American Railroad Journal.

PUBLISHED BY J. H. SCHULTZ & CO. No. 9 SPRUCE ST.

New York, Saturday, January 7, 1860.

Little Miami Railroad.

WM. H. CLEMENT, Esq., former superintendent of this road has returned to it again, and been elected its President. The officers for the year are as follows:

President—WM. H. CLEMENT.
Superintendent—JOHN DURAND.
Secretary—CHARLES H. KILGOUR.
Auditor—D. G. A. DAVENPORT.
Treasurer—S. E. WRIGHT.

Mr. Clement brings to his position the advantage of long experience, sound practical ability and great energy. His connection with the Little Miami Company will add much to the public confidence in the management of its affairs. Nathaniel Wright Esq., who has occupied the position of President for the past year, retires voluntarily, to give place to Mr. Clement.

LaCrosse and Milwaukee Railroad.

The attorney for the bondholders of the Western Division of this road, gives notice that he will not move for a receiver at present, for the reason that the road cannot, during the winter months, be run except at a loss.

Pittsburg, Fort Wayne and Chicago R. R.

WM. B. OGDEN, Esq., has, by consent of all parties, been appointed Receiver of this road. Some plan will soon be proposed, we presume, for the relief of the company.

Railroads of the United States, Jan. 1, 1860.

We give herewith our annual statement of the Railroads of the United States at the commencement of the present year, with a view of their progress since 1831.

The following is the recapitulation of our tables:

States, etc.	Total length of line.	Miles in operation.	Cost of roads and equipment.
Maine	618.1	544.6	$20,431,701
New Hampshire	599.9	565.2	17,785,111
Vermont	568.5	537.9	21,785,752
Massachusetts	1,507.3	1,428.0	65,319,921
Rhode Island	86.9	63.6	2,747,568
Connecticut	820.7	665.6	25,198,199
New England St.	4,201.4	3,804.9	$153,268,251
New York	3,610.6	2,756.4	$137,077,621
New Jersey	658.9	556.4	26,463,455
Pennsylvania	3,995.1	3,081.1	149,509,261
Delaware	117.9	117.9	2,345,825
Maryland, & D.C.	889.3	833.3	41,526,424
Middle Atlant. St.	9,271.8	7,345.1	$356,922,586

Total United States	7,475	18,153	29,401

The following is a statement of the number of miles of railroad in operation in each year since 1831.

Statement of Total Mileage for 30 Years.

1831	54	1841	3,319	1851	8,856
1832	131	1842	3,877	1852	10,878
1833	576	1843	4,174	1853	13,315
1834	762	1844	4,311	1854	15,511
1835	918	1845	4,522	1855	18,153
1836	1,102	1846	4,870	1856	21,440
1837	1,421	1847	5,336	1857	24,290
1838	1,843	1848	5,682	1858	26,210
1839	1,920	1849	6,350	1859	27,857
1840	2,197	1850	7,475	1860	29,401

Decennial Increase.

1840	2,197		
1850	7,475	5,278	240.2 per cent.
1860	29,404	21,922	293.5 " "

The total number of miles in operation on the first day of January, 1859, was 27,857. The number of miles opened during the year, consequently, has been 1,541.

The number of miles in progress in the United States is estimated at 17,580. The extent of mileage of roads in progress can never be stated with much accuracy, but we see no limit to the construction of these works, till they become the common highways for every portion of the country. In the North-eastern, and in some of the Western States, this result seems pretty nearly accomplished; yet, even in those, the system is constantly expanding. Their construction, under a state of affairs similar to the present, must rapidly continue to go on till an aggregate of 50,000 miles is reached. Even the embarrassments of the country which culminated in 1857, seemed to have exerted only a slight influence in checking their progress, which was never more active than at the present time in several of the States.

The total amount of capital invested in all the roads is $1,118,920,929. The increase during the year has been $157,873,565. Our statement a year ago did not embrace roads in progress. The actual increase may be somewhat over-estimated. Not so with the aggregates, however.

DETAILED STATEMENT.

A tabular statement showing the length and cost of each at the end of the financial year closing nearest to 1st Janury, 1860.

1. Maine.

Companies.	Total length.	Length completed.	Cost of road and equipment.
Androscoggin	36.1	36.1	$645,272
Androsc. & Kennebec,	55.0	55.0	2,212,176

Southern Railroad.

We understand that the Southern Railroad Company, as heretofore, has, with the strictest punctuality, made provision to pay the semi-annual interest instalment of $42,000, due at the Bank of America, New York, on the first of January; also to pay $8,000 interest instalment on their income bonds due at the same time. The $42,000 is the sixth annual interest instalment which has been punctually met by this company.

The first instalment of the bonded debt of the company of fifty thousand dollars, given to the Girard Bank on account of the purchase of the Vicksburg and Jackson Railroad, is likewise due on the first of January next, for which, we learn, the company has also provided.

With regard to the completion of the road, its prospects were never brighter. The entire work, including track-laying to Meridian, is put out to the most responsible and reliable contractors, who have obligated themselves to complete their several contracts by the first of October, 1860. The last three thousand tons of iron which the road requires has been purchased for cash in England, and will be delivered in a few months, partly in New Orleans and partly in Mobile, so that track-laying will proceed west from Meridian as well as east from Morton. Under the skilful and efficient management of Wm. M. Wadley, the distinguished Chief Engineer and General Superintendent of the Company, coupled with the foresight, wisdom and energy of its able President, Wm. C. Smedes, Esq., the early completion of this road to its intersection at Meridian with the Mobile and Ohio Railroad, is no longer problematical. It will not only be speedily and substantially built, but will soon take rank in point of respectability, utility and emolument, with the first-class roads of the South.—*Vicksburg Whig.*

Railroads in Texas.

We learn that the New Orleans and Texas road has twenty-five or thirty miles graded, and has already received iron for twenty-seven miles, including a cargo from Cardiff, Wales, recently. We are informed that 4,000 tons in addition, are being shipped. The Central road is daily expecting iron for the first part of the fourth section. The importance of pushing this road more rapidly forward, is deeply felt by the people as well as by the company, and we are assured no stone will be left unturned to secure the object. We observe that a bill is now before the Legislature to charter a new road from Cypress City to the heart of Eastern Texas, to be called the Houston, Trinity and Eastern Texas road.—*Houston Telegraph.*

RAILROAD SHARE LIST, including Mileage, Rolling Stock, etc., etc.

An *asterick* (*) occurring in the column headed "Rolling-Stock," signifies that the cost is included in that of "Railroad and Appurtenances." A *dash* (—) signifies "nil." Running *dots* (.....) signify "not ascertained." Land-Grant Railroads are in *"italics."*

Railroad Reports.

RAILROAD COMPANIES will oblige us by sending us copies of their Reports as soon as they are published.

American Railroad Journal.

Saturday, January 7, 1860.

The Lake Shore Difficulty.

Great complaint has been made by the Erie Railroad Company, among others, at the imposition of an extraordinary tax or toll by the Erie and Northeast Railroad, upon all tonnage passing over it. The Erie *Dispatch* says that this tax was imposed to reimburse the road for moneys spent in maintaining the line during the Erie war, some two or three months since. The Erie road gave notice to its customers and to its Western connections that it would protest the bills of lading of all property consigned to it against this tax, and the road paid the Erie and Northeast road its toll, but under protect. Mr. Dean Richmond of the New York Central is charged at being at the bottom of this matter which is producing a great deal of irritation, and may tend to hasten the construction of another route from Erie, east.

Central Railroad and Banking Company of Georgia.

The report of this company for the fiscal year, ending November 30, 1859, gives the following statement of the operations of their road during that time. The earnings were:

Up freight (westward)		$588,116 55
Down freight (eastward)		677,401 50
Total from freight		$1,265,518 05
Through passengers	$97,704 44	
Way "	179,444 87	
Gordon, Milledgeville and Eatonton Railroad	20,438 17	
		297,587 48
U. S. Mails		32,625 01
Passenger train and express freight.		38,217 30
Total earnings		$1,633,947 84

The ordinary expenses for same time were:

Transp'tation expenses.	$187,651 91	
Maintenance of motive power	156,065 75	
Do. cars	92,199 64	
Damage	8,278 71	
Repairs of road, bridges, buildings, etc.	243,319 07	
Incidental expenses	19,701 55	
	$707,216 63	
Extraordinary expenses, viz:		
New buildings, Macon and Savannah	51,693 04	
Do. bridges and culverts	27,238 23	
Do. tools, machin'y, etc.	8,195 56	
		794,343 46
Leaving actual net earnings		$839,604 38
The increase in gross earnings over the previous year, was		$280,225 84
The increase in expenses		196,236 38
Making the increase in net earnings		$83,989 46

Of the above increase in gross earnings, $166,849 98 was derived from the transportation of westward bound freight. This vast increase is attributed to the establishment and maintenance of a line of steamships between New York and Savannah. Out of 6,930 shares, (the total amount of stock of the New York and Savannah Steam Navigation Co.,) this company holds 4,420. The down freight has increased $32,047 37. During the year, 390,188 bales of cotton have passed over the road—being an increase of 12,995 bales through from Macon and above, and 28,588 bales from way stations and Augusta. The increase in way cotton is attributable to the free use of fertilizers by the planters, 3,864,850 lbs. of which have been transported over the road, at a nominal price, thus benefiting not only the planters of the state, but at the same time enhancing the business of the road.

The company have 54 locomotives; 22 first class, and 6 second class passenger and baggage cars; 4 mail, 3 express, 21 conductors, 14 baggage and package, and 594 freight cars—total 664, all eight wheels.

No. of miles run by passenger trains	294,000
By freight and other trains	496,030
Total miles run	790,030

—the consumption of wood being one cord to 67 miles run.

Earnings per mile run by passenger trains	$1 25
" " " freight "	2 55
Earnings per mile run by engines	$2 09
Current expenses do.	89½
Net earnings do.	$1 19½
Earnings per mile of road, includ'g Gordon and Eatonton branch	$7,166 44
Expenditures, do. do.	3,483 96
Net earnings per mile	$3,682 48

The brick bridge crossing West Boundary street and the Ogeechee Canal, commenced in February last, is rapidly approaching completion. It is of four brick arches of 48 feet each, resting on brick piers, and is believed to be of greater span than any brick bridge in America. A new produce freight house, 600 feet by 36 feet, is nearly completed. The new engine house and shops are nearly finished, and the machinery is soon to be put in operation. A new freight house has been erected at Macon during the past year, at a cost of $15,000. A small dispatch engine for use of road repairs, has been built at a cost of $3,188 81; also a large first class freight engine, costing $11,341 21. Another engine of same size as the latter, has been commenced. In addition to these, the company will require to purchase two engines the coming year. Fifty additional box cars are being constructed in the company's shops. Besides which, the company are in want of two first class and two second class passenger cars, five conductors' and ten fruit cars. There have been built in the company's shops the past year two first class, two second class and baggage, three express, eight conductors, four stock, two fruit, and one negro sleeping car, at a cost of about $27,500.

Within the year there was purchased of the Lackawanna Iron Co., 638¾ tons of American rails, 45 lbs. per yard, costing delivered $35,489 75; there were also re-rolled 1,451 tons, of same weight, at a cost of $46,338 94; 7,000 chairs for re-laying the above rails were also procured at a cost of $4,401 04—making the total cost of rails and chairs $86,229 73. These rails will lay about 29½ miles. There have been received for the use of the main line, 80,093 ties, 883,709 feet of bridge timber, 2,024,031 feet stringers, 6,264 feet switch stringers, and 1,071,972 feet of other lumber—

making a total of 3,985,976. There have also been received for the branch 314,780 feet of timber, ties, stringers, etc. About 8½ miles at the Gordon end of the Eatonton branch, have been relaid with the light bridge rail removed from the main line. It is proposed to continue the relaying to Milledgeville, as fast as the new rails are laid on the main line. The company have on hand 880 tons of old rails, most of which are unfit for use. It is recommended that 2,100 tons of 45 lbs. rail be laid annually, which will keep the road in good order, and enable it to be worked economically.

The cash received from road and bank has been as follows:

From Road	$1,645,554 09
" Bank	81,080 72
	$1,726,634 81

Disbursed as follows:

Paid road expenses	$794,343 46	
" bank "	14,651 92	
" interest on bonds	11,994 50	
Dividends declared	600,000 00	
Depot buildings	120,000 00	
		1,540,989 90
Carried to reserve fund		$185,644 91

—which now amounts to $702,720 15, but subject to the payment of $28,000, annual rent of the line from Gordon to Eatonton. This reserve fund may seem large, but a part of the assets of the company, being of a permanent character, cannot be disposed of. The investment in steamships, $284,791 36, and in negroes, $31,303—making together $316,094 36—deducted, would leave of available reserve only $386,625 79, which the President thinks should be increased, rather than diminished.

A charter has been obtained for a road from Eatonton to Madison, and a preliminary survey of the line made. This new line is about 21 miles in length. The Central Railroad Company have agreed to take it, when built, at a yearly rent of 7 per cent. on its cost, provided the people, without asking State aid, subscribe enough to build it, and place the construction of it in charge of this company. While it will add to the value of the line from Eatonton to Gordon, it will not disturb, but rather coincide with, and aid, the existing railroad system.

An act has been passed authorizing this company to consolidate the stocks of the Milledgeville and Gordon and Eatonton branch roads with the stock of this company, and further, to increase the capital sotck of this company to $5,000,000. The present capital of the company is $4,000,000. Over $1,000,000 taken from the earnings of the road, have been expended on the road and its equipment. In the opinion of the Board, the stockholders should be reimbursed for this outlay; they can realize dividends of 10 per cent. per annum on a capital of $5,000,000. The capital of the roads proposed to be consolidated, will require the issue of new stock to the extent of about 300,000. If $500,000 of stock be now given to the stockholders, there will be left about $200,000 for future emergencies. Looking to the large amount to be expended for increase of rolling stock, and for additional or double track, the Board has deemed it prudent to retain this $200,000 of new stock. The 5,000 shares above referred to, are to rank with the present stock in future dividends.

The following is a statement of the condition of the company's affairs, on the 6th of December, 1859, after the declaration of the semi-annual dividend:

			Dr.
Railroad capital			$3,700,000 00
Bank "		$300,000 00

The officers of the company are:
R. R. Cuyler, *President.*
Geo. W. Adams, *Superintendent.*
J. A. Courvoisie, *Treasurer*

The Gauge Question.

(Continued from p. 862.)

While I have, I think, demonstrated that our long line and great business will, of itself, greatly compensate for transhipment as a means of economy, and I think I have shown that, in fact, no transhipment will occur at all, more than will occur if you change the gauge; for both Major Brown and Mr. Allen do, as all must, I think, take it for granted, as I have tried to prove would be the case, that the branch roads which are intended to transact business for us, will be of like gauge; though I do maintain, that I would tranship even then, or stock the roads, as experience, as I show, has proven to be the best plan. But admit all, and say that we shall have to tranship the freight coming to us from all the lines which can be made, how much will it cost, and where can we look for recompense in our broad gauge?

If 533,000 tons is to be the business of the road, we will say that 300,000 tons comes to us by cars from other roads. This, at 6 cents per ton, is $18,000. I may have remarked that the balance must come in wagons as now; or in steamboats and vessels, and will cost more than if it should come in cars, though not 6 cents per ton. The saving of our wide gauge, from which the above $18,000 may be paid, is found in the doctrine which I think we have proved beyond a peradventure, that our engines will be more powerful, and that our cars will be able to take freight with less dead weight. The exact increase of capacity from these sources cannot be well settled but by experience, though the existence of the fact is so fully proved and generally admitted.

One of the English Engineers not in favor of 7 feet gauge as applied to England, but who understands this question of power, no doubt as well as any of them, says that the power of the engine is increased as the width of the gauge. I think this is true up to engines of 23 or 24 tons; and that beyond this weight, it is greater; but on a 6 feet gauge you are limited, as you are on one of greater or less width, as Mr. Allen says; and it is now rather to be inferred that 30 to 33 tons is the limit on a 6 feet gauge; that is, that beyond that weight, using all the room we have for firebox and boilers, we would get so long a boiler as not to increase our effective power. Within this limit, or some limit, this extra power is obtained, as has been shown, by increasing the heating surface in the firebox, or flues, near the firebox. It is a simple question, and is nothing more than we have stated.

Nothing more need be remarked, except that, (as a high pressure engine stimulates combustion, and increases by forcing out its steam from that part of the cylinder which, to give the greater effect, should be in vacuum;) the *stronger* the blast, the *greater* the loss of power. This loss of power is very considerable, and depends upon the power of the blasts, which in generating a given quantity of steam, is reduced as you increase your heating surface in and near the firebox. Taking then the power of our engines to be increased only, as the width of gauge, or 25 per cent., we can then haul loads 25 per cent. larger than on the narrow gauge. This is proven to be true by the experiments sent me by Mr. Gooch, making allowance for the extra power of their wider gauge than ours. Mr. Nicolls, then Superintendent of the Reading Railroad, writes, as you may see, that an engine of 18½ tons will take only 133 tons over grades with a narrow gauge. Mr. Nicolls ought (if any one) to know the power of narrow gauge engines; yet we have performed more than 25 per cent. over this, as a daily thing, with our wide gauge Rogers' engines. Taking adhesion as a basis, I have no hesitation in assuming the above ratio of increase.

The saving in the capacity of our cars is not so easily estimated in figures. That it is very great, I see no reason to doubt. If we can only get one-half a ton in a car more, as an average, it will be 5 per cent. saved in dead weight—equal to a little more than 30 per cent. increase of net load.

The effect of this upon the cost of transportation may now be considered. The report of the Commissioners of Location, shows that a yearly saving, $128,000, is made by taking the more level routes of Pennsylvania, because you thereby increase your load. This, however, is on a business of only 200,000 tons per annum.

Take the more recent and just estimate of this Board, or 533,000 tons; and the saving would be $334,400. The increase of loads caused by the lower grades, and which produces this large sum, is, for the length of the line involved, in question or say, 84½ miles, 264 per cent. To produce the same saving on a change of grade, covering the whole line, the loads must be increased 50 per cent.

We have shown that the *effective* increase of effective power on our wide gauge is fully equal to 30 per cent.; consequently, the effect of this upon

your revenue will be $200,640; or, after deducting the $18,000 for transhipment, gives a clear saving of $182,640 per year. The whole extra cost of the wide track, in grading and superstructure, will not exceed $325,000, while the saving in the less number of cars and engines will more than balance this amount, so that the above sum of $182,640 is a clear yearly gain of the wide over the narrow gauge system, you avoid an immediate extra outlay of nearly $600,000 in changing your gauge and machinery, and laying extra tracks, $132,000 of which is a perpetual loss. The above yearly saving of $182,640, is equal to the interest, at 6 per cent., of $3,044,000.

That the wide gauge will produce this large saving, I have no doubt. Wide gauges are no longer matters of experiment. Their value has been fully shown here and in England. The greater comfort for passengers, and economy in transportation have been demonstrated and admitted. The Board, therefore, will be justified, inasmuch as they find the road already on a wide gauge, in allowing its construction to be continued with their present plans. But the responsibility of changing rests entirely with them. It will be, as I view the question, a most unfortunate decision for the stockholders and the city, if such change should be made. The great improvements which are yet to be made on a gauge like ours, will be arrested; and you will say what the British Parliament have not yet assumed the responsibility of saying, under all the light and influence of this question as presented in England, that railroads are not to be improved; that the chance adoption of a 4 feet 8½ inches gauge was, after all, the very best possible. I could not, under any circumstances, be party to such a decision.

[To be continued, and followed by letters from Engineers, etc., etc.]

Railroads of Virginia.

We copy the following *resume* of the Railroads of Virginia, and in which the State is interested, taken from the late reports of the Board of Public Works:

The *Alexandria, Loudoun and Hampshire Railroad*, which runs from Alexandria, by way of Leesburg, Berryville and Winchester, to the coal mines, 160 miles in length, has been graded for 41½ miles, and the rails laid for 24 miles.

Operations on the *Fredericksburg and Gordonsville Railroad* have been suspended since the year 1857 for want of means, and no report has been received from the company for the same time.

The *Norfolk and Petersburg Railroad* (80 miles) is now completed, and trains are running regularly, and, although at present yielding but enough to pay its expenses, bids fair, by the practical development of the country through which it passes, to realize the hopes of its friends.

The *Manassas Gap Railroad* is now finished to Mt. Jackson, in Shenandoah county, and considerable work done between that place and Harrisonburg. The independent line to Alexandria and the Loudoun branch of this road are now suspended for want of means to carry them on. It is a matter of grave doubt whether the company acted wisely in carrying on such a large amount of work without the means having been previously provided.

The *Orange and Alexandria Railroad*, from Alexandria to Gordonsville (88 miles,) is completed, and its extension from Charlottesville to Lynchburg (60 miles) is now nearly ready for the cars to pass over its entire length. The board at a late meeting approved of the agreement, the terms of which fixed the rates by which the cars of the Orange and Alexandria Railroad Company should run upon the Virginia Central road between Gordonsville and Charlottesville (21 miles). There being no obstacle to delay the running of the entire distance between Lynchburg and Alexandria (169 miles), the increased receipts from travel and freight lead its friends to believe it will be one of the best investments of the State.

The *Virginia Central Railroad*, including the Blue Ridge Railroad, built exclusively by the State, is 204 miles long, 195 miles of which are completed and in running order. The remaining nine miles are unfinished; and it is understood by the board that application will be made by the company for some assistance from the General Assembly, and they hope it will receive a favorable consideration. This road has paid into the treasury in the fiscal year 4½ per centum dividend on the State subscription, amounting to $84,354 22, and, judging from the report of the company, they deem it a certainty in future.

The *Virginia and Tennessee Railroad* (204 miles long) is completed, and their report exhibits a very large increase of revenue over that of any preceding year. This company has for the two years preceding paid up promptly the interest on the loan of $1,000,000 made by the State. There still remains over $200,000 of interest due the State for arrears of interest on the same loan, which the company will gradually pay up hereafter until the same is liquidated.

The prospects of the company for the future warrant the belief, that besides the payment of the interest regularly, they will have the means to pay the State a dividend of six per cent. on the preferred stock, amounting to $500,000.

The *Richmond and York River Railroad* (38 miles long) is now finished for 24¾ miles to Pamunkey River. The remaining 13¼ miles are nearly graded and ready to receive the rails. Trains have recently commenced running regularly on the finished portion of this work, and having steamboat and other connections by stages with the present terminus on the Pamunkey River, this line presents attractions for travelers to the tide-water section of country. The board have examined this road lately, and found it in good order, and believe that with good ballasting it will be one of the best roads in the State.

The *Richmond and Danville Railroad* (104½ miles long) is completed, and its success is realizing even more than its early friends anticipated. It has paid its interest regularly to the State, and has paid off during the past year a large debt becoming due, of over $200,000, and will pay a dividend this year of 4 per cent to its stockholders.

The *Richmond and Fredericksburg Railroad* is 75 miles long. It will be seen by their report that the receipts for the last year, ending 30th September, 1859, were $279,945 58, and the expenses were $134,559 89, leaving net income $145,385 39. This road has now a heavy rail laid upon it from Richmond to a point beyond the bridge at Fredericksburg (about 62 miles). The company, instead of paying cash dividends, have, on account of some of their funded debt becoming due, declared dividends in bonds, interest to be paid semi-annually. The State now holds $130,720 of these bonds, bearing 6 per cent. interest.

The road of the *South Side Railroad Company* is, with the addition of the old City Point Railroad, which now belongs to them, 132 miles long. They report their earnings for the past year to be $201,344 36. The interest on the loan of $800,000 made by the State, has been paid regularly since 1st July, 1858. There still remains unpaid over $180,000 due on account of arrears, for which they have at present made no arrangements.

The *Richmond and Petersburg Railroad* (22 miles long) is in excellent order, and its revenues continue to be sufficient to maintain the company in paying their regular annual dividend of 5 per cent. to the State on its investment of $385,600.

The *Roanoke Valley Railroad* is 22 miles long. The board having received no report from the company, can only have reference to their report to the stockholders. It is gratifying to observe that this company, which has been for some time in a declining condition, now report, in the language of its President, "money in the treasury, credit re-established, almost unprecedented appreciation of their bonds, a gratifying augmentation of business, and a reduction of active indebtedness of more than 50 per cent." This company have undertaken to extend their road to Keysville, on the Richmond and Danville road, a distance of 30¼ miles, which has been let to contract under favorable terms, and is now in progress. The State has an interest in this road of $310,000, of which $130,000 is preferred stock.

The board will only refer to the reports from the *James River and Kanawha Company* to the General Assembly, as giving a more full and concise account of their condition than this report can give. Under the act passed 15th February, 1858, providing more effectual means for the improvement of the navigation of the Kanawha river, directors were appointed on behalf of the State in the Kanawha board of the James River and Kanawha Company. The condition of this company emphatically calls for legislative action.

The *Dismal Swamp Canal Company* having undertaken a large amount of work at the south end of their improvement, have applied all their surplus means to the accomplishing of that object, and suspended the payment of dividends to its stockholders.

Journal of Railroad Law.

LIABILITY OF A COUNTY, ON BONDS GIVEN FOR, SUBSCRIPTION TO A RAILROAD.

An important decision has lately been rendered by the Supreme Court of the State of Illinois, in the case of Oloff Johnson *vs.* the county of Stark. The case involved the question of the liability of the county upon certain bonds made in the name of Stark county, to the Western Air Line Railroad upon a subscription to that road. The claim was assigned by the company to the plaintiff who applied for a mandamus to compel the supervisors to complete their subscription and issue the bonds. The case was decided in favor of the defendants, on the ground that the act of the Legislature in respect to the issuing of the bonds did not authorize the county to provide for the payment of the coupons in New York City, as they had been drawn; that the officers executing the bonds and coupons had therefore no authority to execute them, and the county was not liable.

The decision is said to affect nearly all the bonds issued by cities and counties in Illinois.

The following is the opinion of the court, in which the facts are more fully stated.

WALKER, J.—At an election held in Tazewell county on the 24th day of September, 1853, for and against the county subscribing for twenty-five thousand dollars to the capital stock of relators' road, the majority required by law was favorable to such subscription. A part of the question submitted was to issue bonds of the county in payment of the subscription, to draw seven per cent. interest per annum, payable semi-annually at the American Exchange Bank in New York. At the September meeting, 1853, of the Board of Supervisors of Tazewell county, application was made to them to subscribe for the stock, which they refused to do, and the shares of stock were tendered by the relators, which they refused, and the Board also refused to issue the bonds of the county; and to compel a subscription and to issue county bonds in payment of the same, this application is made.

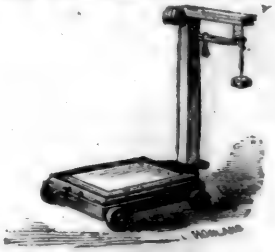
The return to the petition insists upon numerous

reasons why the subscription should not be made. It is objected that the county have no right to issue bonds or other obligations payable at any other place than at the county treasury. This court held in the case of Prettyman *against* the Board of Supervisors of Tazewell county, (19 Ill. 406,) that it was only by virtue of the act of February, 1857, authorizing the county courts of each county which had subscribed to the Tonica and Petersburg road, to make the interest of their bonds payable at any place they might choose. That act only applied to subscriptions to that particular road, and can have no application to any other. And it was then held that the county court had no power to issue bonds payable in the city of New York, for want of express authority by legislative enactment. States, counties and corporations created for public convenience only are not required to seek their creditors to discharge their indebtedness, but when payment is desired the demand should be made at their treasury. That is the only place at which payment can be legally insisted on. And it is the only place where the treasurer can legally have the public funds with which he is entrusted. To authorize the creditor to draw his warrants on the treasurer, payable in a sister State or in a foreign country, necessarily imposes an obligation on the treasurer to provide funds at that place to meet it; and his duties requiring him at the treasury would require the employment of agents, the transmission of the funds, at risk of loss, and at a considerable expense in charges and discounts and insurance that is not incident to its payment at the treasury. And the same reasons apply with equal force to cities, counties and public corporations of a similar character. The legislature has conferred no such general power on such bodies, and in its absence they have no power to make their indebtedness payable at any other place than at their treasury.

The next question we propose to consider is whether under the legislative enactments authorizing counties and cities to subscribe for such stock are compulsory when the citizens have, by vote, determined in favor of it. That many acts authorized to be performed by such bodies is discretionary, and others are peremptory, will be readily conceded; that the mere grant of authority to such bodies cannot be construed into a requirement of its performance, without discretion, is obvious. A large portion of their powers are unquestionably of a discretionary character. But, when the law has imposed a duty and required its performance, there can be no discretion exercised, unless it be as to the time or mode of its performance when neither are pointed out by the act enjoining the duty.

To attempt the exercise of all the powers conferred on these bodies by the legislature would seriously involve if it did not bankrupt every city, county, and corporate town in the State. Yet when the duty to act is enjoined, whether in express terms or by implication, there can be no choice but to perform the duty required. Counties and cities are incorporations created for public convenience and to transact the public business of the communities embraced in their limits. They are dependent upon the legislature for their very creation, and from it they derive all their authority to act. And it is, therefore, necessary to examine the various legislative enactments to determine whether the power conferred upon counties to subscribe for stock in railroad companies is imperative or only discretionary.

[His Honor here proceeded to quote the provisions of the act of November 1849, and the amendment thereof in 1854, in regard to subscriptions to railroad stocks. He proceeded:]



The language [of the act] clearly requires that they shall subscribe the amount voted upon, or any part of it, and a subscription of any amount that they may deem for the best interests of the county or city will fully answer this requirement. A subscription of one share would be a part of the same, authorized to be subscribed, and it is within the discretion of the county judge or the city council whether they will subscribe beyond that amount. If the legislature had intended to make it compulsory upon them to subscribe the whole amount they would have adopted different language from that employed. There is an evident propriety in giving the financial agents of a county or city a large discretion in the management of its pecuniary affairs. In the change of circumstances to which railroad enterprises are constantly subjected, to the varying condition of the finances of the county, the success of rival enterprises and the want of means to secure success in the construction of railroads, must have dictated the policy adopted by the legislature in leaving it a matter of discretion in the county judges or City Council to subscribe all or any part of the amount authorized. If, immediately after a vote was taken and resulted in authorizing a subscription, and before the power to subscribe had been exercised, it were to become manifest that the road, or any part of it, never could be completed, and the officers, to promote private interest, or from a misguided zeal, or even confidence in what might afterwards be accomplished, were determined to push the enterprise and waste the means of the corporation, the city or county surely ought still to have the means of avoiding the loss by a power to refuse to make the contemplated subscription. Or suppose the company, after the vote is had, resulting in favor of subscription, should abandon that portion of the road in which the voters had an interest, and insist upon the issue of the bonds to be applied upon a remote portion of the road, by the completion of which they could receive no benefit, can it be contended that there should be no discretion in the financial agents of such municipal corporations to subscribe or not as the interest of those bodies might require?

(To be continued.)

Railroad Bond Suit in Iowa.

At a session of the District Court at Washington, some two weeks since, application was made by the proper authorities of Mahaska County, to Judge Stone, for a writ of injunction; enjoining and restraining the M. & M. R. R. Co. from disposing of the bonds of that county now in their hands, and amounting to the sum of $200,000. The writ was allowed, and a notice served on the company to that effect. The principal allegation in the petition was a failure, on the part of the company, to comply with their contract by prosecuting the work in that county; a motion to dissolve the injunction will be tried at the next term of said court. This question will be looked to with considerable interest, as there are a number of counties in the State similarly situated.—*Mt. Pleasant Republican, Nov. 30th.*

THE LAWRENCEVILLE MANUF'G CEMENT COMPANY,
OFFICE 96 WALL ST,
NEW YORK.

THIS Company manufacture **ROSENDALE HYDRAULIC CEMENT** of a superior and uniform quality, and are constantly receiving it **fresh** from their Works at Rosendale. Particular attention paid to grinding **fine**, and packing in superior casks. We warrant it to set under water, and attain a hardness excelled by no Cement manufactured. It has met the approval of Government, and we are at present supplying the fortification now in course of erection, together with Water Works and Public Buildings.
For sale upon favorable terms by addressing.

WM. N. BEACH, President.
CHAS. E. LAWRENCE, Sec'y.

CEMENT, PLASTER, ETC.
THE HUDSON RIVER CEMENT CO.

HAVE commenced manufacturing for the season, and can now furnish a very superior article of fresh **Rosendale Cement, Calcined Plaster, Farmers' Plaster** and **Marble Dust.** Address

HUDSON RIVER CEMENT COMPANY,
13 **Jersey City, N. J.**

HOFFMAN'S ROSENDALE CEMENT,
OFFICE, 92 WALL ST., NEW YORK.

THE LAWRENCE CEMENT COMPANY are prepared to receive and execute orders for their Cement, to any extent that may be required. They would particularly call the attention of purchasers to the distinguishing brand of their manufacture, viz.: **HOFFMAN'S ROSENDALE CEMENT.** This seems to be necessary, as they have established a reputation for the superior quality of their Cement, and there are various other brands offered, as "Rosendale" Cement. It has the unqualified approbation of the most eminent Architects and Engineers, being used in almost every department of the Works under Government. It is put up in the most careful manner, each barrel being well lined with paper, and will be delivered on ship-board, in this city, on the most favorable terms. Particular attention given to shipping orders, and Freight obtained on the best terms.

M. W. WOODWARD, Secretary.

Rosendale Hydraulic Cement.

THE NEWARK AND ROSENDALE CEMENT COMPANY are now receiving **fresh from the Mills** their approved ROSENDALE CEMENT, warranted **pure** and **free from quick lime,** and which has given such **general satisfaction** in the various government and other public works in which it has been used. Purchasers and shippers should be careful to get the **genuine ROSENDALE CEMENT,** branded "NEWARK AND ROSENDALE," "H. WILDE." This Cement does not swell and burst the hoops when stored in warm climates. It is packed in tight **kiln dried barrels,** and is specially adapted for safe shipping on long voyages. Terms reasonable, which may be known by addressing,

JOHN H. STEPHENS, President, Newark, N. J., or
HENRY WILDE, Secretary, 90 Wall st., N. Y.

DELAFIELD & BAXTER'S,
Late OGDEN & DELAFIELD,
ROSENDALE CEMENT.

WE are prepared to enter into arrangements for supplying our CEMENT for public works, or other purposes. We **warrant it equal in every respect** to any manufactured in this country. It attains a great degree of hardness, sets immediately under water, and is a **superior article** for masonry coming in contact with water, or requiring great strength.
For sale in tight barrels, well papered, on application at their office, by **DELAFIELD & BAXTER, 104** Wall st.
The above CEMENT is used in most of the fortifications building by government. 45

HENRY BURDEN'S
PATENT REVOLVING
SHINGLING MACHINE.

THE subscriber having recently purchased the Right of this Machine for the United States, now offers to make transfers of the Right to run said Machine, or sell to those who may be desirous to purchase the Right for one or more of the States.
This Machine is now in successful operation in ten or twelve Iron Works in and about the vicinity of Pittsburg, also at Phœnixville, and Reading, Pa., Covington Iron Works, Md., Troy Rolling Mills, and Troy Iron and Nail Factory, Troy, N. Y., where it has given universal satisfaction.
Its advantages over the ordinary Forge Hammer are numerous:
Considerable saving in first cost; saving in power; the entire saving in shingler's, or hammerman's wages, as no attendance whatever is necessary.
It being entirely self-acting: saving in time from the quantity of work done, as one machine is capable of working the iron from sixty puddling furnaces; saving of waste, as nothing but the scoria is thrown off, and that most effectually; saving of staffs, as none are used or required.
The time required to furnish a bloom being only about six seconds, the scoria has no time to set, consequently is got rid of much easier than when allowed to congeal, as under the hammer.
The iron being discharged from the machine so hot, rolls better and is much easier on the rollers and machinery.
The bars roll sounder, and are much better finished.
The subscriber feels confident that persons who will examine for themselves the machinery in operation, will find it possesses more advantages than have been enumerated.
For further particulars address the subscriber at TROY, N. Y.
P. A. BURDEN.

VULCANIZED RUBBER GOODS,
MACHINE BELTING,
STEAM & PISTON PACKING,
HOSE OF ALL DESCRIPTIONS,
SHOE SOLEING,
LACE LEATHER,
VALVES,
FIRE BUCKETS, ETC.
THE undersigned, **Wholesale Agents** of the **BOSTON BELTING COMPANY,** beg to call the attention of DEALERS and JOBBERS to the above mentioned goods, which are conceded by all practical mechanics to be
THE BEST PRODUCED.
For list of prices, and a full description of goods, terms, etc. apply to
BRAMHILL & CAMPBELL,
190 William st., near Spruce, NEW YORK.

NEW WORK.

The Gauge Question.

[LETTERS FROM VARIOUS ENGINEERS UPON THE SUBJECT OF THE GAUGE.]

GREAT WESTERN RAILWAY, ENGLAND,
PADDINGTON, June 11th, 1847.

SIR:—I duly received your letter of the 31st March, and would have replied earlier, but waited to send you the result of some experiments I intended to make with the best and largest class of narrow gauge engines, now in use in England, and our new class of engines for the broad gauge.

You are aware when the experiments were made by the commissioners, we had to use an engine five years old, against engines constructed for the purpose of the trial.

I now enclose you the working of two of the engines on the Southeastern Railway, against two of our new class—and leave you to form your own opinion of which will be the most useful engine, either for high speeds or heavy traffic. The result as to cost of working these larger engines, fully bears out all I stated they would do in my evidence before the commissioners.

With equal loads they are lighter in fuel, and will take double the load with very little additional fuel, all other charges being independent of the load; and this is really the whole question of the economy of the broad gauge. We never use two engines, not even with our goods trains, now that we have applied something like the full power of our gauge on the engines; and trains weighing 600 tons are as regular as to the time as a passenger train. Before we constructed these larger engines, we were compelled to put two engines upon the trains at double the cost, and without obtaining the same regularity, as it is difficult to manage two engines in shifting the trains at the stations along the line, as easily as one, and there is a consequent loss of time. Every step we have taken in increase of power, has been an improvement *in every way—economy, speed and load*, and the all important point of *regularity*. So sensible are the narrow gauge party of this, that their whole attention is devoted to the enlargement of their engines; and Mr. Stephenson has carried this to a point of danger, by increasing the length of his boiler to a very dangerous extent. There is no doubt, however, he is under a mistake in hoping to get power by this means, as experiments I have made show, that after the first few feet of tubes from the fire-box, very little steam is generated by the remainder; and it is quite useless to cool the air in the smoke-box down to a temperature below the steam in the boiler. Our new class of engines have 305 tubes, two inches in diameter, but only 11 feet long; and I find the air in my smoke-box, at the highest velocity, is not more than 600 temperature, which I consider lower than it should be. But on some the machinery being under the boiler, I was obliged to keep this length of tube to give me as long a connecting rod as possible, or I would not have made them as long. Increasing the number and cutting them short, is the proper principle to adopt. You then get a large sectional area for the air to get through, and a lighter power of blast pipe will draw it, which of course is power saved in the cylinder.

The break of gauge is a thing no doubt to be avoided if possible. Uniformity has its measure of value; but I consider the value of the higher speed and greater power of the broad gauge far more than compensate for the inconveniences of the break. For instance—take a line 100 miles long. On the broad gauge, ½ to ¾ of an hour can be saved with passenger trains, while the time lost, to change carriages, need not be more than 8 or 10 minutes. The system of sending carriages long distances is acted upon in this country, but *we* have no continuous line of 300 miles long; and I think there is a limit to which this can, and will be done. It has been very much reduced for branch lines—in fact, where there is much traffic, it is impossible to run your carriages partly filled: the train becomes too heavy. I think with goods it is done to a much greater extent; but the value of a change is about 4d. per ton only, and is therefore not a serious matter. The London and Birmingham now find it quite difficult enough to run their full trains, and have reduced the capacity for the empty ones very much. It is now chiefly confined to the coal trade. I do not think any engineer in England thinks four feet eight and a-half inches is wide enough for the traffic of the country. It is not a fight of *opinion* just now, so much as a fight upon *interest*. The narrow gauge parties have narrow gauge lines, and find themselves unable to compete with the broad gauge, and feel it would be a very costly thing to alter the narrow. They naturally enough wish therefore to get rid of the broad. In spite of all, however, the broad gauge does *go ahead*, as you would say in America, and will continue to extend itself in al directions. The more I have examined the question, both commercially and as a money matter for the company, the more am I convinced of the vast importance of the broad gauge. I shall be happy at any time to give you any information in my power, and am very respectfully,

Yours,

DAVID GOOCH.

READING, PA., March 27, 1857.

SIR:—I am in due receipt of your favor of the 24th inst., on the subject of loads and plan of engines for your railroad. In compliance with your request, I offer the following opinions in answer to your inquiries:

The plan of locomotive engines I should recommend for your road, with maximum grades of 60 feet per mile limiting its load, (provided your rail is not less than 55 lbs. per yard, and your curves of not less radius than 700 feet, and of such

radius at a few points,) is as follows: Your weight, with water and fuel, 18½ tons of 2,240 lbs. Six wheels, all drivers and coupled, 48 inches diameter, with weight equalized on each wheel. Cylinder, 14½ by 20 inches. Boiler, firebox and tubes as large as these wheels, cylinders and weight will admit. The six wheels should be all pedestaled in the same solid wrought iron frame, with the latest improvements in wedge packing, &c., &c. Such an engine will haul for you on a level road, with good fuel, 650 tons of 2,240 lbs. behind its tender, as an every day performance, (cars and freight included,) at a speed of 12 to 15 miles per hour. Its load upon a 60 feet grade will be, under the same circumstances, about 133 tons, including cars and freight.

The proportion of paying freight, or net load of cars, will be found by two-thirds of the gross weight, as above stated, if the cars are open; and six-tenths of the cars covered and roofed; the latter description, generally carrying the more valuable light and bulky goods.

These p'p'tions give, on the level, 433 and 490 tons.
And on the 60 feet grade, 89 " 80 "

I am well aware that engine builders and engineers reports, give theoretical statements of the power of locomotives much higher than I have stated; and it is true that an engine, as above described, can haul a train about 50 per cent. heavier as an extraordinary performance. Such duty' however, requires a combination of favorable cir' cumstances rarely to be expected upon roads having a heavy tonnage, and cannot be depended upon as the average daily performance of engines. For a speed of 10 miles per hour, I would reduce the diameter of the driving wheels two inches, making them 46 inches diameter—the other proportions of the engines remrining nearly the same. As the above plan and performance of engine was intended for a 4 feet 8½ inches gauge, we pass to the last query of your letter respecting the advantages or disadvantages of a 6 feet gauge.

After a full consideration of this important question, and of the arguments adduced by the advocates of each gauge before the committee of the British Parliament, I am of opinion that the use of the six feet gauge will prove rather disadvantageous than otherwise, in making your road, and for the following reasons:

1st. The efficiency of your locomotive engines will be decreased. In stating 18½ tons as the weight of a 6-wheeled coupled engine, I have taken the greatest weight which a 55 lb. rail should safely bear, about three tons on each wheel, the whole of which adhesion is made available in hauling the train. By spreading the track 15½ inches, and preserving the same weight of engine, its boiler, and consequently its fire surface, must be *decreased* to make up for the *increased* weight of heavier axles, braces, cylinder wings, frame, &c. The power of the engine is thus diminished, and must be followed by a decreased train, and therefore by increased expense per ton. It is true, other forms of engines may be adopted, but there may have their objections. An 8-wheeled engine, with all the wheels drivers, would prove very heavy for the rail and bridges; and one with four drivers would require too much weight on each wheel to give 16 or 17 tons adhesion, besides both the latter engines wasting their power carrying dead weight up grades.

2d. The cars of a six feet gauge are heavier, in proportion to the paying weight of freight or passengers, than a 4 feet 8½ inches gauge. This objection will be found important on the N. Y. & E. R. R., decreasing the paying tonnage up grades.

3d. All the running machinery will work with more friction round curves, than on the narrow gauge.

4th. Axles of engines and cars will be more liable to break on the broad gauge, being longer and more easily twisted, and more subject to flaws from the thicker iron.

5th. The fact of the gauge of the N. Y. & E. R. R. being different from other roads, isolates it from them, and will be found productive of great inconvenience in the future commercial intercourse of the country by other roads, either in operation or projection.

"The break of gauge" has been found to involve such delay, expenses, and annoyances to passengers and transporters of goods by the Great Western Railroad of England, that the question of conforming to the national gauge of 4 feet 8½ inches, has already been seriously entertained by the Directors, with a consequent expense of an alteration of the entire machinery of their road.

A railroad in Germany has already tested, and abandoned the broad, for the narrow gauge.

I consider it well worthy of the earnest deliberation of the proprietors of the New York and Erie Railroad, whether that great work shall be continued with its present gauge, or made to conform to the standard used throughout the United States. I have in the above remarks candidly expressed my opinions on the subject of your queries. I would further state that the specifications of locomotive engines given to manufacturers of these important machines, require much care and judgment in drawing up. The results of our experience on this head, I shall be happy to give, if so requested. Very respectfully,

Your ob't servt.,
G. A. Nichols.
Engineer and Gen. Supt. Phila. & Reading R. R.
(To be continued.)

Nashville and Northwestern Railroad.

This road is making rapid strides towards completion. The President, V. K. Stevenson, Esq., has lately contracted with an iron agency at New York for the rails for the whole road, to be delivered at New Orleans as required. Enough iron has been received at Hickman within the past ten days to make the road to Union City, 14 miles.

During January and February, there will be iron received here for twelve miles of this end of the road—which will be laid down by July. The company have now 34 miles of finished grading on the western end of their road, and have received the State aid bonds for 30 miles, equal to $300,000. The iron company who contract to make the rails, agree to take one-fourth of their pay in the Railroad Co.'s mortgage bonds at par.—*Nashville Patriot.*

The Lynchburg Extension of the Orange and Alexandria Railroad.

With the exception of the bridge across James river, the Lynchburg extension of the Orange and Alexandria Railroad is completed. The bed of the road, and the rails laid to Lynchburg, with the above exception. On or about the 15th of the present month, it is thought, the road will be opened for travel and trade.—*Richmond Enquirer, January 5.*

Railroad and Steamboat Accidents for 1859.

The number of railroad accidents in the United States in 1859, by which life was lost, was 79; killed 129, wounded 411. This does not include accidents caused by the carelessness of travelers themselves. During the last seven years the number of lives lost by railroad accidents has been as follows:

Year.	Accidents.	Killed.	Injured.
1853	138	234	496
1854	193	186	589
1855	142	116	539
1856	143	195	629
1857	126	180	530
1858	82	119	417
1859	79	129	411
Total	903	1,109	3,611

The number of steamboat accidents during the year 1859 is 21; persons killed 242, wounded 146. This is a decrease for the past year. For the past seven years the number of lives lost and persons injured by steamboat accidents, not including those which occurred at sea, was as follows:

Year.	Accidents.	Killed.	Woun'd.
1853	31	319	158
1854	48	587	225
1855	27	176	107
1856	29	358	127
1857	30	322	86
1858	27	300	107
1859	21	242	146
Total	213	2,304	958

Sunbury and Erie Railroad.

EXTRACT FROM THE GOVERNOR'S MESSAGE.

In my last annual message, I communicated to the General Assembly all that, up to that period, had been done under the act, entitled "An act for the sale of the State Canals," approved April 21, 1858. Since the adjournment of the last Legislature, satisfactory evidence having been given to me, of the compliance of the Sunbury and Erie Railroad Company, with the conditions mentioned in the third section of the act referred to, the State Treasurer, under my direction, has delivered to the Company the canal bonds for two millions of dollars, deposited in the treasury under the provisions of the said act.

The Railroad Company has also become entitled to, and has received, one million of dollars, of the mortgage bonds referred to in the sixth section of the same act; leaving mortgage bonds amounting to two and a-half millions of dollars, still remaining in the treasury of the Commonwealth to be delivered to the company, "from time to time, *pari passu*, with the progress of the work, as ascertained by the returns and estimates of the Chief Engineer of the said company." When the bonds last mentioned, shall have been surrendered to the company, as directed by law, the State will still hold, as absolute owner, three and a-half millions of dollars of the mortgage bonds of the company, payable in the year 1872, and in the six succeeding years, as mentioned in the act of Assembly, with interest, at the rate of five per centum, per annum, payable semi-annually, on the thirty-first days of January and July of each year. Interested, as the Commonwealth is, in the early completion of this important thoroughfare, it affords me great pleasure to be able to inform the General Assembly, that the progress of the work, for the past year, has been highly satisfactory.

The eastern division of the road, extending from Sunbury, in the county of Northumberland, to Whetham, in the county of Clinton, a distance of eighty-one miles, is finished; passenger and freight trains passing over it daily. The Western division, extending from the city of Erie, to the borough of Warren, in Warren county, a distance of thirty-six miles, is also completed, with regular passenger and freight trains now running over it daily, making one hundred and forty-seven miles of railway, along the line of the route, that have been already brought into practical operation—one hundred and seven miles of which, exclusive of sidings

were finished during the year. On the intermediate portion of the line, between the borough of Warren and Whetham station, a distance of one hundred and forty miles, ninety-five and a-half miles are graded, leaving but forty-four and a-half miles yet to be graded, to place the whole of the unfinished portion of the road in a position to receive the superstructure. If no untoward event shall delay its vigorous prosecution, another year will not pass before the entire line of the road will be finished and in use; thus affording a direct and continuous communication, by railroad, from the city of Philadelphia to the harbor of Erie.

Terre Haute and Richmond Railroad.

We have the 11th annual report of the President and Directors of this Company for the fiscal year ending November 30, 1859. The business operations and financial condition of the company are fully set forth in the statement of the Secretary. The earnings of the road were:

From transportation of passengers	$173,008 42
" " " freights	154,178 43
" " " coal	10,314 50
" " " U. S. mail	9,125 00
" " " express	9,510 47
mileage of cars, etc.	1,161 04
	$357,297 85

And the expenses were:

Repairs of road	$23,496 22	
" machinery, engines & cars.	39,666 90	
" buildings	1 556 20	
" water stations.	2,557 35	
" fences	3,337 63	
Renewal of cross-ties.	9,758 91	
" railroad iron	5,529 36	
Depot expenses	16,177 79	
Train "	29,006 16	
Fuel	16,982 33	
Oil, waste and tallow.	2,385 82	
Salaries of officers	5,300 00	
Miscellaneous	9,813 89	
Total operating expenses.	$165,568 56	
Additional expenditures.	9,574 43	
		175,142 99
Net earnings		$182,154 86

From which deduct—

Taxes	$7,645 67	
Interest and exchange	14,426 57	
Dividends	137,895 00	
		159,967 24
Surplus earnings		$22,187 62

Of which there has been expended, and not charged to current expenses of the year, for

Telegraph	$1,217 81
Real estate at Terre Haute	10,000 00
Half interest in depot at junction of New Albany	985 00
	$12,202 81
Compared with the previous year the gross earnings show a decrease of	$22,976 75
But the expenses have been reduced	28,257 18
Making the increase in net earnings	$5,280 43

During the year five thousand of the company's bonds have been surrendered, and stock issued for the same, increasing the capital stock of the company to $1,381,450
And reducing the amount of bonds to 230,000

Aggregate of stocks and bonds	$1,611,450

The receipts from all sources during the year (including balance of $79,194 07, in Treasurer's hands at the commencement of the year), were $453,605 24; and the expenditures, $358,589 61—leaving a balance of $100,015 63; consisting of bills receivable, $13,326 56; due for U. S. mail, $7,850 17; cash, $78,838 90.

The equipment is as follows: 18 locomotives; 17 first-class passenger cars, 8 baggage and express cars; 98 house cars; 30 covered stock cars; 45 lumber and platform cars; 62 coal cars; and 54 gravel and other cars.

The total number of miles run by all the trains was 234,178. The average cost of repairs of locomotives per 100 miles run was $7 71; fuel, (8,150 cords at $2 14,) $7 49; wages, $6 24; Oil, waste, etc., $0 65. Miles run to pint of oil, 28.

The business of the road in tonnage equals that of $1858. There has been a large increase in the tonnage of 1st, 2nd and 3d class freights; and also in the tonnage of wheat, flour and corn. The decrease of revenue mostly arrises from the low rates that have ruled during the year for through freights, and to the delayed movement of live hogs, which seriously affected the revenue for November. In Nov., 1858, 726 car loads were transported, against 91 in Nov., 1859. The aggregate number of car loads of hogs transported in 1858, was 2,167, against 525 the past year. There has been an increase of $11,623 65 on Western freights, and a falling off on eastern of $22,059 77. A telegraph has been erected along the line of the road, at a cost to this company of $1,217 80.

In regard to further improvements made, the report says:

The relaying the road with new ties has been completed; one hundred tons of new rails have been laid, and a new coat of ballasting put on the road-bed. The stone masonry of all bridge abutments, wing-walls, culverts, and drains, have also been completed. We have also built two additional water stations, making the supply of water on the line of the road ample. A new side track has been laid at Staunton, for the accommodation of the coal business; also one at Greencastle, for the convenience of loading stock. The fencing has been thoroughly repaired, and is now more perfect than at any previous time. The machinery and rolling stock have been kept up, and is in perfect order. The trains have been run with regularity, and without accidents.

GENERAL STATEMENT.

	Dr.	
Capital stock		$1,381,450 00
Bonds 7 per cent		230,000 00
Dividends unpaid		623 26

CHAS. WOOD, *Secretary.*
JOHN SCOTT, *Treasurer.*

Coal Burning on the Philadelphia, Wilmington and Baltimore Railroad.

We copy from the late Report of the Philadelphia, Wilmington and Baltimore Railroad the following extracts, showing the results of the experiments in burning coal on this road the past year.

The plan of burning coal in our locomotives has been pursued with very satisfactory results.

The Dimpfel engine, Daniel Webster, has run 29,563 miles:

Cost of coal consumed	$1,661 98
Cost of wood for kindling	147 19
Total cost of fuel consumed	$1,809 17

Cost per mile run, 6.11 cents.
Number of pounds of coal per mile, 32.41.
Cost of repairs per mile run, 3.7 cents.
Trains run on the Great Express down and Night Line up. Average speed down, 28½ miles per hour. Speed up, 23 miles per hour. Average cars down, 9½. Average up, 10½.

The Dimpfel Engine Henry Clay has run passenger and freight trains 24,325 miles—

Cost of coal consumed	$1,734 94
Cost of wood, for kindling	190 88
Total cost of fuel	$1,925 82

Cost per mile run, 7.91 cents.
Number pounds coal per mile run, 41.3 cents.
Cost per mile run for repairs, 4.7 cents.
The train run has been generally a heavy one.
These two engines were built by Fairbanks, at Taunton.

The Dimpfel Engine Christiana has run 10,222 miles—

Cost of coal consumed	$701 30
Cost of wood, for kindling	99 37
Total cost of fuel	$800 67

Cost of fuel per mile run, 7.83 cents.
Cost of repairs per mile run, 8.4 cents.
Number of pounds of coal per mile run, 40.20.
This was an old wood burner, altered by the New Castle Company.

The Dimpfel Engine George Washington came on to the road July 4th, 1859, and has run 11,028 miles on the Great Express train down, and Night Line up, and on the Mail and Express trains.

Cost of coal consumed	$539 28
" wood, for kindling	59 19
Total cost of fuel	$596 47

Cost of fuel per mile run, 5.41 cents.
Cost of repairs per mile run, 1.4 cents.
Number of pounds of coal per mile run, 30.42.
This engine was built by Baldwin & Co., of Philadelphia.

The Dimpfel Engine John E. Thayer, also built by Baldwin & Co., came on the road October 19th, 1859, and has as yet run but a few trips over the road. It has proved, however, thus far entirely successful.

The engine Sampson came on the road as a coal burner, August 1, 1859, and has run 5,261 miles on freight trains exclusively.

Cost of coal consumed	$321 90
" wood, for kindling	48 75
Total cost of fuel	$370 65

Cost of fuel per mile run, 7.41 cents.
Cost of repairs per mile run, 3.41 cents.
No. of pounds of coal per mile run, 38.08.
The above engine was originally a wood burning New Castle engine, in which a new coal burning boiler was placed.

The engine Morris, a New Castle engine, referred to in the last report as a coal-burner, altered from a wood-burner, on Mr. Bullock's plan, has run 27,144 miles.

Cost of fuel consumed	$1,684 27
Wood for kindling	215 16
	$1,899 46

Cost per mile run 6.99 cents.
Cost of repairs per mile run 4.5 cents.
Number of pounds of coal per mile run 36.13.

The train run by this engine has been the mail train down and up, and a part of the time the express train up and the night line down. The average cost of wood for the above trains would have been about double that of coal.

St. Louis, Iowa and St. Paul Railroad.

At a meeting of the Directors of this company, held at Oskaloosa on the 21st ult., the following resolution was adopted:

Resolved, That the St. Louis, Iowa and St. Paul Railroad be, and is hereby located, commencing at or near the southwest corner of Davis County, thence by the divide to or near Moravia, Appanoose County; thence by west route to Albia, Monroe County; and thence to Oskaloosa, upon or near the present surveyed route as near as practicable.

A committee, consisting of President Grennell, Chief Engineer S. D Lampman, and Secretary, A. F. Seeberger, was appointed to represent the interests of the company in Iowa and Missouri until the next meeting of the Board.

Atlantic, Tennessee and Ohio Railroad.

A meeting of the directors of this company was held at Charlotte, N. C., on the 19th ult. The report of the engineer, Mr. Gardner, was submitted, from which it appears that eight miles of the line, commencing at the depots of the Charlotte and South Carolina, and North Carolina Railroads, had been surveyed, and that the cost of graduation will amount to less than $1,500 per mile. It was therefore

Resolved, That the Mecklenburg subscriptions to the Atlantic, Tennessee and Ohio Railroad will justify the letting of 16 miles of said road, and that the engineer proceed to locate and let the same as speedily as possible.

Resolved, That as soon as the subscriptions at Davidson College shall amount to $15,000, and that at Mount Mourne to the sum of $20,000, the engineer will proceed to locate and let the contracts for the road to Mount Mourne.

Western (N. C.) Railroad.

We learn from the Fayetteville *Observer*, that contracts have been let for the graduation, masonry and bridging on the last division of this road —to the Coal Fields. The track-laying has been completed 23 miles. The work is now in such a state of forwardness as to justify the confident expectation of the completion of the road by July.

Kanawha Coal Oil.

We learn from the Kanawha *Republican* that M. de Bellot des Minieres, and other French gentlemen, who have been residing for some time past in Charleston, Kanawha county, Va., with a view of ascertaining the mineral and agricultural resources of Western Virginia, are about to commence a part of their industrial operations for the purpose of developing the mineral resources of that section of the State, by the erection, on Coal river, during the next summer, of large oil works, of about one hundred retorts, and also at the same time, works for the fabrication of ammoniacal salt and coke, from the rich bituminous coal of that region.

Lost Railway Baggage.

We notice a recent decision of Judge Collins, of the Hamilton (Ohio) Common Pleas, in a suit for a trunk lost on the Little Miami Railroad, or one of its connecting roads. The defence of the railway company was, that it was not proven that the trunk was lost on L. M. R. R. The decision was to the effect that the check given for the baggage was evidence of a contract which was binding on all the connecting roads, jointly and severally—and that the loser may have his action against either, or all, not being bound to prove on which road the loss occurred.

South Side (Long Island) Railroad.

The Queens County *Sentinel* reports the proceedings of a meeting held at South Oyster Bay, Dec. 27th, to arrange preliminaries for the construction of this road. It says:

The contemplated route of this road is from Babylon through the extreme southern parts of the towns of Oyster Bay and Hempstead, thence to New York. The route has already been surveyed and determined from Baylon to Jerusalem; thence it is somewhat doubtful whether the road will be made to diverge, so as to accommodate the village of Hampstead, or continue on a straight line through the northern part of Freeport, Near and Far Rockaway. We understand $30,000 has already been subscribed in this village. $70,000 has been subscribed in the city of Brooklyn, and a large amount at Babylon and vicinity. The originators of this project are determined to carry it through; and our readers may soon expect to hear that the construction of a South Side Railhas commenced.

To the Editor of the Am. Railroad Journal:

Sir:—Referring to the subject of an article in your last number on the Bridges of the Grand Trunk Railway of Canada, I should like very much to be informed by some of your engineering readers as to the following points:—

1st. How many railway bridges, constructed of wood, do they know personally as having been in constant use for upwards of twelve years, without unusual repairs or renewals; and what was the principle of construction of every such bridge, and the kind of timber of which it was built?

2nd. Is the housing-in of bridges universally beneficial, and decidedly economical?

3rd. Is artificial preservation of timber (such as creosoting, Paynizing, &c.,) ever resorted to by any American Engineers?

Any replies to those queries will be very acceptable to Your obedient servant,

Engineer.

Central Southern Railroad.

This road commences at Columbia, Tenn., a point on the Tennessee and Alabama Railroad, 44 miles south of Nashville, and runs thence in a southerly direction to the Alabama State line, a distance of 48½ miles. Here commences the Tennessee and Alabama Railroad, 26 miles long, running thence to Decatur, on the Memphis and Charleston Railroad. A continuation of this road south to Elyton and Montevallo, or some other points on the N. E. & S. W. Ala. and Ala. & Tenn. Rivers Railroads, will doubtless be constructed at no distant day. The distance to be built in this direction, will not exceed 100 miles. It will open up direct communication with Selma, Montgomery, Pensacola and Mobile, by means of the Ala. & Tenn. Rivers, the Ala. & Miss., the Ala. & Florida, and the Mobile and Great Northern roads.

The Tennessee and Alabama Railroad is already completed to Columbia. Thence to Pulaski, 35½ miles, the road of the Central Southern Company will be completed and opened for travel in a few days. From Elk river to the Alabama State line, the track has been laid; leaving a gap of 12 miles only to be completed. The work upon this portion of the road is in a fair state of forwardness. By the terms of the contract it is to be finished in March next. Madry Ridge tunnel has been driven 557 feet on the north-side, and 339 feet on the South, leaving 337 feet yet to be pierced. A large amount of work remains to be done to the distance penetrated, to prepare it for the track. The approaches were also incomplete. It is, however, in such a state that nearly all the work can be carried on together. The tunnel will probably be completed in April, so that the track can be finished in May next. The bridge over the Elk river was to have been completed in December last. The iron was all made at the Cambria Iron Works, Johnstown, Pa., and is a superior quality of American manufacture. The spikes and fastenings were furnished by the Tredegar Iron Works, Richmond, Va., and are of the best quality, and most improved kind.

The amount expended for local work construction, during the year, was	$123,015 68
Previously expended	241,084 11
	$364,099 79
For Elk river bridge	29,635 26

The cost of local work to Pulaski was not accurately determined. The original estimate, not including ballast, was $358,660 05

The actual cost has been reduced to about	275,000 00
Showing a difference of about	$83,660 05

This saving has been effected by modifying and increasing the grades of the road—the maximum being 68⅔ feet per mile. The diminished cost will enable the company to ballast the road with broken stone in a very thorough manner. About 14 miles of road-bed have been ballasted in Maury Co., and 9 miles in Giles, leaving 10 miles still to be ballasted in Pulaski Co.

There are several large bridges on the line of the road: one over Robertson's Fork, 120 feet long; three over Richland Creek, one of 160 feet, and two of 180 feet each; and one of 50 feet over Pidgeon Roost Creek.

The company have two first class locomotives on the road; another is to be delivered during the winter. They are from the Rogers' Locomotive Works, and are very superior machines, not excelled by any in Tennessee. They have also one passenger and baggage car, twelve platform, seven box, and three track-laying cars.

The amount expended for track and equipment during the year was	$248,663 46
Add amount previously expended	279 95
Total cost of track and equipment	$248,943 41
Add amount expended for local works	364,099 79
Elk river bridge	29,635 26
Total amount expended	$642,678 46

The receipts from all sources during the year were $146,288 32; and the disbursement, $143,376 23—leaving a balance of $2,912 09.

The means of the company have been derived from the following sources:

Capital stock	$493,152
State Loan	325,000
Construction bonds	27,308
Contractors	52,087
Other items	37,054
	$934,601

Disbursements—

Graduation and masonry	$364,099
Rails	196,244
Equipment	28,364
Uncollected stock	139,861
Elk river bridge	6,635
State loan interest, etc.	47,423
Other items	131,975
	$934,601

The office of the company is at Columbia, Tenn. The officers are:

THOMAS MARTIN, *President.*
JOHN BAIRD, *Treasurer.*
A. ANDERSON, *Chief Engineer.*
D. J. JOHNS, *Superintendent.*

Central Ohio Railroad.

We have the report of this company for the year ending July 31, 1859.

The road has been in the hands of a receiver since the 1st day of May last, at the suit of the trustee under the 1st and 2d mortgages.

The receipts from passenger the past year have been, $234,861; freight, $318,613; mails, etc., $44,159. Total, $597,633. The earnings for the previous year were:—From passengers, $230,696; freight, $291,035; mails, etc., $48,369; total, $570,100; increase for the year $27,530. The current expenses for the same period have been $451,891, or 76 per cent. of the gross receipts. The extraordinary repairs, consisting of improvements in the road-bed, additional machinery, etc. etc., have been $74,386. Making the entire expense of working the road for the year $526,277, or 88 per cent. of the gross earnings.

There were paid during the year, $80,276 on account of interest, due prior to August, 1857.

The capital account is stated as follows:—

LIABILITIES.		
Capital stock		$1,628,355 87
Bonded Debt.		
First mortgage bonds, due Feb'y 1, 1861	$450,000	
First mortgage bonds, due May 1, 1864	800,000	
		1,250,000 00
Second mortgage bonds, due Sept. 1, 1865	$800,000	
Less deposited as collateral,	11,000	
		789,000 00
Third mortgage bonds, sinking fund, due April 1, 1858	$950,000	
Less deposited with trustees as basis for sinking fund	$100,000	
Less deposited as collateral to bills payable	823,000	
	923,000	
		27,000 00
Fourth mortgage bonds, sinking fund, due July 1, 1876.	$1,365,800	
Less deposited with trustees as basis for sinking fund	$200,000	
Less deposited with agents to fund debts	30,800	
	230,800	
		1,135,000 00
Income bonds due 1857, '58, '59 and '60 amount issued	$1,172,200	
Less amount deposited as collateral	600,200	
		572,000 00
Less amount issued to Muskingum county, due Jan. 1, 1862		100,000 00
Unfunded or Floating Debt.		
Due to dividends, and dividend and interest scrip, interest on stock		32,628 95
Individual accounts		26,396 69
Bills payable		1,126,458 60
Due to individuals on account of expenses, etc.		750 49
Due to connecting roads on account passengers, prior to May 1		440 42
Balance of transportation accounts.		122,401 45
		$6,810,432 47

ASSETS.		
Construction		$5,350,443 24
Do. amounts chargeable to do.		229,065 22
		$5,579,508 46
Real estate, depot grounds and machine shops		132,339 53
Office furniture at stations		1,676 17
Machinery, locomotives, cars, etc.		788,664 28
		$6,502,248 44
Advances on real and personal estate security	$40,003 52	
Advances of capital stock as collateral to bills payable	30,350 00	
		70,353 52
Trustee of Harris Farm, Bellaire	$17,208 43	
In suspense	1,078 66	
Individual accounts	82,557 69	
Bills receivable	5,362 69	
Stock in C. W. & Z. R.R. Co., deposited as collateral	100,000 00	
133 shares of stock C. O. R. R. Co., in hands of agent	6,132 89	
		162,340 36
Third mort. sink'g fund	$18,550 00	
Advances on account of locomotives purchased,	26,150 80	
Due from individuals, applicable to payment of expenses, etc.	4,897 57	
Due for mail transportation to May 1	8,522 73	
Due from other roads, on account freight and passengers to do.	995 35	
In hands of the Receiver to August 25	9,811 48	
Suspended debt	6,562 22	
		75,490 15
		$6,810,432 47

The above statement presents the substance of the Report. Considerable sums are still required to be expended to make the road what it should be.

The result is an unpromising one. The road earns a fair sum for its mileage—$4,200 per mile, but its extravagant management leaves little or nothing for its owners. Of its cost $5,100,000 is represented by debts. To pay 7 per cent. on this sum would require $357,000. The road ought, and under good management, could probably be made to pay $250,000 *net*. But this result is not likely to be realized, so long it remains in the hands of a *Receiver*, whose trust is coupled with no personal interest, and to whom the success of the road must necessarily be a matter of comparative indifference. The best course to be pursued, for all parties, is to sell the road for the first three mortgages, amounting to $300,000. In the hands of *owners* it would, probably, be able to meet the interest on this sum. Unless something of the kind be done, we fear the annual expenses will continue to keep pace with the receipts.

Cincinnati Stock Sales.

Louisville and Lexington Railroad.

We understand that it is in contemplation to bring a proposition before the Kentucky Legislature to so amend the charter of the Louisville and Lexington Railroad as to enable that company to purchase the Lexington and Big Sandy road, which is now in an unfinished condition.

The Lexington and Big Sandy Railroad was intended to connect the Kentucky roads at Guyandotte, Va., with the Covington and Ohio Railroad; and if completed, will form the most direct connection by mail for the trade centering at Louisville, between the East and West.

Panama Railroad.

Statement for the year ending December 31, 1859.

Balance to credit "Income Account," after dividend, Jan'y 6, 1859, per statement.		$529,041
Add excess of receipts over estimate for portion of December, 1858		6,068
		$535,109
RECEIPTS from Dec. 31, 1858, Dec. 31, 1859:—		
For passengers	$1,068,832	
For freight (merchandise)	537,689	
For freight (treasure)	153,877	
For mail transportation	100,000	
For baggage	18,952	
For miscellaneous, wharfage, light money, etc.	6,095	
Earnings for the latter part of December, not yet received —estimated at	40,000	
	1,925,444	
Total		$2,460,554
DEDUCT—Interest on 1st mort. bonds (£450,000), with exchange and commission	$150,694	
Interest on 2d mortgage bonds (£225,000), with exchange and commission.	70,770	
Interest on convertible bonds, July 1, $38,000, at 3½ per cent.	$1,155	
Do. Jan. 1, $27,000	945	
	2,100	
Running expenses	416,819	
Premium of exchange on remittances to meet bonds, paid in London, Dec. 1.	73,158	
Office expenses	25,207	
Appropriated to cover depreciation in iron, ties, buildings, etc.	40,000	
New-Granadian Government—proportion mail receipts	10,000	
	795,748

On account of bonds, due Dec. 1	550,000
Total	$1,200,000

All the company's interest in steamers is covered by marine insurance, excepting the Columbus, valued at $25,000.

The cost of the road, per construction account, closed January, 1859, is $8,000,000

Against which there are—

Capital stock		$4,973,000
Convertible bonds		27,000
Sterling bonds, due 1865	1,250,000	
Do. do. 1872	1,150,000	
Total		$7,400,000

Toledo and Wabash Railroad.

The Committee appointed at the meeting of the Directors of the Toledo and Wabash Railroad Company, on the 2d of December, to consider the financial position of the Company, and its probable revenues for the year, and to recommend such measures relative to the interest due and to become due on the Second Mortgage Bonds as in their opinion may be proper and expedient under the circumstances, have reported that, having investigated the accounts, they find that the present outstanding liabilities of the Company are as follows:

FUNDED DEBT.

First mortgage bonds of the Toledo and Illinois Railroad Company, principal due August 1st, 1865		$900,000 00
First mortgage bonds of the Lake Erie, Wabash and St. Louis Railroad Company, principal due Aug. 1, 1865		2,500,000 00
		$3,400,000 00
Interest payable Feb. 1, and Aug. 1:		
Second mortgage bonds of the Toledo and Wabash Railroad Company, principal due November 1, 1878: interest 1st May and November	$1,000,000 00	
Second mortg. bonds of the Wabash and Western R. R. Co., principal due Nov. 1, 1878; interest payable 1st May and November	1,500,000 00	
	$2,500,000 00	
Less bonds unissued, held by the Co.	154,500 00	
		2,345,500 00
		$5,745,500 00
Notes given for coupons due Aug. 1, 1857, and Feb. 1, 1858, on 1st mortgage bonds, with interest, due Nov. 1, 1860	$16,079 16	
Do. due Nov. 1, 1861	16,079 16	
Do. do. 1862	16,079 16	
Do. do. 1863	16,079 15	
Do. do. 1864	16,079 15	
	$80,395 78	
First mortgage coupons due Aug. 1, 1857, and Feb. 1, 1858, unfunded	63,315 00	
		143,610 78
Floating debt, exclusive of arrears of interest	$145,499 78	
Less available assets	99,719 92	
		55,779 96
Arrears of interest 1st mortgage bonds	$119,000 00	
Arrears of interest 2nd mortgage bonds	82,092 50	
		201,092 50
Total debt		$6,146,088 24

Of these liabilities, the Committee state that the following must be provided for during the current year:

Balance of floating debt		$55,779 96
Arrears of interest on 1st and 2d mortgage bonds		201,092 50
First instalment on notes given for 1st mortgage coupons, due August 1, 1857, and Feb. 1, 1858	$16,079 16	
First instalment on unfunded coupons	12,663 00	
		28,742 16
Interest on notes for funded coupons, and on unfunded coupons, 1st mortgage		10,059 75
Interest due Feb. 1 and Aug. 1, 1860, on 1st mortgage bonds		288,000 00
Interest due May 1, and Nov. 1, 1860, on 2nd mortgage bonds		164,185 00
Total		$697,859 37

The probable revenue for the current year is shown by the following statement of earnings and ordinary expenses for the year ending August 31, 1859:

Passenger earnings		$239,651 09
Freight earnings		482,775 27
Mail and express earnings		40,081 88
		$762,508 24
Expenses of all kinds, exclusive of interest on debt, partly estimated		438,711 07
		$323,797 17
Interest on total debt for the year:		
First mortgage bonds, $3,400,000	$238,000 00	
Second mortgage bonds, $2,345,000	164,185 00	
Notes given for first mortgage coupons and unpaid coupons, $143,710 73	10,059 75	
		412,244 75
Deficiency		$88,447 58

It is represented that the traffic of the road throughout the year was unfavorably affected by the failure of the crops, and the general stagnation of business consequent upon the revulsion of 1857; that in view of the gradual revival of activity in all branches of business, and the large crops of the present year, a material increase of gross earnings during the coming spring and summer, may be confidently looked for from the sources of traffic which have heretofore existed, and that an important addition thereto would be made by the opening, before the 1st of January, of the Logansport, Peoria and Burlington Railroad. The Committee regard the following as a prudent, and as far as it is practicable now to furnish such—a reliable estimate of the probable net revenues of the Company for the current year, commencing 1st December, 1859, and ending 1st December, 1860:

Earnings	$950,000
Expenditures, $40,000 per month	480,000
Net earnings	$470,000

—exceeding the annual interest on the entire funded debt, by the sum of $57,755 25. In order, however, to give to the first mortgage bondholders that priority to which they are equitably entitled, and relieve the Company from the hindrance to the efficient operation of the road, caused by the non-payment of the floating debt (consisting principally of temporary loans, and arrearages on the wages of operatives), the Committee recommend that the cash means of the current year be appropriated to the payment of—

Arrears of interest on first mortgage bonds	$119,000 00
Interest due 1st Feb. and 1st August, on 1st mortgage bonds	238,000 00
Interest on notes given for funded interest, and on unfunded coupons, and instalment of principal thereof, due 1st November, 1860	38,801 91
Floating debt	55,779 96
Total	$451,581 87

and that the second mortgage bondholders are requested to fund their coupons due 1st November, 1859, and 1st May and 1st November, 1860, amounting to $246,277 50. In recommending this measure, the committee, consisting entirely of holders of second mortgage bonds, and representing a large proportion of the whole amount thereof, have no hesitation in expressing their confident belief that it is the best mode of promoting the interests of their fellow-bondholders.

The Committee recommend that bonds shall be issued for the coupons funded, on the following conditions:

1st. The bonds shall be of the denominations of $105, $525, and $1,050, dated on the 1st of May, 1860, and bear interest at 7 per cent. per annum, payable semi-annually in the City of New York, on the 1st of May and 1st of November in each year, and the principal also payable in said city on the 1st of May, 1865, with the privilege to the Company, on giving sixty days' public notice in one or more newspapers published in the city of New York, to redeem all or any of the bonds at any time previous to their maturity.

2nd. As security for the punctual payment of the principal and interest of these bonds, the coupons for which they are issued, shall be deposited with one or more Trustees (appointed by the Board of Directors) who shall countersign the bonds, and keep a registry thereof, indicating the numbers of the coupons for which each is issued.

3rd. The Company shall pay to a Commissioner (appointed by the Board of Directors), on the 1st day of June, 1860, and monthly thereafter the sum of $2,500 out of its current revenues, after payment of the necessary expenses for the operation and maintenance of the road and appurtenances, as a sinking fund for the payment and extinguishment of the principal of the bonds now proposed to be issued.

4th. It shall be the duty of the Commissioner, on the receipt of each of said monthly payments, to purchase, and not exceeding par and accrued interest, as many of the bonds now proposed to be issued as may be necessary to absorb the amount of money in his hands belonging to the sinking fund.

At a meeting of the Directors of the Company, held December 28, 1859, it was

Resolved, That the Report of the Special Committee, relative to the interest on the 2d mortgage bonds, is hereby approved and ordered to be entered on the minutes; and that the officers of the Company are hereby directed to take all necessary steps to give its recommendations full effect, by preparing and executing bonds in conformity therewith; said bonds to be countersigned by the Trustee, with whom the coupons shall be deposited, and signed by the President and Treasurer, who are hereby authorized to affix the seal of the Company thereto, and to issue the same to the 2d mortgage bondholders as soon as a majority thereof have signified their willingness to receive them in exchange for their interest coupons due 1st November, 1859, and 1st May and 1st November, 1860.

Resolved, That Blakeley Wilson is hereby appointed the Trustee with whom the coupons shall be lodged, and the Commissioner of the Sinking Fund, to whom the monthly instalments thereof shall be paid by the Company in conformity with the recommendations of the report.

Railroads of Wisconsin.

POUGHKEEPSIE, Jan. 2d, 1860.

EDITOR RAILROAD JOURNAL.

DEAR SIR:—Enclosed I send you an Act past by the last Legislature of Wisconsin, which has an important bearing on the foreclosure of railroad mortgages in that State.

As Eastern parties have commenced proceedings of foreclosure against several railroads in Wisconsin, the publication of this Act in your JOURNAL at this time may be of service. I am informed by good legal authority this law is binding on trust deeds or mortgages of railroad property executed before its passage as well as those after.

Yours truly,

C. H. ROBERTS.

AN ACT to amend chapter seventy-nine of the revised statutes, entitled, "Of Railroads."

The People of the State of Wisconsin, represented in Senate and Assembly, do enact as follows:

§ 1. Section thirty-eight of chapter seventy-nine of the revised statutes is hereby repealed.

§ 2. In case of any sale of any railroad, or of any portion of any railroad, with its appurtenances, property, right of way, franchises, and privileges, or any of them, under and by virtue of any trust deed or mortgage, now executed, or that may be hereafter executed, upon the same, such sale, when made in accordance with the provisions contained in such trust deed or mortgage, shall be absolute, unless the said company, or any subsequent encumbrancer, shall, within one year from and after the date of such sale, redeem said railroad and property so sold, by paying or depositing the amount of the purchase money on such sale, and the cost of such sale, and the interest thereon, at the rate of ten per cent. per annum, with the trustee or party making the sale, or with the court in which the decree ordering said sale is entered; and any such sale shall not be required to be made in accordance with any other law of this State for the sale of real estate under the foreclosure of mortgages, or otherwise.

§ 3. The party so redeeming shall pay to the purchaser or purchasers at such sale, the value of all substantial and necessary improvements made by such purchaser or purchasers after the sale, whether in the further construction of said road, or for the better use and enjoyment of the same, with interest thereon, as hereinbefore provided, within sixty days after the value of such improvements has been agreed upon between the parties interested. And in case they cannot agree, the same shall be determined by three commissioners, who shall be competent engineers, and who shall be appointed by the chief justice of the Supreme Court, on the application of either party interested, on ten days notice of such application.

§ 4. It shall be the duty of such commissioners, immediately after their appointment, to proceed to ascertain and appraise the value of such improvements, under oath, in such manner and upon such testimony as they may deem proper, and with all possible dispatch to report the result of their deliberation, together with all evidence taken by them, to the clerk of the court where the decree of sale was entered; and in case the sale is made by virtue of any provision in such trust deed or mortgage, such determination and report shall be filed with the clerk of the Supreme Court. The decision of any two of such commissioners, so filed, shall be final and conclusive between the parties, as to the amount to be paid for such improvements.

§ 5. Upon depositing the sum of money named in such report with the clerk of the Circuit or Supreme Court, as the case may be, the person so redeeming shall be entitled to the full possession, enjoyment, and occupancy of said road.

§ 6. The provisions of sections two, three, four and five of this act, in so far as they authorize any redemption after the sale of any railroad, or any portion thereof, with its appurtenances, shall not be applicable to any mortgage heretofore executed by the Chicago, St. Paul and Fond du Lac Railroad Company, but the sale of the railroad of said company, when made in accordance with the provisions contained in any trust deed or mortgage now a lien upon the same, shall be absolute and final.

§ 7. This act shall take effect and be in force from and after its passage.

Approved March 1, 1859.

Railroads of Michigan.

The Detroit *Advertiser*, in its annual commercial review, gives an elaborate statement of the railroads of Michigan, of which we present the following abstract:

MICHIGAN CENTRAL RAILROAD.
J. W. BROOKS, Boston, *President.*
ISAAC LIVERMORE, Boston, *Treasurer.*
WILLIAM BOOTT, Boston, *Auditor.*
R. N. RICE,, Detroit, *Gen. Supt.*
C. H. HURD, Detroit, *Ass't Supt.*
JOHN HOSMER, Detroit, *Gen. Freight Agt.*

Monthly earnings for the year ending December 1st, 1859:

DETROIT AND PORT HURON RAILROAD.

Or, to call it by its right name, the Chicago, Detroit and Grand Junction Railway.—This line of road is 58 miles in length, extending from this city to Port Huron. It forms an extension to the Grand Trunk Railway of Canada, and is under the same general management. The road was opened for traffic on the 21st November, a little more than a month ago, and has since been remarkably well patronized. From November 21st, to Dec. 21st, 1,058 passengers and 7,916,409 lbs. of freight were forwarded from this city by it. The passenger receipts for the same time reach $2,120 84.

The officers of this portion of the road are as follows:

T. E. BLACKWELL, *President.*
T. S. STEVENSON, *Secretary and Treasurer.*
WALTER SHANLEY, *Superintendent.*
T. D. HALL, *Gen. Freight and Ticket Agent.*
J. D. HAYES, *Station Agent,* Detroit Junction.

Of the Canada road the following are the officers:

Hon. JOHN ROSS, *President.*
T. E. BLACKWELL, *Managing Director.*
WALTER SHANLEY, *General Manager.*
J. M. GRANT, *Secretary.*
C. R. CHRISTIE, *Sup't Western Division.*

Total length of road open, 1,073 miles.

GREAT WESTERN RAILWAY.
C. J. BRYDGES, *Managing Director.*
THOMAS REYNOLDS, *Financial Director.*
W. C. STEPHENS, *Secretary.*
J. PEACOCK, *Assistant, Sup't Western Division.*
THOS. BELL, *General Freight Agent.*
H. SHACKLES, *Auditor.*
JULIUS MOVIUS, *General Agent for the U. S.*
WM. J. SPICER, *Agent at Detroit.*

Monthly Traffic for the year ended November 30, 1859.

Months.	Pass'gers and sundries.	Freight and live stock.	Total 1859.	Total 1858.
Dec. 1858.	$84,964	$75,181	$160,144	$209,108
Jan. 1859.	72,054	55,848	127,902	194,117

Southern Pacific Railroad.

President FOWLKES advertises in the N. O. *Crescent* that sealed proposals for the construction of twenty-five miles of road west of Marshall, Texas, to be let in sections of one mile each, and monthly payments to be made in cash, the work to be done, including grading, cross-ties, track-laying, culverts, &c., will be received at the office in that town until the 20th of January, the day of letting.

Railroad Earnings.

The earnings of the Galena and Chicago Union Railroad, for December, were:

	1858.	1859.	
Freight..	$50,021 40	$56,613 89	Inc.. $6,592 49
Pass'g'rs.	30,239 95	22,373 87	Dec.. 7,866 08
Mails, &c.	6,820 87	4,000 00	Dec.. 2,820 87
Total..	$87,082 22	$82,987 76	Dec.. $4,094 46

Corrected earnings for the previous month, $123,-907 01.

The earnings of this road for the past four years have been as follows:

	December.	Entire year.
1859	$82,987	$1,364,700
1858	87,082	1,547,561
1857	86,635	2,117,354
1856	113,189	2,450,011

The earnings of the Michigan Southern Railroad, for December, were:

	1859.	1858.
Passengers	$52,258 44	$57,862 51
Freight	87,390 80	64,733 45
Mails	4,583 41	4,635 14
Miscellaneous	5,046 28	12,496 14
Total	149,978 93	$139,727 24

Increase, $10,251 69. The miscellaneous last year was partly received from the Michigan Central, and making allowance for this, December shows a gain of $18,000. The earnings of the road the past four years show:

1859	$1.740,054	1857	$2,233,744
1858	2,015,749	1856	2,714,848

The earnings of the Michigan Central Railroad in December were:

1859	$132,948 84
1858	130,108 51
Increase	$2,840 33

The following is a statement of the earnings of the Buffalo, New York and Erie Railroad (Buffalo to Corning) for the month of December, 1859, compared with the same month of last year:

	1858.	1859.
Passengers	$11,034 59	$9,064 76
Freight	35,973 07	34,471 42
Other sources	1,686 85	1,540 17
Total	$48,694 51	$45,076 32
Decrease		$3,618 19

The receipts of the New York and New Haven Railroad, for December, were:

Passengers	$82,297 81
Freight	13,500 00
Total	$95,797 81
Due other roads	25,478 40
Balance	$70,319 40
For 1858	66,250 22
Increase	$4,069 18

The traffic of the Great Western Railway of Canada for the week ending Dec. 30, 1859, was as follows:

Passengers	$14,423 59
Freight and live stock	18,310 83
Mails and sundries	1,410 57
Total	$34,144 49
Corresponding week of 1858	32,802 26
Increase	$1,342 22

The December earnings of the Macon and Western Railroad were $46,740 40
December, 1858 87,666 59
Increase $9,078 81

The receipts of the Grand Trunk Railway of Canada for the week ending Dec. 24, were $57,466 18
Week ending Dec. 25, 1858 37,147 27
Increase $20,318 86
Total traffic from July 1st $1,320,166 67
Same period last year 1,142,856 17
Increase $177,310 50

The earnings of the Little Miami and Columbus and Xenia Railroad, for December, compare as follows:

December, 1859	$99,586 26
December, 1858	94,670 91
Increase	$4,915 34

The December earnings of the Wabash Valley road were as follows:

Passengers	$17,165 57
Freight	25,562 87
Miscelleneous	3,316 66
Total	$46,095 10

The following are the earnings of the Chicago, Burlington and Quincy Railroad for December, 1859:

Freight	$57,768 10
Passengers	22,485 07
Mails and miscellaneous	1,781 98
Total	$81,985 15
Operating expenses, estimated	50,000 00
Net earnings	$31,985 15
Gross earnings per mile	$512 42

Earnings between Chicago and Burlington, 210 miles, for December, 1859:

Freight	$64,989 77
Passengers	26,453 02
Mails and miscellaneous	2,088 93
Total	$93,481 72

Earnings between Galesburg and Quincy, 100 miles:

Freight	$17,566 23
Passengers	9,275 55
Mails and miscellaneous	854 33
Total	$27,695 61
Total for 310 miles	$121,177 33
Earnings in December, 1858	113,672 06
Increase in December, 1859	$7,505 27
Gross earnings per mile	$390 89

The receipts of the Grand Trunk Railway of Canada, for the week ending December 31, 1859, were $53,777 11
Corresponding week last year 33,506 24
Increase $20,270 86
Total traffic from July 1, 1859 $1,373,943 78
Do. for same period last y.. 1,176,362 42
Increase $197,581 36

The net receipts of the Harlem Railroad Company for the month of December, were as follows

1858	$93,188 28
1859	94,553 65
Increase	$1,365 37

The earnings of the Cleveland and Toledo Railroad for the first week of Jan'y were $16,641
In 1859 13,803
Increase $2,838

The following is a statement of the earnings of the Cincinnati, Hamilton and Dayton Railroad Company, for December, 1859, as compared with the same month last year:

December, 1859	$57,359 29
Do. 1858	47,826 83
Increase in 1859	$9,532 41

Annexed are the earnings of the Milwaukee and Mississippi Railroad in December:

	1859.	1858.
Freight	$43,156 05	30,384 83
Passengers	11,178 66	20,696 58
Mails	1,335 41	2,384 41
Total	$56,170 12	$53,415 82
Increase		$2,754 30

Journal of Railroad Law.

LIABILITY OF A COUNTY, ON BONDS GIVEN FOR, SUBSCRIPTION TO A RAILROAD.

(Continued from p. 15.)

It cannot be possible that, after the vote has resulted in favor of subscription and before it has been made that no change in the affairs or prospects of the road could occur, which would not release them from the duty of making such subscription. The legislature must have intended to invest the county judges and Common Council with the discretionary power of imposing conditions to the county or city subscription, so far as it might be necessary to protect their interest and secure the faithful application of the amount subscribed. If, however, the law is peremptory to compel the subscription for the full amount and leaves the agents of these bodies without any discretion when the vote has resulted in favor of subscription, any conditions they might impose would have no binding effect, nor would any imposed by the voters be binding. The legislature has given them the control over the stock when issued, and has given them the discretionary power to issue the bonds whenever the interest of the county or city may in their judgment require it. Considerations of policy could not have induced the Legislature to withhold a discretion in making such subscriptions, as these powers delegated are as important as that of making the subscription of the whole or any part of the sum authorized by a vote; and that the Legislature intended to withhold such a discretion we are unable to believe, and until they employ different language from that used in the fourth section of this act, we cannot so hold.

Until the county or city has subscribed there is no privity between the road and county or city. It is the contract of subscription which compels the subscriber for stock to pay his money, and the company to issue to him shares of their stock. Until the county subscribes for shares of their stock, the company hold no obligation on the county, and cannot by tendering shares of stock compel them to subscribe or to issue bonds, nor have they any power to compel the road to issue to them shares of their stock. Until the subscription is made, it is entirely at the option of the road whether they will permit such subscription. Before the subscription is made no obligation exists between the parties. Nor can the vote be treated as an agreement between the county and the road beyond what the law has peremptorily required to be performed. When the vote was taken and resulted in favor of subscription, it only amounts to a delegation of power to the Super-

visors to make the contract of subscription as the law then authorized them to do. The road was no party to this vote, and have no more right to insist upon the execution of the power thus delegated than they would have in case an individual were to authorize an agent to subscribe for stock in their road, and who should refuse to exercise the power for his principal.

In the case of Fulton County against the Wabash and Mississippi Railroad Company *ante*, this Court held that the law did not authorize the submission of a proposition for subscription of a gross sum, to two roads in the same submission, in such a manner that the voters had no option to vote for the one and against the other. This submission was made in that manner. It is proposed to subscribe one hundred thousand dollars, one fourth to this and three-fourths to another road, and the voter, however much in favor of subscription to one and opposed to the other, was compelled to vote either for or against the entire subscription. That case is decisive of this, and we deem it unnecessary again to discuss the question in this case.

We are, for these reasons, of the opinion that the relators have failed to show a case by their petition which entitles them to the relief prayed, and that the demurrer to the return should be sustained to the petition. The writ of mandamus is refused.

IMPROVEMENTS.—ADOPTION OF THEM BY RAILROAD COMPANIES.

In the case of Smith *vs.* the New York and Harlem Railroad Company, recently decided in the New York Court of Appeals, and which we noticed in a recent number, there is a decision in relation to the adoption of the new improvements which are constantly being brought to light in the progress of the age, and which by actual experience become now to be truly valuable improvements. The law does not compel a corporation to adopt every improvement which enthusiastic inventors may deem important. But when an invention has really demonstrated itself to be well adapted to the purposes it was intended to accomplish, when its superiority above the old methods is certain, and the community in general have adopted it, then, if the invention or improvement is such as will tend to promote in any way the safety of the community, the law enjoins upon the corporation the duty of adopting it. And if they neglect to do so, and parties receive injuries by reason of, or on account of such neglect, the law throws the responsibility upon the corporation and compels them to respond in damages to the party injured.

The plaintiff in the case referred to was the wife of an engineer in the service of the New York and New Haven Railroad Company. This company, between Williams' Bridge and New York City, runs its trains over the track of the New York and Harlem road. It was admitted by the pleadings that the defendants' track was thus used, under some arrangement between the two companies, under which the defendant received a compensation for such use, and was bound to keep the road in good order, supplied with proper switches, watched and adjusted by the defendants' servants, as well for the trains of the New Haven Company, as for its own.

The complaint averred, among other things, that the defendant permitted a switch of an insufficient, improper and unsafe character to be used at Melrose upon the portion of the track used by both companies, and a train of the New Haven Company under the conduct of the deceased as engineer, was thrown from the track and killed.

Upon the trial before Mr. Justice Woodruff, there was evidence that at the place where the accident occurred, there was a "short switch" and that a different construction known as the frog and guard rail, is so greatly superior, in point of safety, to the short switch, that the latter has generally been discarded on railroads, and the former adopted in its place.

The judge charged the jury that if there was a want of reasonable skill and prudence on the part of the defendant, in the construction of its road at the place of the accident, or a neglect on its part to adopt a useful improvement in the construction of the switch, by which improvement the danger of accident could be materially reduced, which improvement was known to the defendant, and in its power to apply, the defendant was liable, if such omission caused the accident, unless the deceased was also guilty of negligence concurring to cause the result. But this rule, he continued, does not require the defendant to adopt or apply every new invention, nor any invention the utility of which is in doubt; on the contrary, to do that might itself be culpable. The obligation to use a new invention only arises when such improvement has been proved and found to be valuable as a means of promoting safety, and that is known to the defendant, and the improvement is within its power so as to be reasonably practicable. To this portion of the charge the defendant took an exception.

The jury, in answer to the specific question, Did negligence on the part of the defendant, in not providing a proper switch, also cause the accident without negligence on the part of the deceased? answered in the affirmative.

The plaintiff had a verdict and judgment, which was affirmed on appeal, at general term, and the defendant appealed.

On this point the opinion of the court was as follows:

SELDEN, J.—It is equally clear that the Judge was right in that portion of the charge which related to the construction of the road.

It was satisfactorily proved, that, if what the witnesses call the frog and guard rail had been used at the place where the train ran off, instead of the short switch, the accident in all probability would not have happened. Nearly all the witnesses regarded the former as a valuable improvement upon the short switch, and as adding greatly to the safety and security of the trains. It had been adopted, according to the testimony, previously to the accident, upon nearly all the roads in the country, and had even been substituted, in many places, for the short switch upon the defendants' own road.

It has been held that railroad companies are bound to avail themselves of all new inventions and improvements known to them, which will contribute materially to the safety of their passengers, whenever the utility of such improvement has been thoroughly tested and demonstrated Hegeman *vs.* the Western Railroad Company, 3 Hem. 9,). Undoubtedly this rule is to be applied with a reasonable regard to the ability of the company, and the nature and costs of such improvements; but within its appropriate limits it is a rule of great importance, and one which should be strictly enforced. A stronger case for the application of the rule than is here presented, could scarcely arise. The improvement related to a part of the apparatus of the road which is the source of numerous accidents. Its utility was undoubted and the expense trifling.

The defendants had themselves recognized its value. If the principle should ever be applied, therefore, it should be applied here. The defendants were clearly in default for permitting the short switch to remain in use upon the road, especially at a place where there was a somewhat unusual complication of switches. The judge was fully warranted, therefore, in submitting this question of negligence to the jury, even if he would not have been authorized to assume, as matter of law, that the company had neglected their duty in this respect. The language in which this part of the charge was couched was appropriate, and I discover no error in it.

The judgment was confirmed, all the judges concurring.

Virginia--Population and Valuation.

From the report of the Auditor of Virginia for 1859, we gather the following figures, exhibiting the population and wealth of that State:

Population in 1859	1,658,190
Whites	1,087,918
Free Negroes	59,118
Slaves	511,154

Increase of population since 1850, 236,529. As follows:

Whites	193,118,	or about 22 per cent.
Free Blacks	4,785,	" 8 "
Slaves	38,626,	" 8 "

Of the 511,154 slaves in the State, 444,795 are contained in the Tide-water and Piedmont districts, and but 66,359 for the Valley and trans-Alleghany districts.

Of the free blacks, 51,498 are residents of Eastern, and only 6,620 of Western Virginia. So that the total black population of Eastern Virginia is 496,293, or about 10,000 more than the total white population; and the total black population of Western Virginia, 72,979, or less than one eighth of the white population of that district.

Eastern and Western Virginia are both embraced within the same parallels of latitude; but the greater elevation of Western Virginia is regarded as equivalent to a difference in latitude of three or four degrees. The climate of Western Virginia is therefore of about the same temperature with that of Pennsylvania.

The total value of real estate in Virginia is assessed at	$374,989,888
Of slaves, at $612 63 each	313,148,275
Of other property	355,827,765
Total assessed value	$1,043,965,928
Add 20 per cent. to obtain real value, and the result is	1,143,676,987

—as the actual valuation of the real and personal property of the State. This sum, divided between 1,087,918 persons—which is the number of white inhabitants of the State—gives to each $1,051 25.

The entire debt of the State is $29,000,000; revenue of the State from taxes and licenses, $3,-120,000—of which Eastern Virginia pays $2,009,-000, and Western Virginia, $1,111,000.

The debt of the State has been increased for internal improvements. For every railroad chartered by the State, she subscribes three-fifths of the capital stock. This gives to the State a controling interest in all these works.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, etc., etc.

An *asterick* (*) occurring in the column headed "Rolling-Stock," signifies that the cost is included in that of "Railroad and Appurtenances." A *dash* (—) signifies "nil." Running *dots* (.....) signify "not ascertained." Land-Grant Railroads are in "*italics.*"

Railroad Reports.

RAILROAD COMPANIES will oblige us by sending us copies of their Reports as soon as they are published.

American Railroad Journal.

Saturday, January 14, 1860.

Pacific Railroad.

We see that Mr. Gwin, U. S. Senator from California, has again moved in the Senate, his bill for a *Pacific Railroad*. It is the old story of mail pay not exceeding $500 per mile per annum and a bonus in the shape of lands; the road to be let out to the lowest bidder.

As we have often remarked, all such propositions are nothing but jesting with the subject. There are no considerable bodies of land of any value on the route. If there were, experience has proved them to be of very little use in supplying means to construct a railroad. It is a preposterous idea that settlers on the frontier can, in addition to their own wants, contribute, by the purchase of lands, a sum sufficient to construct a railroad that must cost $100,000 per mile. In the States of Illinois and Iowa, for example, they may possess great prospective value, but in these a railroad through them must be built long before they can be paid for.

The first step to be taken in any sensible plan is to ascertain the *route* to be adopted—the best route *commercially*, and for cheapness of construction. This will have to be done before the work is commenced, and every year that Congress delays to ascertain these facts, just so long is the realization of the project postponed. But Congress evinces no disposition to go sensibly to work. The result will probably be several attempts and as many failures, till experience teaches wisdom.

It is the proper function of the Government to ascertain the best *route*. This being accomplished, its next duty will be to supply the *means* for construction. These, for a long time at least, can come from no other source. It is idle to proceed upon any other hypothesis. The road would be unproductive at least during the period of its construction —say from 12 to 15 years. What capitalist is going to embark his money in an enterprise where he must wait so long a time without the hope of getting a penny in return, with a probability, to say the least, that the whole may be lost. To show what a laborious and difficult task it is to construct railroads in new countries, we need only refer to the State of Missouri, which, in conjunction with the city of St. Louis, has for ten years past been busily to work upon *her* Pacific Railroad, which, after a great struggle, is completed 168 out of the 300 miles. In this instance, the State and City had to supply nearly all the means, and will have to supply the balance, if the road is to be completed. Yet here is a road running through the oldest settled part of the State, having every prospect of being productive on its cost. If such a *road* cannot be built, (with a land grant), without State aid, how can one through a desert of more than 1,000 miles in extent, uninhabited and uninhabitable? The idea is preposterous.

The truth is a great many members of Congress desire the road without having the courage to meet the question presented. They are not yet prepared to take the only step that leads to success, for fear they may espouse the *unpopular* side. They consequently delude themselves and their constituents with the most nonsensical propositions, which do very well for the time, because their absurdity cannot immediately be demonstrated. Mr. Gwin's proposition is precisely of this character. If he wants the road, he is taking exactly the course to postpone its completion. If he does not want it, he cannot so effectually accomplish his object as by keeping to the course he is now pursuing.

Wilmington, Charlotte and Rutherford R.R.

We learn from the Wilmington *Herald* that "work upon this road is progressing quite rapidly —between 25 and 30 miles being laid with iron, and in pretty fair running order. The road when finished will be a good and substantial one. The grading and embankment appears to have been worked according to railroad rules for such things, and the cross-ties, though rather far apart at present, are of substantial make, and will do service." This road, when completed will be 184 miles in length, commencing at Wilmington, and running in a direction north of west, via Lumberton, Rockingham, Charlotte and Lincolnton, to Rutherford. The whole line lies in North Carolina. It is all under contract, and every effort is being made to complete it at as early a day as possible. It is being constructed under direction J. C. M'Rae, Esq., Chief Engineer.

Wooden vs. Iron Bridges.

MR. EDITOR:—In your JOURNAL of the 10th of December, page 809, and of the 24th of December, page 853, appears two articles, the one an extract of the annual report of the Alexandria, Loudoun and Hampshire Railroad; the other, headed: "Bridges on the Grand Trunk Railway of Canada." In both of these articles it has been attempted to show that wooden bridges are more economical than iron bridges, not only at first cost, but were in the long run.

The figures and arguments set forth in those arcles, may be satisfactory enough to the writers thereof, and to the superficial reader; but the Engineer who takes into consideration all the facts bearing upon the subject, and who possesses sufficient knowledge of the first cost of wooden and iron bridges and the expenses of maintaining them, will arrive at very different conclusions, and as this is a matter of considerable importance to the railroad interest of the country, it is but proper that erroneous statements, made in one of the leading journals, should not remain uncorrected.

The case cited in the article on page 853, and upon which the conclusion as to the first and ultimate economy of wooden bridges is based, is one not of general application. A wooden bridge of 150 feet span is stated to cost $6,000, or $40 per foot lineal, and the iron bridge of the same span is said to cost $30,000, or $200 per lineal foot. Now, if an iron bridge of 150 feet span is to cost as much as that, nothing is clearer than that iron bridges should never be built upon this continent. Fortunately, however, our American engineers, not being wedded to the English tubular plan, understand how to build iron bridges of the same and of greater strength than the best wooden bridge for $50 and $55 per foot, or from $7,500 to $8,250 per span of 150 feet. At such prices, the comparison of cost of wooden and iron bridges will be somewhat different.

The average time a wooden bridge lasts is about 8 years. If its first cost is $6,000, and it requires rebuilding 8 years after its construction, then the cost of the new structure will be $6,000, plus compound interest for 8 years=$3,628 26, plus cost of new structure=$6,000, making in all $15,628 26.

The iron bridge at that time costs $8,250, plus the compound interest on that sum for 8 years=$4,988 88, or $13,238 88, showing a difference of $2,389 38 in favor of the iron bridge after the first 8 years.

But this is not all. We have estimated for the reconstruction of the wooden bridge only $6,000 and the reconstruction was to be required after the expiration of 8 years, while the facts with which every one who ever had charge of keeping wooden bridges in repair is familiar, is this: that the reconstruction commences three or four years after the bridge has been built, and that it cannot be done at the rate of $40 per foot as in the original construction, but that it costs at the lowest estimate more than twice that amount.

It is generally the case, that after three or four years some of the sticks in a wooden bridge require replacing. It is very difficult and expensive to take out a stick while the trains have to run over the bridge. Expensive scaffolding has often to be resorted to, and the mere preparations to replace one or two pieces of defective timber are often more costly than the required repairs. It is difficult to estimate the exact cost of thus keeping wooden bridges constantly in good order, and unfortunately our railroad reports do not show an exact account of the cost of each bridge on the road; but every one, who has any practical knowledge of the subject, can judge from its nature, that the reconstruction of a wooden bridge, under all the disadvantages under which it has to be done, cannot cost less than double the cost of original construction. Hence it is safe to say, that a wooden bridge of 150 feet span, costs in round figures, $21,000, eight years after construction; while an iron bridge costs only $13,000 in the same period of time.

But this is not all. A wooden bridge requires constantly a watchman at about $360 per year, which is equal to the interest on a capital of $6,000. An iron bridge being proof against fire needs not to be watched. Hence, if the question is simply one of "first cost and maintenance," then, from the day the wooden bridge is built, its cost must be considered equal to $12,000, ($6,000 for cost proper, and the cost of watchman equal to a loan of capital of $6,000,) while the iron bridge costs only $8,520.

But this is not all. Wooden bridges are often destroyed by fire in spite of the watchmen, as we can see almost daily from newspaper reports. The loss of a structure in that way is not to be estimated by the original cost of it, for there is the loss occasioned by the interruption of the traffic for days and weeks—the cost of erecting and maintaining temporary works until a new structure can be prepared, etc.

There are few roads which have not severely felt the uncertainty of wooden bridges, and few managers of railroads, if they were only allowed to take the ultimate good of their company into consideration, would ever erect another wooden bridge. But they are forced by necessity to adopt the cheapest expedient to get a road in running order and money-making condition, disregarding for this time the consequences. And, as a *temporary expedient*, wooden bridges will do well enough, but when it is attempted to show that they are "*the very thing*," we must solemnly protest.

IRON.

Coal Trade of Pennsylvania.

The statistics of the coal trade of 1859, given in the Philadelphia *Mining Register*, show a coal tonnage from the three anthracite districts of Pennsylvania exceeding the coal tonnage carried by the same lines in 1858, almost one million tons.

The exact increase being	976,639 tons.
Add to this the increase in the tons sent from the Broad Top and Barclay fields	37,700 tons.
And the increase in Eastern Pennsylvania is	1,014,339 tons.

If to this be added the increased consumption in the mining districts, and the increased tonnage on two unreported roads to local markets, we may safely claim for Eastern Pennsylvania, for 1859, an increase of eleven hundred thousand tons of coal.

Northeast and Southwest Ala. Railroad.

The Tuscaloosa *Monitor* publishes a long and interesting letter from Mr. Rhodes, Chief Engineer of the Northeast and Southwest Railroad, embodying a proposition from Mr. Scott, an experienced railroad builder, to complete the road, and urging upon the friends of the enterprise to come forward and enable the Directors to close with his liberal offer.

Mr. Scott proposes to execute all the unlet work on this road, from one end to the other, including trestle work, bridging, cross-ties and culverts, for half cash and half in the first mortgage bonds of this company. The bonds to be taken at par—all work below Tuscaloosa to be all done in the year, 1860—all work below the Tombigbee river to be done in time for track-laying, come when it may, and all work above Tuscaloosa to be done in two years from the 1st of January last. He requires, as a condition to this proposition, that certain work contracted for by the Messrs. Dearing and Dr. Drish, shall be embraced therein, and these gentlemen have agreed to relinquish their contracts accordingly. The Chief Engineer says:

"That there is no obstacle opposing the completion of this road in three years, other than our not having on hand or pledged to us, the sum of $450,000 or $500,000 in cash, with which to meet the cash demands of Mr. S.'s proposition. I assume that the iron will be purchased by Mr. Deane as soon as our bonds and mortgage are prepared and placed in his hands, if Mr. Scott is engaged here. Mr. Deane assures me that he has no doubt of this fact. He speaks advisedly, because he has investigated the matter closely and constantly since last August. He accompanied Mr. Scott out here and spent several days with me. He is satisfied of our speedy success, if this proposition be accepted. He has a very decidedly good prospect for obtaining the iron for the Wills Valley road in this country, and thinks it can be done in time to enable that road to begin track-laying in the spring. He was authorized by one iron establishment in Virginia an offer to furnish this road with chairs (if of cast iron) for our bonds, which is equal to a sale of over $200,000 of our bonds, and has some reasonable hope of contracting for bolts, spikes, and possibly for some of our engines for these same bonds."

So, it appears, that if the sum of $500,000 in cash can be raised, the whole road will at once be prosecuted rapidly to completion.

Philadelphia and Reading Railroad.

The following statement of the business of this road for the year ending November 30, 1859, is from the annual report of the company, just submitted to the stockholders:

RECEIPTS OF THE ROAD.		
From travel, 379,406, equal to 126,076 through passengers		$318,846 19
Freight on merchandise, 334,609 3-10 tons		474,887 67
Freight on coal, 1,632,931 11-20 tons, at 1.15 35 cents		1,883,685 12
United States mail		19,618 00
Miscellaneous receipts		27,256 37
		$2,724,293 35
EXPENSES.		
Transportation	$899,221 73	
Roadway	233,578 07	
Drawb'ks and allow'ces.	143,380 79	
		1,276,180 59
Net profit for the year		$1,448,112 76
INTEREST ON BONDED DEBT.		
Coup's to 1st Jan., 1860.	$701,094 00	
Interest on bonds and mort., real estate	31,227 00	
Total Int. for the year	$735,321 00	
RENEWAL FUND.		
5 cents per 100 tons on 404,553,694 tons transported 1 mile during 12 months, end'g Nov. 30th, 1859	202,296 84	
		937,617 84
Dividend fund for the year		$510,494 92
Which has been disposed of as follows, viz:		
Sinking fund, loan 1836 60.	$25,000 00	
Sinking fund, loan 1849 70.	75,000 00	
Sinking fund, loan 1856 86.	50,000 00	
	$150,000 00	
State tax on capital for 1859	16,828 02	
Dividend on preferred st'k 7 per cent. on $1,551,800	108,626 00	
Accrued interest on reserved divid'ds, p. stock	12,104 04	
		287,558 06
Reserved fund, 1859		$222,936 87

During the past year there has been a general improvement in the business of the company. Every department shows an increase in the quantities carried and in the receipts, while there has been a general reduction in the cost of transportation and other expenses.

A comparison with the business of 1858, shows the following results, viz: In merchandise an increase of 146,880 2-10 tons carried, $138,972 73 in receipts, and $67,842 56 in profit.

In coal, an increase of 90,284 14-20 in tons carried, $17,991 71 in receipts, $97,192 57 in profit.

In travel, an increase of 93,753 in passengers, $46,166 48 in receipts, and a decrease of $11,901 57.

Mails and miscellaneous receipts have increased $10,411 52.

Transportation expenses have been decreased 7.55 cents per ton of coal carried; 20.58 cents per ton of merchandise carried, and increased 24.05 cents per through passenger.

The net amount of freight and toll received from coal averaged, in 1858, 120.94 cents per ton carried. In 1859, 115.85 cents per ton carried, and the per centage of all expenses, except Renewal fund, to gross income from all sources was, in 1858, 47.80 per cent.; in 1859, 46.85 per cent., including Renewal fund; the per centage in 1859 was 54.26 per cent.; in 1858, 55.07 per cent.

The following comparative statement, which includes receipts and expenditures of every description, shows an increase of $117,785 50 in the net profit for the year, viz:

1859.		
Gross receipts		$2,724,293 35
Expenses	$1,276,180 59	
Renewal fund	202,296 84	
		1,478,477 43
Net profit		$1,245,815 92
1858.		
Gross rec'ts	2,510,750 91	
Expenses	1,199,798 35	
Ren'l fund.	182,922 14	
	1,382,720 49	
Net profit		1,128,030 42
Increase		$117,785 50

The dividend fund for the year is shown as follows, viz:

Amount of net profit	$1,245,815 92
Less interest on bonded debt	735,321 00
Dividend fund	$510,104 92

—equal to 4.35 per cent. on $11,737,041 42, the capital stock of the company. Last year it was $383,329 42, equal to 3½ per cent. on the capital.

The income of the year has been appropriated as follows viz:

Amount of profit		$1,448,112 75
Less of renewal fund		202,296 24
Net profit		$1,245,815 92
From which deduct for—		
Interest on bonds	$704,094 00	
" mortgages	31,227 00	
		735,321 00
Dividend fund		$510,494 92
Which has been disposed of as follows:		
To sinking fund	$150,000 00	
Taxes	16,828 02	
7 per cent. dividend declared on Preferred Stock, to be paid hereafter	108,626 00	
Interest on Preferred Stock dividends of former years	12,104 04	—287,558 06
Balance carried to reserved fund		222,936 86
The amount at the credit of reserved fund at the end of 1858, was.		111,314 79
Add amount of surplus this year		222,936 88
		$334,250 67
Deduct amount carried to expense account, to make losses and depreciations		106,171 64
Present amount of reserved fund		$228,069 03
The appropriation to renewal fund out of the income account, has this year amounted to the sum of.		202,296 84
Add balance unexpected in 1858		12,713 89
Together		$215,010 73
Of which there has been expended this year (as per detailed statement)		208,417 32
Leaving a balance applicable to next year		$6,593 41

During the past year there has been expended on the Lebanon Valley Branch, to complete depot at Harrisburg | $13,661 16
In new turnouts and sidings | 16,919 30
In settlement of land damages | 44,799 06
Together | $74,779 48

Making the present cost of the Branch $4,490,755 84. Full details of the working of the branch are given in statement R., annexed to this report.

The result is as follows: Total number of passengers carried, 103,144, equal to 43,410 carried the whole length of the Branch; total tonnage of every description, 311,826 tons.

Gross receipts	$206,828 08
Working expenses	94,208 28
Profit on the Branch	$112,619 85
Add amount earned on the Main Line from the same business	134,168 30
Together	$246,798 15

—equal to 5½ per cent. on the total cost of the Lebanon Valley Railroad.

It has been deemed preferable to ask for an extension of the term of payment of the bonds maturing in 1860, than to attempt a negotiation of those due in 1886, which were created in 1857, to be specially reserved for this purpose. By an extension, all the rights of the mortgages are retained, unimpaired, and the security remains the first liens upon the property of the company. New sheets of ceupons will be issued, and it is proposed to pay to the holders a bonus of ten per cent. This proposition, it is expected, will prove acceptable to the holders of the bonds, which will continue to be, as they have always been, among the best railroad securities in the country.

As this extension will render any further issue of 1886 bonds unnecessary, measures have been taken to insure the cancelment of those on hand, and to record a deed reducing the amount of the mortgage to the amount of bonds actually in circulation, viz: $3,586,500.

In asking for this extension, it would appear desirable that some action should be taken to secure the gradual extinguishment of the bonded debt of the company. The managers therefore recommend that an increase should be made to the existing sinking funds, to be applied annually to the purchase and cancelment of bonds on the best terms they can be procured, so long as this can be done at or under par.

The following resolutions were offered:

Resolved, That the report of the Board of Managers, this day presented and read, be, and the same is hereby accepted, approved and adopted.

Resolved, That the Board be, and they are hereby authorized, in their discretion, to carry into effect any of the measures proposed in their report.

Resolved, That the Board are hereby authorized to enter into such contracts as they may deem advisable for working connecting roads.

Resolved, That the mode of adjusting the bonds due July 1st, 1860, proposed by the managers, is hereby ratified and confirmed, and they are requested to take such means as they deem proper to carry the same into effect.

Resolved, That the Board of Managers are hereby authorized to make the extension from Harrisburg to Dauphin, and adopt such measures to secure the prompt completion of the same as they deem proper.

Resolved, That the sum of $140,000 of the future net profits of the company, after payment of the sum necessary for the extension of the bonds due in 1860, the completion of the road to Dauphin, the car loans, the necessary rolling stock and improvements on the line of the road, and all the liabilities of the company except the bonded debt not matured, be set aside in each year as a sinking fund, (in addition to the $150,000 already provided) and shall be appropriated to the purchase of such of the bonds of the company for which no sinking fund is already provided and established, in order of the priority of the mortgages given to secure such bonds, so long as they can respectively be obtained at or under par, and the bonds so purchased shall be forthwith canceled.

Resolved, That inasmuch as the sinking fund provided by the foregoing resolution will appropriate the profits of the company to the extent named in liquidation of debts, therefore,

Reselved, That an amount of common stock be created annually, in lieu of the sum thus appropriated, equal to the par value of the securities so purchased and canceled. The stock so to be created and issued shall be distributed annually at par to the Preferred Stock if or to the extent that the profits shall not be adequate to the payment of the dividends due on such stock in cash; but if so sufficient, then to the common stock until the rate of dividend thereon equals that of the preferred stock, and any surplus thereof to preferred and common stock, according to the rights of the holders thereof respectively.

Resolved, That the Board of Managers be, and they are hereby requested and directed to enter into such an agreement as shall make the provisions in the foregoing resolution an obligatory and binding contract of the company.

Resolved, That the matter of closing the Stock Agencies in New York and in Boston be, and the same is hereby referred to the Board.

Cleveland, Painesville and Ashtabula R. R.

We have received a report of this company. It bears date March 1st, 1859. It gives a detailed statement of the working of the road for the year ending December 31, 1858, of its general condition, the character of the assets, and outstanding debt at that time. The revenue for the year was as follows:

Receipts.		
From Passengers		$498,559 54
" Freight		557,872 48
" Mail		24,000 00
" Express		28,648 85
" Miscellaneous		7,272 60
		$1,111,353 47
Expenses.		
Repairs of Road	$124,806 61	
" Locomotives	31,710 44	
" Buildings	6,197 02	
" Bridges	352 68

Tot. pounds transported.	508,309,903	525,814,297

The above outstanding funded indebtedness, amounting in the aggregate to $1,667,000, falls due as follows:

First mortgage bonds	Feb. 1st, 1861
Second " "	Oct. 1st, 1862
Special " "	July 1st, 1874
Convertible Scrip	Jan. 1st, 1880

Of the 1st and 2d mortgage bonds, $42,000 have been purchased and cancelled since the 1st of January. The $500,000 Special bonds were issued in exchange for a like amount of the capital stock of the Sunbury and Erie Railroad Company, and for chartered privileges in the State of Pennsylvania. The last issue of $300,000 was on account of accumulated surplus earnings, a large portion of which had been expended in making a second track, and in substituting stone culverts and heavy embankments in place of the trestle work across the deep chasms in Pennsylvania and at Grand River; it being deemed inexpedient to put this surplus into the hands of the shareholders by creating new stock, it was resolved to issue bonds from time to time, secured by a mortgage on the road as similar cases may occur, not exceeding in all $1,000,000; but such further issues are not contemplated faster than the 1st and 2d mortgage bonds are redeemed, or a permanent and reliable sinking fund is created therefor, without interfering with the payment of regular cash dividends on the capital stock.

Within the last three years all the deep ravines in Pennsylvania, also Grand river, in Ohio, have been permanently arched and filled, at a cost of $599,800 11. There only remains the Ashtabula and Conneaut Creeks which are of any importance that have wood structures over them; and these are in good condition, and are well protected from decay and fire, and would, no doubt, last at a moderate expense of repairs fifteen or twenty years. These can be made permanent with arches and filling in at a cost, probably, not exceeding $100,000. There is 15½ miles of second track laid, which, with the main track, is in good order. It is the policy of the Board to place it in still better condition by putting down an increased amount of re-rolled iron and re-ballasting portions of it, as it is conclusively proved that the road should be kept smooth and even, as a matter of economy. There is also 22 miles of second track graded, on which it is not proposed to place the superstructure until the business of the road is largely increased.

The rolling stock is generally in good condition, and since the charge of $75,000 to income account for depreciation, it is estimated to be well worth the amount at which it stands on the books of the company.

The officers elected at the annual meeting held August 9th, 1859, are as follows:

A. Stone, Jr., *President.*

S. Witt, *Vice President.*

H. Nottingham, *Superintendent.*

Geo. B. Ely, *Sec. and Treasurer.*

Machinery, Metals, &c., in Australia.

The Melbourne *Argus* says: "The extraordinary movement in mining companies, intending to work our gold fields by machinery, has created an unprecedented demand for machinery and the metals required for their fabrication. Not only have these advanced immensely in price, but old stocks of engines and boilers, which two months ago were utterly unsaleable, have been sold at large profits. In fact, it was to a certain extent this realizing on old consignments that induced many merchants to patronize the mining companies, which otherwise they would probably never have taken a share in, let alone fathering illegitimate projects. The demand for quartz-crushing engines continues, notwithstanding the collapse of several undertakings; and good boilers, as well as boiler-plate, are much wanted to complete orders. The price of the latter has advanced to £18 per ton, and the consumption of assorted bar and rod is in excess of the supply."

Philadelphia and Reading Railroad.

The following circular has been issued by the Reading Company in regard to their 6 per cent. loan, falling due in July next:

OFFICE PHILA. & READING R. R. Co.,
PHILADELPHIA, Dec. 28, 1859.

These bonds are secured by the first mortgages on the road, amounting in the aggregate to $3,308,400. The net revenue for the last fiscal year was six times the amount of the annual interest on these bonds. The managers propose to extend them for a period of twenty years, the holders retaining the bonds and the security of the mortgages in the precise condition in which they are now held. Fresh sheets of coupons for the interest, payable half-yearly, will be issued. A bonus of 10 per cent. will be given to the holders, in consideration of their assenting to the extension. This bonus will be paid in cash to the bearers of the bonds, on their signing a receipt and presenting their respective bonds at the office of the company, or to its agents, for indorsement.

Forms of receipt and indorsement will be furnished on application. By order of the Board of Managers. W. H. McILHENNY, *Sec'y.*

DIVIDEND NOTICE.

NEW YORK, January 9th, 1860.
CENTRAL RAILROAD COMPANY OF NEW JERSEY

THE Board of Directors have this day declared a dividend of Two and a-half (2½) per cent. out of the earnings of the three months ending December 31st last (the close of the fiscal year as changed) payable on and after the 16th inst., at the office of the Company, No. 69 Wall st.

The transfer books will be closed until the 17th inst.

GUTTA PERCHA CEMENT ROOFING.

THE **Cheapest** and most **DURABLE ROOFING** IN USE. Sent to any part of the country with *directions for application.*

SPECIMENS and *references* can be seen, and any desired information obtained on application, by *letter* or in *person*, at our OFFICE, **510 BROADWAY, N. Y.** (Opposite the St. Nicholas Hotel) **JOHNS & CROSLEY.**

DELAFIELD & BAXTER'S,

Late OGDEN & DELAFIELD,

ROSENDALE CEMENT.

WE are prepared to enter into arrangements for supplying our CEMENT for public works, or other purposes. We **warrant it equal in every respect** to any manufactured in this country. It attains a great degree of hardness, sets immediately under water, and is a **superior article** for masonry coming in contact with water, or requiring great strength.

For sale in tight barrels, well paperred, on application at their office, by **DELAFIELD & BAXTER, 104** Wall st.

The above CEMENT is used in most of the fortifications building by government. 45

Rosendale Hydraulic Cement.

THE NEWARK AND ROSENDALE CEMENT COMPANY are now receiving **fresh from the Mills** their approved ROSENDALE CEMENT, warranted **pure** and **free from quick lime,** and which has given such **general satisfaction** in the various government and other public works in which it has been used. Purchasers and shippers should be careful to get the **genuine ROSENDALE CEMENT**, branded "NEWARK AND ROSENDALE," "H. WILDE." This Cement does not swell and burst the hoops when stored in warm climates. It is packed in tight **kiln dried barrels,** and is specially adapted for safe shipping on long voyages. Terms reasonable, which may be known by addressing,

JOHN H. STEPHENS, President, Newark, N. J., or **HENRY WILDE,** Secretary, 90 Wall st., N. Y.

THE LAWRENCEVILLE MANUF'G

CEMENT COMPANY,

OFFICE 96 WALL ST,

NEW YORK.

THIS Company manufacture **ROSENDALE HYDRAULIC CEMENT** of a superior and uniform quality, and are constantly receiving it **fresh** from their Works at Rosendale. Particular attention paid to grinding **fine,** and packing in superior casks. We warrant it to set under water, and attain a hardness excelled by no Cement manufactured. It has met the approval of Government, and we are at present supplying the fortification now in course of erection, together with Water Works and Public Buildings.

For sale upon favorable terms by addressing,

WM. N. BEACH, President.
CHAS. E. LAWRENCE, Sec'y.

CEMENT, PLASTER, ETC.

THE HUDSON RIVER CEMENT CO.

HAVE commenced manufacturing for the season, and can now furnish a very superior article of fresh **Rosendale Cement, Calcined Plaster, Farmers' Plaster** and **Marble Dust.** Address

HUDSON RIVER CEMENT COMPANY,
12 **Jersey City, N. J.**

HOFFMAN'S

ROSENDALE CEMENT,

OFFICE, 93 WALL ST., NEW YORK.

THE LAWRENCE CEMENT COMPANY are prepared to receive and execute orders for their Cement, to any extent that may be required. They would particularly call the attention of purchasers to the distinguishing brand of their manufacture, viz.: **HOFFMAN'S ROSENDALE CEMENT.** This seems to be necessary, as they have established a reputation for the superior quality of their Cement, and there are various other brands offered, as "Rosendale" Cement. It has the unqualified approbation of the most eminent Architects and Engineers, being used in almost every department of the Works under Government. It is put up in the most careful manner, each barrel being well lined with paper, and will be delivered on ship-board, in this city, on the most favorable terms. Particular attention given to shipping orders, and Freight obtained on the best terms.

M. W. WOODWARD, Secretary.

American Railroad Journal.

PUBLISHED BY J. H. SCHULTZ & CO. No. 9 SPRUCE ST.

New York, Saturday, January 21, 1860.

Hannibal and St. Joseph Railroad.

We have the annual report of this Railr oad, for the year ending September 1, 1859.

The road was opened on the 13th of February last. The company had been encumbered with a contract for construction very onerous in its terms, rendered still more so by the character of the person with whom it had to deal. This contract was so modified in July, 1858, as to place the road in the hands of the company, by whom the work was vigorously pushed forward, nearly 100 miles having been laid between the 25th of June, 1858, and the 13th of February, 1859.

The total cost of the road to Sept. 1, was $11,102,827, including assets to the amount of $173,895.

The sources whence this sum has been derived, are as follows:

Stock fully paid	$1,602 900
Do. partially paid	167,712
Bonds of the State of Missouri	3,000,000
Land mortgage bonds	5,000,000
Convertible bonds	757,000
Plain bonds	
Bills payable	564,214
	11,101,826

The Report states, that the earnings of the road for the first season after its opening, have not realized the expectations formed. The large emigration toward Pike's Peak, and across the Plains, commenced before the company were fully prepared for it, and the disasters experienced by the emigrants from starting too early, put a decided check to the movement. The road had also to contend with a very vigorous competition from steamboats on the Missouri. This competition is not anticipated for the future, as the Association that carried it on the past year, has been dissolved; and as the road can place merchandise at St. Joseph at much lower rates than steamers. During the early part of the season the road did not take one-fourth of the *through* freight, and not more than one-third of the *through* passengers. Later in the season, this proportion was very much changed in favor of the road, and the company expect to be able to command, for the future, nearly all the trade and travel between the Mississippi river, Northwestern Missouri, and Kansas and Nebraska as well as the travel across the Plains.

The earnings of the road, from the time it came into the hands of the company, till September 1st, have been as follows:

Statement of Earnings from 12th November, 1858, to September 1st, 1859.

1858.	Earnings.	Operating expenses.	Net earnings.
Nov'r, 12 to 30	$6,741 50	6,320 00	421 50
December	17,424 79	11,260 50	6,164 29
January, 1859.	16,206 53	12,025 20	4,181 33
February	21,013 77	16,260 70	4,753 07
March	66,183 27	29,320 00	36,863 27
April	82,604 81	33,620 15	48,984 66
May	72.845 73	30.211 48	42,634 25
June	55,262 93	27,318 50	27,914 43
July	60,017 67	25 843 90	24,173 77
August	60,977 51	24,755 09	36,222 42
	$449,278 51	216,965 52	232,312 99

The earnings and expenses before the operating department came under the officers of the company, from July 1st to Nov. 12th, were as follows:

	Earnings.	Operating expenses.	Net earnings.
From July 1 to Nov. 12	$47,990 94	$44,983 32	$3,007 62

Earnings and expenses for September and October have been:

	Earnings.	Operating expenses.	Net earnings.
September	$74,223 80	$27,116 57	$47,107 23
October	80,212 60	*28,000 00	52,212 60

The earnings from March, 1859, to October, 1859, were $542,328
Expenses 226,215

Net earnings $316,112

The report of the land department states that up to the 30th of October, there had been sold 14,131 acres of land, for the gross sum of $144,707; and 71 town lots, for the sum of $4,547. The amount of bonds received in payment of lands, have been $9,500. The land agent estimates that the land will produce $12 per acre, of which the company own about 600,000 acres. They are, without doubt, among the finest in the State, of any of the Western States, and are so situated that their value will be greatly influenced by the construction of the road.

Operating Account, September 1, 1859.

Deficiency made up by Western R. R.	1,872 36
Paid two dividends, 3 per cent. each	$27,000 00

The gross receipts of the year as compared with the receipts of 1858 stand thus:

Years.	Pass'grs.	Freight.	Oth. sourc.	Total.
1858.	$637,942	$968,516	$94,735	$1,700,293
1859.	679,121	986,305	101,642	1,767,068
Increase	$42,079	$17,789	$6,907	$66,775

An aggregate of 58,836,260 passengers or tons freight carried one mile in 1859, against 57,677,806 passengers or tons of freight carried one mile in 1858.

The freedom from accident and the regularity of the trains during the past year attest the ability and fidelity of the men who have had charge of the roadway, the running equipment and the operation of the road. The roadway, engines and cars were never in better condition than they now are, and we are confident that for the purpose of maintaining them in first rate order, it will not hereafter be necessary to increase the annual expenditures for repairs over that of the past year, unless it may be required for the performance of the increased amount of business.

About twelve miles of second track has been completed the past season, making 54 miles of double track between Springfield and Albany. It is proposed to complete the second track between Springfield and Worcester the ensuing season by the construction of about ten a half miles between Palmer and Warren.

Journal of Railroad Law.

DAMAGES—MEASURE OF FOR NON-DELIVERY OF GOODS BY CARRIER.

The case of Ingleden *vs.* Northern Railroad, illustrates the measure of damages, in an action, for a loss occasioned by unusual delay in delivering goods to the consignee by the carrier. The plaintiff, in this case, sent a quantity of Ink by the Northern Railroad from Lowell to West Lebanon, N. H. He further directed a servant of the railroad, upon the arrival of the goods at West Lebanon, to place certain directions upon the boxes, and forward them to Keene, N. H., by another railroad. The Ink arrived safely at West Lebanon, but not until after considerable delay; and the plaintiff charged that owing to this delay, the ink did not arrive at its place of destination, at Keene, N. H., until cold weather set in and froze the ink so as to render it entirely valueless. It was in good condition when sent from West Lebanon, and no weather cold enough to freeze it, had then occurred.

The question was, whether, by the original delay, the defendants should be made liable for the freezing of the ink after it had left their control.

At the trial, the defendant requested the court to rule that such delivery was a performance of the contract by the defendants, so as to free them from all damages afterward occurring by freezing or otherwise.

The court declined so to instruct the jury; but did instruct them that the defendants were liable for all damages that could be traced to the delay of the defendants, though said damage occurred after the delivery aforesaid to the railroad to be sent to Keene, provided the plaintiff satisfied the jury that he used reasonable care in taking care of said ink, and the loss or damage was occasioned by the unnecessary delay of the defendants in transporting the same over their road.

The defendants excepted to this charge, and the case was appealed. The following is the opinion of the court, upon the ruling of the judge at trial:

THOMAS, J.—The learned judge in instructing the jury that the defendants were liable for all damages that could be traced to the delay of the defendants, though said damages occurred after the delivery to the railroad to be sent to Keene, laid down a rule broad and indefinite, and looking apparently to remote as well as proximate consequences. Nor does the subsequent language tend very strongly to limit or restrain this rule. It seems to be saying, in effect, that if the jury were satisfied the ink would not have been frozen on its way to Keene if the defendants had sent it in due time to West Lebanon, and due care was taken of it on its way to Keene, the defendants would be liable.

Upon the bill of exceptions it does not appear that the defendants were charged with any duty in forwarding the ink to Keene, or that the officers of the defendants corporation, having charge of the transportation, knew of its destination beyond their own line. The declaration alleges only neglect and delay in carrying it from Lowell to West Lebanon; and the duty of the defendants, as carriers, terminated with the arrival of the ink, and its readiness for delivery at the latter place.

The extent of the duty of the carrier is the measure and limit of his liability. For any injury the plaintiff sustained in this property, by reason of the negligence and delay of the defendants in such transportation, the defendants would be liable.

The proposition stated by the counsel for the plaintiff, that a common carrier is liable for all the damages which are the consequences of his negligence, is a sound proposition, rightly understood. He is liable for all damages which the law sees to be the consequences. But the law looks to and regards the proximite, and not the remote consequences—the direct proximate consequence of the negligence, and not remote results that may be traced to it by a chain of causes, however sound may be each successive link. It may not always be easy to draw the line, and say what is proximate and what remote; but this renders it more the less obligatory to adhere to it when it can be discerned. In cases of this kind, the rule of damages seems to be the diminution in value of the goods, as articles of merchandise, at the time of their arrival, by reason of the delay. What were the goods worth the less, at the time of their arrival, than they would have been if they had come without delay, or in the usual course of transportation. The difference, in some cases, may be very slight, scarcely appreciable; in others as the case of fruit or other perishable articles on their way to market, it may cover the entire value; and this even, it is plain, before decay actually commences, if there were no market at the place of delivery, and they must perish before they could reach one.

Applying this rule to the case at bar, the inquiry would be, what was this ink worth the less, on its arrival at West Lebanon, by reason of the delay, as an article of merchandise? The defendants not being charged with the duty of forwarding it, the plaintiff himself, or through his servant or agent, must exercise a reasonable discretion in regard to it. If it could have been sold for its fair value at

West Lebanon, the injury sustained by the plaintiff would be slight. If, on the other hand, there was no market for it there, and the best thing that could be done, under all the facts of the case, was to forward it, taking the risk, how much less was it worth for that purpose than it would have been had it arrived in due season at the place of delivery.

Upon these grounds the exceptions of the defendant were sustained and a new trial ordered.

New York and Erie Railroad.

We give below a series of statements showing the results of the operations of this road for the year ending Sept. 30, 1859:

STATEMENT OF EARNINGS AND EXPENSES.

From freight	$3,195,869 57	$3,813,310 77

BONDS ISSUED AND AUTHORIZED TO BE ISSUED BY THE SEVERAL RAILROAD COMPANIES.

Names of Companies.	Amount authorized.	Amount issued.	Amount due.
Pacific R. R.	$7,000,000	$7,000,000	....
Pacif. S. W. Br.	4,500,000	2 800,000	$1,700,000
Han. & St. Jos.	3,000,000	3 000,000	....
North Missouri	5,500,000	4.350,000	1,150,000
St. L. & I. M't'n	3,600,000	3,501,000	99,000
Cairo & Fulton	650,000	650,000	....
Platte County.	700,000	300,000	400,000
Total	$24,950,000	$21,601,000	$3,349,000

Amount of bonds issued to railroad companies as above stated is shown to be	$21,601,000
Add State debt proper	602,000
Add revenue bonds issued	400,000
Add amount forfeited by N. Missouri.	1,150,000
Add amount forfeited by Iron Mount'n	99,000
Add amount due Platte County	400,000
Add amount due Southwest Branch	1,700,000
	$25,952,000
Balance unappropriated	4,048,000
Total	$30,000,000

The debt is limited by the Constitution to $30,000,000. The $400,000 revenue bonds mentioned in the table are redeemable early in 1861. The bonds forfeited, $1,150,000 to the North Missouri,

and $99,000 to the Iron Mountain road, may be appropriated to other roads if it is the pleasure of the Legislature. The interest on the permanent State debt is $1,332,180. With the increase of the roads, and reasonably good management, it is presumed that $600,000 of the interest will be met by them, thus making the charge on the State $732,180, or for the two years, $1,464,360. The receipts into the State Treasury for the two fiscal years ending in 1858 were $1,361,348. The estimate for the two years ending 1860, including the balance in hand, and $848,000 proceeds of the mill tax, is $2,853,042, from which are to be deducted $1,087,700 for ordinary expenditures and school purposes.

The bonded debt of the City and County of St. Louis at the latest report was:

City	$5,401,400
County	3,692,000
Total	$9,093,400

Valuation of Ohio.

The annexed is a summary of the grand list of the State of Ohio for the years 1852 and 1859:

	1852.	1859.
Number of acres	$24,418,630	$25,820,842
Value of lands	273,378,744	438,439,600
Value of towns	81,558,374	155,674,404
Value of chattels	152,644,763	251,785,947
Total taxable valuation	$507,581,911	$845,399,951

	Levy. Mills.		Levy. Mills.	
State Taxes.				
For Sinking fund	..	$1,015,163 82	1¼	$1,055,119 78
Gen. R. fund	..	507,581 91	.7	590,870 39
State Com'n Sch'l fund	..	253,790 95	1¼	1,267,433 44
Dis. Sch'l Libr'ry fund	..	.....	.1	84,494 99
Total St. Tax.	3¼	$1,776,536 68	.55	$2,997,913 60

Mobile and Great Northern Railroad.

The City of Mobile has taken stock in this road to the amount of $1,000,000. It is to issue bonds therefor, payable as follows:

in	in	in	in	in
15.1861	21.1866	31.1871	46.1876	68.1881
16.1862	23.1867	34.1872	50.1877	73.1882
17.1863	25.1868	37.1873	54.1878	79.1883
18.1864	27.1869	40.1874	58.1879	85.1884
20.1865	29.1870	43.1875	63.1880	28.1885

The city is to provide annually, from and after the 1st of January, 1860, the sum of $95,000, until the company shall be able to provide that sum from its surplus earnings, to be applied to the payment of the bonds in the order they become due, and of the coupons attached to such as are unpaid; and to adopt proper by-laws and regulations for raising that sum by special tax.

We copy the following clauses in the agreement between the City and the company:

For all bonds redeemed by the city, the company shall issue a like amount of capital stock to such persons as the city may direct; "it being deemed best that the capital stock of said company shall be and remain in the hands of individuals, rather than in the hands of the corporate authorities of said city."

After full payment of the debts of the company for building and equipment of the road, warehouses, depots, &c., and after keeping the road in repair, the company will thereafter provide a like sum of $95,000, to be applied to the payment of said coupons and bonds, which shall, as earned, be deposited in the Bank of Mobile; provided the net earnings of the road, after keeping it in repair, shall be sufficient to pay said sum; but if the net surplus earnings shall be insufficient to pay said sum, the whole surplus earnings of the road shall be paid over to such persons as the city may direct, to be applied to the payment of the coupons and bonds.

The company, when required, shall make a deed of trust for the benefit of the city, of all its property and effects, acquired by means of the bonds and stock subscriptions, with power to the city when the company fails for two years to perform its part of the contract, to take possession of, and sell the same at four months' notice, whenever the corporate authorities of the city shall by resolution so direct, if they prefer such course rather than to take the surplus of the earnings of the road. But the company shall have power to create a preferable lien to the amount of $300,000, to enable it to proceed in the construction of the road.

Finances of Pennsylvania.

The debt of the State of Pennsylvania is as follows:—

Funded Debt, viz:		
6 per cent. loans		$400,630 00
5 per cent. loans		37,625,153 37
4½ per cent. loans		388,200 00
4 per cent. loans		100,000 00
		$38,513,983 37
Unfunded Debt, viz:		
Relief notes in circul'n,	$101,213 00	
Inter'st certificates outstanding	18,513 82	
Interest certificates unclaimed	4,448 38	
Domestic creditors	802 50	
		124,977 70
Total State Debt, Dec. 1, 1859		$38,638,961 07

The loans over-due, as well as those becoming due, were:

Amount over due		$18,166,103 80
Am't reimbursable in the y.	1860	2,372,601 87
" " "	1861	79,900 00
" " "	1862	1,945,773 78
" " "	1863	188,200 00
" " "	1864	2,981,450 43

" " "	1877	4,969,000 00
" " "	1878	428,000 00
" " "	1879	400,000 00
" " "	1882	850,000 00
Amount of bank charter loans		386,330 60
Am't of relief notes in circulation,		101,213 00
Total		$38,633,710 19

The assessable value of the real and personal property is $568,770,234.

Finances of Indiana.

The following is a summary of the entire indebtedness of the State of Indiana, foreign and domestic:

Internal Improvement bonds outstanding	$394,000 00
Five per cent stocks outstanding	5,322,006 00
Two and a half per cent. stocks outstanding	2,054,298 50
Bonds issued to the Board of Commissioners of the Sinking Fund, under the act of Dec. 23, 1858	1,888,219 64
Vincennes University bonds	66,585 00
Loan from the Board of Commissioners of the Sinking Fund to pay interest due July 1, 1858	165,000 00
Bonds issued to pay interest due July 1, 1859	165,000 00
Indebtedness of the General Fund to other funds	239,675 80
Due Shelby County for an advance in revenue of 1857	2,076 63
Total	$10,286,855 57

The indebtedness of the general fund to the other funds Nov. 1, 1857, was	$920,075 80
On the 1st of November, 1857, it was	407,677 31
Increase	$521,968 49
Add amount of two loans to pay interest	330,000 00
Add difference between balance on hand Nov. 1, 1857, $484,431 67, and Nov. 1, 1859, $172,672 82	311,758 85
Makes	$1,163,757 34

As the amount of debt accumulated in consequence of the Legislature of 1857 to pass the revenue bill.

The indebtedness of the General Fund to the other funds, Nov. 1, 1859, was	$929,675 80
Nov. 1, 1858, it was	489,779 53
Increase	$439,896 27
Additional loan to pay January, 1860, interest	140,000 00
Total	$579,896 27
Deduct difference between balance on hand Nov. 1, 1859 ($172,672 82), and Nov. 1, 1858 ($102,412 74)	70,260 08
Makes	$509,636 19

As the amount of debt accumulated in consequence of the refusal of the Legislature of 1858, extra session, to act upon Gov. Willard's recommendation to levy a tax for 1859.

Hudson River Railroad.

Below will be found the statement of the operations of this road for the year ending September 30, 1859:

Stock and Debts.	Amount.
Capital stock, as by charter	$4,000,000 00
Amount of stock subscribed	3,770,926 59
Amount paid in, as by last report	3,758,466 59
Total amount now paid in of capital stock	3,758,466 59
Funded debt, as by last report	8 842,000 00
Total amount now of funded debt	8,842,000 00
Floating debt, as per last report	455,003 04
The amount now of funded debt	414,654 35
Total amount now of funded and floating debt	9,256,654 35
Average rate, per annum, of interest on funded debt	6.9 per cent.

Cost of Road and Equipment.

	By last report.	By present report.
Graduation and masonry	$5,306,575 13	$5,351,110 42
Bridges	262,805 35	263,205 35
Superstructure, including iron	2,239,782 11	8,239,782
Pass'ger and freight stations, buildings and fixtures, engine and car hou's, mach'e shops, machinery and fixtures	742,151 83	744,768 82
Land, land dam'ges, and fences	887,383 54	899,046 19
Loc'mot's and fixt's, and snow-plows	536,103 12	536,103 12
Passenger and baggage cars	265,323 53	265,323 53
Freight and other cars	380,946 05	380,946 05
E'gin'ring and agencies	707,919 30	707,994 05
Total cost of road and equipment	$11,828,989 96	$11,388,279 64

The length of the road is 144 miles; the length of double track and sidings is 106 miles. The number of engines employed, 52; passenger, etc., cars, 138; freight cars, 511.

The cost of maintaining the road or real estate

of the corporation was $217,766 19. The repairs of machinery cost $158,952 64. The cost of operating the road was $708,827 78.

Railroad Earnings.

The revenue of the Baltimore and Ohio Railroad for December, was as follows:

MAIN STEM.

From Passengers	$39,965 25	
" Tonnage	248,849 67	
" Mails	8,041 34	
" Express	6,321 24	
		$303,087 60

WASHINGTON BRANCH.

From Passengers	$23,187 34	
" Tonnage	6,805 17	
" Mails	1,000 00	
" Express	1,350 00	
		32,242 51

N. W. VIRGINIA BRANCH.

From Passengers	$2,055 17	
" Tonnage	17,310 18	
" Mails	866 67	
		20,232 02
Total		$355,662 13

The following is a comparison of the revenue of the road for the months of December, 1858 and 1859:

	1858.	1859.
Main stem	$277,781 00	$303,087 60
Washington branch	35,602 31	32,242 51
N. W. Virginia branch	22,818 94	20,232 02
Totals	$336,202 25	$355,662 13
Net increase December, 1859		$19,459 88

The fiscal year of the Company commenced with October. The revenue for the first quarter of the year compares with the same period of the previous year as follows:

	1859.	1858.
October	$416,929 61	$391,395 10
November	431,287 56	380,879 75
December	355,662 13	337,202 25
	$1,203,879 30	1,109,477 10
	1,109,477 10	
Increase present year	$94,402 20	

The receipts of the Grand Trunk Railway of Canada, for the week ending January 7, 1860, were $49,332 52
Corresponding week last year 29,411 90
Increase $19,920 61
Total traffic from July 1, 1859 $1,428,276 80
Do. for same period last y.. 1,205,774 82
Increase $217,501 98

The following is the December statement of the Illinois Central Railroad Company:

Land Department.

Acres Construction Lands sold	1,346.15	for	$20,888 09
Acres Interest Fund L'ds sold	360.00	"	5,000 00

Total sales during the month	1,871.79	for	$28,815 61
To which add Town Lot sales			247 90
Total of all			$29,063 53
Acres sold since Jan'y 1, 1859	28,063.45	for	$145,029 89
Acres sold prev'sly	1,229,835.33	"	15,637,148 95
Total	1,257,898.78	for	16,052,178 84

Construction Bonds canceled in Dec., 1859	$42,500 00
Construction Bonds canceled previously	1,275,000 00
	$1,317,500 00
Free Land Bonds canceled in Dec., 1859	5,000 00
Free Land Bonds canceled previously	177,000
	182,000 00
Total Bonds canceled up to Dec. 31	$1,499,500 00
Cash receipts in Dec., 1859	$61,310 89
Do. since Jan'y 1, 1859	590,530 47
Total cash and bonds received to Dec. 31, 1859	$3,307,428 00

Traffic Department.

Receipts from passengers	$65,119 36
Do. freight	111,311 25
Do. mails	6,358 23
Do. rent of road	5,943 42
Do. other sources	3,589 38
Total receipts in December, 1859	$192,321 74
Do. do. 1858	153,993 78
Increase	$38,327 96
Receipts from Jan. 1, to Dec. 31, 1859	$2,119,377 90
Do. do. 1858	1,976,568 52
Increase in 1859	$142,809 38

	1856.	1857.	1858.
Traffic	$2,434,878.59	2,293,964.57	1,976,578.52
Work'g expenses	1,444,546.19	1,791,231.14	1,419,954,80
Balance	$990,332.40	$502,733.43	$556,623.72

The earnings of the Erie Railroad for the month of December, 1859, were $414,764 24
Earnings December, 1858 383,426 10
Increase $31,338 14

The earnings of the Ohio and Mississippi Railroad for December, 1859, were:

Passengers, etc., 1859	$126,666 23
Do. 1858	104,030 98
Increase	$22,635 25

The earnings of the Pacific Railroad of Missouri for December were:

	1858.	1859.
Passengers	$24,515 49	$28,283 52
Freight	24,531 28	28,743 05
Mails	2,037 50	2,100 00
	$51,084 27	$54,076 57
Increase		$2,992 30

SOUTHWEST BRANCH.	1858.*	1859.
Passengers	$162 30	$520 00
Freight	277 63	758 00
	$439 98	$1,278 00
Increase		$838 07

* 14 days.

The following is a comparative statement of the earnings and expenses of the Buffalo and State Line Railroad for December, 1858 and 1859:

EARNINGS.

	Passengers.	Freight.	Oth. Sour's.	Totals.
1858	$27,292.84	52,161.24	1,174.20	81,078.28
1859	27,634.33	55,480.41	1,416.19	83,880.96
Inc.		2,819.20	241.99	2,802.68
Dec	258.51			

EXPENSES.

	1858.	1859.	Decrease.
Construction	$543 01		$543 01
Maintaining road	19,772 98	15,684 87	4,088 61
Repairs machin'y	4,538 36	5,296 46	*758 10
Operating	20,179 50	14,550 68	5,628 82
Totals	$45,033 85	35,531 51	9,502 34

* Increase.

The earnings of the Central Railroad Company of New Jersey for the month of December were:

December, 1859	$86,706 04
" 1858	79,616 98
Increase	$7,089 06

The business of the North Pennsylvania Railroad for the last two months of 1859, shows as follows:

November, 1859	$31,780 38
December, 1859	31,209 28
Total	$62,989 66
Same time last year	51,957 94
Increase	$11,031 72

—or rather more than 21 per cent.

Taxation of New York.

The following table exhibits the aggregate amount of State, county and town taxes paid in each year from 1843 to 1857, inclusive, and the amount paid respectively on real and personal property:

Year tax levied.	Aggregate amount of State, Co'ty and Town Taxes.	Valuation of real estate.	Valuation of personal property.
1843	$3,965,180	$476,999,430	$118,602,064
1844	4,243,701	480,027,609	119,612,348
1845	4,170,527	486,490,121	115,988,895
1846	4,647,461	496,483,411	119,880,236
1847	4,843,575	509,496,855	121,162,201
1848	5,295,458	526,624,853	125,663,318
1849	5,548,981	536,162,901	129,926,625
1850	6,312,787	571,690,707	153,183,486
1851	6,759,438	888,237,812	196,538,263
1852	7,007,688	946,467,907	221,802,950
1853	9,326,763	1,015,762,791	249,270,727
1854	9,638,279	1,091,514,033	272,638,110
1855	11,678,015	1,107,272,715	294,012,564
1856	12,743,179	1,112,133,136	316,506,930
1857	15,166,309	1,111,551,629	319,897,155

Year tax levied.	Amount of tax levied on real estate.	Amo'nt of tax levied on personal estate.
1843	$3,177,609 03	$787,571 11
1844	3,396,713 33	846,388 48
1845	3,379,749 15	790,778 80
1846	3,743,221 58	904,240 80
1847	3,913,028 00	930,547 60
1848	4,275,441 23	1,020,017 00
1849	4,466,619 28	1,082,362 00
1850	4,978,743 33	1,334,044 00
1851	5,584,773 26	1,224,665 00
1852	5,677,238 08	1,330,450 00
1853	7,483,930 11	1,842,833 86
1854	7,712,730 25	1,925,549 38
1855	9,227,784 18	2,450,281 51
1856	9,920,072 09	2,823,107 64
1857	11,776,974 09	3,389,335 53

This statement shows that only about one-fifth of all taxes falls upon personal property, while real estate pays four-fifths.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, etc., etc.

An *asterick* (*) occurring in the column headed "Rolling-Stock," signifies that the cost is included in that of "Railroad and Appurtenances." A *dash* (—) signifies "nil." Running *dots* (.....) signify "not ascertained." Land-Grant Railroads are in "*italics*."

Railroad Reports.

RAILROAD COMPANIES will oblige us by sending us copies of their Reports as soon as they are published.

American Railroad Journal.

Saturday, January 21, 1860.

Southern Pacific Railroad.

It is stated that Mr. J. Edgar Thomson, of the Pennsylvania Railroad, has accepted the Presidency of the Southern Pacific Railroad; and that V. K. Stevenson, President of the Nashville and Chattanooga, is to act as its General Agent. Samuel Tate, of the Memphis and Charleston, is to be Commissioner of the Land Department.

This is certainly a strong array of names. All of these gentlemen occupy high positions, and are widely and favorably known as successful men, possessing a wide experience in railway affairs. If they all give themselves heartily to this new enterprise, their well known energy and abilities cannot fail to accomplish very important results.

We presume these gentlemen, if they have connected themselves with this work in the manner stated, propose no half-way measures, nor the construction of a section of road of only a few hundred miles in extent. If they had no objects beyond this, they could have found plenty of work nearer home.

One thing is certain. A Pacific Railroad will never be *completed*, unless undertaken; and all have seen enough of railroads to know that what had a very small, and often, apparently inadequate commencement, ripens, in time, into a great and successful achievement. We are not informed as to the plans of these gentlemen, but we suppose, that in due time, they will bring out a scheme which shall bear some proportion to the magnitude of their undertaking. They all know how to build railroads, and the difficulties in the way of their construction, and have measured well, we presume, the difficulties before them.

Should they commence their road and push it vigorously forward, they will have gained one important advantage. By attracting the attention of the country, they lay the foundation of a conviction that theirs is the best route, and they are to be the successful competitors for the great prize. In a moral point of view this is a very great advantage, and one which they will not be slow to turn to account.

The first point aimed at, we presume, is El Paso. The territory traversed thus far, 800 miles, is in the State of Texas. Beyond this, to the eastern boundary of California, the assistance of the general government we take it, will be sought. San Diego will be the first point made for on the Pacific. It has a pretty good harbor, but it is not San Francisco. That point, we presume is embraced in the programme. The majority of the people of California prefer a more northern route for fear, that should a road be constructed to San Diego, it would be a long time before it would reach San Francisco.

Pittsburg and Steubenville Railroad.

At the annual meeting of the stockholders of the Pittsburg and Steubenville Railroad, recently, Mr. Isaac Jones was elected President. The affairs of the road are in much the same state as when the last annual meeting was held, and the prospects of its completion but little more promising.

The Pro Rata and Toll Bills before the Legislature.

There now seems to be every prospect that bills to reimpose upon the railroads of the State the canal tolls, and to compel them to carry *local* at the same rate as *through* freights, now pending before the Legislature of the State, will become laws. If so, a blow, fatal to the interest of our railroads, will be dealt. It will fall with peculiar force upon the Erie, as this road now finds it a most difficult task to meet the interest on its liabilities, for which, at the present time, it is quite unequal. Should these measures become laws, and continue in force any considerable length of time, the stock of the Central will be where the unsecured bonds of the Erie are now, if not at figures still lower.

The success of these propositions is greatly to be regretted on other accounts as well as the injury they will work on our railroads. They are based upon the falsest principles of political economy. Commerce should never be subjected to any changes beyond the cost of transportation, and a fair return upon the capital invested in the means of conveyance. Such undoubtedly are the views of our people, could the question be fairly presented to them. But it has now become involved in the political maelstrom, where passion and personal interest override all other considerations. The Governor seems disposed to make the most of the wrong side of this matter, to advance his political aspirations. As he leads the dominant party in the State, there is every reason to suppose he will carry the measures he has recommended.

In the meantime, the two great companies most interested seem to be entirely inactive, or to rely upon *lobby* operations, rather than meet the case fairly upon its merits, in which issue, success must be the certain result. This question never has been referred to in any report ever made by either company. They have never taken the first step to disabuse or enlighten the public mind. The Central Company have not, during the whole period of its existence, made a communication directly to its stockholders Complete retiscence has been its policy. It has allowed the storm to gather which now seems about to break upon it; but which, it has been in its power to dissipate, by the publication of a few well-timed arguments. But it has preferred silence, and to allow an opposition, contemptible in the outset, to go on increasing in strength, till it has seized the chair of State, and to become the predominant party. It is, in this way, the author of the mischief from which it is about to suffer.

Nashville and Northwestern Railroad.

Col. Stevenson, the President of this road, has succeeded in making the purchase of sixteen thousand tons of iron, all that will be required for the Nashville and Northwestern road. Twelve thousand tons were purchased in Europe, and the balance in Pennsylvania. About one thousand tons have already been delivered at Hickman, Ky., and the balance is to be delivered at the rate of one thousand tons per month.

The cost of the iron will amount to about $1,100,000, of which $80,000 has been paid. The twelve thousand tons to be purchased in Europe is to be paid for in one-fourth of the company's second mortgage bonds and three-fourths in State bonds, both at par. The inland freight, amount-

ing to about $100,000, is to be paid in the same manner.

All the important work of grading, masonry and bridging on the entire line, with the exception of the bridge over the Tennessee river, has been contracted for, and is being pushed forward in such a manner as to give assurance that it will be completed within contract time. The company have already drawn $300,000 of State bonds, and will draw $200,000 more in sixty to ninety days. This fact shows the rapidity with which the work is being pushed forward.

New York and Erie Railroad.

We give herewith statements which are copies from the General Ledger of the New York and Erie Railroad, showing the financial condition of this road, as it was on the 30th of September, 1852, and for each year succeeding, to the present; —also statements showing the earnings and expenses of the road, for a period of seven years consecutively, ending with September 30. The expenses include all kinds of current expenditure, except the interest on the company's indebtedness, and undoubtedly embrace large sums that properly belong to construction, and would have been charged to this account by most companies, and perhaps by the Erie, had it been flush of cash. In this case, all such expenditures were paid from earnings, which has been the only resource of the company for a year or two past. The result for the past seven years, consequently, is probably as unfavorable to the company as we have every right to expect the next seven years will be.

In this period, the gross earnings have been $36,935,567; ordinary expenses, $22,257,442; extraordinary expenses, including loss on steamers sold; rebuilding bridges; bad debts; running the Buffalo and New York City Railroad, etc., etc., $1,066,822; rent of Union and other roads, $659,-004. Total, $23,983,268, leaving a balance of net earnings, $12,952,299. The interest accruing on the funded and floating debt, in the meantime, was $11,824,800, showing a balance in favor of the road of $1;127,499. In the meantime, dividends to the amount of $1,953,265 have been paid, $1,000,000 being in *stock*. There has also been paid to the sinking fund, for the bonds due in 1875, $1,462,000.

These data are given to enable every person interested in the road to form his own opinion as to the value of the securities he may hold. The completion of the Long Dock will greatly increase the facilities of the company, and add largely to its business, but at the same time, it will add largely to its liabilities. The advantage, however, must be largely in its favor.

We have a right to expect for the future, a rapidly increasing business from the road. We presume it has been as large the past three months, as for any corresponding period since its first opening. The rates of transportation, unfortunately, have been very low, owing to the low price of nearly all the great staples of the country, and to the vigorous competition encountered on every side. Both these causes of low rates will probably continue for some time to come. The alternative for the company, consequently, is in reducing the cost of transportation.

Here is, undoubtedly, a wide margin for saving. Indeed, the future success of the road does not so much depend upon the amount of traffic coming to it, as to the economy and ability with which it is worked. If every cent that the road is capable of earning is saved, it may be made to pay a sum equal to the interest on all its liabilities. Unless this kind of success be achieved, the road must certainly go down.

Comparative Statement of Balances of General Ledger of the New York and Erie Railroad Company, on the 30th of September, 1852, '3, '4, '5, '6, '7, '8 *and* 9.

* Transferred to Construction.
† Deducted from Funded Debt.

This statement differs materially from the usual statement made of earnings, for the reason that they only include those immediately connected with the Traffic Department, whereas there are large expenditures outside the regular business. The company have also suffered heavy losses from investments in steamboats, which have been carried to *profit and loss*.

In the statement immediately preceding, no account is made of the sinking fund, to which $1,-462,000 have been paid.

The extraordinary expenses on account of leased roads, and payments made to the New Jersey Railroad Co., amounts to about $170,000 annually.

Sunbury and Erie Railroad Opening Celebration.

On the 15th of December, when the formal opening of the Western Division of the Sunbury and Erie Railroad was celebrated at Warren, among the speeches made was one by Thomas Struthers, Esq., of Warren, of which the subjoined is an extract copied from the *Erie Gazette* of December 22.

Upon the subject of the company's finances, Mr. S. gives very specific statements of cost, and commits himself thereto, and, also, to the opinion that the road will do "more" than earn "ten per cent. to the stockholders," without observation or qualification. Mr. Struthers said:

Upon 168 of the 280 miles, its entire length, the rail is now laid and the cars running. Of the remaining 117 miles, 80 miles are graded, and much work done on the 37 miles yet to be completed. It is, therefore, too late to entertain a doubt of the final success of the work at an early day. The work from Erie to Warren has been done with less money than any equal length of railroad in the State, and the portion remaining to be done is equally cheap of construction. By this time next year, no doubt, the celebration of the final construction will take place.

Will it pay? This question will best be answered by a glance at the cost of the road and the business it will have to do. It is safe to assume that the whole cost and equipment will not exceed $13,000,000; which will be represented by $7,000,000 of five per cent. and $1,000,000 of seven per cent. bonds, and $5,000,000 of stock. The trade opened up to it on the lake at Erie, seeking a transit to the Atlantic cities, is larger than the whole foreign commerce of the nation. It passes, by easy grades, through a fine region of farming country, covered with most valuable timber and underlaid by inexhaustible mines of bituminous and cannel coal and iron ore. The whole lake country and the Canadas furnish a market for these articles—particularly the coal. The Pennsylvania, the New York and Erie, and New York Central Railroads do each a business, yielding receipts to the amount of nearly $5,000,000 per year. Why will not this, which affords the shortest line with the easiest grades between the Northwest and all the cities of New York, Philadelphia and Baltimore, do as much? But assume that it will do but half as much as one of these, $2,500,000—adpropriate 50 per cent. of this to the working and keeping in repair the road, and $420,000 to the payment of interest on the bonds, and you have $830,000 which will pay 10 per cent to the stockholders, and lay up six per cent. for the sinking fund, or to make further improvements. The road, gentlemen, you may depend upon it, will do this and more.

Finances of New York.

The State Comptroller's Report for the fiscal year 1859, presents the following leading figures:

State Debt.		Annual Interest.
General Fund Debt	6,505,654 37	$354,606 10
Canal Debt, No. 1	11,665,098 99	614,263 04
Do. No. 2	12,000,000 00	710,000 00
Do. No. 3	642,585 49	34,629 28
Do. No. 4	2,500,000 00	150,000 00
Contingent Debt	570,000 00	.....
Total	$33,883,338 85	$1,863,498 42
Gross Canal revenue, 1859		$1,859,879 63
Expenses, repairs, etc.		897,878 96
Surplus revenue		$962,000 67
Warrants drawn on treasury for the year		$5,071,492 31
Transferred to school fund		23,976 60
Literature fund		3,460 50
U. S. deposit fund		5,891 63
L. I. R. sinking fund		697 92
Unpaid warrants, 1858		654 18
		$5,106,083 84
In treasury, September 30, 1858	$308,539 35	
Receipts of year	4,781,188 44	
From school fund	531 80	
Unpaid warrants	424 44	
		5,090,684 03
Deficiency of revenue		$15,399 01

STATE OF THE TREASURY.

Balance, Sept. 30, 1858		$565,959 42
Receipts of year		6,479,278 74
Warrants unpaid		424 44
		$7,045,662 60
Warrants drawn on treasury	$6,858,789 45	
Unpaid warrants of 1858	654 18	
		6,359,448 63
Balance in treasury Sept. 30, 1859		$686,218 97
The treasury owes:		
To the school fund		$450,327 82
Literature fund		101,550 25
U. S. Deposit fund		105,851 67
Mariners' fund		1,334 57
R. R. sinking funds		26,465 22
General fund		29,025 00
Total		$723,554 03
Due from United States Deposit fund	$21,935 15	
General fund deficiency	15,399 91	
		37,335 06
Balance in the treasury Sept. 30, 1859.		$686,218 97
Deficiency on revenues as above		$15,399 01
Unpaid appropriations in all		250,000 00
Whole deficiency		$265,399 01
Estimated receipts year ending Sept. 30, 1860		$2,994,485 00
Estimated expenses ending Sept. 30, 1860		2,815,071 88
Estimated surplus		$179,413 12

Of the General Fund debt, $45,000 is due in 1860, and $1,400,000 in 1861.

The aggregate amount of valuations is, viz:

Real estate (assessed)	$1,098,666,251 00
Personal estate (assessed)	315,108,117 00
Corrected aggregate valuations,	$1,416,290,887 00

The amount of taxes is as follows:

1⅛ mill tax for support of Government, and ⅛ mill tax for the completion of the canals, is	$2,458,613 92
¾ mill school tax is	1,053,873 04
Town tax is	2,361,603 47
County tax is	10,479,210 85
Total taxation	$16,353,301 38

The rate of tax $1 valuation is 11.54 mills.

Finances of New Jersey.

The message of Governor Newell, of New Jersey, furnishes the following statement of the financial affairs of the State:

Whole amount of receipts during the year 1859	$207,740
Balance in Bank, Jan. 1, 1859	13,046
Total	$220,786
Disbursements.	
Ordinary expenses	$136,001
Extraordinary expenses	65,496
	$201,498
Appropriations unpaid.	
Balance of appropriation of 1859 to support Normal School	700
Appropriation of 1857 to Managers of Lunatic Asylum	9,000
Balance of 1859 to Public Schools	20,598
Balance of 1856 to Lippincott's Gazetteer	4,800
Estimated Receipts for 1860.	
Transit duties	$125,000
Dividends	24,000
Tax on capital stock	40,000
Interest on bonds and mortgages	2,773
Pedlars' licenses	1,800
Forfeited recognizances	500
United States for rent	800
Assessments on private acts	4,060
Total	$198,878
Balance in Bank Jan. 1, 1860	19,288
Total	$219,166

The liabilities of the State are as follows:—

Standing debt	$95,000
Unpaid appropriation for Normal School, 1859	700
Unpaid appropriation for Lunatic Asylum, 1857	9,000
Balance due schools	20,598
Lippincott's Gazetteer (not presented for payment)	4,800
Prison liabilities	3,000
Total	$133,096

Finances of Iowa.

The finances of this State, as shown in the message of the Governor, are in a satisfactory condition. The liabilities of the State amount to $352,492 37. Of this sum, $122,295 75 is part of the school fund which belongs to the State, and is held by it in trust for educational purposes, and on which the State pays interest; so that the actual liabilities only amount to $230,196 62. The balance now in the treasury, and in the course of payment through the banks, the delinquent taxes now due from the counties, and the tax of the year 1859, amount in the aggregate to $628,609 47. The Auditor estimates the expenditures for the two fiscal years commencing Nov. 7, 1859, and ending Nov. 1, 1861, exclusive of appropriations for charitable institutions and other special purposes, at $401,719 72, while the estimated resources of the State for the same period, exclusive of the saline and school fund, is put down at $858,609 48. The expenditures for ordinary purposes during the two fiscal years ending on the 7th of November, 1859, amount to $366,198 56, while the extraordinary expenses for the same period amount to $212,157 45—an aggregate of $578,356 02.

Mariotta and Cincinnati Railroad.

This road is to be sold. Below we give the substance of the judgment and decree of the court, (of Common Pleas for Ross County) ordering the sale. The Court decided—

1. That the M. & C. R. R. Co. is a corporation with the powers, &c., as stated in the petition.

2. That said company did execute and deliver the three several mortgages or trust deeds named in the petition, to wit:

The 1st mortgage to James Winslow, dated 1st October, 1852, conditioned for the payment of the company's bonds for $2,500,000.

The 2d mortgage to James Winslow, dated 1st May, 1854, conditioned for the payment of the company's bonds for $2,000,000.

The 3d mortgage to Edwin Ludlow, dated 17th April, 1857, for $1,500,000.

3. That all of said mortgages were recorded in the several counties through which the road passes, and that the same are severally valid as conveyances of the property, rights, privileges and franchises of said company in said mortgages mentioned, and as security for the payment of the bonds severally mentioned therein.

4. That the whole of the bonds secured by said 1st mortgage were issued and are now outstanding, and that the company has failed to pay the interest coupons attached to the same, and falling due 1st Jan. and 1st July, 1858, 1st Jan. and 1st July, 1859, and 1st Jan. 1860; and amounting, including interest from said several dates to the rendition of the decree to $464,187 50.

5. That all of the bonds secured by the 2d mortgage were issued and outstanding, and that the company has failed to pay the interest coupons falling due 1st Nov. 1857, 1st May and 1st Nov. 1858, and 1st May and 1st Nov. 1859, and amounting with interest to date of the decree, to $374,850.

6. That the bonds secured by the 3d mortgage were issued and outstanding, and the company failed to pay the interest coupons due 1st Sept. 1857, 1st March and 1st Sept. 1858, and 1st March and 1st Sept. 1859, amount at date of decree, $282,763 50.

7. That the conditions of said mortgages were forfeited, and the title to the property conveyed thereby to the Trustees had become absolute, at law, subject only to the equitable right to redeem by payment of the unpaid interest.

8. That said railroad company is insolvent, unable to pay its debts, to prosecute its business, to operate the road and to repair its bridges, culverts, &c., so that passengers and freight, and the agents and servants of the road, may pass over it in safety.

9 and 10. That certain chattel mortgages given to Niles & Co., and Barney, Parker & Co., have been partly satisfied by the delivery to them of the chattels covered by them, and are not liens on the property covered by said 1st, 2d and 3d mortgages.

11. That the first mortgage constitutes the first lien on the company's road and branches, made or to be made, the right of way, the land occupied thereby, the superstructure and tracks thereon, bridges, viaducts, culverts, fences, depot grounds and buildings, appurtenances and all franchises, rights and privileges of the company in and to the same, as described in said mortgage, but this finding is not intended to, and does not determine, that the rolling stock, &c., on which the plaintiffs claim to have the elder lien by virtue of said 3d mortgage, is included in the description of the property named in the 1st mortgage, but that and all other questions touching the claim of said 3rd mortgage to such priority, is reserved for future decision.

12. That the 2d mortgage is the second lien, except as to the rolling stock, &c., as to which the question is reserved.

13. That the 3rd mortgage is the third lien on the property described in the 1st and 2d mortgages, but the court being informed that none of the rolling stock, &c., was owned by the company at the date of said first two mortgages, but was acquired subsequently, and not now being advised whether said rolling stock, &c., falls under the exclusive lien of said two pre existing mortgages, or under the exclusive lien of said 3d mortgage, reserve that question for decision until the time arrives for the distribution of the proceeds of sale, and nothing in this decree shall be held to prejudice the right of the 3d mortgage bondholders to assert such priority, if such right they have, nor to prejudice the right of any creditor not a party to this suit, to assert any right or lien against said company or its property which may be superior to the rights or liens of said mortgage bondholders, nor to prejudice any right of the Lawrence Machine Shop to assert that against the proceeds of sale, any right which it may have to four locomotives claimed by it.

14. That said property, franchises, rights, privileges and appurtenances, and whether usually regarded as real, personal or mixed, cannot be so divided as to be sold in parcels to advantage, but should be sold as an entirety, leaving the proceeds of sale for distribution according to the several rights of the parties.

Commerce and Navigation.

The constant but gradual growth of our leading interests, as they are statistically exhibited from year to year, is considered so much as a matter of course, that it excites no surprise and but little interest; and in order to obtain a clear view, and to form a just idea of this growth, it is necessary to compare the present with a point somewhere in the past. In looking over an old volume of the *North American Review*, recently, we came across a table showing the extent of our navigation in 1833, and the ownership of each State, which we copy below, amounting in round numbers to 1,400,000 tons. He would have been considered a bold man, and not, perhaps, a very sound one, who should then have predicted that this tonnage would be doubled in twenty-five years, yet the result is an increase in that time, not of 100 only but of 450 per cent. In addition to the table copied from the *Review*, we give the comparative figures for 1858, showing the distribution of this great interest among the several States, and the gain made by each:

	1833.	1858.	Gain.
Maine	182,714	747,400	554,686
Massachusetts	395,924	794,660	398,736
New Hampshire	17,126	33,410	16,284
Rhode Island	40,607	48,781	8,174
Connecticut	52,878	114,716	51,838
Vermont	1,531	7,514	5,933
Tot. for N. Engl'd.	700,780	1,746,481	1,045,701
New York	319,209	1,600,726	1,281,517
New Jersey	33,143	114,654	81,511
Pennsylvania	88,162	284,418	196,256
Delaware	13.265	22,275	9,010
Maryland	80,702	249,560	168,858
District of Colum.	17,225	33,317	16,092
Virginia	43,807	79,880	39,003
North Carolina	32,142	43,178	11,036
South Carolina	15,560	62,012	46,457
Georgia	8,651	39,594	30,943
Ohio	9,683	118,350	108,667
Tennessee	3,047	11,412	8,365
Michigan	1,753	69,589	67,836
Alabama	7,240	47,443	40,203
Mississippi	926	2,552	1,627
Louisiana	6,171	213,736	207,565
Florida	3,002	20,987	17,905
Kentucky	..	..	29,037
Missouri	..	..	61,266
Illinois	..	..	73,905
Wisconsin	..	..	24,782
Indiana	..	..	4,266
Texas	..	..	11,585
California	..	..	79,813
Oregon	..	..	5,030
	1,384,538	5,049,719	

In 1833 steam was in its infancy. The steam tonnage of that year was a trifle over 100,000 tons, against 730,000 in 1858—an increase of more than 600 per cent. The fishing business in this time has been, comparatively, nearly stationary—employing 110,000 tons in 1833 against 140,000 in 1858. This slow growth is owing to the scarcity of mackerel and the difficulty of making fares of late years, the tonnage in that branch being only half what it was in 1833, while the cod fishery has nearly doubled.

But the most remarkable feature appears in the coasting trade, which employed 2,360,000 tons in 1858 against 744,000 in 1833; nearly a million tons more than our whole tonnage twenty-five years ago. The rapid increase of this trade is more gratifying in every point of view than that of any other, as showing a continually increasing interchange of commodities between the several sections and States of the Union, tending every year to render us more independent of foreigners, and drawing closer the bonds of Union by the strong chain of mutual interest.—*Boston Journal.*

Logansport and Burlington Railroad.

This important work was fully opened to the public on the 26th ult., when a train passed over the whole line of the road from Logansport to Burlington. That portion of the road between the Chicago Branch of the Illinois Central Railroad and Logansport road, two miles, has been constructed since the 16th of May last, a period of only 7 months and 9 days, a despatch unexampled in the construction of railroads. During this time, three truss bridges, of the aggregate length of 1,342 feet—one 907 feet long over the Tippecanoe river, being 73 feet above the bed of the river, have been constructed; and three structures of trestle work, of the aggregate length of 4,050 feet—one 850 feet long and 47 feet high, at Crooked Creek. The three contain 790,000 feet, board measure, of timber.

In the construction of the road during the seven months there have been excavated 675,000 cubic yards of earth; 13,800 cubic yards of rock; 2,282 cubic yards of masonry have been laid up, and 1,255,000 feet, board measure, of timber and lumber have been procured, hewn, framed and raised into trestle work, culverts, cattle guards and other structures, besides the timber piers and abutments at Tippecanoe river; and 160,000 to 170,000 crossties have been delivered—all of which timber, including that of which the bridges were built, was growing in the woods on the 1st of June.

Calais and Baring Railroad.

The earnings of the road for 1859 amounted to	$29,191 60
Expenses	13,568 15
Net	$15,623 45

The net earnings have been applied as follows:

For coupons 1st mortgage bonds	$6,000 00
Second do.	1,050 00
Dividend of 4 per cent.	4,000 00
Interest on floating debt	239 28
Sinking fund	4,000 00
Balance unappropriated	334 22

The paid-up capital of the company is $100,000.

Funded debt, 1st mortgage bonds	$110,000
Do. 2d do.	13,300
Floating debt	3,100

JOHNS & CROSLEY.

DELAFIELD & BAXTER'S,

Late OGDEN & DELAFIELD,

ROSENDALE CEMENT.

WE are prepared to enter into arrangements for supplying our CEMENT for public works, or other purposes. We **warrant it equal in every respect** to any manufactured in this country. It attains a great degree of hardness, sets immediately under water, and is a **superior article** for masonry coming in contact with water, or requiring great strength.

For sale in tight barrels, well paperred, on application at their office, by **DELAFIELD & BAXTER, 104** Wall st.

The above CEMENT is used in most of the fortifications building by government. 45

Rosendale Hydraulic Cement.

THE NEWARK AND ROSENDALE CEMENT COMPANY are now receiving **fresh from the Mills** their approved ROSENDALE CEMENT, warranted **pure** and **free from quick lime**, and which has given such **general satisfaction** in the various government and other public works in which it has been used. Purchasers and shippers should be careful to get the **genuine ROSENDALE CEMENT**, branded "NEWARK AND ROSENDALE," "H. WILDE." This Cement does not swell and burst the hoops when stored in warm climates. It is packed in tight **kiln dried barrels**, and is specially adapted for safe shipping on long voyages. Terms reasonable, which may be known by addressing,

JOHN H. STEPHENS, President, Newark, N. J., or
HENRY WILDE, Secretary, 90 Wall st., N. Y.

THE LAWRENCEVILLE MANUF'G CEMENT COMPANY,

OFFICE 96 WALL ST,

NEW YORK.

THIS Company manufacture **ROSENDALE HYDRAULIC CEMENT** of a superior and uniform quality, and are constantly receiving it **fresh** from their Works at Rosendale. Particular attention paid to grinding **fine,** and packing in superior casks. We warrant it to set under water, and attain a hardness excelled by no Cement manufactured. It has met the approval of Government, and we are at present supplying the fortification now in course of erection, together with Water Works and Public Buildings.

For sale upon favorable terms by addressing.

WM. N. BEACH, President.
CHAS. E. LAWRENCE, Sec'y.

CEMENT, PLASTER, ETC.

THE HUDSON RIVER CEMENT CO.

HAVE commenced manufacturing for the season, and can now furnish a very superior article of fresh **Rosendale Cement, Calcined Plaster, Farmers' Plaster** and **Marble Dust.** Address

HUDSON RIVER CEMENT COMPANY,
12 **Jersey City, N. J.**

HOFFMAN'S ROSENDALE CEMENT,

OFFICE, 93 WALL ST., NEW YORK.

THE LAWRENCE CEMENT COMPANY are prepared to receive and execute orders for their Cement, to any extent that may be required. They would particularly call the attention of purchasers to the distinguishing brand of their manufacture, viz.: **HOFFMAN'S ROSENDALE CEMENT.** This seems to be necessary, as they have established a reputation for the superior quality of their Cement, and there are various other brands offered, as "Rosendale" Cement. It has the unqualified approbation of the most eminent Architects and Engineers, being used in almost every department of the Works under Government. It is put up in the most careful manner, each barrel being well lined with paper, and will be delivered on ship-board, in this city, on the most favorable terms. Particular attention given to shipping orders, and Freight obtained on the best terms.

Street Railways in New York.

To F. A. CONKLING, ESQ., *Member of Assembly from the City of New York.*

SIR:—The modern invention of Street Railways, instead of being controlled and managed in a manner worthy of an improvement so manifest and important in the transportation of passengers between distant points in large cities, has so far served only the purposes of speculation for shrewd and managing schemers. Instead of realizing to the public the full benefits which ought to result from their undisputed right to use all the mechanical expedients involved, (for there is no question of patents at issue, so far as the main features of street railways are concerned,) these facilities, and the routes for their use, have been to this time forestalled and monopolized by a few associations of individuals, who, by all sorts of lobbying and legislature chicanery, have obtained grants through many of our principal thoroughfares, with the right to collect a toll so far beyond the cost of service rendered, that what otherwise would be an invaluable public blessing, is fast becoming an unbearable imposition. Their claim to the use of these routes, and to the collection of the exorbitant fares allowed by their grants, might be submitted to with more patience, in view of the indispensable conveniences which railways furnish, if the accommodations provided were not most execrable.

It would seem to be unnecessary to argue at any length the advantages street railway cars possess over omnibuses. Their superiority in every respect, whether as to their mechanical features or their convenience to the passenger, or the public, admits of no dispute. They have become a necessary part of the machinery of a great city, and could no more be dispensed with than our gas or our water works.

The street railways of New York during the year 1858 carried about 35,000,000 passengers. To transport this number in omnibuses would have required about 900 more of these vehicles than we now have running in our streets. It is easy to conceive what, with this additional number, would have been the condition of our great thoroughfares, both in regard to the state of their carriage ways and the passage of other vehicles. As it is at present, Broadway is but one great procession of omnibuses; everything else is overshadowed by them; and the crossing of the street by a pedestrian, is a feat requiring long practice, combined with the greatest agility.

It is not, as I before stated, my present aim to advocate the superiority of cars over omnibuses. Street railways are no longer an experiment; and I only refer to this question as warranting the assumption, that, before long, the facilities afforded by railways must be extended over the entire city. Nothing can arrest their progress; but it is, and has been, retarded by the fact that the consummation desired is not approached, as a great public measure and for the public benefit, but by separate and isolated schemes, for the purposes of public plunder, and without any plan for a *system* for the whole city. In the scramble for spoils, each faction, to a certain extent, for a year or two past, has had power to defeat the schemes of the other, and those who have had patriotism enough to wish for, and foresight to see the necessity of, a general system, have been obliged to stand by and see the Kilkenny fight, contented that no more harm has been done, and no more barriers thrown in the way of the desired end. That renewed attempts will be made, at this session of the Legislature, to force through several more of these isolated schemes, is quite certain. Every new grant of this kind, is but a new barrier to the adoption of a thorough system. The subject, therefore, of street railways—their cost of construction, their maintenance and their profits—should be thoroughly ventilated, before every opportunity for a correction of the evils complained of, is lost; and the control of our avenues of travel to pass into the hands of the greedy speculators, whose whole aim is to monopolize this business, receiving the highest rate of compensation, and providing the lowest order of accommodation. That I do not exaggerate when I say *exorbitant* fare, will be proved by the following tables, deduced from the reports of the Street Railways of New York for the year 1857. The reports for 1858 would show still more extraordinary statements, if they could be analyzed; but they are so designedly and ingeniously befogged and muddled in the figures, that the items cannot well be got at separately. The Fourth Avenue road is not included in the statement, as the company makes no report of its street business, separate from the operations of the Harlem road. The Ninth Avenue road was not then in operation.

Avenue.	Length.	No. of cars.	Cost of do.	No. of horses.	Cost of do.	Cost of r'l estate, &c.
8th.	4.89	61	$48,800	471	$77,500	$207,124
6th.	4.00	98	61,101	354	71,927	166,915
3d .	6.00	71	50,000	529	80,000	40,000
2d .	8.00	58	43,500	368	55,200	40,000
Tot.	22.89	288	$203,401	1,722	$284,627	$454,039

Avenue.	Total cost of track, &c.	Cost per mile of do.	Cost per mile of all items.	Total cost.
8th ...	$475,000	$97,137	$164,000	$808,424
6th ...	555,012	138,750	213,989	855,957
3d	1,000,000	166,666	195,000	1,170,000
2d	764,664	82,578	109,374	903,364
Totals.	$2,794,676	$122,100 Average.	$163,300 Average.	$3,737,745

The total number of miles embraced in the statement is nearly 23—the average cost of which is represented at $163,300 per mile; making a grand total of $3,737,745, upon which the public are expected to pay from 8 to 12 per cent. dividends.

Does any sane man believe that these roads actually cost one-third of that amount? The following statement will give in round figures and with liberal margins, the sums for which these roads were, or ought to have been, built and equipped:

288 cars, at $700 each	$201,600
1,722 horses and harness, at $150 each	258,300
Real estate	300,000
22.89 miles track, $15,000 per mile	358,350
Total	$1,118,250

—or an average, per mile, of about $49,000.

This is less than one-third of the cost reported—the difference being, in gross, $2,619,495.

Now there is not a practical railroad man in existence who will not assert that, with *one* million dollars, he could commence to day, and within six months, construct and equip 23 miles of better roads, with better cars, better horses, and better accommodations in every respect.

So much for the cost of these roads. There is no dodging the facts. The figures stand out so that there is no mistaking them. Where it is represented that a mile of street rails, laid down in the pavements, cost $122,000, as an average for all the roads, without a dollar's worth of grading, and without the equipment of a single horse or car, he must, indeed, be a man of large credulity who can swallow such a statement. The articles of cost of track are few and simple. A very excellent street railway may be constructed for the following sums:

100 tons of rails	$5,000
80,000 feet timber (B. M.)	1,600
Spikes, &c.	100
Labor, laying down	800
Cost one mile single track	$7,500

—or $15,000 for double track.

This is a fair cost under the old plan of construction, with the clumsy sills and cross-ties, which experience has shown to be not only of no use, but a positive evil, entailing constant repairs and renewals, and obstructing the streets with the rubbish. A still better road than any in use in New York, can be laid at even a less cost.

The fairness of the estimate presented as the actual cost of street railways, is sustained by the reports of the Brooklyn City Railway Co., which, for the year 1857, stands as follows:

100 cars	$85,803
900 horses	135,502
Real estate	224,582
Tracks and grading	580,121
Total for 20½ miles	$1,026,008

—equal to an average of $50,000 per mile, and this too, with the cost of tracks represented at $28,319 per mile, or more than $10,000 per mile in excess of their actual cost.

The fact then cannot be disguised that the public of New York City are now paying to the railway companies at least $350,000 per annum, interest, on an entirely fictitious capital; for the reports for 1858, show the following earnings and expenses

Avenue.	Total cost of oper'n.	Total receipts.	Net receipts.	Pr. ct. on the rep'ted cost.
8th	$177,753	$338,410	$160,657	21.35
6th	178,226	280,617	102,391	11.98
3d	242,811	403,055	160,244	11.62
2d	119,704	227,457	107,753	10.72
	$718,554	$1,249,539	$531,045	13.30 Av'ge.

From this it will be seen that the average net earnings were 13⅓ per cent. on the reported cost, or over 40 per cent. on their actual cost. Does anything in the annals of speculation, upon a lamb-like enduring public, show like this? Let it be understood that this is an average statement. If we take an isolated case, we shall find still more astounding results. In the report for the year 1858, the Eighth Avenue road is represented to have cost $756,142—its entire length being five miles. It earned net, after paying every expense, $160,657, or 21.35 per cent. on its diluted capital.

A fair cost for this road would have been $250,000, so that it actually earned in that year 64 per cent! ! !

Take the Third Avenue road alone, and we find its cost, for six miles in length, reported to be $1,378,000, or at the rate of $229,682 per mile! ! ! Its net earnings for 1858 were $160,244—equal to 11⅔ per cent. on this enormous valuation; and 53 per cent. on its probable cost.

If we assume 10 per cent. to be a liberal dividend on investments of this character, it is not a difficult matter with these results to estimate the value of the grants which have been so rapaciously swindled from the public.

We have shown the real cost of these 23 miles of railroad to have been not far from $1,000,000; but to be liberal, let us call it $1,200,000—10 per cent. per annum on this amount would be $120,000. They actually earned net, as has been shown, $531,000, or $411,000 more than this amount. Capitalizing this excess at 10 per cent. per annum, and the result is, that the public have given to these companies privileges which are worth $4,110,000, or $180,000 for every mile of rails which have been laid down in the streets. With such facts staring us in the face; with the certainty before us that we have already saddled ourselves with a burden of taxation of nearly half a million dollars per annum, with no earthly benefit; and that in addition to squandering this annual sum upon a set of soulless corporations, made up of selfish and grasping individuals, we permit them to impose upon us in every conceivable shape, will the system longer be permitted? Will a Representative of the people in the Legislature of this State, with a knowledge of these matters, that no man who makes pretensions to a reasonable modicum of common sense dare deny, so far disregard every obligation of his position as to vote for any further grants of this nature.

That additional railways are required, and that more must be constructed, admits of no doubt; but when the public disposes of the routes, the public should have a *quid pro quo*. I do not mean to be understood that I am in favor of selling these grants even at what I have shown them worth. The money received for them would be but a new placer for the spoilsmen. As the five cent. rates would, under such a valuation, be still continued, it would amount strictly to a poll tax upon every passenger. It would be an unjust discrimination upon the class who ride in the cars, for the benefit of those who can afford more aristocratic vehicles.

The grant for such a system should be given not to the highest, but the lowest bidder—to that party who will give the greatest conveniences with the lowest fare.

Let us see what the fare should be. The following table shows the aggregate result of the operations for 1858 of the four roads referred to as compared with 1857:

Year.	Cost of Operation.	Receipts.	Net Receipts.	No. of Pass. car'd.
1857	$1,051,369	$1,587,581	$536,212	31,783,068
1858	1,007,265	1,659,534	652,269	32,535 506
Inc...	*$44,104	$71,953	$136,057	753,438

* Reduction.

	Cost of each passenger.	No. of miles run by cars.	Cost per mile run.	Net rec'ts per cent.
1857..	3.3 cts.	6,420,444	16.37 cts.	11.3
1858..	3.1 cts.	6,332,889	15.93 cts.	13.
Reduc.	0.2 cts.	87,555	0.44 cts.	*1.7

* Increase.

It will be seen that the cost in 1858 for every passenger carried was 3.1 cents; the reduction of cost from previous year being 6 per cent. Improvements in the management of these roads, and the economy which would naturally be exercised under a reduced rate of fare, but which is never used when such exorbitant profits are realized as at present, would no doubt reduce the cost to 2½ cents. But for the sake of the argument let us take 3 cents as the minimum. It would then cost to carry 35,000,000 passengers $1,050,000. Estimating a fair cost for these roads to be $1,200,000, and the net receipts to pay 10 per cent. should be $120,000. Add this to the above cost of operation and maintenance, and we have $1,170,000 as the gross receipts required. This would be obtained at a fare of 3⅓ cents per passenger. Every person now riding in these cars is therefore paying 50 per cent. more than the value of the service rendered him. True, a fare of 3⅓ cents is not practicable as a single rate, but it is practicable in packages of tickets. At a fare of four cents, the profits on 35,000,000 passengers would be $350,000, or about 30 per cent. on a liberal cost for these roads.

There is margin enough at a 4 cent rate to give us far superior accommodations. It would furnish us a place to sit. It would relieve us from being hung upon *straps*, and squeezed into a jelly, two or more times a day. The comfort and conveniences of our cars might be so enhanced that the cost for carrying each passenger could be increased to 3⅗ cents, and yet enough net receipts be left from a 4 cent rate to pay 10 per cent. The time must come when at least double the number of miles of railways we now have will be laid down in the streets of New York. Take the map of the city, and lay down upon it all the various stage routes which are now in operation, and then lay down a system of railways which will furnish far greater facilities, and it will be found to require not more than 40 miles in addition to the present roads. This can be done in such a way that a passenger may find a car to carry him between almost any two points he desires, at a single fare, without (as the saying is) making a gridiron of the city. This is what is required, and this can and will be carried out, unless all control is lost by suffering ourselves to be saddled by a few more of these gratuitous, 5 cent grants. How much better then, to commence now, with a well digested comprehensive plan, or if it is not advisable to carry it all out at once, at least commence with a view to its ultimate completion.

Forty miles of railways will be constructed within the next five years beyond a doubt, either at a fair cost, and 4 cent rates, or else at the usual average

of $100,000 to $250,000 per mile, with 5 cent rates.

Such a system as is here proposed, at 4 cent rates, would change the rates on the existing roads.

This 70 miles of railway would banish the outlandish omnibusses from all but a few side routes, and nearly the entire travel would be in cars. Who can doubt but that the number passengers carried would keep pace with the facilities. If the 30 miles now in operation carry 35,000,000 passengers, 70 miles will beyond a doubt carry 80,000,000. At 4 cent rates, the saving to the community would be $800,000 per annum in fares alone, besides as much more in the wear and tear of our pavements.

It is simply a question whether this enormous annual sum shall be forced from the public to glut the coffers of four or five soulless corporations, while we continue to ride in their dirty and crowded cars; or whether we shall keep the control and ride comfortably and quietly in clean vehicles, not only up and down through our longitudinal streets, but in almost any direction we may choose. The details of such a system are not at all complicated, and properly laid out, it need not interfere with or embarrass other travel, nor need Broadway be disturbed; and yet the great problem "how to relieve this thoroughfare" would be solved. The question as to the manner in which the various routes, forming such a system, could be determined on, and conflicting interests harmonized, I do not propose to discuss; but I believe that all this can easily be accomplished, if the public can only be awakened from its Rip Van Winkle sleep upon this subject. The difficulties surrounding this question will vanish as they are approached.

When the routes are fixed upon, so as to accommodate the greatest amount of population with the fewest number of miles, then let the right to construct and operate them be put up for public competition, and given to those parties who, under the proper guarantees, and under stringent conditions as to the character of the vehicles, the frequency and direction of the trips, the accommodations given to each individual passenger, &c., &c., will carry at the lowest rates of fare.

I believe a multitude of such parties could be found who would grasp at such grants at 4 cent fares with a reduction to 3 at the end of 5 years. This is the way in which the capabilities of street railways, as a great public convenience, can be most fully developed, and their benefits equitably and properly distributed, without laying a tribute upon the poor man's ride, either for the benefit of a purse-proud railroad corporation, or to lessen the taxes of that class of the community who can ride in their carriages.

Very truly yours,

CIVIL ENGINEER.

Chicago, Iowa and Nebraska Railroad.

The following is a statement of the earnings and expenses of this road during the last seven months of 1859:

	Earnings.	Expenses.	Difference.
June	$9,668 50	$5,208 87	$4,459 63
July	9,189 09	4,323 42	4,865 67
August	8,352 87	5,019 62	8,333 25
September	12,998 48	6,565 14	6,433 34
October	17,648 72	5,746 57	11,902 15
November	16,013 97	6,143 73	9,870 24
December	11,457 67	5,550 17	5,907 50
	$85,329 30	$38,557 52	$46,771 78

Steam Engineering in 1859.

(Continued from p. 864.)

STEAM GENERATION.—In the introductory remarks, our readers will have noticed how carefully any exaggeration has been avoided in speaking of *possible* economics in generating and using steam; and we have taken this course, knowing there are many practical engineers of the present day who do not hesitate to speak of 1½ and even 1 lb. of coal as sufficient to obtain an indicated H. P.; whether such statements will be borne out by any present or future improvements, time will prove. The reason we avoid what may be considered extreme views, is because we wish to stand on firm ground, and have all our statements supported by the general engineering experience of the country.

We propose, therefore, in the spirit of the introductory remarks, to allude simply to facts as they exist, and not to individuals, to attempt to separate the good from the bad, and to point out some of the legitimate improvements that can *always* be realized in the generation of steam, by faith in, and adherence to, the text with which we set out —that "*Heat is the Source of All Power in Steam.*"

Although the generation of steam or vapor of water has no necessary connexion with the machine in which the steam may be afterwards applied to produce motive power, yet it is generally the custom, in considering results, to mix the two together in such a way as to prevent the possibility of arriving at correct conclusions; the diameter of the cylinder is the dimension purchasers look to as the most important, whilst they receive, almost without comment, every variety and size of generator: the consequence of such a practice can be foreseen: the *amount of power* received for a given price varying to the extent of 30 and 40 per cent.

Elaborate and reliable experiments have been made to ascertain the quantity of heat necessary to evaporate a given weight of water, and we receive as ascertained facts the large amount of latent heat in steam, and the different quantities of fuel necessary to raise the temperature of a cubic foot of water from 32° to 212°, and to convert it from 212° into steam. We also take it for granted our readers are familiar with the expansive property of steam; if not, we cannot undertake to supply such elementary information.

In steam boilers we have two distinctive features —the fire-grate and the heating or absorbing surface—and they are so closely connected and mutually dependent upon each other, that if the relative proportion between them be altered, there is an immediate alteration in the results.

It happens that inexpensive boilers in construction are not necessarily economical in performance; on the contrary, if a small boiler is required to produce a large supply of steam, the result is a considerable waste of fuel; this remark applies to all description of boilers, for land or sea.

If all the heat developed in the combustion of 1 lb. of the best steam coal be utilized, it will evaporate from 14 lbs. to 15 lbs. of water at 212°. How near do we arrive at such a result in ordinary practice?—certainly not within 40 per cent. Ordinary land and marine boilers do not evaporate more than from 7 lbs. to 8½ lbs. of water at 212° per 1 lb. of fuel; in fact, it has been stated on good authority that the average duty of land boilers in the Lancashire districts does not exceed from 6 lbs. to 7 lbs. of water at 212° evaporated by 1 lb. of coal. There are instances of 10 lbs., 11 lbs., and 11½ lbs. of water at 212° being evaporated by 1 lb. of the best fuel; and if the late Newcastle experiments can be relied on, nearly 13 lbs. was evaporated; but this latter duty in an ordinary marine boiler, although with fresh water, is so far above what is realized in general practice, and so *very near* the theoretical value, that we cannot at present admit it in our calculations; it may, however, be conceded that fully 11 lbs. of water at 212° can be evaporated by 1 lb. of good steam coal—an improvement of more than 30 per cent. on the general practice of the present day.

In generating steam there are two chief sources of waste—radiation, and the heated gases allowed to escape through the chimney. The first can be partly removed by clothing the boiler with non-conducting material; the second is the most important and the most difficult to contend with.

In locomotives the temperature of the escaping gases is upwards of 1,000°; in land boilers, from 400° to 600°; and in marine boilers, from 500° to 900°; in each case depending to a great extent upon the relative proportion between the fire-grate and the absorbing surface, or, more correctly, between the amount of fuel consumed in a given time and the absorbing surface. And this brings us to the real practical difficulty of combining economy of fuel with the development of great evaporating power in a boiler of a given size and weight.

The amount of evaporation in a given time in steam boilers of the same type, is proportional to some extent to the difference between the temperatures of the escaping heated gases and the water to be evaporated with a given absorbing surface; the higher the temperature of the said gases the greater the evaporation in a given time, and the greater the amount of fuel required to evaporate a given quantity of water. On the other hand, the nearer the temperature of the escaping gases approximates to the temperature of the water to be evaporated, the less the evaporation in a given time, and the less the amount of fuel required to evaporate a given quantity of water.

In the above statements it is assumed in each case the boilers are of similar construction and worked under similar circumstances, the only difference being in the ratios of the absorbing surface to the amount of fuel consumed in any given time; the truth of the above is seen every day. In one case (we state of actual instances,) there is a marine boiler having 1,600 feet of absorbing surface, and 80 feet of fire-grate, or a ratio of 20 to 1, the combustion is at the rate of 24 lbs. per sq. foot of fire-grate per hour, the escaping gases have a temperature of upwards of 800°, 6¼ lbs. of water is raised from 100° to 260°, and evaporated by 1 lb. of fuel, and 190 cubic feet of water are evaporated per hour, or 1 cubic foot to 8½ sq. feet of absorbing surface.

In another instance, we have a marine boiler of similar construction and proportions, except in the ratio of fire-grate to absorbing surface, the latter being 1,200 sq. ft., and the former 40 sq. ft., or a ratio of 30 to 1. The combustion is at the rate of 16 lbs. per sq. ft. of fire-grate per hour; the escaping gases have a temperature of 450°; 8⅛ lbs. of water are raised from 100° to 270° and evaporated by 1 lb. of fuel, and 87 cubic feet of water are evaporated per hour, or 1 cubic ft. to 13¾ sq. ft. of heating surface.

These boilers are working under like circumstances, and, leaving out decimals, the figures given are substantially correct, and fully illustrate the connexion, previously stated to exist, between the temperature of the waste heat and the duty and economy realized.

If engineers had simply to generate steam with the least possible expenditure of fuel, regardless of time, and the cost, weight, and capacity of the generator, the problem could be solved with comparative ease, but the case is totally different; a certain weight of steam has to be produced in the least possible time with the least possible cost, weight, and capacity of the generator, and, above all, with the least possible expenditure of fuel—regard being had also to durability and facilities for repair. Here we have the most conflicting conditions, and it cannot be matter of surprise if mistakes have been, and are being made, it being only necessary that one element be over-valued or another be under-valued, to insure an unsatisfactory result. One manufacturing engineer swears by his fire grate, another by his heating surface, and another by his proportion or form of flues; it matters not which is the favorite view (one may be adopted with less injury to the purchaser than an other); nothing short of an impartial consideration of each and *all* of the requirements in generating steam can meet the difficulties of the case.

If such impartial consideration was the general

rule, there would be no occasion for the present remarks.

The history of the locomotive boiler clearly shows how little previous design there has had to do with its present efficiency; the necessity of using high pressure steam, and the difficulty of condensing, led the way to the blast; and it must be admitted that, of all kinds of boilers, the locomotive is the most scientific and the most economical, if allowance be made for the peculiar requirements connecting with its use.

Notwithstanding the temperature of the smoke-box is often 1,000°, with a combustion of from 60 to 120 lbs. of fuel per square foot of fire grate per hour, a larger amount of water is evaporated by a given weight of fuel than in the majority of land or marine boilers. The rapid combustion is more perfect—almost every portion of the boiler is protected by non-conducting materials—less than 7 ft. of heating surface is sufficient to evaporate a cubic foot of water—and 1 lb. of Welch coal will evaporate 8½ to 9 lbs. of water; nevertheless, there is much unnecessary waste of fuel in the high temperature of the escaping gases (although they are not, *comparatively*, so high when the temperature in the furnace is considered), and in supplying the feed-water at a low temperature. With the introduction of coal as fuel, modifications may be required in the furnace and tubes; and there is much reason to believe, from comparative experiments, that *crowded* tubes do not allow the steam to escape to the steam space as quickly as it is generated.

We may confidently look to a considerable increase of economy and efficiency in the locomotive boiler, even though now for weight, space, cost, and economy of fuel, it must be placed at the top of the list, and certainly deserves the least criticism.

The duty and economy of steam boilers are mainly dependent on the rate of combustion, the ratio between the heating surface and the fire-grate, and the ratio between the heating surface and the consumption of fuel per hour, thus:

Rate of Combustion.

Cornish boilers burn per sq. ft. of fire-grate	4 lbs.
Ordinary land boilers	12 "
Marine boilers	18 "
Locomotive boilers	100 "

Ratio between Heating Surface and Fire-Grate.

Ordinary boilers	12 to 1.
Marine boilers	27 to 1.
Cornish boilers	36 to 1.
Locomotive boilers	75 to 1.

Ratio of Heating Surface to Rate of Combustion.

Cornish boilers	9.0 to 1.
Marine boilers	1.5 to 1.
Ordinary land boilers	1.0 to 1.
Locomotive boilers	0.75 to 1.

The preceding figures are only approximate, but they represent the particular features of each class, and if we were to tabulate them according to the *economy* generally realized, the Cornish boiler would stand first, the marine second, and the common boiler third; for obvious reasons, the locomotive boiler cannot be fairly classed with the other three.

If we take as a standard the *rate of evaporation* for a given quantity of heating surface, we must place the common land boiler first, the marine boiler second, and the Cornish boiler third; and here again the locomotive boiler must be omitted as an exceptional construction.

In such general remarks and statements as the preceding, it is not necessary that they should represent the experience of all our readers—they are based on actual practice, and suffice to illustrate the subject under discussion, and point out the connexion always existing between sound principles and successful practical engineering.

It is assumed, as generally acknowledged, that from 30 to 60 per cent. of fuel is wasted in generating steam, and that a considerable amount of this waste ought to be, and can be avoided; and although we do not dictate the exact means for accomplishing this, we can easily trace out, in the majority of cases, the direction of the improvement required.

Boilers made and used in districts where fuel is cheaply obtained have never been remarkable for their economical performances, nor are the engineers in those districts famed for great anxiety to introduce improvements for economizing fuel; it cannot be expected, and we are not surprised to know that land boilers in coal districts only evaporate 6 lbs. of water at 212° by 1 lb. of fuel.

With wagon or plain cylindrical boilers, that form such a large porportion of those now in use on land, economy of fuel is simply a question of size to produce a given weight of steam, it becomes almost entirely a question of capital; an increased ratio between the heating surface and the fire-grate is in this case the desideratum; the furnace flues and chimney being well proportioned, and every effort made to check radiation.

In the Cornish boiler, where the furnace is *within* the inside tube or tubes, that temperature in combustion which is so essential to its perfection is not easily obtained; hence the difficulty that arises in attempts to consume the smoke in such furnaces; and increase of duty and economy would ensue from placing the furnace *under* the boiler, and returning the heated gases through two smaller tubes—a plan that has been often tried with universal success; it allows ample space in the furnace, insures perfect combustion, and has also other mechanical advantages.

In other descriptions of land boilers, where additional heating surface is introduced within the main shell, it well proportioned, they are generally more economical than the Cornish boilers with the same ratio of heating surface to fire-grate, and with the same rate of combustion.

There can be no doubt that, for land purposes, a boiler with internal flues, capacious furnace, a greatly increased ratio between the heating surface and the fire-grate, and a rate of combustion above that in general practice, is the cheapest, the most effective, and the most economical.

There can be—and indeed there is—no difficulty with such boilers in realizing an increased economy to the extent of 30 per cent., and in obtaining a greater effect in a given time from a ton weight of boiler.

In addition to the purely economical value of steam boilers, we shall hereafter have to consider their mechanical construction, especially as affected by the introduction of steam of high pressure.

In concluding these remarks, we would impress on our readers that our only wish is to direct attention generally to present defects in the Steam Engineering of 1859, and to point out to young engineers those paths of improvement where their energies and talents will be productive of real benefit to their profession, and the world at large.

In our last number we referred briefly to the present efficiency of boilers used on land, and pointed out the wide margin still left for improvement; and as it is neither the intention nor object of these general observations to enter minutely into constructive details, we propose now, as briefly, to say a few words respecting the present efficiency of marine boilers.

When steam was first applied to the propulsion of ships, it was generated in large boilers with capacious internal flues, the pressure per sq. in. seldom exceeding 4 or 5 lbs. The advantages of this class of boilers are the ready access to all portions of the internal surface for cleaning, and their consequent durability, extending frequently to 8 and 10 years; their disadvantages are their weight, both of iron and water, and the great space they occupy in the ship. They have been, and still are, much used for tug-boats, and a few may be found in some of our largest first-class steamships.

To remedy the great weight and bulk of the flued boiler, the multitubular system was introduced, and it has now almost completely supplanted all other kinds of boilers for steamships, and although the particular arrangement of the present marine boiler may not be the best, it has nevertheless stood the test of a lengthened trial, and to a certain extent can be fully relied on.

To those practically acquainted with the construction of the boilers now in use in our naval and merchant steam fleets, we shall be understood in describing them as those in which we have first the furnace, then the flame-box as a continuation thereof, then the tubes or flues returning over the furnace to the smoke-box; and, lastly, the uptake leading from the smoke-box to the chimney, and all, excepting the chimney, enclosed in the outer shell. This is the kind of boiler now generally adopted on board ship; in some cases, as in the *Great Eastern*, there are furnaces at each end of the boiler, leading into one flame-box, and having two sets of return tubes, leading to one or two chimneys as may be preferred. This arrangement, well proportioned, can be made the most effective of any, the only drawback being the necessity of having two stoke-holes—a matter of some importance in a small ship.

Adhering to the rule we have hitherto observed to avoid discussing exceptional cases, we will only allude in passing to the existence of two other kinds of boiler sometimes placed on board ship. In the one, we have, instead of return tubes, a series of vertical chambers, strongly stayed, and formed of ¼ in. iron. This arrangement has some advantages, one of which is stated to be that of durability. In the other design, introduced into several American mail steamships, the flame passes from the flame-box among a number of vertical tubes to the uptake, the steam being generated from the water in these tubes. We simply mention these exceptional arrangements, because they deserve to be noticed as having been proved by actual experience to be sound and practical.

We now return to the ordinary multitubular marine boiler as previously described, and generating steam generally at a pressure of from 15 to 25 lbs. pr. sq. in.; 30 lbs. per sq. in. appears to be the limit to which flat surfaces can be safely stayed, without crowding the stays so as to prevent easy access for cleaning and repair, and as also a rectangular form of shell wastes less space in the ship than a cylindrical, the former is almost universally adopted, and will, doubtless, be retained until the use of steam of higher pressure necessitates a different construction better calculated to resist the increased pressure.

The few accidents from explosion that have occurred in British steamships seem to show that as a general rule marine boilers have been constructed of sufficient strength for the pressure used, although this is no proof that the material has been well applied; indeed it is a matter of congratulation that we are not at present called upon to criticise the constructive details of a very large portion of our present marine boilers. We must, however deprecate the common practice of attaching long stays intended to resist a strain of 8 tons to one side only of a single angle iron by a badly fitting bolt of 1¼ in. or 1½ in. diameter; as also the system adopted in many large works of plating boilers without reference to the position of the stays, as though they could be shifted anywhere to suit the seams.

In no branch of mechanical engineering has such a want of science and constructive ability been displayed as in the designing and construction of marine boilers; and at the present time the bulk of our locomotive boilers have the longitudinal joints of the barrels only singly riveted, although it is known that an additional row of rivets would increase the cost but slightly, add some 14 per cent. to the strength of the barrel, and enable the weight to be reduced. It is very questionable if a late explosion and consequent loss of life would have occurred if the system of double riveting had been adopted.

The very best engineering should be displayed in the mechanical design and construction of boilers; and if an ignorant class of men are employed as foremen, the drawings supplied to them should be of the most complete and precise description.

In investigating the working efficiency of the present multitubular marine boilers, we are met at starting by a difficulty not experienced in land boilers—we allude to the use of salt water, which not only causes a considerable waste of fuel, but renders it almost impossible to ascertain with any

degree of accuracy the evaporating power of a boiler; and this element of uncertainty as to the duty realized has exercised a most baneful influence on the improvement of marine boilers in the mass.

Our standard works, too, on the steam engine have greatly underrated the loss of fuel occasioned by the use of salt water, and constantly discharging into the sea a portion of the heat created by combustion in the furnace. It has been assumed that the loss of fuel referred to may be estimated by calculating the heat required to raise the extra feed supplied (to be afterwards blown into the sea), from its entering temperature to that at which it is discharged from the boiler; but observation and experience prove that both water and *steam* are discharged; and hence there is not merely the loss of sensible heat, as before estimated, but also a considerable loss of that latent heat in the steam, previously generated at a considerable expense of fuel. If this is not so, how is the fact accounted for, that in America, as the result of considerable experience in both fresh and salt water boilers, it is found absolutely necessary to allow at least one-fourth more boiler power when salt water is used than when fresh, whilst many engineers allow even a difference of one-third?

We have then in ordinary practice, instead of a loss of some 10 or 12 per cent., as generally stated, a loss of at least 20 per cent.; and we have known instances where the loss of evaporative power, by changing from fresh to salt water, has amounted to 30 per cent.

If we are moderate, and take one-fifth as the actual loss, this alone is a serious drawback, when economy of fuel is of so much importance on board ship. There is without doubt considerable difference in the amount of loss by blowing out, according as the engineer in charge is more or less intelligent; for whilst on the one hand too much regard to economy may ruin the boiler, on the other, too much regard to avoidance of incrustation will result in needless waste of fuel.

We repeat, that in consequence of the inconvenience attending any attempts to ascertain the actual evaporation or economical efficiency of marine boilers, the most extreme views and practice have obtained, and almost without comment or criticism; no one knows with certainty the actual result of any particular arrangement or proportion, and consequently, no one has the means of giving a standard for comparison.

Among several thousand boilers now in use, we find the greatest variety of constructive proportions, and as a natural result there exists a difference of 30, 40 and 56 per cent. in the evaporative power of boilers having equal heating surface and fire-grate.

The amount of heating surface and fire-grate allowed for a given nominal power, varies 25 and 100 per cent. respectively, whilst the ratio between these two main elements varies fully 70 per cent. We are literally "at sea" in marine boiler engineering, nor do we seem to acknowledge practically that, except under special circumstances, there must be certain arrangements and proportions that will give the best result.

The first desideratum in all boilers is to obtain as perfect combustion of the fuel as possible, and experience has fully proved that, unless special arrangements are made for a supply of oxygen to the fuel, in addition to what is passed through the fire-grate, by a natural draft, and unless ample space is allowed in the furnace and flame-box for the products of combustion to combine, and maintain a high central temperature, the total heat resluting from combustion will be far short of what can be realized.

Now these are not opinions, they are proved facts—obvious to every unprejudiced practical engineer; and it is, therefore, difficult to explain why so many boilers are designed with proportions entirely at variance with these ascertained acts.

Seldom are efficient arrangements made for the required supply of air, and the furnaces are so contracted in height that the fuel almost touches the upper plates; and then, as the half-consumed products of combustion struggle along this comparatively cold-walled chamber, they pass into a flame-box (often only 16 in.) as contracted as the furnace; and when they traverse the small tubes the wasteful operation is completed, and results in a deposit of soot, and a most defective evaporation. This state of things exists in the bulk of our present marine boilers, and is discreditable to the reputation of British engineers.

An impartial consideration of comparative results in burning fuel in a boiler furnace appears to indicate that there should be a minimum height of 2 ft. between the fire-bars and furnace-crown, at the dead-plate, and a minimum length of 2 ft. to 2 ft. 6 in. in the flame-box.

Without presuming to pass judgment on the comparative merits of the various schemes for furnishing an extra supply of air to the furnace, for the purpose of effecting a more perfect combustion, and the consumption of smoke, we cannot but feel it is due to Mr. C. W. Williams to express the opinion, that his simple arrangements deserve the best consideration and confidence of practical engineers.

The vexed question of what description of coal is best for marine boilers is yet undecided, although of late years careful experiments have, to a certain extent, disproved the results arrived at by the Admiralty, and given in their three reports; and we may add, that the public estimation of the value of the best North Country coal, for steam purposes, is greatly increased; and enough has been done to convince the unbiassed that, with certain arrangements of furnace, external smoke can be almost entirely avoided.

In supplying furnaces with fuel, it is to be regretted that the practice is so common of throwing the fresh charge of fuel to the back of the furnace, instead of keeping the fresh fuel supplied to the front near the dead-plate, and, as combustion increases, pushing it towards the bridge. This latter system of firing, as well as others of a similar character, entails rather more work on the stoker, and hence is seldom adopted.

The arrangements generally introduced for the supply of air to the stoke-hole are of the most imperfect description, the cold air descending being met and obstructed by the hot air ascending, and this arrangement is adopted with the knowledge that the evaporative power of marine boilers is often seriously affected by a deficient supply of air to the stoke-hole.

If fault can be found with the present arrangements and proportions of furnace and flame-box, what shall be said of the varied dimensions of the return tubes? On the Thames we have 2½, 2¾, and 3 in. tubes from 5 to 6½ ft. long; on the Clyde we have from 3 to 4 in. tubes from 6 ft. to 8 ft. in length, and to estimate rightly the importance of these tubes, it must be remembered that they constitute about three-fourths of the total heating surface. Many a marine boiler has been spoilt by the introduction of badly proportioned tubes. Then there is the question of what actual evaporative value a long tube has; from the results of some careful experiments it has been ascertained that about one-fifth of the length of the tube next the flame-box was equal in evaporative value to the flame-box itself, but that the remaining four-fifths were not together, equal in evaporative value to the one-fifth next the flame-box, and that the one-fifth next to the smoke-box was of very little use for generating steam.

Now, if these experiments are trustworthy, and we believe they are, they must modify considerably the prevailing opinions on the evaporative value of tube surface; and it must be conceded that practical experience with long small tubes has generally corroborated the conclusions to be drawn from them.

The practical difficulty that arises by the adoption of short tubes, is the necessity of increasing the number to obtain that heating surface which the ship-owner expects to receive from the manufacturing engineer, and which he is not inclined to lessen, although with the improved arrangement it may be more effective.

In considering the question of diameter and length of tubes, there are two points to be noticed: first, the sectional area through the tubes being sufficient to receive and convey the expanded gases from the furnace without retarding the same; and, secondly, reducing the length of tube to a minimum consistent with the heating surface required, and the number of tubes that can be conveniently introduced.

It is not our wish to lay down the law on a subject so full of difficulty, but we can safely indicate in what direction we have erred, and what course should be pursued to remedy those errors.

An imperfect and sluggish combustion is the inevitable result of contraction in the sectional area through the tubes, and a waste of fuel is as inevitable where there is a deficiency of heating surface for a given rate and amount of combustion.

Numerous cases occur in practice in which both the above errors are existing, and are simply the result of defective information in the designer.

It is not unusual to find a difference of 25 per cent. in the areas of the chimneys of boilers of the same size and proportions; considering that the heated products of combustion gradually cool and contract as they leave the tubes, and that the frictional surface is reduced from about 13 to 1, there can be no doubt that the sectional area of the funnel should be considerably less than that through the tubes; we find, however, frequent instances, where the chimney is as large, and even larger in sectional area than the tubes.

Then who decides on the height of the chimney? why, frequently even in large establishments the draughtsman who prepares the rigging plans, so as to make it look well with his spars, &c.; thus often a boiler that requires an unusually high chimney has a low one.

We have on a previous occasion referred to the connexion always existing between the generating power of a boiler and the difference of temperatures between the escaping gases and the water to be raised into steam; a strong draft and rapid combustion making an effective but not economical boiler.

With a chimney of a given height—the draft being dependent upon the temperate of the escaping gases—when there is a large proportion of heating surface, a sharp natural draft and rapid combustion are not attainable.

As long as the rate of combustion is dependent upon heat escaping up the chimney, so long must the loss of that heat be submitted to; and if an artificial blast is substituted, and an attempt is made to absorb all the heat created by the combustion in the furnace, we shall still have this practical difficulty, that when the difference between the temperatures of the flues and water becomes, as it would in this case, very small, either a great increase of time must be given to complete the evaporation, or the ratio between the heating surface and the rate of combustion must be greatly increased.

The advantage to be derived from an artificial blast is the power to increase the rate of combustion *ad libitum*, and thus make a small boiler do the same duty as a large one; and, as a question of weight of boiler, such an arrangement is of great importance.

What are the practical deductions to be made from the preceding remarks?

We think there is sufficient evidence, of a thoroughly practical kind, to prove that attention to those arrangements and proportions we have shadowed forth, will result in a considerably increased duty and economy.

With capacious furnaces and flame-box, an ample supply of air both in the stoke-hole and fuel, tubes *not exceeding* 5 ft. in length, and not less than 3 in. external diameter, a ratio of heating surface to fire-grate of not less than 40 to 1, and a rate of combustion from 16 to 22 lbs. of good steam coal per sq. ft. of fire-grate, with such proportions, 11 lbs. of water can be evaporated under atmospheric pressure by 1 lb. of coal.

When we compare such a result with the average duty realized at the present time, we feel we are justified in deprecating the present inefficient state of our marine boiler engineering, with its de-

ficient supply of air, contracted furnaces and flame-box, badly proportioned tubes and chimney, and an evaporative duty of only some 7 to 8 lbs. of water by 1 lb. of coal.

Unless surface condensation is introduced there appears little prospect of any extensive introduction of high-pressure steam into steamships, and we must be content for some time yet with a maximum pressure of 30 lbs. per sq. in.

If surface condensation ever becomes general, we may be quite certain there will be a considerable increase of the working pressure; but to design a boiler adapted for a steamship and capable of resisting a working pressure of 100 lbs. per sq. in., requires great care and experience: either the cylindrical form must be adopted, or flat surfaces must be stayed, like the fire-box of a locomotive boiler; in either case, it is impossible to allow of internal cleaning, so that any failure of the fresh water supply would be fatal to durability.

Although the block-ships and gun-boats fitted with high-pressure machinery, and working with salt water, are so seldom under steam, great inconvenience has resulted from the inability to keep the boilers free from incrustation.

If steam could be generated in small pipes, and their durability ensured, it would be a perfect high-pressure boiler, as 200 lbs. per sq. in. could be generated with as much safety as 20 lbs. in our present marine boilers.

We do not think there is any more hopeful branch of engineering than that connected with the propulsion of ships, nor any more likely to repay the improver. Necessity will ultimately oblige both steamship owners and engineers to economize fuel, and a truly satisfactory result can only be arrived at by the most laborious and persevering attention to the minutest details.

Connected with boiler engineering, the profession is much indebted to Mr. Fairbairn for data of a most valuable character; and there are many engineers of the present day who are helping to introduce great improvements. Our English exclusiveness militates greatly against a free interchange of practical experience among our leading engineers, and the young engineer must trust entirely to his own struggles for a position.

In the preceding remarks many points of interest in steam generation have been omitted, but with the excepting ordinary details, they will be referred to in the introductory observations on the Applications of Steam as a Motive Power.

(To be continued.)

Hempfield Railroad.

The earnings of this roads for the year ending Aug. 31, 1859, have been:—From passengers, $13,662; freight, $16,784; mails, etc., $3,336; total, 32,411. The current expenses, $25,144.

Completion of the Grand Trunk Railroad.

The Chicago *Press* of the 21st says:

The West is already beginning the feel the effects of the opening of the Grand Trunk Railway. That company are now shipping direct to Liverpool, beef, pork and lard, for 87½c. per hundred. This amounts to $2 80 per barrel. Three years ago the lowest winter freight between Chicago and New York, if we mistake not, was $1 per hundred; now it is one-eighth less to Liverpool. We learn that the New York and Erie Railroad has telegraphed to its agency here to take European freights for the same price as the Grand Trunk, and doubtless the New York Central will at once follow the example, if it has not already done so. The rates are of course for all rail to Portland, a distance of more than eleven hundred miles. As soon as navigation opens, a line of propellers will run in connection with the Grand Trunk to Sarnia, and the European steamers will run up to Montreal, leaving only some five hundred miles of freight by railway. If the line can now afford to carry at present rates, it is likely, with six hundred miles less railway, the business public will welcome a still further reduction before the 1st of May.

Pennsylvania Coal Trade for 1859.

The Pottsville *Miners' Journal* of the 14th inst. publishes its annual review of the coal trade of the United States, for 1859. The following table will show the amount sent to market from the several regions:

Schuylkill Region.	1858. Tons.	1859. Tons.	Incr'se. Tons.
By Reading R. R.	1,542,669	1,632,933	.....
Trevorton coal	.....	23,679	.....
		1,609,253	66,584
By canal	1,323,804	1,372,021	48,217

		1,249,550	
		122,721	
Add Anthracite			952,678
Increase of all kinds			1,115,399

From this table it appears that the whole quantity sent to market amounted

In 1859 to	8,889,787 tons
In 1858 to	7,774,888 "
Total increase in 1859	1,115,399 "
Of which anthracite	992,678
Other kinds	122,721
	1,115,399 "

The increase from the anthracite regions was furnished as follows:

From the Schuylkill region	105,180 tons
Lehigh region	177,182 "
Shamokin	44,860 "
Wyoming basin	665,456 "
Total increase in 1859	992,678 "

Of the amount sent to market in 1859 there were

Anthracite	7,515,516 tons
Other kinds	1,372,271 "

Of the whole supply of anthracite:

Schuylkill county furnished	3,048,615 tons
The other regions	4,468,901 "
Total	7,517,516 "

The Anthracite Coal Fields.

The first or southern coal district, embracing the Schuylkill, Pinegrove, and Lyken's Valley regions, contains ..... 75,950 acres
The second or middle coal field, comprising the Lehigh, Shamokin and Trevorton regions, contain ..... 85,525 acres
The third, or northern coal field, comprising the Wyoming basin, contains ..... 76,805 acres
Total ..... 238,280 acres

From these regions there were sent to market, in 1859, the following quantities of coal:

	1859.	1858.	Incr. 1859.
First district	3,245,248	3,131,687	113,561
Second "	1,861,955	1,552,965	308,990

We copy the following from the report of the Directors:

In making up the account of expenditures, it will be seen that we have adopted a course which, if adhered to, will secure a good degree of uniformity in the charged expenses of operating the road.

In the first place, we assume that there is an annual decay of sleepers, bridges, station houses, etc., and that the extent of that decay for each year, is properly chargeable to the expenses of that year.

In the second place, a fortunate concurrence may, in some years, reduce the actual expenditures below the average of annual expenses; and, in other years, various causes may conspire to carry the expenditures above that average; and thus a fluctuation in that account is presented, which prevents any safe calculation for the future on the part of those interested in the property; and which, therefore, it is desirable to avoid.

We have endeavored to ascertain, so far as is practicable, from the experience of years, what may be expected, with a given amount of business, to be the amount of expenses chargeable to each account, annually; and if in any year the amount actually expended falls short of that estimate, we do not rely upon a permanent reduction of those expenses, but charge the expenses of the year with the estimated amount, and carry the difference to a fund to meet what may be the expenditures of another year on that account beyond the estimate.

For instance, we assume that, in a series of years, the cost of renewing sleepers will be $8,000 annually. The last year it amounted to only $6,788 69. The expenses on that account are charged at $8,000; and the difference, $1,211 31, is carried to the fund for the "renewal of sleepers." In this manner, the business of each year is charged with its proportion of the decay and depreciation of the property; and, as far as is possible, uniformity secured in the expense account. Upon this principle $29,591 71 have been carried to the several funds for renewal, during the past year; and the whole amount of those funds is now $41,249 40,—the details of which will appear in the balance sheet.

During the year, a new valuation of our whole property has been made, and the construction account reduced to $3,160,000—the amount of our capital. It is intended that that valuation shall represent the actual present cash value of the property.

Our funded debt payable from 1860 to 1868,—amounts to $174,220; but it will be observed, that, in the balance sheet, that debt is treated as if now due, and that the balance there shown is the balance after the payment of all debts of the corporation; so that the stockholders may be congratulated upon the fact that the corporation is entirely free from debt, beyond its means of immediate payment, and that the future earnings of the road will be subject to no charge on that account. Every doubtful claim of the corporation has been charged to "profit and loss," and the assets, as they appear in the balance sheet, are put down at or below their cash value.

The Report is a brief, but it must be a satisfactory one to the stockholders, and we copy it nearly in full for the purpose of showing the system upon which the expenditures are made up. Had it been more extensively followed, we should not have seen so many instances of 10 and 20 per cent. dividends, for two or three years, and none thereafter. We should like to see all accounts of current expenditures made up in the same manner.

Dividends paid during the year, 8 per cent.

Banks of the United States.

One of the most comprehensive volumes published for the year is the "Merchants' and Bankers' Register for 1860," published at the Bankers' Magazine office, New York, and containing as follows: 1. A List of the Banks, arranged alphabetically, in every State and City of the Union, December, 1859; Names of President and Cashier, Location and Capital of each. 2. A List of Private Bankers' in Three Hundred and Fifty Cities and Towns of the United States, December, 1859. 3. A List of the Banks in Canada, their Cashiers, Managers and Foreign Agents. 4. Directors and Officers of the Bank of England, 1859; List of Members of the New York Stock Board, and Stock Sales of 1859. 5. Fitchburg and Worcester Railroad.

The earnings of this road for the year ending Nov. 30, 1859, were as follows:

From passengers	$14,934
" freight	21,473
" mails	500
" miscellaneous sources	10,811
	$48,768

The disbursements for the year were:

For current expenses	$32,140
Paid interest	3,832
" dividends	10,578
Balance	2,218
	$48,768
Capital stock paid in	$198,800
Funded debt	62,900
Floating debt	300
	$262,000

The company have assets to the amount of $17,525, which would reduce the cost of the road to $244,474.

Journal of Railroad Law.

EVIDENCE. ADMISSIBILITY OF, IN AN ACTION FOR DAMAGES.

It is often a difficult question to decide what evidence is admissible and what is inadmissible. Rules of evidence are laid down for the purpose of more certainly arriving at the truth, and when properly applied they greatly assist the administration of justice. The case of Robinson against the Fitchburg and Worcester Railroad Company recently decided in the Supreme Court of Massachusetts throws some light upon the question of admissibility of evidence in an action against a railroad corporation to recover damages for injuries sustained. In this case the plaintiff was injured by a locomotive engine of the defendants while he was delivering wood from a team by the side of their railroad track.

At the trial the plaintiff, in order to show want of care on the part of the defendants, in not ringing their bell, or giving some signal of the approach of the train to the place where the plaintiff was engaged in delivering wood, at the time of the injury, introduced evidence tending to show that there was a farm crossing, or traveled place at that point; and, as tending to prove that fact, offered evidence that there had been such a crossing there *previously* to the construction of the railroad. This evidence was excluded by the court.

The plaintiff then offered to show, that there was a crossing there *at the time of the trial*, as tending to show its existence at the *time of the injury*. But this evidence was all excluded. The plaintiff called the conductor of the train by which he was injured, and, in order to show that the engineer of the train was not a careful, skilful and proper person to run the train, asked the conductor, (who, it appeared, had known the engineer for several months,) whether he knew of any specific instances of want of care in the engineer in his business of running trains, within three months of the injury, before or after. But the court excluded the question.

The plaintiff, in order to show that he was in the use of ordinary care at the time of the accident, asked a witness, whether the only mode of approach by a team to the place of delivering the wood was by way of the track. This was objected to and excluded, on the ground that it was a

question for the jury to decide, upon the whole evidence relating to the locality.

Evidence of certain statements concerning the accident, made by the engineer of the train to the plaintiff within ten days after it, was offered by the plaintiff, but excluded by the court.

Evidence that the president of the corporation had stated to the plaintiff that he thought the defendants would give him something, or pay him something, was offered, as tending to show a recognition of their liability by the defendants: but it was excluded.

The plaintiff having contended that the defendant employed the engineer of the train at low wages because of his want of skill, the defendants were allowed, against the objection of the plaintiff, to ask the president of the corporation this question, "How did you employ him as engineer; as what kind of engineer?" and the answer was, "I employed him as a competent engineer, with skill enough to make him a safe man to run an engine.

It appeared that some months after the accident a letter was addressed by the plaintiff to the dedefendants, which was read to the stockholders at their annual meeting by the president, and was by him produced, on notice, at the trial. But it was proved, without objection, that upon the reading of the letter at the meeting, a vote was passed to lay it on the table; and the court ruled the letter incompetent.

The plaintiff offered to show, as part of his damages, that the injury rendered him unable to do the labor required by his business, and so broke up his business. But the court excluded the evidence.

The plaintiff requested the court to instruct the jury that if they were satisfied that the plaintiff, while lawfully on the track of the railroad and in the exercise of ordinary care, was struck and injured by the defendants' cars or engine, the burden of proof would then shift upon the defendants to show that they were using ordinary care at the time. But the court refused so to rule, and instructed the jury that the burden of proof was upon the plaintiff to show affirmatively, that while he was lawfully on the track and in the use of ordinary care he was injured by the defendants, and that they were not in the use of ordinary care.

The jury returned a verdict for the defendants. But upon exceptions to the rulings of the judge and to the charge, the plaintiff appealed to the Supreme Court. The opinion of the Supreme Court is as follows:

Bigelow, J.—Upon consideration of the several exceptions insisted on by the plaintiff at the bar of this court, we see no sufficient ground for disturbing the verdict rendered in favor of the defendants in the court below.

I. Evidence of the existence of a private crossing at the place of the accident, prior to the construction of the railroad, and also subsequently to the time of the injury to the plaintiff, seems to have been excluded on the ground of its irrelevancy. The precise question at issue was the state and condition of the place at the time when the collision took place, and whether there was then a crossing in use over the track of the railroad, which would require a greater degree of caution in the exercise of due care by the servants of the defendants, than at other places on their road, where no crossing existed. This the plaintiff was allowed very fully to show. Now, without deciding that proof of a certain state of facts or condition of things, prior and subsequently to a particular occurrence, would not be admissible and competent as leading to a just inference of their existence at the time when the occurrence took place, it seems to us that, in the present case, there is nothing in the bill of exceptions, which shows that the evidence excluded was so material and relevant to the subject matter which the plaintiff sought to establish, as to render its rejection a valid ground of exception. Many questions relating to the materiality and relevancy of proof to the issue on trial, necessarily address themselves, very much to the sound discretion of the presiding judge. He only can best determine whether evidence is collateral or unimportant, having before him all the facts in proof. A court of error will not therefore revise his decision upon such questions, except in cases where manifest mistake is shown.

II. Evidence of specific acts of negligence and carelessness on the part of the engineer, in running the train on other occasions than the one in question, was clearly incompetent. It would not only lead to collateral inquiries, and so distract and mislead the jury from the true issues before them, but it had no legal or logical tendency to prove the point in issue. Because a man was careless or negligent of his duty in one or two specified instances, it does not follow that he was so at another time and under different circumstances. * * * * * * *

III. The inquiry of the witness as to the mode of approach to the wood pile, sought for his opinion on a matter which bore directly on the question of the use of due care by the plaintiff at the place of the accident. It was, therefore, incompetent. All the facts bearing on the locality, and the means of access to it, being laid before the jury, it was their province to decide whether there was any other mode of approach which a person of ordinary prudence could take. In determining this question they could not properly be aided by the opinions of witnesses.

IV. The admissions and statements of the engineer, after the accident, were inadmissible. The defendants were not in any way bound by his confessions. They were not within the scope of the engineer's agency for the defendants, and were made some days after the accident. They were, therefore, only the declarations of a third person and incompetent as being merely hearsay evidence.

The evidence of the president of the corporation, who employed the engineer, that he was hired by him as skilful and competent, was relevant and material, in answer to the ground assumed by the plaintiff as a foundation for his right of recovery, which was that the engineer was employed by the corporation with a knowledge that he was unskilful, and at low wages. As distinct and substantive proof in defence of the case, we think it would have been liable to objection, but it is quite clear that it was competent in answer to the case alleged and attempted to be proved by the plaintiffs.

The remaining objections to the rulings of the court as to the offer and rejection of the evidence are either clearly immaterial, or wholly untenable, as falling within the scope of the proper discretion of the judge in regulating the order of proof, except that which has reference to testimony bearing on the question of damages. This last it is unnecessary to consider, because the plaintiff having failed to establish his case on the merits and to show any claim for compensation, cannot be aggrieved by any ruling relating to damages merely.

The burden of proof was clearly on the plaintiff to show want of due care on the part of the defendants, as well as the exercise of ordinary care by himself at the time of the accident.

Public Debt of Canada.

The public debt consists of Imperial Guaranteed Loan, bearing 4 per cent. interest, and constituting a first charge on the Consolidated Revenue Fund, £1,500,000; sterling debentures 5 per cent., payable in London, £279,355; ditto 6 per cent., ditto, £7,223,600; currency debentures, 4½ per cent., payable in Canada, £3,000; ditto 5 per cent., do., £147,683; do. 6 per cent., do., £524,064; total, £9,677,672, chargeable on Consolidated Revenue Fund, and bearing an annual interest of £546,345. In addition to the foregoing amount, the Province, as Trustee for the Consolidated Municipal Loan Fund and for other special funds, has issued debentures chargeable specially upon the security of such funds, and not upon the Consolidated Revenue, to the following amount: Sterling debentures chargeable on the Consolidated Municipal Loan Fund, payable in London, 6 per cent., £200,000; currency and sterling do., do., payable in Canada, £1,720,160; currency debentures, 6 per cent., chargeable on minor special funds, payable in Canada, £63,178—£1,983,338; bearing an annual interest of £119,000 sterling. The whole direct and indirect debt of Canada, may be, therefore, classed: Imperial Guaranteed Loan, £1,500,000; sterling debentures, payable in London, £7,702,-925; currency and sterling, payable in Canada, £2,458,085; total, £11,661,010; the total charge for interest being £665,345. The Lords of the Treasury now hold in investment on account of the sinking fund for the redemption of the Imperial Guaranteed Loan—3 per cent. Reduced Annuities, £619,080; Indian bonds, 1858, £174,000; total, £793,080. And an annual contribution of £30,-000, in addition to accumulating interest, is made by the province to this fund; the charge upon the revenue being thus: Interest on £1,500,000 at 4 per cent., £60,000; sinking fund, at 2 per cent., £30,000; £90,000 per annum. The balance yet remaining due being only £707,000, to be reduced in January by the sum of £30,000, now in course of remmittance from Canada. By an arrangement with the Lords of the Treasury, it is agreed that the sinking fund may be invested in approved securities, bearing a rate of interest nearly approaching that paid by Canada, to raise the amount required to make good the entire sinking fund, and thus to discharge the Province from the necessity of providing from its consolidated revenue any larger sum than the interest on the balance of about £700,000, by which means an annual charge of about £35,000 will be substituted for that of £90,000, while some profit will arise from the sinking fund being invested in securities yielding a higher rate than that payable under the guarantee 4 per cent. The Government of Canada also are themselves holders of securities purchased on account of special funds, to the amount of, sterling, £724,777. Almost the whole of this sum consists of the currency debentures of the province, whose indebtedness is really to this extent diminished. By the terms of the charters granted to the provincial banks, they are required to hold as security for their issues, provincial debentures to the extent of 10 per cent. of their capital. The amount so held is now about £500,000 sterling, which is thus withdrawn from sale. During the past year 1859, the Government have come under obligations to the extent of about £400,000, which

has been applied to the redemption of the securities before enumerated. And it is proposed now to raise the necessary capital for the pupose of redeeming all the outstanding currency debentures, most of which are held in England. By substituting the direct engagement of the province in lieu of that of the Municipal Loan Fund and other special funds, and by making the principal and interest payable in London, it is expected that the holders of these depreciated securities will be glad to avail themselves of the opportunity now offered of redemption, or of accepting the new consols or bonds in lieu of their present bonds, while, by interposing its own security, the province will obtain a large reduction on the amount charged for interest. After deducting the secuites now held by the Government of Canada, those already purchased for the purpose of redemption, and also those held under the bank charters, there remains the sum of about £1,250,000 still outstanding of the currency and Municipal Loan Fund bonds. Under the terms of the act providing for the redemption of the feudal tenure in Lower Canada, a fund was created for the purpose of indemnifying the seigniors, amounting to about £650,000 sterling, the interest upon which, at 6 per cent., is now a charge upon the Consolidated Revenue Fund; and of this amount £250,000 will be required in the course of the year 1860. The Government propose now to make provision for the payment of this sum, which will constitute no addition to the present liabilities of the province, but will reduce the interest from 6 per cent. to 5 per cent.

The Government has also to provide the sum of £200,000 for the erection of the public buildings at the new provincial seat of Government. This amount will be required in the course of 1860 and 1861. And to this extent only does the Government of Canada now propose to make any addition to their existing liabilities.

It is, therefore, proposed to create an issue of Consolidated Stock or Bonds, at the option of the purchaser, irredeemable until after twenty-five years from 1st January, 1860, bearing 5 per cent. interest, payable half-yearly, for the following purposes: To pay up in full the sinking fund for the Imperial Guaranteed Loan, about £700,000; to reimburse the Consolidated Revenue Fund for advances made in 1859 on account of redemption of debt, £400,000; to redeem so much of the Feudal Tenure Fund, £250,000; for public buildings at Ottawa, £200,000; for redemption of remainder of 6 per cent. currency debt, both direct and indirect, about £1,250,000—£2,800,000. The charges now borne by the revenue on the foregoing items, are as follows: Interest and sinking fund, imperial loan, £90,000; 6 per cent. interest on £2,100,000, £126,000; total per annum, £216,000. By the issue of 5 per cent. consols or bonds, the annual charge will be reduced to—for interest, £140,000; for sinking fund, ½ per cent., £7,000; total, £147,000; making a reduction of charge upon the revenue of Canada of £69,000 per annum, while, at the same time, the existing Imperial Sinking Fund will by this operation be increased to £1,500,000, thus practically extinguishing so much of the present debt. The Consolidated Stock or Bonds will be issued at par, bearing interest from January 1. Until 30th June next subscribers who are holders of Provincial Government 6 per cent. bonds, payable in Canada, and having the direct engagement of the Consolidated Revenue Fund, will be permitted to pay their subscriptions to the new stock or bonds in these securities at par (viz: £1 4s. 4d. currency for £1 sterling,) adding one-quarter per cent. premium for each year the bond may have to run. Thus, a bond having twenty years to mature will be taken at 105, payable in the new stock or bonds at par. Subscribers who are holders of Consolidated Municipal Loan Fund bonds will be permitted to exchange them at par for the new stock or bonds—viz: £1 4s. 4d. currency for £1 sterling. In order to facilitate the consolidation of the entire debt of the province, the Government are prepared to convert the sterling 6 per cent. bonds, payable in London, and carrying a direct charge upon the Consolidated Revenue Fund, into new stock or bonds of the same character as those now to be disposed of, and to be issued under the authority of the same act, at the following rates:

£	s.	d.	New Stock or Bonds.	6 per cent. b'ds due—
109	10	0	5 per cent. for £100	Aug., 1874
110	12	6	" " "	Sept., 1876
111	0	0	" " "	July, 1877
111	5	0	" " "	Jan., 1878
111	12	6	" " "	Jan., 1879
112	0	0	" " "	Jan., 1880
112	3	9	" " "	July, 1880
112	11	3	" " "	July, 1881
112	15	0	" " "	Jan., 1882
112	17	6	" " "	July, 1882
113	0	0	" " "	Jan., 1883
113	3	9	" " "	July, 1883
113	7	6	" " "	Jan., 1884
113	10	0	" " "	July, 1884

Holders of 5 per cent. sterling bonds may convert at par; but neither class of such sterling bonds payable in London can be received in payment of subscriptions to the new loan. The option of conversion is limited to the 30th June, 1860.

Statesville and Charlotte Railroad.

On last evening, Mr. Johnston, President of the Charlotte Railroad, appeared before the City Council for the purpose of calling their attention to the railroad now being built from Charlotte to Statesville. This connection will form a very important feeder to the Charlotte and South Carolina Railroad.—*Carolinian.*

New York and New Haven Railroad.

The result of the operations of this company, for the year ending on the 31st day of March, 1859, has been as follows:

Income.

From Passengers	$624,795 43
" Freight	157,949 77
" Mails, Expresses, &c.	45,946 75
	$828,691 95

Expenses.

For Transp'tion expenses	$198,114 17

Wilmington, Charlotte and Rutherford R.R.

In our issue of 14th inst. we gave a notice of this road, compiled chiefly from an article in the Wilmington *Herald*, which contained some errors—one of which (that referring to the distance apart of the cross-ties) is calculated to convey an unfavorable impression of the road. The *Herald* no doubt fell into the error from the fact that the company at one time, while putting down track, were obliged to lay it with about one-third of the requisite number of ties, because a temporary failure on the part of the contractors to supply a sufficient quantity in time. The following, in reference to this road, is from an authentic source, and may be relied upon as correct:

"The road when completed will be 270 miles long, viz: the Eastern Division from Wilmington to Charlotte, 190 miles, and Western Division, from Charlotte to Rutherford, 80 miles. It is graded, as are all our roads at the South, for a single track only. The superstructure will consist of a T rail weighing 50 lbs. per lineal yard, placed upon cross-ties 22 inches apart, from centre to centre; the ties of heart pine, or oak, seven by nine inches, and eight feet long.

"On the Eastern Division, 28 miles of track were laid last year. This year it is hoped that we will be able to lay the road on the Eastern Division to Rockingham, in Richmond County.

"On the Western Division track-laying will be commenced about the 1st of April next, with the expectation of completing by the end of the year, 50 miles."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, etc., etc.

An *asterick* (*) occurring in the column headed "Rolling-Stock," signifies that the cost is included in that of "Railroad and Appurtenances." A *dash* (—) signifies "nil." Running *dots* (.....) signify "not ascertained." Land-Grant Railroads are in "*italics*."

Railroad Reports.

RAILROAD COMPANIES will oblige us by sending us copies of their Reports as soon as they are published.

American Railroad Journal.

Saturday, January 28, 1860.

Public Debt of Canada.

Canada is a province of most approved loyalty, of which she has made conspicuous display in imitating the love of the parent country for a good, round, national debt. To be sure, that of the latter has been the growth of centuries, and the result of relations sustained to continental powers, with whom, in times past, she has been in a chronic state of warfare, and was compelled to run up a debt to carry it on, so far exceeding all reasonable bounds of computation, as to forever relieve the public mind of all anxiety about devising any mode for its payment. It is now a part of the English Constitution, to which the people are as much habituated as to the air they breathe, and they have about as much idea of getting rid of one as the other.

Canada, fortunately, has had no wars to carry on. We have no "balance of power" doctrines on this side of the water. She has no fortifications to construct, no ships to build, no army to maintain; and, only recently, a government to support. All these matters have been at the charge of the Home Government. Still, she has a debt of nearly $60,000,000, which is as great a burthen to Canada as $1,200,000,000 would be to the United States, or as $3,800,000,000, (the debt of that country,) to Great Britain. Canada has, say, 2,600,000; the United States, 30,000,000—a population 12 times greater. We presume it is fair to estimate the means of the people of the United States to be twice greater, in ratio to their population, than those of Canada. At the same rate per head, the debt of Canada is equal to $720,000,000 for the United States.

Canada has no coal, which at once puts an end to all hope of ever becoming a great manufacturing country. Coal is the *sine qua non* of material greatness in these days of scientific method. Great density of population in Canada is, consequently, out of the question; and without great density of population, there will never be great accumulation of capital, as men are valuable in ratio to their nearness to each other. Canada can never become a great maritime people, as an embargo rests on her harbors, (always dangerous of approach,) six months in the year.

Now, without any necessity for great expenses for self-protection, and without any great plans for political aggrandizement, it appears to us that Canada, measured by the amount of its public burdens, is old, while yet young. A debt of $60,000,000 would be regarded as a serious burden by the people of the United States. We should at once set ourselves about devising some plan to get rid of it. And such a sentiment is characteristic of all our States, except the two or three which have taken it into their heads to repudiate altogether. The extremes to which they have gone only prove the rule. The only alternative left, to a scheme for the payments of their debts at an early day, (so common with nearly all the States,) was to deny their obligation altogether. There is now hardly a State in the Union in which the contract, creating new liabilities, does not contain provisions which will work out their speedy payment; nor hardly a State whose indebtedness, created some years ago, is not fast melting under the provision of well regulated sinking funds. In this country the strongest repugnance exists against the creation of permanent National or State debts. One reason perhaps is the commercial character of nearly all such as exist. Like all commercial ventures, it is felt that they should be regularly wound up, more especially if they have turned out unfortunately, as many of them have.

The national debt of England does not come in the category of commercial transactions. The nature of its origin creates no suggestion for its payment. Like an ugly habit that it cannot be got rid of, it is defended as a grace or virtue rather than admitted as an offence. The Canadas, in their too great loyalty, we fear have become enamored with this feature of the English constitution, and is rolling up a debt which will always be a serious burden to carry, and a disagreable element in their political affairs.

	$1,959,549 92

The rate of interest paid on preferred stock is 8 per cent. This stock was created in 1850, and is to become common stock in August, 1860 Upon the common stock a dividend of 4 per cent. is payable Feb'y 1st.

During the present year, the lease of the Ashuelot Railroad will expire. This road has been a drain upon the Connecticut River to the amount of $30,000 annually, it having been run without profit.

The funded debt of the Company is as follows:

Bonds due May 1, 1862	$25,000
Do. Nov. 1, 1862	80,000
Do. May 1, 1863	25,000
Do. Nov. 1, 1863	40.000
Mortgage due Nov. 1, 1878	72,500
	$252,500

The company on the 1st of Sept. 1858, executed a mortgage on the road to secure the payment of bonds to the amount of $250,000, bearing 6 per cent. interest payable in 20 years, for the purpose of returning the bonds soon to fall due. Of these, as before stated $72,500 have been issued.

The officers of the company for the year are:

D. L. Harris, Northampton, *President.*
Seth Hunt, " *Treasurer.*
Wm. B. Brinsmade, " *Superintendent.*

Orange and Alexandria Railroad.

We have the Report of this company for the year ending Sept. 30, 1859.

The earnings for the year have been as follows:

From passengers	$162,197
" freight	84,392
" mails, etc.	13,725
" Manassas Gap Railroad	28,483
Total	$288,297

The current expenses have been as follows:

For maintenance of road	$34,613	
" " " motive power	39,456	
" " " cars	6,898	
" transportation expenses	32,354	
" salaries, office expenses, etc.	14,814	
" other items	3,000	
		131,226
Net revenue		$157,571

		2,689,970 29
		$6,255,014 91

This road is now opened for its whole length from Alexandria to Lynchbugh, a distance of 166 miles, and completing a direct line entirely through the State, in connection with the Virginia Central, (which is used for 21 miles,) and the Virginia and Tennessee, 205 miles. The completion of the Lynchburg Extension is a most important event, not only to the Orange and Alexandria Railroad, but to the railroad system of the country. The Mississippi Central Railroad is also on the eve of completion, opening a direct route by railroad to New Orleans. These connections cannot fail to be most valuable to the Orange and Alexandria Railroad, and must, for the current year, add very largely to its receipts, as it now forms the central portion of a direct line uniting the very extremes of the country.

The officers of the Company for the current year are:

President—J. S. Barbour, Jr.
Superintendent—H. W. Vandegrift.
Treasurer—James H. Reid.

Pacific Mutual Insurance Company.

We give in another column the statement of this company for the past year, showing the most satisfactory results. This company was established for an exclusive mercantile business, (principally for the Importers and Jobbers,) and no risks are taken by the year, or upon the hulls of vessels.

All the net earnings of the company are divided among its policy-holders, they receiving the full benefit of its profits. No reservation of profits is made for the benefit of parties not directly interested in the business of the company as dealers.

This company has returned to its dealers, in dividends, namely: 1856, 37 per cent.; 1857, 20 per cent.; 1858, 20 per cent.; in 1859, 43 per cent.; and in 1860, 30 per cent., and will redeem its second dividend, issued in 1857, in cash, on and after Tuesday, the 7th day of February next. By the principle upon which this company is conducted, the Insurer simply pays the general risk of insurance and the cost of conducting the operations of this company—the profits accruing the insurers, in many other companies, being returned to him.

Municipal Subscriptions to Railroads in Wisconsin.

The Madison *Journal* contains the following in reference to the County and Town subscriptions in Wisconsin to Railroad Companies:

The opinion of the Supreme Court in the case of Bushnel agt. The Town of Beloit, announced on Wednesday by Judge Cole of Madison, and concurred in by the other Judges, settles the constitutionality of legislative acts authorizing counties, towns, and municipal corporations, to issue bonds in aid of railways and similar improvements.

The town of Beloit, in conformity with an act of the Legislature, by the consent of a majority of its legal voters, issued bonds in aid of the Racine and Mississippi Railroad. These bonds were made transferable in the usual manner. The town of Beloit resisted the payment of the interest due upon them, mainly upon the ground that the Legislature had no power, under our Constitution, to pass the act authorizing the issue of bonds for such purposes. Bushnell, the respondent, a holder of some of the bonds in question, brought a suit against the town for the payment of the interest.

Judge Cole, in his opinion, sustains the decision of the Court below, affirming the decision of the Legislature, under our Constitution, to authorize such issues of bonds, and very thoroughly discusses the whole subject in a lengthy and able argument.

New York and Erie Railroad.

Below will be found the last monthly statement of Nathaniel Marsh, Receiver, in account with the New York and Erie Railroad Company.

Nathaniel Marsh, Receiver.

New York, January, 1860.

Griffin and North Alabama Railroad.

On Wednesday morning, the 11th inst., says the *Griffin Union* of the 13th, the grading of this new railroad was commenced. Messrs. Brown & Holman have taken the first contract, beginning at Griffin. Other contracts will commence in a few days, and by the 1st of February we expect to see the whole line under way as far as Newnan.

Emigrant Travel on the Pennsylvania R. R.

During the year 1859, the Pennsylvania Railroad Company transported over their road 14,359 emigrant passengers, most of whom were destined to points west of Pittsburg. A large number of them settled in Kansas and Iowa. Of the whole number, 7,620 came from New York, having been landed in that city, and choosing the Pennsylvania route as the most economical and expeditious. The entire number had with them 387,656 pounds of extra baggage. The following exhibits the number of passengers for each month:

Months.	Number.	Months.	Number.
January.....	712	July	1,041
February.....	870	August.....	1,151
March	1,828½	September	1,237
April.....	1,380	October	1,256
May.....	1,854	November	1,256
June.....	1,393½	December	880
Making a total of.....			14,359

Lehigh Valley Railroad.

The annual meeting of this company was held at Philadelphia a few days since. The following is an abstract of the report:

RECEIPTS.

From coal transportation.....	$391,766
" Passenger, express and mail.....	68,161
" Miscellaneous freight.....	65,937
Total	$525,866

EXPENDITURES.

For coal transportation	$160,895
" passenger, express and mail.....	28,085
" miscellaneous freight.....	22,991
Total	$211,971
Balance net earnings	333,896
Against which has been charged—Interest on bonds.....	85,020
Current interest.....	8,257
Salaries and office expenses.....	6,359
Dividend	117,518
Total	$217,518
Leaving a credit balance of.....	96,375

The whole amount of coal transported over the road was 577,651 tons, against 471,029 tons last year—showing an excess this year of 106,622 tons. This amount was distributed as follows:

	1859–Tons.	'58–Tons.
To the Belvidere Delaware R. R.	131,152	96,141
" Central Railroad.....	182,222	122,000
" North Pennsylvania R. R.	77,483	66,123
" East Pennsylvania R. R..	3,579	.....
" Catasauqua Railroad ...	4,384	4,012
" Morris Canal.....	4,688	5,870
Delivered on the line of road...	174,143	176,883
Total.....	577,651	471,029

Of the whole surplus of the receipts over the expenditure, $62,797 06 has been used in new construction, and the balance applied to the liquidation of the debts of the company. The total capital of this company is $1,966,350, upon which the net earnings are about 11 per cent. Very few coal transportation companies in this State can show such a flattering and encouraging result. Mr. J. G. Fell is the President of the road; Mr. J. N. Hutchinson, Secretary and Treasurer. Managers—Asa Packer, William H. Gatzmer, John T. Johnston, R. F. Stockton, E. A. Packer and David Barnett.

The Canals--Report from the State Engineer.

The report of the State Engineer upon the Canals of the State was sent to the Legislature yesterday (Friday.) The State Engineer estimates the cost of completing the canals, as follows:

Erie Enlargement.....	$535,626 30
Oswego Canal.....	116,575 29

Black River Canal.....	60,430 00
Genesee Valley Canal	24,374 00
" " Extension	15,800 00
Engineering, 10 per cent.....	93,697 88
Contingencies	150,000 00
Land Damages.....	500,000 00
	$1,679,686 69

The estimate presented in the State Engineer's Report last year made the cost of completing the Canals, $2,900,540 37. The estimate this year reduces this amount, after deducting the work done since the last report, $49,039 69.

All the work remaining to be done is under contract except to the amount of $301,170 90.

On the Erie Canal, the report says seven feet of water can be secured the entire length, at the opening of navigation next spring, and the whole work can be done by the spring of 1861—if the funds are provided by the legislature. The report says the Canal may be completed between Albany and Lockport, and seven feet depth of water (without the full width of channel) be secured from Lockport to Buffalo for $274,250.

On the subject of lengthening the locks as has been proposed, the report thinks it inexpedient—at least till the enlargement is finished and its capacity tested.

Indianapolis and Cincinnati Railroad.

The passing of the usual January dividend by this road has created some inquiry by foreign stockholders into the causes. From a personal knowledge of the management of the affairs of the company, we can enlighten the public and the stockholders. We can safely say this, that no road in the country is in a more sound and reliable condition than the Indianapolis and Cincinnati.

Within the past fifteen months the company has removed all its bridges, with a single exception—seven in number. Timber abutments have been taken out, and solid stone masonry substituted. The old bridges were of poplar and oak; the new ones are of pine. The old abutments were of wood; the new ones of stone from the flat-rock quarries. No road in the country has been more thoroughly equipped in this important provision for the safety of the traveling public.

During the year, about a mile of track has been constructed to an important stone quarry, at an expense of some $10,000. The amount of stone shipped during the past year exceeded twelve thousand tons. A large amount is already quarried, ready for spring shipment. The freights of the first six months of the year will probably pay one-half the expense of the track. The stone is in active demand, and finds a ready sale. The new jail will be mostly built of materials procured from these quarries.

The company has also erected a car house at Indianapolis for all the cars upon the road, and five new wood-sheds at convenient intervals along the line. Depots have been built at all the stations, together with an excellent eating-house at Morris, the latter a very desirable acquisition, as we have personal reasons to know. The company has built and purchased twenty-four acres to accommodate the stone trade, and materials for some forty more. During the year, they have liquidated some $40,000 of ten per cent. construction bonds, and have renewed and painted all the water stations on the line.

The fiscal year of this road ends on the 1st of January. The earnings of the year 1858 were about $449,000. The receipts of 1859 show a falling off of perhaps $35,000. The principal reason for this deficit is found in the fact that the previous year exhibited almost an entire failure of the corn crop of Indiana, the great staple of the inward freights. Of course, as a natural consequence, there was a falling off in the outward freights, the demand for merchandise and manufactured articles being correspondingly lessened by the ability of the usual purchasers to pay. The local business fell off in a corresponding ratio.

It seems to have been the policy of the management of the road to maintain its position as a leading line to the Northwest. Within the next two or three years there will be a desperate struggle of the several railroads for the supremacy, and the roads which maintain themselves in an independent position can always control its connections. In such a position we regard the Indianapolis and Cincinnati road. The management has given much attention to its local traffic, fostering and encouraging little towns along the line, and developing the resources of the country as far as possible. This may be regarded as a permanent investment, and will eventually yield a handsome return, and will pay more than a dividend just at present.

The future of this road is encouraging. Nothing can retard its permanent prosperity. It is in as good (if not better) condition as any road in the West, and, what is still better, the local management has the confidence of the directors and the stockholders. They confidently believe that if they do not receive a dividend to-day, that the money has been judiciously and carefully expended, and that the return in the future will be adequate to their most sanguine expectations. As a

leading line out of our metropolis, the Indianapolis and Cincinnati occupies an important position, and a year hence will defy all competition. Our own observation during the week past, justifies this strong expression of opinion of its future prosperity. We speak what we believe, and time will justify the unqualified endorsement of the management of this important tributary to the trade of Cincinnati.—*Cincinnati Enquirer.*

Raritan and Delaware Bay Railroad.

Ten miles of this road, from Keyport to Redbank, was opened for public use a few days since. The whole road will be about 90 miles.

Brooklyn City Railroad.

The annual report of the Brooklyn City Railroad Company, to September 30, 1859, states that the entire liability of the Company is $1,000,000 capital stock, upon which regular dividends of 4 per cent. semi-annually are paid. The business for ending Sept. 30, 1859, was 20 per cent. larger than in 1858, the road carrying 9,261,393 passengers, against 7,705,839 the previous year. Of the surplus of $88,203 10 on hand August 1, the earnings of 1859 contributed $49,856 37:

1857-8	288,771.22	1,994,185
1858-9	346,037.39	2,496,968

The length of the road laid is 20.1 miles double track. The number of first-class passenger cars is 100, and of omnibus passenger cars 17.

The Victoria Bridge.

The great Victoria Bridge at Montreal has been tested by the English engineers sent out for that purpose, and their report, announcing the result and advising the company to accept the bridge, has been published. A train heavily loaded and long enough to cover two of the tubes, of which the bridge is composed, from end to end, was run through the bridge, stopping in the different tubes so as to test each span. The load upon the bridge was about one ton for every foot of length. A steel wire was extended through the bridge, tightly drawn, and from this the deflection of each span was measured. The train standing on the first tube only, depressed that span ⅞ of an inch, and raised the next one ⅜ of an inch; standing upon both at once, both were depressed ¾ of an inch; and so with the other spans except with the long central tube, when the deflection was one inch and three-eighths. In all cases the tubes returned to their proper position, the load being removed.

Contract for Railroad Iron.

The Crescent Iron Works, at Wheeling, Va., have contracted to manufacture 4,500 tons of tubular T rails for the Memphis branch of the Louisville and Nashville Railroad.

HUDSON RIVER CEMENT COMPANY,
12 **Jersey City, N. J.**

HOFFMAN'S ROSENDALE CEMENT,

OFFICE, 92 WALL ST., NEW YORK.

THE LAWRENCE CEMENT COMPANY are prepared to receive and execute orders for their Cement, to any extent that may be required. They would particularly call the attention of purchasers to the distinguishing brand of their manufacture, viz.: **HOFFMAN'S ROSENDALE CEMENT.** This seems to be necessary, as they have established a reputation for the superior quality of their Cement, and there are various other brands offered, as "Rosendale" Cement. It has the unqualified approbation of the most eminent Architects and Engineers, being used in almost every department of the Works under Government. It is put up in the most careful manner, each barrel being well lined with paper, and will be delivered on ship-board, in this city, on the most favorable terms. Particular attention given to shipping orders, and Freight obtained on the best terms.

M. W. WOODWARD, Secretary.

Coal-Burning on the Reading Railroad.

We copy from the last report of the Reading Railroad Company, the following communication, addressed to the President of this company, by Mr. Millholland, Superintendent of the Locomotive Department of that road, upon the use of coal as fuel for locomotive engines.

Sir:—I have your letter of the 7th inst., and most cheerfully comply with your request mentioned therein.

We have been burning anthracite coal in some of our locomotives for the past twelve years, and for five years in all the engines employed in coal transportation, hauling with them trains of 500 tons, exclusive of the weight of cars, and are now burning anthracite coal in all the locomotives on passenger, freight, and coal trains, employed on the main line of the road, and in all the engines employed on the lateral roads, except the two passenger engines on Lebanon Valley Branch, and one running the Reading Accommodation Train, and one on the Chester Valley Railroad, burning wood.

There are now on the road—

4 first class	anthracite	coal-burn'g	pass.	locom's.
1 sec'd	"	"	"	"
88 first	"	"	"	coal and fr'ht "
3 sec'd	"	"	"	"

These engines are much easier managed than wood-burners, and a much more uniform pressure of steam can be kept on them, as they are all provided with variable exhausts, under the control of the engineer, who can increase or diminish the draft at pleasure. To fire these engines requires much less labor than wood-burners, as it is not necessary to fire oftener than at intervals of forty minutes, and sometimes double that time may elapse without further attention than occasionally to clean out the cinder and ashes between the grate-bars. The best fire-boxes for burning anthracite coal are those with the largest grate area. The first four large engines for burning this fuel, built by Ross Winans, Esq., of Baltimore, and placed on the road in 1847, had fire-boxes six feet three inches long, by two feet ten inches wide, giving a grate area of 17.68 square feet; these engines did not make steam freely, and had to be run with a small exhaust, and in consequence produced a very strong draft, and threw a great deal of coal out of the chimney. The next five engines built by Mr. Winans for this company, were placed upon the road in 1850 and 1851, and were different from the four built by him in 1847; they are what is commonly called the "Camel" engine, having a large dome and house on top of the boiler for the engineer, their fire-boxes being five feet two inches long, by three feet six inches wide, giving a grate area of a little over eighteen square feet; they were also deficient in making steam, but gave much better results than the first four. The engines that have been placed on the road within the past seven years, also built by Mr. Winans, have fire-boxes 7 ft. long and 3½ ft. wide, making a grate area of 24.5 square feet, and perform very satisfactorily. One of the difficulties we have had to contend with in the use of anthracite coal as a fuel for locomotives has been the necessity of using an inferior quality of coal for the purpose of preventing the cast iron grate-bars from melting, as it makes a great deal of cinder and ashes, which, when once formed on the grate-bars, protects them from the immediate action of the fire, and the firemen have to be very careful in cleaning the grate-bars, that they do not get so much of it out as to bring the hot coals in contact with the bars and melt them down, and being compelled to use this inferior coal has made the consumption appear more than it really should be.

The best coal could not be used in our locomotives with any certainty of success, until water grate-bars were substituted for cast iron; in fact, it was looked upon as a bad article for the purpose, because it would melt the cast iron grate-bars; but the water grates have shown that it is far preferable, as it not only takes less of it to perform a trip, but there is less required on the grate at a time, and the fire being thinner, a larger exhaust can be used, and consequently a much milder draft is produced; no fire is thrown from the chimney, and the increased area of the exhaust relieves the back pressure on the pistons, and thereby increases the power of the engine.

In using the best anthracite coal in our passenger engines fitted with water grates, I have seen the fire run so low, when near the ends of the road, that a portion of the grate-bars would be bare. And I have no hesitation in saying, that, with a properly constructed boiler, fitted with water grates, and the use of good anthracite coal, all classes of locomotives, both passenger and freight, can be used with as much reliance as to their performances, both as to speed and power, as engines burning wood or any other fuel; and that a more uniform pressure of steam can be maintained on them, than any wood-burning passenger or freight engines that have been on our road for the past eleven years. It is, however, a matter of experiment with us now, to know what is the best material for a fire-box, and the proper shape to put it in, for service with anthracite coal. In the fire-boxes of Winans' engines, having a grate 7⅛ ft. long and 3½ ft. wide, with *vertical* side-sheets, we have been using copper, three-eighths of an inch thick; this, however, would not last more than about eighteen months, running about 25,878 miles, when the boilers had the entire back end of the fire-box open, with two upper and one lower door to close when in use, and cast iron grate-bars.

In this kind of a fire-box, the side-sheets would be worn down in places to not more than a sixteenth of an inch; and in others, it would retain nearly its original thickness, but from what cause I am unable to say; but probably from mechanical action, as the thin places are generally found about where the coal would strike the side-sheets when thrown in with a shovel. To remedy this wearing away of the side-sheets, I put in a harder material, iron; but it does not last so long as copper placed in a vertical position, as it appears to become very much overheated, and cracks vertically, showing a crystalline fracture, which, I have no doubt, is caused by the absence of water on the opposite side of the sheet from the fire.

The steam generated on the side next to the water (in consequence of the sluggishness of the circulation, if any, in this part of the boiler,) remains there in contact with it, and as it will not take up heat with as much facility as water, allows the iron to become too much overheated, and the first strain that comes upon it in the way of unequal expansion or contraction, causes it to crack; but copper being a more ductile material, is not affected in the same way, but becomes softer by the frequent heating and cooling, and therefore appears to be the best material of the two, for this kind of fire-box.

I closed up one-half the open end fire-box by putting a water back that took up one-quarter of the opening on each side of the fire-box, leaving one-half the area of the end open from top to bottom; the lower half of the opening was closed by a grate door, which serves to admit air to the coal in that part of the furnace that would not be sup-

plied with air if a solid door was used, and also for the purpose of inserting a slice-bar to break up the cinder on the grate. The upper half of the door is used for firing, and consists of two plates of cast iron, the inner one about two inches from the outer, leaving a space between, that was supplied with air through holes bored or cast in the outside plate; which air protects the inner plate to some extent from the heat, and also supplies air to ignite the gases, and not to allow them to pass from the furnace unconsumed.

This arrangement of doors increases the durability of the side-sheets, and engines whose boilers have been thus fitted, have run an average of 29,391 miles before the sheets required replacing.

To introduce the water grates, I was compelled to close the back end of the fire-box, leaving an oval door for firing, the same as in the ordinary wood-burning boilers, but with a number of small holes in the inner plate of the door, and larger in the outer; and in some of the boilers, I have put hollow stay-bolts, with an opening about one-quarter inch in diameter, in the back end of the fire-box. The side-sheets in the first boiler fitted with water grates and closed back end, run 39,254 miles; and as this is the only one that wants the side sheets renewed, I have no doubt as good results will be had from others fitted in the same way. I have now on trial, in a boiler with vertical sides, and same sized fire-box as before mentioned, with closed back, and side and end sheets five-sixteenths of an inch thick, made of Mr. Clay's homogeneous steel, which is doing well; it has run 14,381 miles. Most of the fire-boxes of the boilers of engines we have built in our own shops, and of those we have made to take the place of wood-burning boilers, differ somewhat in shape from those I have mentioned, and have a combustion chamber attached, extending from eighteen to thirty-six inches into the cylindrical part of the boiler; and some of the fire-boxes are much wider than they are long at the bottom, which makes the side-sheets incline towards the fire. Iron has been used in all these with but one exception, which is five feet long and five feet wide, making a grate area of twenty-five square feet. In this I put copper side-sheets, to ascertain if the shape had any influence on the wear. The experiment showed that copper would last longer in this shape with cast iron grate-bars, and the back end partly open, as they lasted to run 38,292 miles, while those with back end partly open run but 29,391 miles.

The iron sheets, however, in other fire-boxes, with inclined sides, show that this plan of constructing is much the best, as the side-sheets show little or no wear, and are not much thinner when taken out than they were originally, and the only cause for removing them arises from imperfect welding of the iron, which gives rise to blistering and cracking around the stay-bolts, so as to cause leaks; but they last much longer than the copper sheets in the vertical sides, and have run an average of 59,866 miles.

I think, from an experiment with an iron sheet in a fire-box with vertical sides, that I have hit upon a plan that will prevent the radiating cracks around the stay-bolts. It is to indent the sheet at the hole where the stay bolt passes through, a little more than will receive the riveting of the end of the stay bolt; this places the iron in such a shape in the sheet as to allow it to spring, when the expansion of the sheet and stay bolt takes place. The experiment clearly shows an advantage from the indentation, as the opposite sheet, in the same fire-box, is cracked and leaks, whilst the stay bolts in this are as perfect as the day they were put it, never having leaked at all, after having been in operation since October, 1858, and ran 22,388 miles.

The most durable fire box for burning anthracite coal we have had on the road is of iron, in a small boiler of one of our light engines, built by the company, about eight years since, and has been but a few months replaced with a new one. It is four feet five inches long, and three feet seven inches wide, making a grate area of 15.82 square feet. The side sheets, being smaller than in the large engines now in use in our coal trade, were made direct from the bloom, and are consequently homogeneous; the flue sheet was also set back from the fire box about eight inches. It ran 168,588 miles, but I have not included it in the average number of miles run by our engines with iron fire boxes.

Recapitulation.

Average number of miles run with iron fire-box sheets	59,866
Average number of miles run with copper fire-box sheets, open end	25,373
Average number of miles run with copper fire-box sheets, half closed	29,391
Average number of miles run with copper side-sheets, closed end, and water-grates	39,254

Cost of Renewing the Copper Fire-Box Sheets.

Labor "per contract,"	$100 00
870 lbs. copper	278 40
635 lbs. boiler iron	31 75
165 lbs. rivets	11 55
273 lbs. stay-bolts	21 84
49 ft. hollow-bolts	10 87
	$454 41

Cr.

By 530 lbs. old copper	$106 00
By 881 lbs. scrap iron	11 75
	117 75
Balance	$336 66

Cost of Renewing Iron Fire-Box Sheets.

Labor	$100 00
1,095 lbs. boiler iron	54 75
165 lbs. rivets	11 55
273 lbs. stay-bolts	21 84
49 ft. hollow-bolts	10 87
	$199 01

Cr.

By 1,190 lbs. scrap iron	15 87
Balance	$183 14

The consumption of fuel by our coal train engines, with a train of 100 loaded cars, with five tons per car, and 110 empty cars up, is on an average in the round trip of 190 miles, nine tons of coal.

The performance of our anthracite coal burning passenger locomotives, I think, will compare favorably with locomotives using wood or bituminous coal on other roads.

Annexed please find a statement of the performance of one of them, and it may be as well to state, that the engineer and firemen of this engine never run a coal burner before, and had not been on this more than a month when the experiment was made, having been taken off a wood burning passenger engine, and I have not the least doubt, but a better result can be shown under similar circumstances, in future.

I would also call your attention to the performance of the Phœnix, the pushing engine at the Falls grade. This engine burns anthracite coal, is an eight wheel connected engine, and weighs 70,700 lbs., and is doing the work that required two eight wheel connected wood burning engines, 52,192 lbs. each.

The number of engines that have been changed from wood to coal burners, and the miles run by each up to the 30th of Nov., 1859, will be found in the following statement.

None of these engines have had new fire boxes, or fire box sheets put in their boiler, since they commenced burning coal.

Very respectfully,

JAMES MILLHOLLAND.

R. D. CULLEN, *Pres't Phila. & Reading R. R.*

In the same connection, we copy the from the Pottsville *Miners' Journal*, a communication addressed to the Editor of that paper by Mr. Nicolls, Superintendent of the road.

SIR:—By your request, I send you a brief account of our experience in using anthracite coal for locomotive fuel, and of its economy compared with wood.

Since the year 1838, when the first engine ran on the Reading road, between Reading and Pottstown, the attention of this company has been steadily directed to the practicability and economy of using the anthracite coal of Schuylkill County, exclusively, for fuel in their locomotives.

For many years past, all the heavy transportation of the road has been performed by engines using this fuel, equal in efficiency, and much superior in economy, to those of their class using wood.

The chief characteristics of our coal engines are: A large, wide and shallow fire box; hollow wrought iron tubes for grate bars, through which the water circulates, communicating with the fire box and boiler, and the variable exhaust. In other respects they differ but slightly from ordinary locomotives.

The dimensions of the "Black Diamond," one of our most approved coal burners used for heavy transportation, are as follows: Weight in running order, with fuel and water, 63,700 lbs.; 8 drivers, each 43 inches diameter; boiler, 40 inches diameter, and 24 feet 6 inches long from end to end, including fire and smoke boxes; cylinders, 18 by 22 inches; 119 tubes, 2 inches diameter, and 14 feet 10 inches long; fire box inside, 65 inches long by 72 inches wide, and 53 inches deep at tube sheet end, sloping to 46 inches deep at fire doors; 16 tubular grate bars 5 feet 5 inches long, and 2 inches outer diameter.

This locomotive will haul as her regular load, 110 loaded coal cars, weighing, exclusive of engine or double tenders, 910 tons of 2,000 pounds, at a speed of 8 miles per hour, consuming in the trip of 95 miles, with such a train, about 10,000 pounds of anthracite coal. In this 95 miles is a fall of 620 feet, with several levels, one of which is over 8 miles long. The whole cost of this coal in the tender, is $10; while to obtain the same results from an engine burning wood, about 6¾ cords would be required, costing us $26.50 when prepared for use.

To the $10 should be added about 1½ cents per mile for additional repairs, caused by the use of coal fuel; but this difference is now gradually lessening, as we apply fresh improvements to these coal burning engines, and is expected in time to disappear altogether.

Equally successful have been our efforts to introduce the use of anthracite coal, by our passenger locomotives.

Five first class passenger engines now use this fuel exclusively, and with such favorable results in their power, speed, economy, and every quality which constitutes an efficient machine, that it is probable no other description will ever be built or purchased for this service. The "Hiawatha," one of the last built by the company, is of these dimensions:

Total weight, fuel and water, 56,448 lbs.; on her 4 drivers, each 67½ inches diameter, 33,264 lbs.; cylinders, 15 by 20 inches; boiler, 40 inches diameter, and 21 feet 4 inches long, out to out; 170 tubes, 11 feet 5 inches long, and 1¾ inches outer diameter; fire box, 84 inches long, 42 wide, and 46 inches high at forward end, sloping to 32 inches at fire doors; 12 fire grate tubes, each 7 feet long, and 2 inches outer diameter; 4 truck wheels, each 30 inches diameter.

The "Hiawatha" will take 6 eight-wheeled passenger cars, weighing with their contents 72 tons of 2,000 lbs., from Pottsville to Philadelphia, 93 miles, at a speed of 30 miles per hour, with a consumption of 2,350 lbs. of coal; and uses about 300 lbs. more coal, with the same train, on her return trip. Fall between Pottsville and Philadelphia, 559 feet. Whole length of trip, including 23 stops, 4 hours 20 minutes.

In performing the same duty a wood burning locomotive would use from 1¾ to 2 cords of wood, the relative value of each description of fuel being the same as stated of the "Black Diamond," and the additional cost of repairs about one cent per mile more than if burning wood. These engines and those of a similar character, whether used for passenger transportation or for that of heavy coal or freight trains, are fully equal to every demand upon them, arising from the contingencies and

casualties of a varied business of extraordinary magnitude, the greater portion of which is done during the night.

With proper management, the same coal fire can be carried without being raked out or re-made, during a trip of eighteen or more hours; and in an emergency it is not uncommon for the same engine to turn, and after some cleaning and raking of her fire, perform double duty, or a round trip of 190 miles, with full trains each way.

These locomotives haul trains of unusual length and weight, both of passenger and freight, at the allotted time table speeds, and can stand with the same fire for hours together in case of accident, ready to resume their trips when required.

Many other advantages are gained by the use of anthracite coal in locomotives.

1. Less "dead" or non-paying weight hauled, in the proportion of 1 to 2¼, with a consequent saving of labor in firing, wear and tear of road, and rolling stock, &c.

2. Less "stowage" room required, in the proportion of 1 to 3; with smaller tender space, and less frequent stops of the train; and less area needed for fuel at stations.

3. Entire freedom from danger of fire to the stock of fuel on hand at stations or elsewhere, by accident or design.

4. An inexhaustible supply of coal always procurable; while the difficulty of securing wood, and its cost, increases annually.

5. Less liability of injury by fire to bridges, buildings, fences, crops, passenger's clothing, &c.

6. No loss of capital required in keeping large stock of wood on hand while "seasoning," or for an emergency.

The "Black Diamond" and "Hiawatha," with many others of their class, were designed and built in the Reading workshops of the Philadelphia and Reading Railroad, by James Millholland, Esq., Master Machinist.

Respectfully yours,
G. A. Nicolls, *Gen. Supt.*

Journal of Insurance Law.

HAZARDOUS ARTICLES: CONSTRUCTION OF POLICY AS TO.

The case of Macowber *vs.* Harvard Fire Insurance Company, decided in the Massachusetts Supreme Court, determines a question which is often likely to occur, and which from this very fact is both interesting and important.

The insurance which was the subject of the controversy, was upon the plaintiff's stock in trade, fixtures, furniture and tools, contained in a certain wooden building described in the application for insurance. This application contained in answer to a request to "state the character and kind of property to be insured" the following statement, "Dry goods, groceries, hardware, crockery, glass and wooden ware, Brittannia and tin ware, stoves of various kinds, and various other ware and merchandise. It was declared by the policy to be the true intent and meaning of the parties thereto, that in case the premises should at any time during the continuance of the insurance be used for the purpose of keeping or storing therein any of the articles, goods or merchandise, denominated hazardous, or extra hazardous, or included in the memorandum of special rates, unless otherwise specially provided for in the policy, or thereafter agreed by the policy, then and from thenceforth, so long as the same should be so appropriated, the policy should cease, and be of no force or effect. And it was further declared that the policy was made and accepted in reference to the condition thereto annexed, which were to be used, and resorted to in order to explain the rights and obligations of the parties thereto, in all cases not therin provided for.

Annexed to the policy were four classes of hazards, denominated, respectively, "not hazardous," "hazardous," "extra hazardous" and "memorandum of special hazards upon which special rates of premium will be charge."

Goods not hazardous were to be insured at the rate of the building in which they were contained and were such as are usually kept in dry goods stores, including coffee, flour, linen, indigo, potash, rice, spices, sugars, teas, threshed grain and other articles not combustible." The following trades and occupations, goods, wares and merchandise were denominated hazardous, and were to be charged ten cents per $100 in addition to the rate of the building in which they were contained, namely, basket-sellers, cotton in bales, coppersmiths, china or glass ware, or plate glass in packages, boxes or casks, groceries with any hazardous articles, hardware, wooden ware *and rags.*

Among the conditions of insurance also annexed to the policy, were the following: "In relation to the insurance of goods and merchandise, the application must state whether or not they are of the description denominated hazardous, extra hazardous, or included in the memorandum of special rates." "If after insurance is effected upon any building or goods in this office, either by the original policy, or by the renewal thereof, the risk shall be increased by any means whatsoever within the control of the assured, or if such buildings or premises shall, with the assent of the assured, be occupy in any way so as to render the risk more hazardous than at the time of insuring, such insurance shall be void and of no effect."

At the trial, the facts necessary to make out a *prima facie* case for the plaintiff were proved or admitted. One ground of defence relied on was that a part of the plaintiff's stock consisted of rags, which was admitted to be the fact. But it was proved "that it is usual for country stores, having a general stock of goods like the plaintiff's, to keep and dispose of rags in the same manner that the plaintiff did." The judge reserved for the consideration of the full court the question whether, upon these facts, the defence could be maintained. The question was accordingly argued before the full bench of the court, and the following is the opinion upon the decision of the case.

Bigelow, J,—The provisions in the policy declared on, and the conditions of insuranc to which the agreements of the parties therein refer, are the same as those which passed under the consideration of the court in Lee *vs.* Howard Fire Ins. Company. The principles there laid down are decisive of this case. It appears by the evidence that, among the articles stored in the building in which the property insured was kept, a quantity of rags was included. These, being enumerated as a "hazardous" article in the conditions of insurance, could not be kept on the premises, without a direct violation of the express terms of the policy, except by the consent in writing of the defendants; and if so kept, without such consent, the policy was thereby rendered void. Rags though especially enumerated as a hazardous article in the conditions of insurance, are not mentioned in the application for insurance, although other hazardous articles are there specified. It is not sufficient that the term groceries was used in the application; nor that it is usual to keep rags in a country store. If the description in the application had contained the words "groceries with any hazardous articles," it might have been sufficient; because it would then have given the Insurers notice that articles deemed hazardous were to be kept, in addition to those ordinarily comprehended within the meaning of the word groceries. Upon the application as it stands, the defendants had a right to suppose that nothing besides groceries, and the articles especially named in the application, was to be kept or stored in the premises. The plaintiff had no right, under his policy, to accumulate articles of the same class of hazards on his premises, not named in the application, without the consent of the defendants. Lee *vs.* Howards Fire Insurance Company.

The effect of the evidence to prove a usage to keep rags in a country store was to control the written agreement of the parties, by which it appeared that rags were not included in any genuine term or description, but were to be specially named, if intended to be included in the policy. The evidence was, therefore, incompetent. A judgment was accordingly entered for the defendants.

Completion of the Orange and Alexandria Extension.

We give the following from the Baltimore *American* to show how the completion of the Orange and Alexandria Railroad is viewed in that city:

The extension of the Orange and Alexandria Railroad from Charlottesville to Lynchburg may be said to be finished. No formal announcement of the completion of this important link in the Great Southwestern system of railways extending from Portland to New Orleans has been made to the public, nor are the cars now running further than Charlottesville, but the work yet to be done at Lynchburg is so trifling, and the opening of the road to through travel is so near at hand, that it may not be amiss to anticipate an event of the first magnitude to the commercial interests of Baltimore, and to give timely utterance to the considerations of a practical nature which such an event necessarily suggests. We are of opinion that the merchants and manufacturers of Baltimore are far from being alive to the immense value of this road as an avenue of business, and more particularly as the most direct and only complete channel for the vast bulk of import trade to a wide and fertile country which was once tributary to our city and may again become so, *by prompt, energetic and sagacious management.* Thirty years ago, wagons from Knoxville, Tennessee, were familiar sights in the streets of Baltimore. These wagons, coming up through the valley of Virginia, brought to our warehouses the varied products of half a dozen different States. Western Virginia, East and Middle Tennessee, Southern Kentucky, North Alabama, Northwestern Carolina, and parts of Georgia and Mississippi, poured the rich stores of their fields and forests into the lap of Baltimore. On the return trip, the wagons of Tennessee were laden with a thousand kinds of imported and manufactured goods, the value of which was largely in excess of the home products they had originally brought in payment of the articles of taste, of comfort, and of luxury demanded by the wide tract of country which we have mentioned and which was rapidly growing in wealth, in population, in refinement, and in all the needs of the highest degree of civilization.

This exceedingly valuable trade, by which our city was enriched in former years, has been lost to us, we are glad to say, through no fault of our merchants, but by reason of the laws which govern the movement of the commercial and mercantile tides. Trade seeks the nearest water, as unerringly as water seeks its level. The completion of the Memphis and Charleston, together with the great inland Georgia road from Savannah to At-

lanta and Chattanooga, opened to the products of the Southwest a new channel to the sea, with which it was vain for the people of Baltimore to compete so long as interior Virginia remained a *terra incognita*, so far as railroads were concerned. The trade, which had once been our's, and which all the inducements of long acquaintance and warm friendship between our merchants and those of Tennessee, Virginia, Alabama, &c., could not retain to us, was, as it were, compelled to the ports of Savannah and Charleston; and where the produce went, thither, of course, the factors followed and purchased their goods. It was under these circumstances that it became imperative upon Baltimore to throw out the mighty arm of the Baltimore and Ohio road which embraces and brings to our wharves the commodities of countries as extensive and even more populous and productive than those from which we had been cut off, by the enterprise of the Georgians and South Carolinians.

But the barrier interposed between Baltimore and the Southwest has been annihilated without cost or inconvenience to her, and the road is once more open to the rich traffic we once enjoyed. The East Tennessee, the Virginia and Tennessee, and the Lynchburg and Alexandria Railroads, with their connections, afford to Baltimore a cheap, speedy, and secure transit to the regions whose trade belonged to us in the days when steam had not superseded horse-power, and when wagons ran in place of cars. *By proper effort on the part of her citizens, the valuable Southwest trade of former years, now quadrupled in quantity, may be regained. Will that effort be made?*

The completion of the Charlottesville extension reduces the distance from Washington to New Orleans to 1,195 miles. In two years from this date the finishing of the N. E. & S. W. Alabama road, with the transverse road from Meridian to Jackson, (if we mistake not) will occasion a further reduction of 150 miles—making the distance from Washington to New Orleans only 1,045 miles. The shortness of this route, it being almost an air line—its speed, safety, and convenience, and the immense travel it must obtain, point it out unmistakeably as the channel through which Baltimore can, if she choose, once more pour the stream of her imports upon the Southwest. Three millions of people, already rich and destined to become richer every year, may be supplied with the untold luxuries and necessities of modern civilized life through this channel. A little foresight and a little energy will restore to Baltimore the tributary provinces which she once owned, and which of right belong to her. Duty, interest, ambition, every incentive that should excite a commercial people, urge us to exhibit this foresight and practice this energy.

Space does not permit us to dwell upon this topic, vast as is its importance, nor do we deem it becoming to impose our opinions as to the duty of Baltimore upon a public whose comprehensive sagacity and business tact have never been called in question. Our task is ended in calling attention to a few facts which in the pressure of other affairs our merchants have overlooked. On one point, however, there cannot be two opinions. The duty of Baltimore, as connected with the opening of a new avenue to an old region of trade, is to facilitate the access of the traders and their products by every means in her power. Hence there can be no conflict of sentiments with regard to the propriety of instantly and earnestly urging upon our Representatives in Congress the imperative obligation of *securing at once a connection between the Alexandria road and the Washington branch of the Baltimore and Ohio road.* French's road already extends from Alexandria to a point opposite the city of Washington, but the connection is broken at Alexandria and a railroad bridge is yet to be built across the Potomac. *These two interruptions should be done away with immediately.* French's road should become part and parcel of the Alexandria road, the cars of which should run without a single break from Lynchburg into the depot near the capitol. This accomplished, Baltimore again becomes the commercial *entrepot* of the Great Southwest, in spite of the opposition of the tide-water cities of Virginia, and the end will prove that the Alexandria and Lynchburg road will be no whit inferior, in point of importance to the material interests of Baltimore, to the Baltimore and Ohio road of which she is justly so proud.

Railroads and Finances of Louisiana.

We copy the following from the late message of the Governor in reference to the finances and railroads of this State:

The condition of the State Treasury, according to the report of the Auditor, shows a balance on the 1st of January, 1860, of $133,696 09, to the credit of the General Fund.

The receipts into the State Treasury for the ensuing year for account of the General Fund, are estimated at $1,205,000. Making a sum total of $1,338,696 09.

The estimated expenditures for the same period, including the unexpended balances, amount to $1,174,513 82. Showing a balance to the credit of that fund on the 31st of March, 1861, of $164,142 77; exhibiting a far more prosperous condition of the finances of the State than has been presented for eight years.

It will therefore be seen that, without increasing the rate of taxation, the annually increasing revenues of the State will enable her to meet promptly all the wants of government.

Bonds issued to Railroad Companies during the year 1859.

To the New Orleans, Opelousas and Great Western Railroad Company, 10 bonds of $1,000	$10,000 00
Issued previously 621 bonds of $1,000	621,000 00
Total amount issued	$631,000 00
To the New Orleans, Jackson and Great Northern Railroad Company (none issued)	
Issued previously, 884 bonds of $1,000	$884,000 00
Total amount issued	$884,000 00
To the Vicksburg, Shreveport and Texas Railroad Company, 29 bonds of $1,000	$29,000 00
Issued previously, 174 bonds of $1,000	174,000 00
Total amount issued	$203,000 00
To the Baton Rouge, Opelousas and Grosse Tete Railroad, 5 bonds of $1,000	$5,000 00
Previously issued	56,000 00
Total amount issued	$61,000 00

RECAPITULATION.

Bonds issued during 1859, 44 bonds of $1,000	$44,000 00
Previously issued, 1,735 bonds of $1,000	1,735,000 00
Total	$1,779,000 00

Estimate filed in Auditor's Office of Bonds required for the year 1860.

By the Vicksburg, Shreveport and Texas Railroad Company	$113,311 00
By the New Orleans, Jackson and Great Northern Railroad Company	111,000 00
By the Baton Rouge, Grosse Tete and Opelousas Railroad Company	19,000 00
By the New Orleans, Opelousas and Great Western Railroad Company	50,000 00
Total estimate, 203 bonds	$293,311 00

You will perceive that the total amount of bonds issued by the State to railroad companies amount to $1,799,000. No provision has yet been made for the ultimate payment of these bonds at maturity or for the payment of $433,000 bonds issued to the New Orleans and Nashville Railroad Company, due 1st April, 1867; and $100,000 bonds issued to the Mexican Gulf Railroad, due in 1870. I now renew the recommendation in my last annual message, that the Legislature take the necessary steps to provide for these debts of the State, by the creation of a *Reserved Fund*, to be appropriated to that purpose, and would suggest that this fund might be provided without the necessity of a resort to any increase of taxation. The Internal Improvement Tax Fund, which was created for the purpose of meeting the interest on the bonds issued to the railroad companies, and fixed at one-fourth of one mill on the dollar, or twenty-five cents on $1,000 it is found meets the interest on the bonds, and leaves a surplus annually in the treasury. That surplus now amounts to near $100,000, and it is estimated will be increased by the 1st of January, 1861, about $50,000. By creating a fund for the "Redemption of Bonds issued to Railroad Companies," and investing the present surplus of the Internal Improvement Tax Fund in the Bonds of the State, annually appropriating the surplus that may appear to the Internal Improvement Tax Fund, and the semi-annually investing in like manner the interest accruing on the bonds held by the "Redemption Fund" and permanently fixing the Internal Improvement Tax at its present low rate, it is believed will very nearly, if not entirely, liquidate the debt of the State for account of railroad companies.

RAILROADS.

But little progress has been made in the extension of our principal railroads since my last annual message. The New Orleans, Jackson and Great Northern Railroad remains completed as far as Canton, Mississippi, and the roadway formation for the first twenty-six miles north of Canton will soon be ready for receiving the superstructure and iron.

This corporation has always held a leading position among our railroad enterprises. Its form of organization, its financial schemes, and its general policy, have been more or less adopted by other companies, and for the most part with advantage. It has probably been managed with less prudence and economy than some other railroad works, but at the same time the road has been pressed forward with zeal, energy and fertility of resources under pressing difficulties, seldom equaled in any section of our country.

This railroad is completed two hundred and six miles, intersecting the Mississippi Central Railroad at Canton, thus securing to New Orleans an unbroken railroad communication with the whole railroad system of the United States, and at once realizing the anticipations of the original projectors.

Although so much has been accomplished, yet only one-half the labor undertaken by the company has been performed; their plan was to build a continuous railroad to the Tennessee River, 410 miles from the city of New Orleans. On reaching Canton, however, the company find they have exhausted their available subscriptions, and have contracted on long time a bonded debt of $3,000,000. Under these circumstances the company are admonished that their franchises in Mississippi terminate by law in March, 1862, and that it will be necessary to procure an extension of time ir order to recruit its resources and establish a financial credit equal to the magnitude of the work yet to be performed. In view of these facts, propositions of the most unfriendly nature have been introduced into the Legislature of the State of Mississippi at its present sitting, whereby it is proposed that the necessary relief should not be granted except under conditions of the most humiliating nature and utterly subversive of the credit and future existence of the corporation. What is most remarkable is that this movement is not supported by the rival railroad interests of Mississippi, but by those who should be the fast friends our enterprise, those who represent the counties traversed by the proposed railroad north of Canton; those who, of all others are most interested in and anxious for the extension of the railroad, impatient, as it would appear, at unavoidable delay, suspicious of the honest purposes of the company to complete their work and perform faithfully other obligations to the State of Mississippi this unnatural course has, it may be inferred, been adopted with the view of intimidating the corporation, driving it from its manifest policy, and

thereby making it more certain of local interests.

I will be able to lay before you at an early day the documentary evidence which has suggested the foregoing remarks. No legislature is responsible for matter which may laid before it, however unreasonable and unjust, but only for its action on such matter. I feel the highest confidence that the Legislature of Mississippi will not knowingly do an unjust, or unfriendly act towards this corporation; but in view of the magnitude of the interest involved in maintaining, unimpaired, the credit and efficiency of the company, and placing its corporate perpetuity and the validity of its contracts beyond all future doubt or cavil, I would earnestly recommend that the State of Mississippi be officially requested to grant to said company sufficient additional time to complete their railroad, and that no forfeiture of franchise shall attach to any portion of the said railroad, which has been or may be hereafter faithfully completed.

The New Orleans, Opelousas and Great Western Railroad is completed to Berwick's Bay, where it unites with a tri-weekly line of steamers which run from the Bay to Galveston. The Board of Directors have placed a considerable amount of additional work under contract west of Berwick's Bay, and have a well matured financial scheme for the completion of their great enterprise, which terminates at Thompson's Bluffs, on the Sabine river. After crossing the river, the New Orleans, Opelousas and Great Western Railroad unites with the Texas Great Western, and the Sabine and Rio Grande Railroads; the former running northwesterly and connecting with the Southern Pacific Railroad, at its crossing on the Brazos river; and the latter south-westerly, nearly parallel with the shore of the Gulf of Mexico, to San Antonio. The prudent management of the affairs of this company, and the liberality of the State of Texas, in the granting of franchise, subscriptions, and substantial endowments to her railroads leading to our western border, secures a bright prospect for the New Orleans, Opelousas and Great Western Railroad Company, inestimable blessings to a large portion of the people of Louisiana and Texas, and oriental wealth to the commerce of New Orleans.

The Vicksburg, Shreveport and Texas Railroad is progressing. The first twenty miles from Vicksburg are in daily use, and it is anticipated that the first grand division of the road will be finished and ready for transporting the next cotton crop of that district. The construction of the entire line of the railroad to its union with the Southern Pacific Railroad, on the Texas border, has been contracted for by responsible parties, and the work will be prosecuted as rapidly as the financial abilities of the company will permit. It is true much less work has been done on this line of railroad than on the two railroads before reviewed; but it must be remembered that the Vicksburg and Shreveport Railroad passes through a comparatively new and thinly settled country, and that it has not, like the Great Northern and Great Western Railroads, received powerful aid in the form of private and city corporate subscription. As the road progresses, the valuable donations of public lands made by Congress (though impaired by act of Congress of the 3rd of March, 1858,) will become valuable assets for future extension; besides the country is increasing daily in population and wealth, which additional resources, taken in connection with the immense western travel which will follow the completion of the Southern Railroad from Vicksburg towards Montgomery, and the extension of the Southern Pacific westward, must at no distant day insure the completion of this great highway, than which none in the State has been conceived in a higher spirit of self-reliant enterprise, or prosecuted with more prudence, ability and industry.

The Baton Rouge and Grosse Tete Railroad, when regarded in connection with the proposed New Orleans and Baton Rouge Railroad, and its present contemplated extension towards Alexandria and Opelousas, rises to a high position in our railroad system. The road has been well managed from the beginning, and all its available resources will be faithfully applied to the extension of the road beyond the Bayou Grosse Tete. The Directors of this enterprise have adopted the true policy, which should govern all our railroad companies; they have increased their negro forces so as to be independent of other labor, and are now most actively engaged in the proposed extension.

It is a source of gratification to inform you that within my knowledge, the State has not in a single instance granted its aid to an unworthy enterprise, or to one which is not at present entirely solvent, and which will not realize all the benefits anticipated by the most sanguine projectors. In due time I will place before you the various reports of all the railroads in which the State is a stockholder.

Selma and Gulf Railroad.

The Selma (Ala.) *Sentinel* of the 5th learns from the Secretary and Treasurer of the Company that the amount required before commencing the work of construction, is about made up. It is expected that forty miles or more of the line will be under contract for a month or so from this time, and the balance as fast as can be prepared by the engineers. It is the purpose of the Directors to increase the stock some two hundred thousand dollars or more, so as to have little credit about the building of the road.

Cleveland and Mahoning Railroad.

The earnings and expenses of this road for 1859, were as follows:—

Receipts from passengers		$46,883
Do.	freight	117,242
Do.	coal	114,136
Do.	mail, etc.	6,889
		$285,141
Operating expenses—		
Repairs of road-bed, etc.		$27,075
Do.	engines	7,655
Do.	passenger and baggage cars	1,560
Do.	freight and coal cars	7,869
Expenses of passenger trains		3,453
Do.	freight and coal trains	8,299
Paid conductors		2,049
Do.	baggage and brakemen	4,063
Station expenses		12,935
Salaries and office expenses		9,738
General expenses		5,862
Rents		2,517
Fuel		9,931
Balance, net earnings		182,283
		$285,141
Gross earnings, per mile run		$1.55
Operating expenses, per mile run		.55.9
Cost of fuel, per mile run		.05.4
Operating expenses, per cent. of earnings		.36.7

The comparative statement of the business of 1858 and 1859 shows as follows:

	1858.	1859.
Total earnings	$234,282 01	$285,140 56
Operating expenses	89,257 23	102,857 60
Net earnings	$145,024 78	$182,282 96

—showing a net increase of $37,258 15.

The earnings of the past year, amounting to		$182,282 96
have been disposed of as follows:		
Paid taxes	$4,213 95	
Paid coupons on 1st, 2d and 3d mortgage bonds	77,749 00	
P'd for construction, (which includes new sidings, extension of old siding, cattle guards, covering new bridges, etc,)	13,297 01	
		95,259 96
Leaving a balance of		$87,023 00

which has been applied to the payment of interest on and the reduction of floating debt.

The mortgage debt, when all the bonds are issued will be thus:

First mortgage	$850,000 00
Second mortgage	500,000 00
Third mortgage	650,000 00
	$2,000,000 00
The annual interest on this sum is	140,000 00
Net earnings the past year	182,282 96

—Leaving from the past year's net earnings $42,282 96, to be applied to a sinking fund for the redemption of the principal.

LaCrosse and Milwaukee Railroad.

On the subject of this road we copy the following from the late Message of the Governor of Wisconsin:

Since the last session of the Legislature, nothing has been done by the LaCrosse and Milwaukee Railroad Company, or by any other company representing it, towards a compliance with the act of conferring the land upon that company. By the terms of the law turning over the grant to that company, the Legislature is authorized to declare the grant forfeited, so far as rights have not become vested. The final disposition of the vexed question connected with this grant is a serious subject for your consideration. I shall continue the same course that I have heretofore pursued in regard to it, unless some steps are taken by the Legislature to change the character of my duties.

I have no recommendation to make in the premises, except to suggest, that in case the grant, or any portion of it, is put into the hands of a new company, it should be done on such terms and conditions, if practicable, as will best aid and relieve the farmers and innocent stockholders of the LaCrosse and Milwaukee Railroad Company, whose interests have become so much involved in the misfortunes of that company.

Marietta and Cincinnati Railroad.

It will be remembered that this road with all its equipment, real estate and property of every description, is to be sold on the 25th of next month. It has transpired that during the recent visit of Noah L. Wilson, Esq., to Europe, a complete understanding was had with regard to the future of this really great line in the event of an order of sale by the courts of Ohio. Immediately upon the return of Mr. Wilson, all opposition to a sale on the part of the company was withdrawn, and the court of Chillicothe ordered a peremptory sale. A company is now nearly formed embracing the pecuniary ability to bid the minimum amount prescribed in the decree, and the class of men whose names will give character to the enterprise. It is understood that, upon compliance with certain terms, the reasonableness of which is conceded on this side, and the procurement of an act of the Legislature, to which there can be no objection from any quarter, the bondholders will be prepared to advance a sum of money sufficient to complete the permanent way of the Marietta and Cincinnati road between Loveland Junction and Belpre, opposite Parkersburg. The bridges will be rebuilt, the shorter tressels perpetuated, and the tunnels finished, for the scheme embraces the perfection of the line from Athens to Belpre via Scott's Landing. We regret that the Hocking Valley line to Belpre direct has not been adopted, but, at the same time, remark that it is due to the men who have so persistently struggled at home and abroad for the completion of the great railroad of Southern Ohio, that their tenacity for the original conception of the road as a line to Philadelphia as well as to Baltimore, should be respected everywhere. Adopting this original idea of the Marietta and Cincinnati road as having, at the city of Marietta, an alternative connection with the Baltimore and Ohio via Parkersburg, and the Pennsylvania Central via Wheeling, the policy of perpetuating the present Athens and Marietta line must be approved.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, etc., etc.

An *asterick* (*) occurring in the column headed "Rolling-Stock," signifies that the cost is included in that of "Railroad and Appurtenances." A *dash* (—) signifies "nil." Running *dots* (.....) signify "not ascertained." Land-Grant Railroads are in "*italics.*"

A Desirable Improvement.

The Utica *Herald* says that Mr. Joseph Jones, of that city, a master mechanic in the employ of the New York Central Railroad, has lately made an important addition to some of the cars on the road. It is a contrivance which completely covers up the intervening space between the cars, without interfering with their coupling or the brakes in the least, but rendering it impossible for any one to fall between the cars or under the wheels. An attachment is also put on the top of the car, by which the brakesman can step from one to the other, without danger of falling between them. It also serves to keep the platform dry, and free from rain, ice and snow.

Railroad Reports.

RAILROAD COMPANIES will oblige us by sending us copies of their Reports as soon as they are published.

American Railroad Journal.

Saturday, February 4, 1860.

Completion of the Mississippi Central R. R.

The present week marks the completion of this road, and the addition of the railroads of the Southwestern States to the grand system of the United States. The great metropolis of the Gulf is now brought within three and a-half days of New York, by a continuous line of railroad. The perilous route by the Mississippi river is at an end. New Orleans is now within easy reach of every portion of the great valley. Twenty-four hours will suffice to reach the mou'h of the Ohio; thirty hours, St. Louis; and thirty-six Chicago and Cincinnati. The great route now just formed will be to the travel of the Southwest what the Mississippi is to its commerce.

In importance, the event is second to none of the kind ever witnessed in this country.

The occasion should not pass without a tribute of respect and gratitude to the parties who have been mainly instrumental in securing this great result. The City of New Orleans and the State of Louisiana built the New Orleans, Jackson and Great Northern Railroad. Without their aid, the first sod would not have been turned. The people of Mississippi had no city, nor State, unfortunately, upon which to rely for aid. The road, if built at all through her territory, had to be built by the planters of a sparsely settled country, who usually have not much faculty for such undertakings, nor money which they care to invest in them. Every cent of stock taken was, in the outset, regarded as so much money thrown away. No new people can afford to construct their own railroads. It was under these discouragements that the Mississippi Central Railroad was taken up by a few self-reliant, but self-sacrificing, public spirited persons, who well understood the labor and risk they assumed, in attempting to build 200 miles of road, drawing the means therefor from a compartively small body of planters. They could not present themselves in the money centres with the bonds for sale. A credit had first to be created by the expenditure of large sums, and by a display of integrity and capacity, and steadiness of purpose, which, under the circumstances, they did not expect would be presumed in their favor. But this very fact created a double motive. They saw that the only way to restore the faith of the State was to reach the public conscience through commercial ideas; that the railroad was in the condition necessarily precedent to such a result—a result which would not be long in following the completion of a system of such works. This expectation, we are happy to say, seems in a fair way to be speedily realized. Already has a movement been set on foot which we are confident will increase in force and strength, till ample provision is made for the State debt.

The road is a work of great importance, *politically* as well as commercially. All our institutions rest upon the basis of interest. We can expect no other, as ideas in the long run will take their shape and color from it. The road just opened is a grand [commercial tie, bringing ex]

tremes into intimate relations, and impressing them, in this way, with a common type. Each will lose something of the emphasis that characterizes it, and will be forced to abate something of its pretensions. All these things will take care of themselves as soon as our people are brought together, by law of convenience and necessity. Our railroad men, therefore, are the true conservators, the conservators of *progress*, which is the only conservatism worth having. The Conservators of Mississippi deserve a monument of respect and gratitude from their benefactors, which is the only one, we presume, which these desire to have erected.

The Pro Rata Bill before the Legislature.

We copy, in full, in another column, the bill before the Legislature of the State for the regulation of the rates and charges upon freight by our railroads. Subjoined we present an extract of the bill:

The first *section* requires that each company make up a full and complete arrangement and classification of property usually carried on railroads, and designate the several grades and orders, as class 1st, 2nd, 3rd, 4th, etc., specifying the rates and prices at which each article or class of articles will be carried *per ton per mile*, which rates shall apply as well to a fractional part of a ton as to quantities greater than a ton.

The sum or charge not to exceed 40 cents *per ton per mile* carried, and including all charges incidental to loading, handling, unloading and delivery.

In case of articles which have usually been carried and counted by the *car-load*, the *barrel*, *package*, or *other known quantity*, such may be still so accounted for, specifying the rate *per mile* at which the same will be carried; but the rate not to exceed 40 cents *per ton per mile*, as aforesaid.

Companies are compelled to receive, transport, load, unload, handle and deliver, etc., all way and other freight, and charge therefor at the same rate *per ton per mile* as that named in the classified specifications and at the same rate as well a short as the whole distance, or length of the road. No article of property shall be charged a price for transportation *per ton per mile* greater than double the ate imposed upon the lowest article named in the *Table of Rates*," ores and mineral coal excepted. In ascertaining the sums to be paid, any fractional part of a mile is to be considered as a whole mile.

No company shall give any precedence or preference to one station over any other in the use of its facilities for receiving, transporting or delivering property; but shall accommodate its customers in the order of priority of tender, or receipt at any station of property delivered for transportatioe to any other station.

A plainly written or printed copy of the arrangement, classification, or specification of charges to be signed by the President, Vice President, General Freight Agent or Superintendent, and kept posted in a conspicuous place in each freight-house, station-house and depot, which copies to be subject to inspection without hindrance. A certified copy of said classified rates to be also deposited with the Auditor of the Canal Department at Albany within ten days after adoption, which copy, or a transcript thereof, shall be legal evidence in any court in this State. No alteration of rates to be made for at least one month after filing specifications, and no change of rate greater than 25 per cent. to be made on any class of property within the current year.

Section 2 provides that no corporation shall directly or indirectly permit any other party to carry over its road any property for less or greater rates than itself is entitled to.

Section 3 provides that no corporation shall pay back directly or indirectly any portion of the sums charged, or make any rebate or reduction therefrom.

Section 4 prohibits any combination or agreement with persons or corporations, the effect of which would be to alter the specified rates. In cases where further transportation is by vessel or other road, the only price in addition to be the ordinary rates of vessels, etc.

Section 5. Violation is declared a misdemeanor —penalty $1,000.

Section 6. To apply to all railroads in the State.

Section 7. To go into effect 1st April, 1860.

Gettysburg Railroad.

The President, R. McCurdy, has just published the annual report of the company owning this road, which was opened through last summer. Before completion, it was operated by the Hanover Branch Company, whose road it joins at Hanover, and thence extends west to Gettysburg. Since that time, the company has conducted its own business with a single engine and passenger car, and 20 lime cars. The gross earnings of the year amounted to $29,002; and the expenses to $9,499, leaving a net income of $19,563. The total cost of the road to the 31st December, 1859, is stated at $274,481. In this cost are included a funded debt of $83,000, and a floating debt of $94,550. The company expect to satisfy the floating debt by using the remainder of $200,000 six per cent. bonds already provided. This road will probably be further extended to Waynesboro.

Coal Trade of Pittsburg.

The coal trade of Pittsburg including the coal from the Monongahela bituminous region has increased year by year as shown in the following table:—

Years.	Exported bushels.	Consumed bushels.	Total bushels.
1845	2,660,340	2,189,660	4,850,000
1846	5,236,500	2,739,280	7,975,780
1847	7,200,450	2,355,530	9,555,780
1848	7,150,355	2,670,205	9,820,560
1849	7,145,150	2,804,850	9,950,000
1850	8,560,180	3,940,020	12,500,200
1851	8,250,120	4,499,880	12,750,000
1852	9,960,950	4,599,150	14,560,000
1853	11,590,730	4,359,270	15,950,000
1854	14,632,580	3,322,380	17,955,960
1855	18,560,158	4,315,292	22,875,450
1856	8,165,196	1,834,804	10,000,000
1857	25,684,550	3,289,046	28,973,596
1858	24,696,669	4,803,331	29,500,000

These figures show how steady and wonderful has been the increase in this great and important branch of business. Excepting the year 1856, in which the Ohio was unnavigable for coal boats for more than 200 days, its progress has been steadily onward. Within the 14 years included in the above exhibit it has increased six-fold. The value of the coal shipped in 1858 amounted to $3,169,894. The returns for 1859 will not be far different from those of the two years 1857 or 1858.

Cincinnati Stock Sales.

BY KIRK & CHEEVER.

Railroad Earnings.

The receipts of the Grand Trunk Railway of Canada for the week ending Jan. 21,

were	$50,037 58
Week ending Jan. 22, 1859	39,932 53
Increase	$10,165 05
Total traffic from July 1st, 1859	$1,525,708 13
Same period last year	1,278,587 03
Increase	$247,121 10

The earnings af the Chicago, Iowa, and Nebraska Railroad—the Iowa connection of the Galena and Chicago road—for the years 1858 and 1859, were as follows:

	1859.	1858.
Passengers	$31,593 88	$15,379 29
Freight	75,608 59	32,817 86
Mails, etc.	5,473 97	2,655 08
Total	$112,778 44	$50,852 23
Increase		$61,821 21

Up to last June the road was only opened to Lisbon, a distance of sixty-four miles, and it has been running to Cedar Rapids only about six months.

Annexed are the receipts of the Sixth and Eighth Avenue Railroads:

1859.	Sixth Avenue.	Eighth Av.
January	$25,373 46	$29,845 77
February	22,166 63	26,274 02
March	26,435 87	31,226 53
April	27,099 85	31,828 87
May	30,404 00	35,554 66
June	28,793 38	34,167 72
July	27,876 21	34,630 37
August	28,553 98	33,682 23
September	30,268 67	31,511 95
October	34,600 67	32,739 78
November	31,165 48	30,166 59
December	29,845 36	30,527 77
Totals	$342,583 56	$382,256 21

Hoboken Horse Railroad.

This local road is now completed to Bergen Five Corners, and commenced operations on Wednesday, 1st inst. The cars which are run hourly from 6 A. M. to 7 P. M. are in the omnibus form and drawn by a horse. The conveniences of these cheap roads should be extended through all thickly settled neighborhoods in the country.

Southwestern Railroad.

The Eufaula *Express* is informed by Mr. McClendon, one of the engineers, that one of the cars on the above road, is expected to run within nine and a-half miles of Eufaula, by the 1st of February. The work between the two points is progressing rapidly, and will be completed, the *Express* states, by the time the bridge can be erected.

Heavy Verdict.

The Boston and Worcester Railroad Company recently recovered, against the Old Colony Company, the large verdict of $41,501 75 for land taken to lay their track upon. It is between twelve and thirteen years since the land was taken, and the case has been in court most of the time since.

Lehigh Coal and Navigation Company.

The annual meeting of this company was held on the 3d May, 1859, when the following gentlemen were elected to the Board of Management: E. Hazard, Geo. Abbott, John Farnum, H. J. Boller, R. Richardson, Alex. Fullerton, A. Manderson, Jas. S. Cox, Edw. Yarnal and Jacob P. Jones. James Cox was elected President, and Edwin Walter, Treasurer and Secretary.

The business of the year was commenced on the 23 March, 1858, and closed on the 10th December. For the year the shipments of coal were as follows:—

At Mauch Chunk	393,167 tons
At East Mauch Chunk	179,204 "
At Penn Haven	199,867 "
At Rockport	67,118 "
At Whitehaven	69,643 "
Total shipments on the company's navigation	908,999 tons,

—showing an increase of 8,685 tons over the shipments of the year 1857. In addition to the above, 32,729 tons were taken from the company's Tamaqua mines.

The distribution of coal was as follows—consumed on the line of the canal, 114,537 tons; passed over into the Morris canal at Easton, 281,950 tons, and entered the Delaware Division canal, 512,512 tons. Of the coal that entered the Delaware division 293,475 tons reached Bristol; 164,149 tons passed into the feeder of the Delaware and Raritan canal and 54,888 tons were consumed on the line of that canal.

The shipments of lumber for the year amounted to 35,896,901 feet; and of total freight including coal and lumber, the descending tonnage amounted to 1,034,974 tons, and the ascending to 91,785 tons: total, 1,126,760 tons. In this is included 67,216 tons of iron ore and 58,202 tons of iron; also 19,585 tons of limestone, and 2,538 tons of slate.

The total profits of the company were $595,856 against $593,290 for the preceding year, but a slight diminution considering the financial condition of the country generally. The balance at the close of the year to the credit of profit and loss after paying all expenses and interest on debt, was $343,863, against $304,811 for the year preceding, being nearly 14 per cent. upon the capital. From this the usual dividend of 6 per cent. was declared; and the debt of the company was reduced $354,977, viz, funded debt $301,416, and floating debt, $53,561.

The statements herewith submitted exhibit in detail the financial condition of the company on the 1st January, 1859:

Income Account.

Income—

Tolls on navigation, less collection expenses	$466,212
Profit on coal and mine rents	105,592
Water rents, ground rents, etc.	24,053
	$595,857
Canal repairs, etc.	$62,827
Railroad expenses	21,931
State tax on capital	7,439
Balance	503,660
	$595,857

Profit and Loss Account.

Balance to credit, 1st Jan'y, 1858	$2,704,988
Balance from income, 1859	503,660
	$3,208,643
Interest on debts	$159,795
Dividend, May, 1858, 3 per cent.	74,897
Do. Nov. " " "	74,397
	$308,589
Balance to credit, Jan'y 1, 1859	2,900,054
	$3,208,643

General Ledger Balance Sheet.

Capital stock	$2,479,900
Common loans	2,790,082
Mortgage loan	829,222
Floating debt	231,532
Unpaid dividends	6,651
Arrears of interest	53,716
Profit and loss	2,900,053
	$9,291,156
Canal and river improvements	$4,455,000
Lehigh and Susquehanna railroad	1,380,000
Real estate, coal lands, railroads to mines etc. and wharves, etc. at Philadelphia	1,453,272
Moveable effects, debts due, bonds and mortgages, etc.	1,925,479
Cash on hand	77,405
	$9,291,156

Of the balance to the credit of profit and loss on the 1st January, 1859, the sum of $983,139 78 is invested in the name of Trustees, as a Contingent Fund. Of this amount $333,889 47 is in loans of the company, and the rest in other loans and available securities—the whole being included among the assets in the item of "*moveable effects*," etc.

The works of this company consist of the Lehigh navigation extending from Stoddartsville to the Delaware river at Easton, 84¼ miles, in which there is an aggregate lockage of 1,286.7 feet, made by 78 locks and 31 dams. These locks will pass vessels of 120 tons from Whitehaven to Easton. Above Whitehaven there is no ascending navigation. The Lehigh and Susquehanna Railroad (belonging to this company) connects the two rivers so called, the distance between Whitehaven and Wilkesbarre, the latter on the Susquehanna, being 20 miles. The company also owns several mine railroads and also expensive works for the accommodation of their coal business at Mauch Chunk, Easton, Philadelphia, etc. These coal lands are also very extensive and embrace those of Summit Hill, etc.

This company was chartered so early as 1818. At that period the country about the upper Lehigh was a wilderness. No regular coal trade had then been commenced, nor was it until three years later that the first regular supply was brought to market which amounted to 365 tons. This was in 1820. In 1829, the quantity brought to market had increased to 25,110 tons, in 1839 to 221,850 tons; in 1849 to 801,246 tons, and in 1858 to 908,999. Such has been the progress of the coal business of the Lehigh Valley, rising in less than 40 years from 365 tons to 1,000,000 annually. In 1856, the total tonnage amounted to 1,186,294 tons which is the largest quantity as yet brought to market from the region in any one year. Upwards of 250 miles of railroad, chiefly employed in the coal and iron business are tributary to the works of the Lehigh Navigation Company. Among these is the Mauch Chunk and Summit Hill road built in 1827 and which was next to the Granite road at Quincy the first in the Union.

The following statement shows the earnings and expenditures of the company for the years 1849-'58 inclusive:—

	Earnings.	Expenses.	Net Earnings.
1849	$575,223	$82,580	$492,643
1850	607,176	178,949	428,227
1851	645,210	247,269	397,941
1852	722,999	145,953	577,046
1853	804,715	128,302	676,413
1854	1,090,652	149,713	940,936
1855	1,019,272	201,697	817,575
1856	864,657	229,736	634,921
1857	593,291	119,686	473,605
1858	595,857	84,758	511,099

The result of 1858 though a large diminution from preceding years is still satisfactory and promises well for the future.

The Managers' Report for 1859 will not be published until after the May meeting. In the meanwhile it is ascertained that the coal tonnage of that year was 1,050,659 tons.

New York Pro Rata Bill.

(*Now before the State Legislature at Albany.*)

AN ACT *in relation to the Transportation of Freight on the several Railroads in this State.*

§ 1. Every Railroad Corporation in this State, which now is or hereafter shall be engaged in the transportation or carriage of property, is hereby required to make up a full and complete arrangement and classification, in the order from the highest to the lowest, as each Railroad Corporation for itself shall rate the relative value of transportation of all and singular, the property usually carried by it, upon the whole or any portion of the line of its Railroad, and shall designate the several grades and orders of such arrangement and classification as Class 1st, 2d, 3d, 4th, which arrangement and classification shall also contain a full and complete specification of the rates and prices respectively, at which such Railroad Corporation will transport each article or class of articles of property, the transportation upon which is rated, at the same value respectively, which rate and price for transportation shall be specified at a sum certain per ton per mile, which rate and price of transportation shall apply as well to a lesser or fractional part of a ton, as to a greater quantity, than one ton (except as herein provided) to be transported upon the whole or part of its railroad.

A sum or charge not exceeding forty cents per ton, except as herein provided, and at that rate, as well for a lesser or fractional part of a ton as for a greater quantity than one ton, for all and singular, the receiving, loading, unloading, handling, and delivering, and all and singular the other acts and things usually done and performed appertaining to the receiving, transporting, and delivering by railroad, property of the kinds respectively mentioned in such arrangement and classification, whether transported over the whole or a part only of its railroad.

In case of any article, or class of articles of property, which usually has been transported by railroad, by the car load, barrel, package, or other known quantity, and not by the ton, such specifications may be made up in other reports as aforesaid, by the car load, barrel, package, or other known quantity, specifying the rate per mile at which the same shall respectively be transported by the car load, barrel, package, or other known quantity, as aforesaid; and the specific sums respectively for the receiving, loading, unloading, handling, delivering, and doing the other things aforesaid, by the car load, barrel, package, or other known quantity, and which last sums shall in no case exceed the said sum of forty cents (40) per ton, whether transported over the above or a part only of its railroad.

Every such railroad corporation shall at all times take, receive, transport, load, unload, handle and deliver, and do the things aforesaid; all way freight, and all property from any station on the line of its railroad, and from any other station upon the line of its railroad, and from either terminus

of such railroad to a way station, or station on the line thereof, which it may transport ordinarily over the line of its railroad or any part thereof; and it shall transport each and all said way freight, and each and every item of and article of said property transported upon its railroad *at the same rate per ton per mile*, as that mentioned in said arrangement and classification and specifications, except as herein provided, and at the same rate per ton per mile, upon a portion of its said railroad as upon the above line thereof, when any item or article of property shall be transported upon any such railroad; and the same shall not be mentioned in the arrangement, classification or specifications herein required to be made by the railroad upon which the same is transported, the same shall be transported at the *lowest rate per ton per mile*, as aforesaid, as mentioned in said arrangement, classification and specifications aforesaid, for any other item or article of property, and all other charges for receiving, loading, unloading, handling, delivering, and doing the other things aforesaid; the same shall be the lowest rate per ton mentioned in each specification for such purposes. No article or class of articles of property, according to the arrangement and classification herein named, shall be charged a price for transportation per ton per mile greater than double the rate imposed upon the lowest article or class of articles named in such arrangement, classification —ores, mineral coal excepted. The same price shall in all cases be charged for the receiving, loading, unloading, handling and delivering, and doing the other acts aforesaid, in respect to any property, whether the same be carried upon the whole line of said railroad or only upon a part thereof, and such charges in all cases shall be according to the arrangement, classification and specification aforesaid.

Every lot and quantity of property, although the same shall consist of two or more items, articles, barrels, bales, parcels, or other known quantity, (being of the same classification and arrangement aforesaid,) offered for transportation at one time, or named upon one bill of lading, ticket, or other method of designating the property intended for transportation for one name or names, shall be considered one lot and quantity for the purpose of ascertaining the rates and aggregate price at which the same shall be transported, received, loaded, unloaded, handled, delivered, and for doing the other things aforesaid.

Any fractional part of a mile, which such property respectively shall be transported, when the same shall be transported more than one mile, shall be considered as a whole mile, in ascertaining the price of transportation of said property respectively.

No railroad corporations of this State, shall give to any station upon its line, or either terminus of its railroad, any precedence or preference over any other station upon its said railroad, in the use of its facilities for the receiving, transporting, handling, or delivering, or doing the other things aforesaid, of any property which may be transported upon either the whole or any part of its railroad, and as near as may be, shall receive, transport, handle, and do the other things aforesaid, all property which it transports upon the whole or any part of its railroad, in the order of priority of tender or receipt at any station upon its line, of such property, for the purpose of having the same transported to any other station upon its railroad.

A plainly printed or written copy of the arrangement, classification, or specification of prices for transportation, receiving, loading, unloading, handling, delivering and forwarding the other things aforesaid, which shall be in force at the time shall be signed by the President, Vice President, General Freight Agent, or Superintendent of each railroad, and shall at all times be kept posted up in a conspicuous place, in each freight house, station house, and depot of each railroad corporation, or used by it, in connection with its railroad, which copies respectively, shall at all times during business hours, be subject to inspection without hinderance.

A copy of such arrangement, classification, and specification aforesaid, signed as aforesaid, shall be acknowledged before, and certified by some officer authorized to take the acknowledgement of deeds, shall be filed with the Auditor of the Canal Department at Albany, within ten days after the adoption, or the making of the same, or the making of any amendment, change or modification of the same, which copy, or a transcript thereof, and of the certificate of the acknowledgement thereof, certified with the time of the filing thereof by the said Auditor, shall be legal evidence in any court, civil or criminal, in this State, of the said arrangement, classification or specification, and the contents thereof, that the same was made by such railroad corporation, and of the filing and the time of the filing thereof. Such arrangement, classification, and specification respectively shall in all cases remain unchanged, for at least one month after the adoption and filing as aforesaid of the same, and the pro rata price for the transportation of any article or class of articles aforesaid, shall in no case be changed, or any alteration of any such arrangement, classification or specification more than 25 per cent. for the lowest aforesaid, as to such article or class of articles respectively in that current year, nor shall such railroad corporation collect or receive a less or greater sum in consideration, in payment for receiving, transporting, loading, unloading, handling, delivering, or doing the other acts and things aforesaid, than that which shall appear to be done by computation, from the arrangement, classification or specification aforesaid, in force at the time being.

§ 2. No railroad corporation shall directly or indirectly permit any other person or persons, corporation or corporations, to carry, transport, or forward over the whole or any part of its road, any property for less or greater rates, or prices respectively than those which the said railroad corporation itself would be entitled to receive for the receiving, loading, transporting, unloading, handling, and delivering and doing the other things aforesaid, respectively according to the provisions of this act.

§ 3. No railroad corporation shall directly or indirectly pay back any portion of the aggregate sums, respectively so as aforesaid to be charged by it, for the receiving, loading, unloading, transporting, handling and delivering, and doing the other things aforesaid, of property as aforesaid, or make any rebate or reduction therefrom, but shall, in all cases, keep and retain *such*, and all sums received by it for said receiving, loading, unloading, etc., any property as aforesaid.

§ 4. Prohibits any combination or agreement with persons or corporations, the effect of which shall be to alter the filed specification, etc., so that in cases where the *further* transportation is by vessel or other road, the only price in addition shall be the ordinary rates of said vessel, and the same provision for charge of handling.

§ 5. The penalty for violation is, that the offending party is guilty of a misdemeanor, and a penalty of one thousand dollars to be recovered by the party suing. Application may also be made to the Supreme Court, under Title 4, Chap. 8, Part 8, Revised Statutes, *Of Proceedings Against Corporations.*

§ 6. To apply to all Railroads.

§ 7. To go into effect April 1, 1860.

CENTRAL RAILROAD COMPANY OF NEW JERSEY, New York, January 30, 1860.

INTEREST.—The Interest Coupons of the 1st Mortgage Bonds due the 1st day of February next, will be paid at the office of the Company, No. 69 Wall st., on and after that date.

DELAFIELD & BAXTER'S,

Late OGDEN & DELAFIELD,
ROSENDALE CEMENT.

WE are prepared to enter into arrangements for supplying our CEMENT for public works, or other purposes. We **warrant it equal in every respect** to any manufactured in this country. It attains a great degree of hardness, sets immediately under water, and is a **superior article** for masonry coming in contact with water, or requiring great strength.
For sale in tight barrels, well papered, on application at their office, by **DELAFIELD & BAXTER, 104** Wall st.
The above CEMENT is used in most of the fortifications building by government. 45

Rosendale Hydraulic Cement.

THE NEWARK AND ROSENDALE CEMENT COMPANY are now receiving **fresh from the Mills** their approved ROSENDALE CEMENT, warranted **pure** and **free from quick lime**, and which has given such **general satisfaction** in the various government and other public works in which it has been used. Purchasers and shippers should be careful to get the **genuine ROSENDALE CEMENT**, branded "NEWARK AND ROSENDALE," "H. WILDE." This Cement does not swell and burst the hoops when stored in warm climates. It is packed in tight **kiln dried barrels**, and is specially adapted for safe shipping on long voyages. Terms reasonable, which may be known by addressing,

JOHN H. STEPHENS, President, Newark, N. J., or
HENRY WILDE, Secretary, 90 Wall st., N. Y.

THE LAWRENCEVILLE MANUF'G CEMENT COMPANY,

OFFICE 96 WALL ST,
NEW YORK.

THIS Company manufacture **ROSENDALE HYDRAULIC CEMENT** of a superior and uniform quality, and are constantly receiving it **fresh** from their Works at Rosendale. Particular attention paid to grinding **fine**, and packing in superior casks. We warrant it to set under water, and attain a hardness excelled by no Cement manufactured. It has met the approval of Government, and we are at present supplying the fortification now in course of erection, together with Water Works and Public Buildings.
For sale upon favorable terms by addressing.

WM. N. BEACH, President.
CHAS. E. LAWRENCE, Sec'y.

CEMENT, PLASTER, ETC.

THE HUDSON RIVER CEMENT CO.

HAVE commenced manufacturing for the season, and can now furnish a very superior article of fresh **Rosendale Cement, Calcined Plaster, Farmers' Plaster** and **Marble Dust.** Address

HUDSON RIVER CEMENT COMPANY,
12 **Jersey City, N. J.**

HOFFMAN'S ROSENDALE CEMENT,

OFFICE, 93 WALL ST., NEW YORK.

THE LAWRENCE CEMENT COMPANY are prepared to receive and execute orders for their Cement, to any extent that may be required. They would particularly call the attention of purchasers to the distinguishing brand of their manufacture, viz.: **HOFFMAN'S ROSENDALE CEMENT.** This seems to be necessary, as they have established a reputation for the superior quality of their Cement, and there are various other brands offered, as "Rosendale" Cement. It has the unqualified approbation of the most eminent Architects and Engineers, being used in almost every department of the Works under Government. It is put up in the most careful manner, each barrel being well lined with paper, and will be delivered on ship board, in this city, on the most favorable terms. Particular attention given to shipping orders, and Freight obtained on the best terms.

New York, Saturday, February 11, 1860.

Railroads of Tennessee.

H. F. Cummins, Esq., Road Commissioner of Tennessee, has just completed his annual report on the condition of the railroads in that State. It is a lucid document, and full of the right sort of information for practical men. We give below a full analysis of the affairs of the several companies reported.

By reference to these statements, it will be seen that the aggregate length in Tennessee of the 17 roads referred to is 1,329.88 miles. The total amount of State aid granted to these is $16,031,000. The aggregate length of finished roads on the 1st October, 1859, was 977.19, and the total amount of bonds then issued, as State aid, was $12,712,000. The length of road remaining to be completed on the lines of the roads now in progress is 352.69 miles, to which the State is pledged in the sum of $3,119,000, and which amount is the prospective liability of the State.

Besides the roads which are specifically reported, there are four others which have been commenced, but on which work has been suspended. These are as follows:

Southwestern	60 miles.
Knoxville and Charleston	55 "
Knoxville and Kentucky	68 "
Cin., Cumberland Gap & Charleston	94 "
Total	272 "

—including which the railroad mileage of the State, completed and unfinished, is 1,599.88 miles. Each of the roads last named has State aid to the amount of $10,000 per mile, and specific sums for bridges—in all amounting

State aid for road to	$2,720,000
" " bridges to	800,000
Total	$3,520,000

The aggregate cost of the 17 roads in running order is $41,728,000. Their net earnings in 1858-9 was $2,411,245, or nearly 6 per cent. on their cost. These roads are still unfinished, and their connections imperfectly formed. In view of such disabilities, the result is highly satisfactory and creditable to the energy, skill and enterprise of the Tennessee public.

Memphis and Charleston Railroad.

Characteristics.—Length from Memphis to Stevenson, 271.56 miles. Branches to Somerville, Tuscumbia, etc., 16 miles. Sidings, turn-outs, etc., 20 miles. Iron, 60 lbs. per yard. Maximum grade, 47½ ft. per mile. Shortest radius of curvature, 4½ degrees. Straight line on main road, 226.35 miles. Bridges, 13 truss, 4,557 ft., and 1 draw, 140 ft. Aggregate length of trestling, 31,663 ft. Stations, way, 33, and flag, 26. Engine houses, 5; machine shops, 2; depot buildings, wood, 24, and brick, 9. Turn-tables, 6. Wood and water stations, 30. Repair houses, 33.

Equipment.—Locomotives, 36; passenger cars, 38; baggage and express, 14; box freight cars, 232; platform cars, 197; gravel cars, 41; road cars, 67; stock cars, 25.

General Statement—1st July, 1859:

Share capital, paid in	$2,237,665	Road-way ..	$3,532,809
State bonds .	1,100,000	Iron	1,911,494
Co.'s bonds ..	1,600,000	Equipment ..	743,729
Floating Debt	443,616		

—making a total cost of $6,188,033.

Operations.—During the year ending June 30, 1859, trains run 562,041 miles, viz: passenger, 252,397; freight, 231,835; and other trains, 78,309 miles. Passengers carried, 230,907, viz: through, 53,935, and way, 176,972. Through fares, 3¼ cents, and way, 4 cents per mile. Speed of passenger trains, 21 miles, or, including stops, 17½ miles per hour. Speed of freight trains, 15, or, including stops, 12 miles. Receipts and expenses, for the year ending 30th June, 1859:

Passengers	$751,928	Total rec'ts ..	$1,330,812
Freight	509,991	" exp'ses	552,776
Other sources ..	68,898	Net earnings.	778,031

Accidents.—1 passenger and 5 others killed; and 2 persons, not passengers, injured.

Officers.—Samuel Tate, *President*; Geo. Robertson, *Secretary*; W. B. Waldron, *Treasurer W. Div.*; Samuel Cruse, *Treasurer E. Div.*; M. B. Pritchard, *Chief Engineer*; B. Ayres, *Supt. W. Div.*; W. T. Ross, *Supt. E. Div.*

Principal office, Memphis, Shelby Co., Tenn.

Nashville and Chattanooga Railroad.

Characteristics.—Length of main line, Nashville to Chattanooga, 149.75 miles. Branch from Wartrace to Shelbyville, 9 miles. Sidings and turn-outs (in number, 34) 7.9 miles. Maximum grade, 105.6 feet. Shortest radius, 6 deg. Truss bridges 11, having a length of 4,721 feet. Draw bridge 1 of 158 feet. Trestling, 8,410 feet. Culverts, wood 215, and stone and brick 23. Road crossings, 48, and railroad 1, all at grade. Engine house, 1; machine shop, 1; depot buildings, wood 6, and brick, 9. Turn-tables, 6. Water stations, 16. Repair shops, 2.

Equipment.—Locomotives, 39; and cars: passenger, 17; baggage and express, 6; box freight, 222; platform, 48; gravel, 15; road, 3; coal, 20, and stock, 3. Weight of engines: passenger, 25, and freight, 26 tons; and of cars, passenger, 8, and box freight, 6 tons. Dimensions of passenger cars, 40x9 feet, and of freight cars, 28x9 feet.

General Account on the 30th Nov., 1859.

Share capital paid in	$2,256,479
Funded debt—Bonds endorsed by State.	1,500,000
" —other bonds	24,000
Floating debt	21,770
Cost of roadway	$3,001,212
" equipment	631,670
other assets	169,367
	$3,902,249

Operations for the year ending 20th Nov., 1859: Passenger trains run 220,230, freight trains 150,115, and other trains 79,000—total 449,345 miles. Passengers carried, through, 61,685, and way, 117,895—total, 178,580. Rate of fare: through, 3.3 cents, and way, 4 cents per mile Speed, express 18, accommodation 15, and freight

9 miles per hour, or including stops, 16, 14 and 7½ miles respectively. Average weight, passenger trains, 73 tons, and freight trains 164 tons.

Receipts from passengers	$291,874
" " freights	341,193
" " other sources	42,765
Total receipts	$675,832
Total expenses	365,632
Net receipts on earnings less expenses	$310,200

Accidents.—Killed 3, not passengers. Injured, none.

Officers.—V. K. Stevenson, *President;* James A. Whiteside, *Vice President;* W. A. Gleaves, *Secretary* and *Treasurer;* W. M. Pennington, *Chief Engineer;* E. W. Cole, *Superintendent.*

Principal office, Nashville, Davidson Co., Tenn.

Mississippi and Tennessee Railroad.

Characteristics.—Length from Memphis to Grenada, 99 miles. Completed, from Memphis to Panola,* 59 miles, of which 9¾ miles are in Tennessee, and the remainder in Mississippi. At Grenada this road connects with the Mississippi Central, and that at Canton with the New Orleans, Jackson and Great Northern. Length of road in progress, 20 miles, from Oakland to Grenada. Stations, way 8 and flag 8. Machine shops 1, and wooden depot buildings 8.

Equipment.—Locomotives 7; passenger cars 5; baggage and express cars, 4; box freight cars 27; platform cars 68; gravel cars 12; road cars 8; weight of passenger engines 22, and of freight engines 24 tons.

General Account on the 1st October, 1859:

Capital stock paid in	$798,285
Funded Debt—Tennessee State Bonds	98,000
" —Company's Bonds	456,949
Floating Debt	319,518
Cost of road and equipment	$2,000,000

Operations for the year ending 30th September, 1859: Number of miles run by passenger trains, 36,500; by freight trains, 32,350; and by other trains, 1,020—total, 69,870 miles. Passengers, 59,077; fares, 4.4 cents per mile; speed, including stops for express trains, 20 miles, and for freight trains, 10 miles per hour. Average weight of passenger trains, exclusive of passenger and baggage, 40 tons.

Receipts from passengers	$65,392
" " freight	106,269
" " other sources	5,595
Total	$177,256
Expenses	60,029
Net receipts, or rec'ts less expenses	$277,227

Accidents.—Killed 2, and injured 1.

Officers.—F. M. White, *President;* C. C. Vance, *Treasurer* and *Secretary;* Niles Merriwether, *Chief Engineer,* and M. W. Newall, *Supt.*

Principal office, Memphis, Shelby Co., Tenn.

Mississippi Central, Tennessee.

Characteristics.—Length of railroad 47.4 miles. This road like the Mississippi Central is an extension of the New Orleans, Jackson and Great Northern from Grand Junction, the crossing of the Memphis and Charleston to Jackson, Tennessee, at which point it connects with the Northern Division of the Mobile and Ohio now open to Columbus, Ky., 87 miles. The completion of the Mississippi Central in January last opened a through route from New Orleans to Columbus, a distance of 529 miles. Number of sidings and turn-outs 12; aggregate length, 2¼ miles. Iron per mile, 54½ tons. Maximum grade, 50 feet. Total rise southward, 758, and full, 688 feet. Straight line, 41.15 miles. Truss bridges—2 Howe and 3 Beam: aggregate length, 479 feet. Trestling (in number, 47) 9,020 feet. Road crossings, 24. Stations, way 10 and flag 3. Engine houses 3; depots, wood 3 and brick 3. Turn-tables 3: wood and water stations, 7. Repair houses 1: cattle guards, 68.

Equipment.—Locomotives, 4; passenger cars, 3; baggage and express, 2; box freight cars 10; platform cars, 51; road cars, 5. Weight of passenger engines, 18 tons, and freight engines, 22 tons; of box freight cars, 5 tons, and of passenger and baggage cars, 8 tons. Dimensions of passenger cars, 46x10 feet, and of freight cars, 26x10 feet.

General Account on the 1st October, 1859:

Share capital paid in	$317,447
Funded debt—State loan	529,000
" " —Company's bonds	103,500
Floating debt	22,360
Earnings applied to construction	3,303
Cost of road	$892,711
" equipment	82,908
Balance sheet	$975,619

Operations for the year ending 30th Sept. 1859: Passenger and freight trains run 44,630 miles; and other trains 9,545 miles—total 54,175 miles. Passengers carried, 34,472: fare, 4 cents per mile, and freight, 14,254 tons, at 8 cents per ton per mile. Speed of trains, 20 miles, and including stops, 16 miles per hour.

Philadelphia, Wilmington and Baltimore Railroad.

We copy from the late report of this company, the following statement of the operations of the Philadelphia, Wilmington and Baltimore Railroad Company for eleven months, ending October 31st, 1859.

Revenue of the Philadelphia, Wilmington and Baltimore Railroad for Eleven months, ending October 31st, 1859.

From Passengers		$718,071 18
" Freight and Express		238,794 81
" Rents		16,918 76
" Mails and Miscellaneous		41,178 99
Total revenue P., W. & B. R. R.		$1,014,963 74
Revenue, New Castle and Frenchtown Line:		
From passengers	$10,408 36	
" freight and express	9,864 63	
" rents, mails and miscellaneous	922 52	
Total revenue N. C. & F. T. Line		21,195 51
Tot. revenue of both lines for 11 mos.		$1,036,159 25
Expenditures.		
Interest on bonded debt, ground rents, &c.	$135,000 00	
All expenditures of the Phila., Wilm. & Balt. R. R., including maintenance of way, renewals and constr't'n of all new work	412,070 98	
Expenditures of the New Castle and Frencht'n Line	11,415 25	
Taxes and bonus to State of Delaware and New Castle County	10,166 67	
Total expenditures of all kinds, including interest, construction and renewals	568,652 90	
Add loss in operat'g the Delaware Railroad for 11 months	30,007 84	
Total		598,660 24
Balance		$437,499 01
From which two dividends, of 3 per cent. each, were paid on the 1st of April and October		$336,000 00

The dividend accounts are from the revenue of six months ending February 28th and August 31st, and do not correspond with the financial year. The net earnings for the year ending August 31st, 1859, and on which the dividends were declared, were $447,968 90, leaving a surplus of $111,968 90 after paying all expenditures for operating the

road, loss on the Delaware Railroad, also for all new work, such as new bridges, new track and new cars, engines, &c.

The expenditures of the road, have been only 40.60 per cent. of the gross revenue, and that these expenditures include everything, there being now no construction or renewal account. The operating expenses proper, excluding new work and improvements, are 37.40 per cent. of earnings.

The revenue and expenditures for the corresponding 11 months, ending October 31, 1859, were as follows:

Phila., Wilmington and Balt. Railroad—		
Passengers		$705,555 74
Freight and express		229,809 60
Rents		14,943 75
Mails and miscellaneous		40,920 63
Total revenue P., W. & B. R. R.		$991,229 72
New Castle and Frenchtown Line—		
Passengers	$9,495 74	
Freight and express	7,894 16	
Rents, mails and miscellaneous	1,031 28	
Total revenue N. C. & F. T. Line		18,421 18
Total revenue of both lines for 11 months, ending October 31, 1858.		$1,009,650 90
Expenditures for 11 months, ending October 31, 1858:		
Expenditures P., W. & B. R. R., including interest, &c.	$563,397 84	
Do. N. C. & F. T. Line, including taxes and bonus	22,989 21	
Loss on Delaware R. R.	41,005 68	
Total expenditures on both lines, including inter't, renewals, new work, and taxes and bonus		627,392 73
Which deducted from revenue, leaves net revenue for 11 months, ending October 31, 1858		$382,258 17

The above items of expenditure were $28,732 49 less for the 11 months, ending October 31, 1859, than for the corresponding 11 months of 1858, and the revenue was, for the same time, $26,508 35 more, thus showing a net result of $55,240 84 better than for the same time in 1858.

In the account with the Delaware Railroad, that road is charged with the expense of operating, and credited with the proportion of earnings due to it. The proportion of earnings due to the Philadelphia, Wilmington and Baltimore Railroad is added directly to our own revenue. In order, therefore, to understand the relation of the Delaware Railroad to our own road, the following explanations are necessary.

During the 11 months ending October 31, 1859, the Delaware Railroad has increased the revenue of the Philadelphia, Wilmington and Baltimore Railroad, and that of the New Castle and Frenchtown and New Castle and Wilmington Railroads, by reciprocal business, $78,485 15.

If we charge to this increased revenue the average rate of expenditures on our own railroad, or 40.60 per cent. of the gross revenue; there will remain to the Philadelphia, Wilmington and Baltimore Railroad as profit from this business, $46,620 18, from which deduct the loss, in operating the Delaware Railroad, $30,007 84, there remains $16,612 84, as an absolute profit on the business derived from that source.

The country is constantly improving along the line of the Delaware Railroad, and the population rapidly increasing. The products of the Peach orchards that have been planted within the last three years, will soon furnish more than one entire freight train daily, during the season. This road is now extended to the State line, from whence it will be built by a company in Maryland to the waters of the Chesapeake. When it reaches this far, it will enable us, without impairing the business of our own line, to compete successfully for cheaper freight and passengers with the outside steamers now taking so large a share of the business from the South directly to New York. For a number of years past, these outside steamers from Savannah, Charleston and Norfolk and Richmond, have taken all the freight, and many of the passengers, to and from the South; indeed all the passengers who have not had business to call them through Washington, Baltimore or Philadelphia; and thus, while our Southern business has remained stationary, or increased but little, the great increase of intercourse between the North and the South has gone to build up a powerful and rival interest to the railroad. Much of this business that has been thus diverted from us, can, by means of the Delaware Railroad extension, be brought back upon the land, while by improved connections at Washington, with the Southern lines, the better paying business in both freight and passengers, can be attracted that way.

Cost of Road.

The cost of road has been reduced since the last annual report, $236,214 60. This has resulted from a part of the surplus revenue, the whole of renewal fund, and the proceeds of the sale of some materials belonging to road being placed to the credit of road account. The amount to the credit of revenue at this time is only that which has accrued since August 31, 1858.

Bonded and Floating Debt.

The company has no floating debt, but, on the contrary, a large amount of available means beyond current liabilities.

Of the new loan authorized by the stockholders of $2,600,000, there has been disposed of $2,185,000, of which $2,000 has been redeemed and canceled.

There has been exchanged and paid off of the loan due July 1, 1860, $2,016,291 05.

There now remains unexchanged and unpaid of the loan due July 1, 1860, $145,485.

The loan, due April 1, 1858, of $144,000, was paid, as was stated in the last report, in cash. In the payment of the above loan, due April 1, 1858, and in exchange of the loan due July 1, 1860, there has been used of the current revenue of the road, $124,524 80. This sum may be regarded as a surplus invested in the bonds of the company.

New Iron, New Track and New Work.

During the year there have been relaid 9.67 miles of track, in relaying which 683 tons of new iron have been used, and 21,662 new cross-ties. The track is believed to be now in better order than ever before. It is yearly improved by new ballasting, and more thorough drainage. The light rail of 50 lbs. per yard, is still found to answer a better purpose upon the whole than the heavy rail of 65 lbs., for the reasons heretofore given, that a better quality of iron is obtained, and a better manufacture in the light, than in the heavier rail.

During the time which this report embraces, there have been built two new cattle guards; three new culverts; and two new bridges each of 60 feet span, at Naaman's Creek; a new abutment and two new piers have been partly completed at Darby Bridge. Bush and Gunpowder bridges have had extensive repairs and renewals, and a portion of each bridge has been filled up and made solid by embankments of gravel. It will be the policy of the Directors to keep both of these structures as well as all other bridges in the most perfect condition of repair and safety.

New Cars and Engines.

Since the last report there have been added to the stock of cars, seven 8-wheel freight cars; two 8-wheel platform baggage cars for crates; and one 8-wheel passenger car. Two of the long passenger cars have been rebuilt, and converted into sleeping cars, which are now used regularly on the night trains between Philadelphia and Washington by means of which passengers have a comfortable night's sleep, and are not disturbed by any change of cars at the Susquehanna river, or at Baltimore. This and the new system of baggage crates, will greatly facilitate all through travel.

All cars have been kept in a good state of repair and efficiency, excepting those noted in the schedule as broken up.

There have been placed upon the road, two new coal-burning engines, the George Washington, (passenger,) and the John E. Thayer, (Freight,) both of the Dimpfel plan. The engines have all been maintained in high state of repair and efficiency.

Railroad Connections.

The connections South and Southwest have been improved and extended since our last report. The extension of the Orange and Alexandria Railroad to Lynchburg will be completed during the present month, and the Mississippi Central Railroad about the same time. The route across Florida from Fernandina to Cedar Key, will soon be finished and become an important tributary. By these improvements the time between New Orleans and New York, will be reduced to about four days. Several other routes at the South are also progressing towards completion, all calculated to increase our business. At the West the Marietta and Cincinnati road will soon be in working condition, and will be a valuable tributary. A very important connection at Washington has also been projected, by which the Washington Branch will be extended to the Potomac river, thus doing away with the use of omnibuses for Southern and Southwestern travelers at that point. Every one who has traveled this route by night or day will readily appreciate the value of this improvement. Independent of its value to passengers it will give us in connection with the extension of the Orange and Alexandria road, the command of a large and valuable freight business which has heretofore gone in other directions by much longer and more circuitous routes.

Port Deposit Branch Railroad.

The land damages on this route have now been adjusted, so that this work can be finished as soon as may be thought desirable.

Track.

The track is in first rate condition in all respects. During the last eleven months between seven and eight miles of track have been raised up on a new bed of gravel for ballast.

Susquehanna Ferry.

The boat has made every trip in the schedule, and answered as heretofore all the demands of the business of the road. The boat and ferry have been kept in thorough repair.

Buildings and Fixtures.

The buildings and fixtures have all been kept up in good order. The roof of the front part of the depot at Philadelphia has been newly covered with leaded tin, and preparations are now making to cover the rest of the building with iron. Great improvements have been made at Southwark, on the Delaware. Seventy-one hundred and fifty-four square feet of land have been made by filling up the dock; and a new building, 55 by 110 feet, is now being built for the accommodation of the through freight from New York to the West and Southwest, and tracks and pens are also to be arranged for the transfer of cattle from the West to New York. The boats of the Camden and Amboy Railroad now come daily to this depot with the through freight, from New York which is rapidly increasing, and is destined, at no distant day, to form a very important item in our revenue. The terminus of the Pennsylvania Railroad has now been fixed at Southwark, and will be reached over our road from Gray's Ferry Bridge, the use of which will add considerably to our revenue and diminish the expenses on that part of our road.

Real Estate.

There has been no real estate sold since our last report, excepting the lot on South Charles street, Baltimore, for $1,500; the proceeds of which, when paid over, will be invested either in permanent improvements, or in the mortgage loan of the Company.

New Ticket System.

This system still continues to give universal satisfaction, and has prevented many of the frauds heretofore practised upon the road by travelers under the old system.

Free Passes.

Free passes are still a source of great annoyance, and will remain so until some more uniform system is devised and put in operation by all the roads. The difficulty seems to be in deciding between those who are really entitled to this courtesy and those who have no claim to it. Those who have the least claim are generally the most clamorous, while many of those who really are entitled to consideration in this respect prefer paying their fare to being ranked among the motley throng of dead heads.

The whole whole number of free passes for 11 months was 9,373, who rode equal to 540,670 mile for one passenger. Much the largest proportion of these were the employees and officers of our own road and those of other roads having direct business relations with us.

The Contract System.

This system still works well, and is productive of much saving to the company. It likewise promotes regularity in running the trains, and in all branches of our business. It diminishes accidents to both persons and property, by bringing home the responsibility directly upon individuals instead of the corporation.

There is no doubt when this system is better understood it will be generally adopted, and be the means of saving large sums in the management of our railroads. Like everything else which is new and comparatively untried, it is looked upon by those unacquainted with it, with doubt and suspicion. Its general adoption must depend, however, upon its results when reduced to a more extended practice. So far as we have tested it, it has been most satisfactory in all its bearings.

Policy of Management.

We have seen no reason to change the views expressed upon this subject in our last report. We have encouraged business from every source that promised any profit. We have given especial attention to the cultivation of local business in both freight and passengers, believing that any new branches of business established on our line must result in our profit.

Finally, we congratulate the stockholders upon the substantial prosperity of their road. It is now established on a firm basis. Its earnings are certain. Its expenditures are brought within a certain and fixed ratio to earnings, and its dividends will be certain and reliable. Its resources are such that the road and fixtures can be as they have been for some time past constantly improved to meet the growing wants of the community without any increase of capital or diminution of dividends.

The general balance sheets of the Philadelphia, Wilmington and Baltimore and the New Castle and Frenchtown Companies, are given separately, as follows:

Philadelphia, Wilmington and Baltimore R. R.

DEBIT.

Capital Stock, 112,000 shares	$5,600,000
Mortgage loan, due July 1, 1860	145,485
do. do. July 1, 1884	2,183,000
Improvement bonds, due May 1, 1863.	119,000
Mortgages on real estate	40,950
Ground rents	10,000
Subject to dividend and interest	$8,098,435
Current liabilities, including Delaware R. R. interest, payable Jan. 1, 1860, ($25,262)	146,855
Net revenue, credit to profit and loss, and deducting loss on Delaware Railroad, $30,007, and two dividends, $336,000	223,223
	$8,468,513

CREDIT.

Road, including Susquehanna Bridge	$6,832,858
Port Deposit Branch	109,515
Terminus at Washington Avenue	56,944
Stock owned by company	744,425
Real estate required for road	45,044
Cost of road and appurtenances	$7,788,786
Assets, including real estate, $208,000.	600,765
Advances to connecting roads	78,962
	$8,468,513

New Castle and Frenchtown Line.

DEBIT.

Share capital	$744,520
Dividends unclaimed	805
Open account	22
Tax and bonus to State of Delaware	3,334
Treasurer Phila., Wilm. & Balt. R. R.	479
	$749,161

CREDIT.

Railroad	$699,514

	$723,551
Chesapeake and Delaware canal stock	25,000
Bonds and mortgage	43
Cash	567
	$749,161

Material Progress in Maine.

The following, clipped from Gov. Morrell's message, gives a very clear outline of the national progress of this State from the time of its separate existence:

The valuation of real and personal estate in 1821 was taken at $20,962,778; in 1830, at $28,807,687; in 1840, at $69,246,288; in 1850, at $100,037,969; and in 1860, it will not fall short of $175,000,000.

The tonnage of the several districts of the States in 1820 was 67,274 tons; in 1830, 70,585; in 1840, 110,000; in 1850, 646,600; and in 1856 was 782,000, an amount equal to one-sixth part of the entire tonnage of the nation. There were, in 1820, 14,347 tons of vessels built in the several districts; in 1840 there were 55,598; in 1850, 149,907.

The estimated value of capital invested in the various branches of manufactures in 1820 was $1,459,450; in 1840, $7,105,620; in 1850, $14,700,000; and in 1859, $25,000,000.

The annual value of manufactures of all descriptions in 1820 was $3,058,000; in 1850 it was estimated at $34,665,132; and at the present time cannot be less than $35,000,000, in which estimate lumber is not included, the annual value of which is not far from $7,000,000.

The agricultural capital in 1825, including improved lands, buildings, cattle, farming utensils, &c., was estimated at $30,737,255, the number of acres of improved lands being 753,076. The capital invested in this pursuit in 1850 amounted to $66,852,031, and there were 2,039,569 acres of land under improvement. The increase in the products of the soil, in quantity and quality, will be found to be in proportion to the increase of the land cultivated. In 1820 there were 143,315 neat cattle, in 1840, 327,255, in 1850, 343,339, and for the same years respectively, the products of the corn, wheat, oats and rye were 858,381, 2,813,044, and 4,230,268 bushels.

The aggregate average Bank circulation from 1820 to 1825 was $966,105, while for a similar period from 1854 to 1859 it was nearly $5,000,000. The amount of capital invested in works of internal improvement up to 1840, was less than $1,000,000, in 1850 it was between $5,000,000 and $6,000,000, and at the present time there are estimated to be $17,800,000 invested in railroads alone.

These estimates do not embrace a large amount of capital, in the aggregate, employed in various small manufactures and mechanic pursuits, which have sprung up in the interior and along our lines of railway and which give profitable employment to the people who conduct them on their own account.

The Great Eastern.

Report of the Builder, Mr. J. Scott Russell, *to the Shareholders.*

The following interesting report has been addressed to the Shareholders by the builder of the great ship, Mr. J. Scott Russell:

As one of the originators of the design of the great ship, and as the builder of the ship, I find it an imperative duty to lay before you, as the owners, a short report on the present state of your property.

1. It has been proved conclusively by the late trials, and contrary to general expectation, that the great ship is as handy and manageable as a small vessel.

This is no light gain—for it was constantly put forward as one of her disadvantages, that there were not two harbors in the world she could enter. It is now proved that that there is no port, where any ship of equal draft of water could safely navigate, that the great ship could not enter. Here, then, is one fact established, by experience, in contradiction to one of many hostile predictions. The fact proves that the means adopted in her original design—to make her steer well—have been entirely successful. Now, look at the real effect of these facts on the value of the property. She can now be safely chartered to sail from Southampton, Weymouth, Milford Haven, Holyhead, Liverpool, Kingston, Cork or Galway. She can be navigated up the Hoogly—if not to Calcutta at least to Diamond Harbor. Sidney and Melbourne are open to her in Australia, and Portland in Maine; and New York might be safely approached as near as by other vessels of the same draft of water. The great ship, therefore, is neither an exception nor a monster, but is able to thread safely the entrance of any harbor where she is likely to find work to be done.

2. It has been conclusively proved, by the late trials, that the sea-going qualities of the great ship are good, and that her properties as a piece of naval architecture are what I, who designed her lines, intended. It was said that, from her great height out of the water, she would be crank, and lie over on her side as the *Perseverance* did; experience has shown that she stands up admirably, and that under sail she has little inclination. Others said she would have the opposite effect, and would be so stiff as not to yield at all to a heavy sea. By this defect, the sea, they said, would strike her like a rock, and do her great damage. Now, the contrary of this has also been proved, and she has a gentle, easy, rolling motion, with scarcely any pitching, but just enough of both to prevent her having anything to fear from the shock of the sea.

3. It has been proved that the great strength of her mechanical construction had not been overstated by her designers. If any trial on land could conclusively have proved this, the great strains she underwent at launching, without change of shape, did so. But experiene of the ship, under the strain of the engines when under way and working up to more than 7,000 horse power in the sea, has shown that the vibration which in vessels of high speed is so common an indication of weakness, exists in her to a smaller extent than in any other ship ever built. She has, therefore, been proved to be, even for her great size, the strongest vessel in the world.

This is the most prominent fact to bear in mind in estimating the value of your property, and it most materially affects the question of insurance.

4. In regard to safety. The peculiar structure given her, consisting of longitudinal strengthening, and an unusual number of longitudinal and transverse bulkheads, by which she is divided into many water-tight compartments, has stood the severest test. The efficiency of these compartments was tried before the vessel left the Thames. A portion of the vessel was entirely filled with water up to the level of the deck. 120 feet of her length

were for some days inundated as completely as if that portion of the vessel had been torn open by running on a rock. During this period the remainder of the ship was perfectly dry. Even the sad accident of the explosion of a heater, so deeply lamented from its injury to life, did nevertheless prove the efficacy of this peculiar structure of the ship in securing the general safety; for the whole of the damage was confined to the compartment where it originated.

5. In regard to speed. The facts which have been ascertained, are, that in the first trials, made under the disadvantages attending every novelty, the vessel attained a speed of 14½ knots, or about 17 statute miles an hour. It is right that you should be informed that 14½ knots was the original speed assigned to the vessel by Mr. Brunel in the early reports to the directors of the original company. There is, therefore, no good reason for disappointment on this head. It must be admitted that there were many people who hoped for more, but they had no right to expect it, for the vessel has an extremely small proportion of power for her size. The object of this small power was great economy of fuel on a long voyage. Taking into account the great size of the ship, and the comparatively small amount of horse power intentionally given to her, she realizes a greater speed than any vessel hitherto constructed.

6. In regard to the nature and speed of a voyage. It ought to be kept in mind that the great ship was not built for extreme speed on short voyages, but for the express purpose of maintaining fair speed, with great economy of transport, on a long run of over 13,000 statute miles. For this use, and this use alone, were all her contrivances of construction originally designed. In considering, therefore, how to turn this property to profitable account, you should never lose sight of the fact that she is able to do this voyage in one-third less time than it has yet been done.

7. Cost of transport. I find, according to our present experience, that the cost of running the ship is £2 a mile, including every kind of expense. The goods alone which she can carry, even at the most moderate freights, will repay this cost, and leave the entire passenger traffic as pure profit. The freights she could earn by passengers are more than double what she could earn by goods.

8. Remuneration from passengers. The comparative exemption of passengers by this ship from sea-sickness, confined cabins, close air, and the other usual inconveniences of a sea voyage, has been proved by experience to be more complete than her most sanguine promoters anticipated. The large space afforded for air and exercise, the light, luxury, and ventilation of the cabins, have never been paralleled in any other ship. There can, therefore, be no doubt that, on those great lines which passengers frequent in large numbers, a strong preference would be given to that ship which substitutes for the sickness and misery of a long sea voyage all the comfort and luxury of a hotel. Two thousand people can be thus conveniently accommodated at fares that would yield a net revenue of £4 a mile.

9. Summary of results. Such, then, are a few of the sea-going qualities and money-earning capabilities of our ship; and you will thus see that all the qualities and powers of the vessel originally promised when she was designed have been borne out by experience. She has proved handy and manageable, so as to go into and out of any harbor in this or other countries that affords suitable traffic. She has ample power to stand up in a seaway or storm, without such rigid stiffness as to make the sea strike her with violence. She has proved herself the strongest ship in the world. She has proved that in danger, from external violence or internal accident, her system of separation into compartments is so successful that no damage to one part of her affects another. She has realized the speed for which she was designed, and which is such as to enable her to reduce the time of a voyage to Australia from 59 days to 39 days. She can not only carry coal for the entire passage to Australia, but find room besides for 5,000 tons of goods. Along with this, she affords ample accommodation for from 500 to 800 first class passengers, and might be fitted up for 1,000 additional berths, as first or second class, and 1,500 third class, if desirable. She has been proved to afford comparative immunity from sea-sickness, along with the comfort and luxury of a first class hotel; thus rendering a passage across the sea in every way more enjoyable than a long journey by land.

Such are the proved advantages which our ship presents, and yet we are told that our property is a bad one, and must be laid aside as unseaworthy.

It has been stated that the ship is not now completed throughout her whole extent. Of course she is not. She was not meant to be entirely completed until after her return from America, when her permanent station and trade could be determined. Originally, she had been designed to accommodate 3,000 passengers, or 10,000 troops; but for the purpose of going to sea, on her trial trip to America, she was only to be completed for 675 passengers. Only two compartments of her length—one of 90 and another of 60 feet long—were completely fitted up for passengers. The rest of the ship remains, as intended, almost entirely unfitted, or provisionally fitted only, for temporary purposes.

Before I conclude, let me say a few words about myself. You have been taught to suppose that you and I have opposite interests. Do not believe it. My interests can never be separated from those of the great ship. I am proud to have been her builder. I expect yet to earn great reputation by her; and I am, like yourselves, a large shareholder. It is, therefore, my interest, even more than yours, that your property in the ship would turn out valuable. It is true, you owe me money for work done; but we are not, therefore, enemies. I want no more for my work than three honest and able arbitrators, to whom you and I have both referred the matter, shall say is due to me. Let us both, therefore, set about turning our mutual property to account, for our mutual good. As a fellow-shareholder of the ship, let me tell you what is now wanted is the best possible management of the ship. Steam-shipping property is not easily managed; but, if you can agree upon men of ability, experience, and success in the management of steam property, to take the entire practical control of the executive part of your business, you will not be disappointed with the result.

Journal of Banking Law.

Deposit in Savings Bank, Effect of Regulations as to.

Banks, as the custodians of individual wealth are sometimes placed in embarrassing positions, by two or more individuals claiming the same deposit. In such circumstances they are under obligations not only to protect the real depositor, but they are under the necessity of so conducting as to protect themselves. To obviate difficulties of this kind various rules and regulations are enacted by the officers of these institutions. But however useful and important these rules may be, they cannot provide for all the unknown cases that may arise, nor will they be allowed to override the rights of other persons that may be affected by them. Banks may make rules as to the manner in which they will receive deposits, and assume the responsibility of a custodian of money; but if deposits are received by the bank, not in accordance with the rules, or an actual violation of them, the question may very properly arise, does not the bank waive the force and protection of its rules, by permitting a departure from them.

The case of Wallace vs. Lowell Institution for Savings bears upon this subject. The plaintiff in this case deposited, through her agent Mary Adams, $41 in the defendants' savings bank. According to the rules of the bank, the name of the depositor should be written, by himself, in a book kept for that purpose, so that when the depositor wished to draw the money, the bank could compare the signature of the drawer with that of the depositor, and thus detect any person in the attempt to draw wrongfully the deposit of another. The plaintiff, instead of signing her name, herself, in the book of the bank, authorized her agent, Mary Adams, to sign for her. Mary Adams accordingly went to the Bank, as though she herself was making the deposit, signed the name of the plaintiff "Harriet Wallace" in the book and deposited the before mentioned $41, received return the usual bank book and carried back the plaintiff.

The plaintiff afterwards went herself to the bank and deposited thirty dollars more. Neither of them, however, disclosed to the bank the fact that the first deposit was not made, or the name signed in the bank's book, by the person really depositing the money.

The plaintiff subsequently called at the bank with her book and demanded payment of the money from the defendants, who desired her to write her name, which she did, and they compared it with her name as written by Mary Adams on their signature book, and, discovering the difference between them, refused to pay over the money. The plaintiff then explained the reason of the difference and how the first deposit was made, and stated that the money belonged to her; but the defendants refused to pay it over, unless she would furnish some reasonable evidence that she was entitled to it, or would give them a bond of indemnity. The plaintiff afterwards made an affidavit, setting forth in substance the facts which are here stated, and delivered it to the defendants, but never offered them any bond.

The defendants' treasurer testified that "it always had been the invariable rule and custom of the corporation to require depositors, when making their first deposit with the corporation, if they could write, to sign their names upon the signature book of the corporation; and that, when depositors could not write, they were required to make their mark in the signature book, in the presence of an attesting witness: that the defendants identified the owners of deposits by a comparison of their signatures with those written in the book of the corporation at the time of making the deposit, that it was their practice to rely on this evidence alone.

Prefixed to the books given to the plaintiff and to other depositors was a printed statement, parts of which were thus: "Deposits will be entered in the books of the institution and also in a book to be given to the depositor. This book will be evidence of their property and as valid as a note of hand. When money is drawn out this book must be brought to the office to have the payment entered." "Persons who put in money must sign the rules, and agree to conform to them." "All deposits shall be entered in a book to be given to the depositor, which shall be his voucher and the evidence of his property in the institution.

The jury found a verdict for the plaintiff for the amount of both sums deposited, and the defendant appealed to the Supreme Court. The following is the opinion.

Dewey, J.—The production of the deposit book of the savings bank, in the usual form in which

such deposits are entered in the books delivered to the depositors, and in which the plaintiff is stated to be a depositor of the sum of $41 and $30 accompanied with proof to the jury that the plaintiff is the person described in the book, and that the money was hers and deposited solely on her account, would seem quite sufficient evidence to authorize a jury to find that the money was due to the plaintiff, and, if the defendants had refused to pay it to her on proper demand, would authorize a verdict against them so detaining the money. Such must be the case, unless there is something peculiar in the matter of deposits in savings banks generally, or this bank in particular; that will defeat the right of the plaintiff to maintain her action.

It is said, on the part of the defendants, that the contract made by them, as to this deposit, was exclusively with the individual personally paying the money. But we see no ground for that assumption. The contract is with the person named in the deposit book as the depositor; not with the servant or agent by whose hand the money is delivered, if the deposit be made through an agent.

Nor do we see how any evidence of a custom of the defendants to require depositors to sign their names upon making the first deposit, or that, when money is deposited by one person for the benefit of another, it must be so stated and entered on the books of the corporation, or they will not receive such deposit, can avail to sustain any right on the part of the defendants to retain to their own use any money of another that they have taken on deposit, and in whose favor they have issued the usual deposit entry. The practice thus offered to be shown is doubtless a very convenient and proper one; one which the defendants have a right to adopt; and to refuse taking any money on deposit unless such condition is complied with. But it cannot avail, unless they insist upon such condition when the money is offered and accepted as a deposit, and passed the same to the credit of the real owner on the deposit book, they are bound to account with such person therefor, unless it can be made to appear that there is some palpable violation of the by-laws that would preclude a recovery of the same.

We do not understand that any by-law of the institution, in terms, require any such acts as are attempted to be shown to have been usual, or by custom required in fact. The requirement in the by-laws, that the party depositing shall by his signature signify his assent to the regulations and by-laws, might be as fully complied with by a signature by an agent, or by another person writing the name of the depositor, at his request and in his presence, as by the depositor's own signature. The question of identity as to the real person who makes the deposit, and who would be legally entitled to withdraw it, is doubtless an embarrassing one to the officers of savings banks. The possession of the bank book, containing the statement of the deposit, would ordinarily be satisfactory evidence on this point; but the possession of the book may have been obtained by theft or fraud, and, therefore, something further may be convenient and useful for the greater security of the bank, by way of establishing the fact of identity of a depositor.

It is urged upon us, that the defendants, in a case like the present, would pay at their peril, and that they ought not to be exposed to an action at law through the acts of the plaintiff's agent, who by her conduct rendered it thus difficult for the officers of the bank to determine what person was entitled to this deposit. But it cannot be denied that the evidence offered on the trial relieved the case of all doubt as to who was the real owner of these funds, and for whom they were held on deposit. The evidence was full and decisive that it was the plaintiff's money, and that she alone was entitled to it.

The only hardship in the case is, that the same amount of evidence was not exhibited to the defendants before the suit was instituted. But in addition to the possession of the deposit book, with an entry to the credit of the plaintiff, which would be strong presumtive evidence to establish the right of the plaintiff to the money, the plaintiff had furnished them with her affidavit, duly subscribed and sworn to, declaring the precise facts in relation to this deposit as they are now established by other evidence. It is time that this affidavit was not that legal evidence which would be required to prove ordinary facts in a court of justice, but it added certainly to the probabilities that the plaintiff was the real depositor. It is that species of evidence which is admissible to prove the loss of papers, and authorize the admission of secondary evidence.

The plaintiff, it is true, might have given the defendants a bond with sureties, to save them harmless upon payment of the deposit to her. this, we think, was not absolutely required of her, when no other question arose but that of identity of the depositor. Such security by bond is required in cases where a savings bank is summoned as trustee of a depositor, and there is, in the opinion of the court, any doubt as to the identity of the defendant.

That case, however, differs materially from the present in the necessity for such a provision; and the bond is there only to be given when, in the opinion of the court, there is a doubt as to the identity of the depositor. That is also a statute provision. There was no statute requiring it here, and no by laws to that effect, and no case that the court can say made such bond a prerequisite to maintaining an action for the deposit.

The judgment was thefore affirmed in favor of the plaintiff.

Report of the Richmond and Danville Railroad Company.

The gross income of this road from all sources amounted to $491,674 34 in the fiscal year ending 30th Sept., 1858. The Board are now gratified to inform the stockholders, that the gross income for the fiscal year just ended reached $554,203 06, showing an excess in the earnings of $62,528 72. Of this excess, over $29,000 was received from passengers, and over $33,000 from up or outward freight, whilst there was a decrease of over $8,000 from inward or down freight. This decrease, no doubt, partly arises from the detention of wheat in the country on account of a general failure of the corn crop, and the ruling low prices of wheat. The large receipts of that staple since the close of the fiscal year, continuing even to the present time, lead us to anticipate a corresponding increase in the down freight to be exhibited in the present fiscal year. Had there been a corresponding increase in the down freight, the total increase of revenue would have reached upwards of $100,000.

Of the income stated above, the net earnings amounted to $292,988 38, or 52 86.1 per cent., whilst the working expenses reached 47 14.1 per cent.

Indebtedness of Company.

Of the debt of $250,000 due the first day of August, 1859, $249,000 have been paid, leaving only $1,000 thereof unpaid, the bonds for which have not been presented. Of the debt of $150,000 due on the first day of November, 1860, $10,600 were paid before the close of the last fiscal year; and no doubt exists of the prompt payment of the balance at or before maturity. The debt of $600,000 due the State of Virginia was contracted by a loan from the State upon the condition of the annual payment of 7 per cent. in semi-annual instalments of $21,000 each for thirty-four years. The compliance by the company with the regular payment of interest liquidates this debt, in the time specified, so that no farther provision for its payment will ever become necessary. It may therefore be regarded as an annual charge upon the income of the company for twenty-seven years to come, nearly seven years of the time having already elapsed. A further debt of $200,000 was contracted by the company and guaranteed by the State, payable in the year 1875, the interest upon which has been punctually paid.

The payment of the preceding debts was in part effected by the creation of a sinking fund, by investment in State stock, in the re-sale of which, the premium and interest made a profit to the company of $10,276 62. There was also a further gain made for the company of $3,315 47 by anticipating the payment of the bonds of 1859 and 1860.

The payment of the debts, with the increased income of the company, the continued good order of the road and of the rolling stock, and the generally prosperous condition of its affairs, in the opinion of the Board, justified the declaring of a dividend of 4 per cent. upon the capital stock of the company. This dividend in the aggregate amounts to nearly $80,000.

Condition of Road, Building and Rolling Stock.

During the past year the road-bed and track have been kept in good order and excellent condition. The flat rail on three and a half miles has been substituted by the heavy T rail; and the work of substituting is gradually progressing. On that portion of the road between the junction and the Appomatox, from which it is contemplated to remove the flat rail at an early day, no further outlay has been deemed proper than was required for the safe operation of the road; but upon that portion between the junction and Staunton river, where the substitution will take place at a later period, the sills and stringers have been thoroughly replaced and renewed, so as to make the wood work as good as new; and all defective iron has been replaced by the good iron removed from the track below.

These improvements and renewals have been attended by heavy expenditure, and have swelled the amount for total repairs of roadway to $101,898 64. To this is to be added the expense of substituting the heavy T rail, the stone piers for the trestling in Staunton river low grounds, and the culvert at Meherrin. A new depot has been erected at Wolf Trap, and that at Amelia Courthouse considerably enlarged; extensive improvements have been made on the depot lot in Richmond, the engine house and passenger car houses in Manchester completed, and passenger houses and platforms have been added, and some of those already existing have been enlarged. which have also led to extraordinary expenditures.

The motive power has been increased by the addition of one locomotive, but in the company's shops; and the rolling stock by one first-class and one second-class passenger car; thirty new eight wheel box freight cars; seven new eight wheel flat cars; six new four wheel coal cars; one new four wheel gravel car, all completed in the company's shops, at a great saving of cost. The whole of the rolling stock has been kept in thorough repair, many of the old cars having been entirely replaced by new ones, not embraced in the account of new work.

The gratifying exhibition of the condition of the company is due to the proper execution of their duties by the officers of the company generally, and especially to the faithful and efficient services of Charles Campbell, late Superintendent of Transportation.

Branch Roads and Extensions.

The extension of the Roanoke Valley road from Clarksville to Keysville on the Danville road, is in process of construction. The whole of it has been placed under contract, and a large force is now employed on the work. The energy with which it was commenced and is now prosecuted, give assurance to your Board of its early completion. It is difficult to estimate the great increase in travel and tonnage which will ensue upon its junction with this road, penetrating, as it does, one of the most fertile and densely populated portions of Virginia and North Carolina.

A company has been incorporated by the State of North Carolina, under the name of the Dan River and Coalfield Railroad, to construct a road from the region of the coal fields down the valley of the Dan, to the Virginia line near Danville, from which point it is contemplated to extend it to Danville. That company has been organized, and a large amount of money subscribed. The line of this road brings within our reach extensive coal fields, and passes through a country rich in minerals, and unsurpassed in fertility. The completion of that connection will greatly enhance the profits and add to the prosperity of this road.

A third connection is also in contemplation, stretching primarily to the base of the Blue Ridge and thence through the copper regions, forming a connection with the Virginia and Tennessee road at the most eligible point. The stockholders of this company have heretofore expressed a warm interest in the success of this enterprise; and by their direction a preliminary survey was ordered by the Board of Directors. That survey has been completed, and the accompanying report of the Engineer will give the details for the information of the stockholders. The Legislature of North Carolina, at its last session, refused to permit any direct connection between the Richmond and Danville road and the North Carolina Central road. The repeated refusal on their part to comply with the long-cherished wish and expectation of this company, and of that portion of their own citizens so directly and deeply interested, furnishes a just cause of regret. But the justice and propriety of allowing a free intercourse by the best and most approved means of communication between the citizens of the two States, bound together as they are by the closest ties of interest and friendship, give the strongest confidence of ultimate success.

Financial Statements.

The receipts for the year ending 30th September, 1859, were as follows:

From local passengers	$107,663
" through "	74,186
" outward freight	159,845
" inward "	152,807
" intermediate "	14,639
" coal "	12,615
" stone "	1,467
" Belle Isle "	3,483
" express "	8,024
" U. S. Mail	19,523
Total receipts	$554,203

And the payments were as follows:—

For sundries	$323,697
" wood	16,465
" stock killed	447
" lost and damaged freight	1,241
" salaries	6,513
Total expenditures	$350,363
Less extraordinary expenses	89,149
	$261,214
Earnings beyond working expenses	$292,989

The following shows the financial condition of the company at the date above named:—

	Dr.
Share capital	$1,980,997
Subscribed by individuals $482,399	
" by counties 310,000	
" by St. of Virg'a, 1,188,598	
Received from unknown stockholder	20
Guarantied bonds, due 1875 $200,000	
State loan for 34 years 600,000	800,000
Mortgage coupon bonds due 1st August 1859 $250,000	
Less discount on same 41,045	208,954
Registered bonds, due 1st November, 1860 $150,000	
Less discount on same 29,232	120,768
Sundries	36,152
Balance of Transportation Department,	1,196,030
Due on open accounts	10,508
Bills payable	29,555
	$4,382,979
	Cr.
Cost of road and property	$3,659,668
Interest on debt $393,239	
Redemption funded ($600,000) 32,909	
Discount on county bonds 6,200	432,348
Casualties	1,379
Bonds due 1st Aug. 1859, redeemed	249,000
" " 1st Nov. 1860, "	10,600
Debts due the Company	17,505
Cash in bank	12,477
Total	$4,382,979

The following are the names of the officers of the company for the current year:—L. E. Harvie, *President;* Thomas W. Brockenbrough, *Treasurer;* C. Campbell, *Superintendent;* B. M. Jones, *Chief Engineer of Western Extension.*

Finances of Ohio.

Governor Chase, of Ohio, in his recent annual message, gives the following account of the financial condition of the State:

The amount of debts, of whatever description, State, corporate, commercial, and every other, is now estimated at $240,000,000, but of these, not less, probably, than one-third will be cancelled by payment of other debts embraced in the same aggregate. The whole existing debt constituting a real charge upon the whole existing property, hardly, if at all, exceeds $160,000,000—about one sixth of its value. If this sum be compared, not merely with the entire property, but with the entire productions of the State, which, according to my estimates in 1858, amounted in 1857 to $261,867,500, and doubtless exceeded that sum in 1859, or with the probable net products after deducting the consumption, direct and indirect, of the people, the gratification afforded by the spectacle of our general prosperity, will not be sensibly abated. The whole amount of receipts into the Treasury during the last year was $3,520,154, and the balance from the preceding year was $226,113. The total sum subject to disbursement in 1859, was $3,746,272.

In January, 1854, after the completion of the public works, and after the abandonment of the policy of aid to public improvements by State subscriptions to the stock of railroad, canal and turnpike companies, the entire debt was $19,251,170; of which the reducible debt was $17,796,057, and the irreducible $1,455 123. From that time the reduction debt was gradually diminished, until the defalcation and debts contracted in anticipation of revenue created a necessity for the temporary loan of $700,000, which was authorized by your predecessors and negotiated in 1858, and is reimbursed on the 1st of July, 1860, and 1st of March, 1861. At the close of 1859, the entire debt was thus constituted: The foreign debt was $13,621,857 20; the domestic debt, $275,385, making the whole reducible debt, $13,897,242 20; the irreducible debt was $2,584,076 95; and the temporary loan, $700,000, making a total of $17,181,319 15. From this amount may properly be deducted $288,154, already collected for part payment of the temporary loan.

American Shipping.

The following statements of the shipping of the United States, are abstracted from the Annual Tables prepared under the direction of the Secretary of the Treasury. They refer to the year ending 30th June, 1859:—

	Tons.
Balance of tonnage June 30, 1858	5,049,808
Built, registered, enrolled and licensed for the year	192,520
Total supply	5,242,328
Sold to foreigners	30,850
Condemned	13,872
Lost at sea	52,569
	97,291
Total tonnage July 1, 1859	5,145,037
Increase for the last year	95,229

The above statement is more favorable than was expected by many. The vessels built during the year were of the following descriptions:—

Ships and barques	89
Brigs	28
Schooners	297
Sloops and small craft	284
Steamers	172
Total number built	870

The number of vessels built and their tonnage for five years past are as follows:—

1855	2,034	583,450.04
1856	1,703	469,393.73
1857	1,434	378,804.70
1858	1,225	242,286.69
1859	870	156,602.33

The tonnage owned in the United States, as returned to the Treasury Department, was last employed as follows:—

In the foreign trade.	Tons and 95ths.
Permanent registered tonnage	1,870,617 73
Temporary " "	636,784 11
Total to the foreign trade	2,507,401 84
Permanent enrolled tonnage 2,579,626 49	
Temporary enrolled tonnage 7,340 81	
	2,586,967 37
Total United States tonnage	5,145,037 84

Of the enrolled and licensed tonnage there were employed:—

In the coasting trade	2,439,820 32
In the cod fishery	120,577 07
In the mackerel fishery	27,069 91
	2,586,967 35

Employed in steam navigation:—

Registered tonnage	92,747 73
Enrolled tonnage	676,004 83
Total in steam navigation	768,752 61

Greenville and French Broad Railroad.

The Board of Commissioners of Roads had a meeting at this place on last Saturday, and determined to submit the question to the tax-payers of Spartanburg, whether the district shall subscribe to the capital stock of this company, on the first Monday in May next. Fifty thousand dollars was the amount fixed upon. We have very little doubt that our citizens, upon due reflection and a proper understanding of the question, will vote for the subscription.—*Spartanburg Express.*

RAILROAD SHARE LIST, including Mileage, Rolling Stock, etc., etc.

An *asterick* (*) occurring in the column headed "Rolling-Stock," signifies that the cost is included in that of "Railroad and Appurtenances." A *dash* (—) signifies "nil." Running *dots* (.....) signify "not ascertained." Land-Grant Railroads are in *"italics."*

Railroad Reports.

RAILROAD COMPANIES will oblige us by sending us copies of their Reports as soon as they are published.

American Railroad Journal.

Saturday, February 11, 1860.

Railroads of Tennessee.

We give elsewhere a summary of the railroads of this State, showing their financial condition, physical characteristics, etc., etc. In our next issue, we shall tabulate the information now given, accompanying it with an abstract of the Internal Improvement law, which has done so much for this State, and which bids fair to give to its people a system of railroads adequate to all their wants, without the loss, to the State, of a dollar. It is one of those few cases in which the interference of a State in works of improvement, has been eminently successful.

A Desirable Improvement.

Under this head we last week noticed an improvement, whereby the space between passenger cars, from their sides, nearly to a level with the track, is so covered as to exclude both the dust and prevent all liability to accident by falling under or between the cars, the improvement being credited to Mr. Joseph Jones. We are informed that it is the improvement of Mr. E. C. Salisbury, of whom frequent mention has been made in the JOURNAL, and who is now introducing it upon the New York Central and other roads. We have seen statements signed by Mr. Vibbard, Superintendent of that road, Mr. Bliss, President of the Michigan Southern, and Mr. Rice, Superintendent of the Michigan Central, all of whom speak of the improvement in high terms, it having been adopted on all these roads.

New Jersey Railroad.

The following is the annual report of the New Jersey Railroad and Transportation Company, submitted to the New Jersey Legislature:—

Receipts and Expenditures for 1859.

RECEIPTS.

From passengers		$729,181 84
From freight		90,080 78
From United States mail, rents, express freight, and other sources		206,420 53
		$1,025,682 65

EXPENSES.

Maintaining railroad, bridges, and buildings	$65,038 06	
Repairs of locomotives, cars and machinery	42,727 42	
Fuel—cost and labor in preparing	66,143 74	
Operating the road and transport'g passengers and freight	197,052 68	
Office expenses, salaries, and contingencies	11,110 27	
		382,072 17
Leaving		$643,610 48
Interest on bonds	$41,505 00	
Transit duty on passengers and freight	17,076 76	
Tax on capital stock	18,746 00	
Dividends in cash, August and Feb'y	374,900 00	
Profit and loss to surplus earnings	191,388 72	
		643,615 48

The Company carried 2,501,124 passengers and 98,007 tons of freight. The total of miles run by passenger, freight, and other trains was 447,676.

FINANCIAL.

The closing cash prices at the Stock Exchange for each day of the week ending 8th Feb'y, 1859, were as follows:

Do. $50 shares	15	to	20

The returns of the banks throughout the United States at dates nearest the 1st January, 1860, have been published. The whole number specified is 1509 with a total capital of $408,051,244, a circulation of $151,976,516, deposits to the amount of $267,437,068, and profits on hand reaching $47,050,803. The resources at the same dates are counted as follows: Notes, bills of exchange, etc. $755,223, specie $88,977,096, and real estate $27,304,812. The balance total is $871,515,181. This is a very favorable exhibit and notwithstanding the extraordinary export of bullion during the year 1859, shows an amount of specie in bank a large per cent. greater than usual. The year 1858 must always be an exception. Nearly one-half

the whole of the metallic money is held in the cities of New York, Philadelphia, Boston, and New Orleans, and at least a fourth part in New York alone.

The circulation of bank paper in its several denominations is stated to be approximately as follows—in bills of one dollar $8,000,000, of two dollars $5,000,000, of three dollars $4,000,000, of five dollars $16,000,000, of ten dollars $6,000,000, of twenty dollars $16,000,000, of fifty dollars $15,000,000, of a hundred dollars $10,000,000, of five hundred dollars $37,000,000, of a thousand dollars $32,000,000 and of five thousand dollars $3,000,000.

The strongest banks in the country are those of New Orleans, the law of Louisiana inflicting on directors a personal liability, where the amount of specie is less than in a specified ratio to the circulation and other liabilities.

The following is a synopsis of the affairs of the banks in the several States and territories:

RESOURCES.

States.	Banks and Branches.	Notes, Bills.	Specie.	Real Estate.

Peoria and Hannibal Railroad.

The officers of this road for the current year are:—

President—H. L. BRYANT, Lewistown.

Secretary—D. W. C. BRYANT, Lewistown.

Chief Engineer—WM. H. GRAHAM, Lewistown.

Treasurer—GEO. PHELPS, Lewistown.

Directors—Joseph Ladd, Peoria; H. L. Bryant, L. F. Ross, J. H. Peirsol, Lewistown; Wm. Phelps, Ipava; Jesse COX, Vermont; L. D. Erwin, Rushville.

On the first division, from Peoria to Rushville, about thirty-five miles of the grading and bridging have been completed, and 35,000 cross-ties furnished. There is also a large amount of grading and bridging done at various points, besides that mentioned above. The iron for 15 miles of the road from Canton to Lewistown has been purchased and paid for, and a contract for all the iron from Peoria to Vermont (60 miles) has been made for which the road has been mortgaged, and $800,000 in bonds have been issued.

New York City Railroads.

Below we give the financial statements of the several companies operating in the city of New York for the years ending 30th September, 1858 and 1859, comparatively:

SECOND AVENUE RAILROAD.

	1858.	1859.
Capital stock, as by charter.	$800,000.00	$800,000.00
Amount of stock issued.	627,200.00	650,000.00
Am't. of Funded debt...	350,000.00	350,000.00
Am't. of Floating debt..	30,000.00	18,000.00
Cost of Road and Equipment.		
For graduation, masonry, bridges, superstructure including iron	$874,300.97	$878,186.56
Passenger and depot stations, buildings & fixtures	26,415.24	27,586.99
Horses	58,487.50	.....
Snow-plows, wagons, trucks, &c.....	1,200.00	3,700.00
Land damages & fences.	.....	36,398.81
Passenger cars	45,000.00	47,500.00
Expenses of Maintaining the Road.		
Repairs of road-bed and railway, excepting cost of iron.....	$1,155.78	$1,629.96
Repairs of buildings....	99.48	470.00
Taxes on real estate....	597.20	158.26
Expenses of operating the road during the year	117,851.96	180,644.02
Earnings from pass'grs..	225,232.21	259,100.68
Earn'gs f'm oth. sources.	2,225.59	8,065.79
Payments other than construction—For interest on bonds and float'g debt & divid's.	51,088.94	76,044.00
Number of passengers carried	4,504.645	5,182,011
Number passenger cars.	70	75

Third Avenue Railroad.

	1858.	1859.
Capital stock, as by charter	$1,170,000.00	$1,170,000.00
Am't. of funded debt.	50,000.00	110,000.00
Am't. of floating debt.	40,600.00	25,000.00
Am't. of funded and floating debt	90,600.00	135,000.00
Cost of Road and Equipment.		
For graduation, masonry, bridges, superstruct'e, includ'g iron	$1,170,000.00	$1,170,000.00

Boston and Worcester Railroad.

The Income of this road for the year ending November 30, 1859, has been as follows:

Passengers		$561,508 24
Freight		471,064 09
Rents		18,983 14
Mails		15,515 26
		$1,067,070 73
Working expenses		$555,545 35
Interest paid	$34,240 74	
Less amount received	31,470 96	
		2,769 78
Paid on account of the new location in Brighton		9,889 16
Total expenditures		$568,204 29
—or 53½ per cent. of earnings.		
Net income		$498,866 44
Dividend, (7 per cent.)		315,000 00
Surplus income, not divided		$183,866 44

The total income has been $143,847 10 *more*, while the total expenditures have been $22,749 11 *less*, than last year.

The liabilities of the corporation are as follows:

Funded debt, due July 1st, 1860		$500,000 00
Floating debt		29,595 48
Assets to pay funded debt:		
Cash	$40,068 20	
Sinking fund	289,420 50	
Loans on collateral	246,448 20	
Notes receivable	28,591 77	
Bills payable	21,128 64	
	$625,657 81	
Less 4 per cent. dividend, payable Jan. 2d	180,000 00	
		445,657 81
Assets not available to pay funded debt:		
Bonds of Grand Junction Railroad and Depot Company		100,000 00

There have been carried in the cars, during the year, one million six hundred and three thousand, four hundred and fifty-three passengers, without any personal injury to one; also three hundred and twenty-seven thousand, three hundred and fifty tons of merchandise, without running but a single car-load off the track.

The company own 30 locomotives, 21 wood, and 9 coal burners. Five wood burners have been altered, in their own shop, for coal, the last year, and more will be changed during the coming year. They have used, during the year, (including 787 cords at stations and in cars,) 12,880 cords of wood, at a cost of $72,372 12, or $5 65 per cord, on the tender; and 1,767 tons of coal, at a cost of $10,213 50, or $5 78 per ton.

Cost per mile run for fuel, is as follows:

	Cents per mile.
Freight trains (wood)	21.49
Passenger trains (wood)	14.26
Mixed trains (wood)	16.93
Average	16.88
Freight trains (coal)	13.57
Passenger trains (coal)	7.64
Average	10.71
Total average	15.28

Total miles run in 1858	498,325
do. do. 1859	511,046
Cost of fuel in 1858	$105,522 48
do. 1859	82,585 62
Increase of mileage in 1859	12,725
Saving in cost of fuel	$22,936 86

The track will compare favorably with the best. There has been used, during the year, 1,495 tons of new iron; 1,215 tons on main road, 103 on Newton Lower Falls, and 177 tons on Milford Branch; also, on main road, 431 tons of rails, repaired in the rail-repair shop at Framingham.

Seven hundred and forty-five tons of the new rails were re-rolled by the Bay State Iron Company, at South Boston, and 750 tons by Nathan Washburn, at Worcester, at a cost for re-rolling of $25 per ton. The cost of repairing 431 tons has been $4 67 per ton.

During the year, 35,945 new sleepers have been used in the main track, and 6,950 in branches.

The financial condition of the company on the 1st of December, 1859, is exhibited by the Treasurer as follows:

Resources.

Cost of the road and equipment, including land not wanted immediately for use of the road		$4,728,580 33
Fuel, iron, and other stock on hand.		138,460 31
Real estate not char'd to construc'n		54,457 66
Loans on collateral		246,448 20
Bills receivable for uncoll'ted freight		21,128 64
Due from other roads and individ'ls.		104,357 06
Notes receivable		28,591 77
Grand Junction Railroad bonds		100,000 00
Sinking fund for bonds due in 1860.		285,420 50
Cash on hand		40,068 20
		$5,751,512 67

THE Cheapest and most DURABLE ROOFING IN USE. Sent to any part of the country with *directions for application*

GUTTA PERCHA CEMENT ROOFING.

SPECIMENS and *references* can be seen, and any desired information obtained on application, by *letter* or in *person*, at our OFFICE, 510 BROADWAY, N. Y. (Opposite the St. Nicholas Hotel).
JOHNS & CROSLEY.

DELAFIELD & BAXTER'S,

Late OGDEN & DELAFIELD,
ROSENDALE CEMENT.

WE are prepared to enter into arrangements for supplying our CEMENT for public works, or other purposes. We **warrant it equal in every respect** to any manufactured in this country. It attains a great degree of hardness, sets immediately under water, and is a **superior article** for masonry coming in contact with water, or requiring great strength.

For sale in tight barrels, well papered, on application at their office, by **DELAFIELD & BAXTER, 104 Wall st.**

The above CEMENT is used in most of the fortifications building by government. 43

Rosendale Hydraulic Cement.

THE NEWARK AND ROSENDALE CEMENT COMPANY are now receiving **fresh from the Mills** their approved ROSENDALE CEMENT, warranted **pure** and **free from quick lime,** and which has given such **general satisfaction** in the various government and other public works in which it has been used. Purchasers and shippers should be careful to get the **genuine ROSENDALE CEMENT,** branded "NEWARK AND ROSENDALE," "H. WILDE." This Cement does not swell and burst the hoops when stored in warm climates. It is packed in tight **kiln dried barrels,** and is specially adapted for safe shipping on long voyages. Terms reasonable, which may be known by addressing.

JOHN H. STEPHENS, President, Newark, N. J., or
HENRY WILDE, Secretary, 90 Wall st., N. Y.

THE LAWRENCEVILLE MANUF'G CEMENT COMPANY,

OFFICE 96 WALL ST,
NEW YORK.

THIS Company manufacture **ROSENDALE HYDRAULIC CEMENT** of a superior and uniform quality, and are constantly receiving it **fresh** from their Works at Rosendale. Particular attention paid to grinding **fine,** and packing in superior casks. We warrant it to set under water, and attain a hardness excelled by no Cement manufactured. It has met the approval of Government, and we are at present supplying the fortification now in course of erection, together with Water Works and Public Buildings. For sale upon favorable terms by addressing.

WM. N. BEACH, President.
CHAS. E. LAWRENCE, Sec'y.

CEMENT, PLASTER, ETC.

THE HUDSON RIVER CEMENT CO.

HAVE commenced manufacturing for the season, and can now furnish a very superior article of fresh **Rosendale Cement, Calcined Plaster, Farmers' Plaster** and **Marble Dust.** Address

HUDSON RIVER CEMENT COMPANY,
12 **Jersey City, N. J.**

HOFFMAN'S ROSENDALE CEMENT,

OFFICE, 94 WALL ST., NEW YORK.

THE LAWRENCE CEMENT COMPANY are prepared to receive and execute orders for their Cement, to any extent that may be required. They would particularly call the attention of purchasers to the distinguishing brand of their manufacture, viz.: **HOFFMAN'S ROSENDALE CEMENT.** This seems to be necessary, as they have established a reputation for the superior quality of their Cement, and there are various other brands offered, as "Rosendale" Cement. It has the unqualified approbation of the most eminent Architects and Engineers, being used in almost every department of the Works under Government. It is put up in the most careful manner, each barrel being well lined with paper, and will be delivered on ship-board, in this city, on the most favorable terms. Particular attention given to shipping orders, and Freight obtained on the best terms.

M. W. WOODWARD, Secretary.

Railroads of Michigan.

The geographical position of Michigan in relation to the East and Northwest of the Union, is so highly favorable that as a commercial State its development must be rapid. The great lines from Canada find their terminus on its eastern frontier, and make Detroit the centre of a vast and ever increasing trade—an entrepot between manufacturing Europe and the grain and meat producing regions lying in the basin of the northern lakes, and in the upper valley of the Mississippi; and over these avenues, that commerce which formerly flowed to and from Boston and New York, will now seek Portland as its seaport. On its southwestern frontier, several great lines from the West and Southwest enter the State; and in a direct line across it, the Detroit and Milwaukee road and the lake ferry, forms together a connection East and West, the shortest, and, in summer, the pleasantest to travel. No less, indeed, than three great lines traverse this State across its breadth, and make it as the stepping stone between the field and the market. It is yet, however, too early in the history of these great works for them to have acquired even the first impetus in their vocation—time will develope their destiny. In the meanwhile it will not be out of place to note their progress and doings; but this more as a starting point for future comparison, than as a present indication of their commercial value. The following, chiefly compiled from the Detroit *Tribune* of the 7th inst., may be relied on, and will suffice for the purpose for which they have been penned.

Michigan Central Railroad.

The Michigan Central was the first railroad built within the State, and since its completion has been one of the most successful, both as a through and local highway. On its line have sprung up a number of flourishing towns and villages, and those which existed previous to its construction have shared in its developing influences. Ypsilanti, Ann Arbor, Jackson, Marshall, Battle Creek, Albion, Kalamazoo, Niles, and others that might be properly included, all located upon this road, are noted for their thrift and enterprise. Their commerce is rapidly increasing, and the country along the entire route will compare well with that traversed by the great thoroughfares of any other section.

This road was commenced and partially built by the State; but in 1844 passed into the possession of the company now owning it, who completed it to Chicago. Its eastern terminus being at Detroit, it has the full advantages of the numerous connections at that point: the Great Western and the Grand Trunk and the Southern Central lines, to the principal ports on Lakes Huron and Erie. At Chicago, it has even greater advantages in its connections—too numerous and too well known to require enumeration. Freight is now taken from Chicago to Portland without breaking bulk but once; and an important arrangement has been made with the Joliet Cut-Off, by means of which a direct transmission of freight is secured between St. Louis and Detroit in 38 hours.

The three magnificent steamers belonging to the company, viz: the *Plymouth Rock*, the *Western World*, and the *Mississippi*, owing to the late depression of business, have been laid up at their dock since the fall of 1857; but with the return of more prosperous times, they will, doubtlessly, be again placed in commission. The line formed by these vessels is a pleasant and cheap medium of communication between the East and the West and Southwest, so far as lake navigation is applicable.

The equipment of the road is complete. The rolling stock consists of 98 engines, 70 first class passenger cars, 12 second class passenger cars, 29 baggage cars, and 2,778 freight cars, making a total of 2,889 cars, all of which were built in the company's own shops. This enumeration does not include the gravel and repair cars, which number several hundred more.

The following table shows the earnings of the road for each month of 1859, and compares the totals of 1858 and 1859:

1859.	Passenger earnings.	Freight earnings.	Mails, etc., earnings.	Total earnings.
January	$50,090	$46,059	$5,237	$101,386
February ...	48,080	49,831	5,098	102,959
March	77,838	68,715	5,311	151,864
April	73,855	63,792	5,497	143,143
May	70,246	51,407	5,493	127,145
June	67,510	46,767	5,493	119 770
July	62,119	40,692	5,493	108,304
August	70,053	72,740	7,572	150,366
September ..	93,595	111,751	5,491	210,837
October	89,198	131,386	5,492	226,077
November ...	69,294	106,830	5,492	181,617
December ...	53,169	74,435	5,344	132,948
Total, 1859.	$824,998	$864,406	$67,015	$1,756,420
" 1858.	1,013,062	931,753	71,870	2,016,185
Decrease...	$188,064	$77,347	$4,855	$259,715

The officers of this company are as follows: J. B. Brooks, *President*, Boston, Mass.; R. N. Rice, *Superintendent*, Detroit, Michigan; C. H. Hurd, *Assistant Superintendent*, Detroit, Mich.; Isaac Livermore, *Treasurer*, Boston, Mass.; Oliver Macy, *Local Treasurer*, Detroit, Mich.; William Boott, *Auditor*, Boston, Mass.; John Newell, *Local Auditor*, Detroit, Mich.; H. E. Sargeant, *General Freight Agent*, Chicago, Ill.; John Hosman, *Freight Agent*, Detroit, Mich.; Geo. W. Gilbert, *Cashier*, Detroit, Mich.; D. Wilmot Smith, *Supt. of Telegraph Line*, Kalamazoo, Mich.

Detroit and Milwaukee Railroad.

This road is 188 miles long, and has been in operation through its whole length since November, 1858. Like the Michigan Central, it has been of incalculable value in developing the resources of the region through which it is located.

Pontiac, Fentonville, St. Johns, Jones, Grand Rapids and Grand Haven, are essentially of its making, and there are numerous other villages on the road which are rapidly rising into reputation. As a direct line between the East and West it is decidedly the most economical, having Milwaukee at one terminus and Detroit on the other, and during the first season several vessels have loaded at the company's wharves at Detroit for European ports.

The company has now in use 30 locomotives, 27 first class passenger cars, 3 sleeping cars, 6 second class passenger cars, 11 baggage cars, 6 post office cars, 2 way cars, 240 box freight cars, 12 cattle cars, 139 flat cars, and 1 auxiliary car.

The number of passengers carried during the year was 159,387, against 126,913 during the year preceding. The freight business is exhibited in the following table:

	1858-9.	1857-8.
December	$31,089	$23,848
January	25,143	18,522
February	24,748	16,134
March	36,130	21,520
April	44,803	31,280
May	42,057	29,017
June	45,107	24,984
July	42,224	26,627
August	53,058	31,571
September	68,006	49,216
October	73,708	46,149
November	55,365	36,529
Total	$540,939	$354,843

The railroad wharf before mentioned is one of the most magnificent in the world, and was completed during the past year. It is 1,500 feet long by 90 feet wide. At its west end is the great freight house, the dimensions of which are 450 feet by 182 feet.

In the latter part of August the fine steamers *Detroit* and *Milwaukee* were completed and put on the route; but owing to subsequent accidents, they were withdrawn. These were intended to connect the west terminus of the road by a water communication with Milwaukee.

The present officers of the company are: C. J. Brydges, *President;* C. C. Trowbridge, *Secretary;* W. K. Muir, *General Superintendent;* J. A. Armstrong, *General Agent;* James H. Muir, *Auditor;* J. L. McAlpine, *Chief Engineer.*

Company's office, Detroit, Mich.

Detroit and Toledo Railroad.

This road, which is 65 miles long, was opened through in January, 1857. It was built by the Detroit, Monroe and Toledo Railroad Company, who leased it to the Michigan Southern Company. It is an important link in the great railroad system, extending from the East to the Southwest, of which system, Detroit, from its favorable position, has become the common centre. Since the opening of the Grand Trunk in November last, a large amount of freight has passed over it booked for Liverpool direct. L. P. Knight is Agent at Detroit.

Amboy, Lansing and Traverse Bay Railroad.

On the line of the new road, the distance from Owosso to Lansing, 26 miles, is ready for the iron. The division from Lansing to Albion, 36 miles, is being graded and furnished with ties. About 100 men are at work. Between Owosso and Saginaw, 33 miles, arrangements are nearly completed to start the work. The grading, etc., is done by local subscriptions, of which $3,000 per mile has been subscribed. Office, Owosso, Mich.

Flint and Pere Marquette Railroad.

The entire line of the Flint and Pere Marquette road, as located, is 172½ miles, and 7¾ miles is laid with iron, and 24½ miles additional is graded, and the ties for which are delivered. It is estimated that hereafter 20 miles a year will be completed.

Grand Trunk Railway.

The link of this road extending from Port Huron to Detroit, was opened to traffic on the 21st November, 1859. It possesses important advantages. Being of uniform gauge (5 feet 6 inches) with the Canada road, and being also under the same direction, no change of cars is necessary from Sarnia to Portland. This road is likely to become the avenue through which an immense tide of immigration will pour into and through Michigan. It will also carry to the seaboard the immense commercial material from all the west of Detroit. A junction has been made with the Michigan Central road, by which it prolongs the Grand Trunk to Chicago; and it is possible that ere long another junction will be made with the Detroit and Milwaukee Railroad, by means of a branch from Port Huron to Owosso. In the latter case, there will be a direct line across Michigan, connecting with the Milwaukee Railroad, by the ferry across the lake, and penetrating into Iowa, Minnesota, Nebraska and Oregon.

The officers of the company are: T. E. Blackwell, *President;* T. S. Stevenson, *Treasurer* and *Secretary;* Walter Shanly, *Superintendent;* T. D. Hall, *General Freight and Ticket Agent;* J. D. Hayes, *Station Agent,* of Detroit.

Michigan Southern and Northern Indiana R. R.

The main line of this road, which taps a rich and important portion of Michigan, is 246 miles long, and its branches, 293 miles long. It cost, with its equipment, $17,000,000. The following are the monthly earnings for the year ending 30th November:

	1857–8.	1858–9.
December	$144,188 81	$139,432 55
January	106,761 90	104,179 19
February	97,312 96	106,059 29
March	160,612 86	142,454 07
April	206,505 60	144,512 46
May	187,799 76	137,518 27
June	180,137 01	122,105 94
July	149,606 78	102,027 29
August	202,709 28	149,879 66
September	224,775 97	181,133 48
October	198,215 93	214.468 66
November	168,009 56	181,532 96

The officers of the company are: George Bliss, Springfield, Mass., *President;* Wm. Savage, Toledo, Mich., *Treasurer;* F. E. Worcester, New York, *Secretary;* John J. Adams, Tecumseh, Mich., *Auditor;* J. D. Campbell, Adrain, Mich., *Superintendent;* J. Nottingham, Chicago, Ill., *General Freight Agent;* and D. P. Phelps, Syracuse, N. Y., *General Ticket Agent.*

Sale of the Genesee Valley Railroad.

The section of this road, extending from Avon to Mt. Morris, 16 miles in length, was sold under the mortgage on the 10th inst. The price paid was $87,500. It was purchased by Wm. Kidd of Rochester, for the benefit of the bondholders.

Pennsylvania Railroad.

The following condensed statement exhibits the results of the operations of this company for the year ending 31st December, 1859:

Earnings of the company from the business of the road:

From Passengers	$1,420,912 43
" U. S. mails	74,483 00
" Expresses	75,120 00
" Freights	3,656,111 15
" Miscellaneous sources	135,725 63
	$5,362,355 21

Expenses of operating the road:

Cost of conducting transportation	$1,333,041 00	
Cost of motive power.	864,076 92	
Cost of maintenance of road	671,100 19	
Cost of maintenance of cars.	190,278 34	
Cost of general exp's.	72,241 70	
		3,130,738 15
Net earnings of the road		$2,231,617 06

The earnings of the road, as compared with those of the preceding year, give an increase of $177,024 53.

The increased earnings for first-class passengers amount to $73,355 99, while the earnings from the emigrant business show a decrease of $24,681 71; leaving as the increase from the whole passenger traffic the sum of $48,674 28. This increase was mainly derived from the local travel upon the road, and is due to the increased facilities afforded for this character of business. The Philadelphia Division shows an increase equivalent to a passage over the whole Division of from $169,379 in 1858, to $196,488 in 1859, and on the main line of the Harrisburg and Lancaster road from $109,481 in 1858, to $124,244 in 1859, notwithstanding the competition between Harrisburg and Philadelphia, by the Philadelphia and Reading Railroad and its Lebanon Valley Branch.

The whole number of passengers transported by the company during the year was 1,459,110, and the miles traveled amounted to 54,839,691, or an average of 37 5.1 miles per passenger. Notwithstanding the large number of passengers carried over the road not a single life was lost.

The freight earnings for the year amounted to the sum of $119,904 84 more than was derived from this source in 1858. The increase of the freight earnings is entirely due to the local business exceeding that of 1858 the amount of 110,937 tons, while the through freight, amounting in all to 233,606 tons, was only increased 12,396 tons.

The whole tonnage moved upon the road during 1859 was 1,170,240 tons, exclusive of 70,875 tons of wood, coal, lumber, &c., for the use of the company. Embraced in the foregoing tonnage there was transported in the cars of the company 210,903 tons of coal, and of the same article 210,722 tons in the cars of individuals, making the entire movement of coal 421,625 tons, and an increase in this traffic over the preceding year of 81,087 tons. The amount of coal delivered in Pittsburg during the last year (all in cars other than those of the Company) was 100,302 tons, and varying but little from the amount for the year 1858.

The result of the year's business should be gratifying to the shareholders, as demonstrating the value of their property, and showing the strength of its position. The Directors have not only been enabled to declare three per cent. semi-annual dividends, clear of State tax, but have had a balance sufficient to justify the creation of a Sinking Fund for the redemption of the Second Mortgage Bonds of the company, in accordance with previous intimations to these bondholders.

The funds furnished to the Trustees of the Sinking Fund have been invested by them in the shares of the Cumberland Valley Railroad Company, and to an amount of more than one-half of the capital stock of that company. This investment, while it

yields a full interest upon the outlay, protects the business of this company from the undue influence of other interests.

The roadway has been maintained in complete order. The amount of iron supplied for repairs, during the year, is equivalent to fifty miles of track, which, with the present extent of line, is about the quantity that will be annually required to keep the road in good condition. A lower rate of speed for both passenger and freight trains would materially lessen the wear of the rails and the machinery, and effect important savings in the cost of working the road in nearly every department.

To attain high speeds, heavy and powerful locomotives must be used, and additional safeguards are required to compensate for the increased risk involved. The destructive effects of these heavy machines, moving at high velocities, can be readiy appreciated by every one, and it is therefore a matter of surprise that managers should persist in this practice. This company cannot, however, reduce the speed of its trains, or advance its through rates and retain its customers, while its chief competitors continue to insist upon an adverse policy.

The earnings of the canals owned by the company were:

From the Eastern Division.	$152,871 23	
" Juniata Divis's..	26,824 39	
" Western Divis's..	15,514 04	
From miscella's receipts..	2,339 62	
		$197,549 38

The expenses of maintaining the canals for the same period, were as follows:

For repairs, renewals and enlargement	$140,105 07	
For superintendence, collectors, lock tenders, weighmasters, stationery, &c.	35,347 31	
		$175,452 38
Leaving net earnings of the canals		$22,097 00

The increase in the canal revenues over 1858 was $18,449 30, and the increased expenditures were $51,894 06, embracing the sum of $24,294 79 expended in the re-erection of a bridge over the Susquehanna River at Clark's Ferry, which had been blown down by a severe storm, and also an expenditure of about $8,000 incurred for steam towage, rendered necessary in consequence of the destruction of the bridge. The remaining portion of the increase of expenses was incurred in deepening and enlarging the capacity of the Eastern Division of the canal.

The amount of coal transported on the canals of the company, during the year 1859, was 515,366 tons, being an increase over the preceding year of 104,634 tons, and the amount of lumber transported was increased from 95,770,453 feet in 1858 to 120,074,675 feet in 1859, giving an average increase of tonnage of about twenty-five per cent. The gross revenue of the canals was not, however, increased in the same ratio as the tonnage, owing to a reduction of tolls rendered necessary in order to retain this traffic in its customary channel.

The enlargement of the Susquehanna and Wyoming canals, which it is understood will be effected before the opening of navigation in the ensuing spring, will so reduce the cost of transportation on the whole line as to allow a restoration of the tolls to their former limit. It has been the policy of this company (contrary to public expectation) to cultivate the trade upon their canals and develope the resources of the region of country contiguous to them, in order if possible, to render them productive property.

These canals were received from the Commonwealth in a very dilapidated condition; the prism of the canal being so reduced as to scarcely afford more than a depth of three feet of water throughout. The condition of these works rendered it impracticable for those engaged in transportation on them to contend successfully with the railways for the traffic of the country traversed, and the consequence was, at the time the company received possession of them, their trade was gradually declining.

Upon the Eastern Division the depth of water has been increased to a minimum of five feet, and the other divisions of the works, where any trade of importance was to be accommodated, have been restored to their original capacity. No portion of these canals, except the Eastern Division, (of 46 miles in length) is self-sustaining; but it is hoped that the Juniata Division, as far west as Huntingdon, may ultimately be made to produce some net revenue.

The management of the entire line of canals has been placed under Thomas T. Wierman, Esq., civil engineer, who has conducted the affairs in this branch of the Company's service with commendable judgment and economy.

The statement of the Treasurer on the financial condition of the company, 1st January, 1860, furnishes the following figures:

Amount received from shareholders in payment for capital stock	$13,249,125 00	
And from loans, &c.	9,307,038 32	
Mortgages and ground rents	815,479 11	
Bonds due the State	7,300,000 00	
Balance of interest and dividends..	45,349 63	
Contingent fund	406,874 23	
Profit and loss, deducting discount on 2nd mortgage bonds	732,966 39	
		$31,356,832 68
Which has been expended as follows:		
Cost of road between Harrisburg and Pittsburg; and station and warehouses on the Philadelphia Division	$16,904,525 16	
Less profits of road after paying interest to stockholders up to Nov. 1, 1855, credited to Cost of Construction, as required by charter.	589,185 79	
Cost of Main Line of Public Works.	7,500,000 00	
Cost of Equipment	2,974,473 23	
Cost of Real Estate	1,644,030 62	
Cost of telegraph line	45,264 28	
Extension to Steubenville & Pittsburg Railroad	5,214 09	
Total cost	$28,484,221 59	
Stock of the Pittsburg, Ft. Wayne and Chicago Railroad Company.	816,050 00	
Bonds of Municipal and Railroad Corporations	46,712 50	
Bills and accounts receivable.	805,184 65	
Sinking fund.	277,255 00	
Fuel and materials	316,549 10	
Balance in hands of agents.	269,941 91	
Balance in hands of Treasurer	340,867 93	
		$31,356,832 68

There has been charged to Construction and Equipment account for the past year the sum of $768,547 26, which has been expended in completing the second track from Pittsburg to Lockport, and from Johnstown, in Cambria county, to Barree, in Huntingdon county, leaving a space of 16 5.1 miles to be filled up between Lockport and Johnstown, and of 55 9.1 miles between Barbee and Harrisburg, in all 72 4.1 miles, to complete a line of double track for the entire length of the road. Other portions of this expenditure have been made in extensions of the shops at Pittsburg and Altoona; the construction of sidings, warehouses and passenger stations on the line of the Philadelphia Division (Philadelphia and Columbia Railroad), and in the increase of our equipment.

These expenditures have, in part, been met, as well as a payment to the State of $100,000 on account of the Main Line purchase, by an increase of the funded debt of the company—the remainder, after providing for the payments due to the Sinking Fund, having been contributed from the profits of the road.

The erection of a passenger station at Pittsburg and one at Lancaster, a warehouse at Johnstown, and the extension of the second track from Barree to Petersburg or Huntingdon, as also the cost of reaching a Delaware terminus, will require an expenditure to be provided for in 1860.

The practical working of the road since the purchase of the Philadelphia Division has demonstrated the importance of a change in the distribution of the motive power of the line, which will render necessary the enlargement of the accommodations for it at Harrisburg, and throw out of use the intermediate shops. It is estimated by the General Superintendent that the cost resulting from such an arrangement (and by which the road can be operated in three divisions) would be fully covered by the saving effected in the motive power and transportation departments in a single year.

The Pittsburg, Fort Wayne and Chicago Railroad Company, which, from time to time, received pecuniary aid from this company, has been in operation from Pittsburg to Chicago during the entire year 1859. Its increased revenues during that period, over those of the preceding year, when we consider the depressed condition of the trade of the northwest, should be deemed quite satisfactory. Had the older portion of the road and machinery been maintained in good, effective condition, the net results upon that road would have been such as to restore confidence in the enterprise. The heavy expenditure on these accounts, however, left but a small amount to be applied to the liquidation of the floating debt, and to meet the advances required for the time of the extension of the time.

This floating debt consisted chiefly of the aggregate of that of the three companies composing the consolidated line, which, at the time of consolidation, was much larger than prudence justified. It was carried mainly by a hypothecation of its bonds. The protection of these bonds from sacrifice has been the chief difficulty encountered in arranging the indebtedness of that company.

Under the belief that the floating debt creditors received too much consideration from the directors, to the injury of the mortgage bondholders, the latter applied to the United States District Court for the appointment of a Receiver. This proceeding was concurred in by the Board of Directors, after a change in the officer was agreed upon, and the decree of the Court so arranged as to equitably protect all interests involved. This decree of the Court protects, as far as practicable, the interests of the Pennsylvania Railroad Company, while it relieves the working of the road from vexatious interruptions from its creditors.

The directors, in pursuance of resolutions passed at the last annual meeting, advertised for proposals for property suitable for a termini depot on the Delaware river, at any point between the mouth of the Schuylkill and two miles above Richmond. Under this invitation, offers for property at different localities were received and referred to the Chief Engineer of the city for estimates of reaching the several properties offered. The report of this officer has been published. After a careful consideration of this report, and an examination of the various sites by special committees of the Board, the location was determined, with remarkable unanimity, at the foot of Washington street, immediately above the Navy Yard. Every member of the Board, except one, fully believed that the place selected was, under all the circumstances, the best adapted to the purposes for which a river terminus is required. The object to be attained by a terminus on the Delaware, is to reduce the cost of placing the products of the West, and of the interior of the State, via the Pennsylvania route, at a point where cheap storage and good shipping facilities can be obtained, and thus secure a due proportion of these products for transportation, to be shipped coastwise or to foreign markets. The requirements for such a site were economy in the construction of a road adapted to the use of locomotive steam power, convenience of access, ample space at moderate cost, and proximity to the business centre of the city.

Under existing arrangements a large portion of the western products brought to Philadelphia passes directly through to other markets for sale, stor-

age or shipment, where superior facilities are offered. One of the objects to be obtained by ample depot privileges on the Delaware front is to retain the produce on storage in warehouses on the wharf until the owner determines upon his market. This accumulation of produce will inevitably attract shipping to this port, and create a competition for freights now so much desired.

The route adopted also affords the advantage of connecting (by a short branch road) directly with the City Gas Works, which would effect a saving in transportation and handling of the coals annually consumed by them, equal to the interest upon the cost of extending the road from West Philadelphia (its present terminus) to a connection with the Philadelphia, Wilmington and Baltimore Railroad, east of the Schuylkill. A connection with the latter road at the west end of Gray's Ferry Bridge, may be made at small expense, which, combined with an extension of the Philadelphia and Reading Railroad to the Pennsylvania Railroad, and the west bank of the Schuylkill, would enable the former company to supply the region of country by the West Chester and Philadelphia, Wilmington and Baltimore Railroads, with coal, instead of passing, as at present, along Broad street.

It has been the policy of the company to seek an increase of traffic by securing freights destined to any part of the world, in all cases where they believed they could add to the profits of the shareholders, while they have, with equal care, sought to protect the manufacturing and commercial interests of Philadelphia, whose means have been so liberally embarked in the enterprise, by such differences, in her favor, in the rates of freight as were due to the shortest distance it was to be transported to and from the west. More than this could scarcely be asked of this company, and more, if demanded, would not be permitted by the competing lines of transportation between the East and West. During the past year the New York Central Railroad Company, in an unreasonable (if sincere) effort to bring the rates to and from New York to the same level with those of Philadelphia and Baltimore, sacrificed hundreds of thousands of dollars to herself and rivals, without attaining her object, beyond temporarily destroying the uniformity of these differences in rates.

The Tunnel at Bergen.

This grand enterprise is being pushed forward with vigor; and it is announced that trains will be able to pass through it by the 1st of May. On the eastern end, the excavation has been completed, and a track laid for over 1,000 feet. Over this, the stones and gravel are now conveyed to the dock by locomotive power. After a cutting of only 80 feet more, another large section will be added, enabling the track to be laid nearly all the way through. The eastern entrance permits the passage of dirt cars as far as the mouth of the tunnel; the earth cutting there is fully one quarter of a mile long, varying from 6 to 60 feet in depth. The bore is 30 feet high by 27 wide at the base, with an arched roof, affording more than sufficient space for a double track. The rock is nearly all gneiss, being like granite of an igneous origin, and exceedingly difficult to penetrate. Large quantities of the stone are being dressed for paving. It is understood that a sort of cock-screw entrance near the middle, something like those leading into the Thames Tunnel, will be constructed, in order to accommodate the people of Hudson. The work of filling in the Long Dock, a most magnificent enterprise, progresses more slowly; but a portion of it may be in readiness by the time passenger trains can run through. The union of Jersey City, Hoboken and Hudson, cannot be far distant; indeed, it is being rapidly brought about by this improvement, and the new houses which are going up in that neighborhood. Within seven years, there will be a population of 100,000 souls on the west bank of the Hudson.

Valuation of Virginia.

The Auditor of Virginia reports the entire valuation of that State at $1,143,676,087, of which the slaves form more than one-fourth, or $313,-148,275.

South Carolina Railroad.

The operations of the company for the years ending 31st December, 1858 and 1859, have been as follows:

	1858.	1859.
Freight earnings	$1,017,421 31	$1,030,566 09
Pass'g'r do.	416,801 05	499,166 50
Mails, etc. do.	66,786 08	66,963 13
	$1,501,008 44	$1,596,695 72
The expenses for the same years were:		
Bureau Department—		
Salaries and contingencies	$18,054 37	$18,352 75
Transport'n Dep't—		
Salaries and wages	238,323 98	245,203 34
Annuity to city of Augusta, from Aug. 1, 1858, to Dec. 31, '59.	9,916 66	7,000 00
Oil and tallow	20,685 82	18,546 94
Wood	53,587 94	42,770 72
Machinery Departm't—		
Salaries and wages, materials and machin'y, and coal	146,029 69	160,365 90
Road Department—		
Salaries and wages, timber, spikes, chairs, and contingencies	127,689 68	157,858 95
Total *ordinary* exp's.	$651,788 70	$709,669 27
Extraordin'y expenses, viz:		
Cost of new works, machinery, etc.	28,788 70	82,741 12
Total ordinary and extraordinary	$680,496 59	$792,410 39
Earn'gs less expenses.	$820,511 85	$804,285 33
From which deduct as follows:		
Sterling interest	$122,142 74	$122,618 00
General do.	56,803 05	45,738 40
Damages and stock killed	13,486 42	8,290 50
Total	$192,432 21	$176,646 90
Leaving for dividend fund	$628,079 64	$627,638 43
Dividend 1st six m'ths.	$155,184 00	$164,883 00
Dividend 2d six m'ths.	164,883 00	164,883 00
Total dividend	$320,067 00	$329,766 00
Which leaves an absolute surplus of income equal to	$308,012 64	$297,872 43
		308,012 64
Other items of surplus funds, transfers, etc.		21,024 97
Total surplus for two years		$626,910 04
Transferred to road account		545,954 73
Damages, depreciation, losses by ag'ts, etc.		$80,955 31

From the above showing, the increase of earnings in 1859 over 1858 was $95,687 28
And the increase of expenses was 111,913 80

Net increase of expenses in 1859.. $16,225 52

—being about 4.29 per cent. in excess of those in 1858.

Report of Finance Committee.

The annual statement for 1859 exhibits a balance of indebtedness agt. the Co. of. $2,623,631 64
Balance last previous year 2,535,520 36

$88,111 28

—from which it would appear that the debts of the company, instead of being reduced, have been increased to the extent of $88,111 28; and it is, therefore, necessary to explain that this is occasioned by the withdrawal from the Assets of $300,-000 of stock in the Camden Branch, which was a mere nominal item, and tended only to complicate accounts. If this sum be restored to the Assets, so as to state the account in the same manner as last year, it will be seen that the result would prove the actual reduction of debt to have been $211,888 72. The effect of this reduction has been virtually to extinguish the floating debt of the company, and leave only the funded debt to be dealt with. The total indebtedness on the 31st December, 1858 and 1859, was comparatively as follows:

	1858.	1859.
Funded debt	$2,730,462 99	$2,679,675 00
Bills payable	172,993 88	147,495 55
Scrip account	20,092 68	.....
Interest and divid'ds	43,224 96	19,598 11
Pay rolls and transcient creditors	82,192 61	84,657 62
Dividends last 6 mos.	164,883 00	164,883 00
Total	$3,213,850 12	$3,096,309 28

—but from the total on the 31st December, there must be deducted, the cash on hand, the amount due by the Post Office Department and other available assets, amounting in all to $376,000, and thus reducing the actual indebtedness to $2,720,-309.

The precise amount of the funded debt is $2,679,675, and it is payable in the following order:

Past due	$1,000 00	In 1863	$440,833 33
In 1860	46,341 67	In 1866	2,000,000 00
In 1861	3,500 00	In 1868	188,000 00

An account of all the moneys expended for permanent works, rolling stock and other property, carefully prepared, exhibits the total cost up to the present time, to have been $8,887,175. This sum has been derived from the following sources:

1st—Share capital paid in $3,879,600
2d—Moneys borrowed and still due ... 2,720,309
3d—Income contributed to capital 2,287,266

The Finance Committee in their endeavors to arrange a suitable plan to provide for the payment of the funded debt, have considered, as suggested by the Board, the possibility of combining with it some measure of compensation to the stockholders for the dividends thus withheld from them and added to the capital. Both objects may be clearly attained by the issue of additional shares. The company could, from their present income, apply $200,000 annually to the payment of their debts; and the entire amount might thus be discharged in a period of about thirteen years. The payments, however, are very unequally distributed, and the heavy payment of $2,000,000 in the single year of 1866, obviously forbids the reliance on the surplus revenue alone; and plainly demands the adoption of some additional and timely measure to insure punctuality in the payment. The committee, guided by these various considerations, have con-

cluded upon a plan which they recommend to the adoption of the Board, as combining the following advantages:

1. That it makes reparation to the stockholders for the income withheld from them and contributed to capital.

2. That it provides a fund of $1,989,800, upon which the company may rely in case of need for the payment of their debts.

3. That this fund will be raised in a manner to confer a benefit, instead of imposing a burden upon the stockholders.

The capital stock of the company consists of 38,796 shares, and the proposal is to issue 38,796 new shares, so as to raise the capital to $7,759,200, or 77,592 shares of $100 each. That the new shares be distributed rateably among the present stockholders. That the scrip be issued with a credit on each share for *Fifty Dollars*, in consideration of the reserved income, and be liable, therefore, to a call of but Fifty dollars on each share.

The effect of this arrangement will be that the stockholders will receive new stock for their past contributions out of income, for the aggregate sum of $1,939,800. An amount which, although less than the sum actually contributed, as we have shown, still makes an appropriation sufficiently near to constitute a measure of substantial justice. Upon the fifty dollars credited on the new stock thus created, it is proposed that dividends shall be paid, the same as on the old shares. The capital will thus be immediately raised to $5,819,400, to wit:

Full shares of old stock	$3,879,600
Half shares of new stock	1,939,800
	$5,819,400

On this sum a dividend of *seven per cent.* would amount to $407,358, or $77,592 more than the dividend of the past year, which was eight and a half per cent. on $3,879,600, or $329,766; and the individual shareholder would receive ten dollars and fifty cents on the old and new share combined, instead of eight dollars and fifty cents on the old share alone.

The resources for the payment of the funded debt of $2,679,675 will then be as follows: Assuming the future net income (which last year was $795,994) at the average sum of $740,000, and deducting $150,000 for the annual interest on the debt during its existence; $93,000 for contingencies, and $407,000 for dividends as proposed, there will still remain $100,000 applicable to the reduction of debt.

This sum annually for eight years would amount to $800,000, which, united to $1,939,800, to be called in upon the new stock, would suffice to discharge the entire debt of $2,720,000. When this debt shall have been paid, the interest will, of course, cease, and also the annual demand of $100,000 for the liquidation of the principal. Supposing the net income to be, then, still $750,000, (if no more,) the capital, $7,759,200, and the dividend seven per cent., or $543,144, there will then be an annual surplus of $200,000 applicable to extraordinary demands upon the company.

It is not, of course, intended that we should wait for the full payment of all the remaining instalments on the new shares before declaring dividends on the new payments; but, on the contrary, that the several instalments shall draw dividends as they may be called in and paid.

While the committee deem it prudent that the company should make this reliable and secure provision for the payment of their debts, and for the protection of the endorsement of the State, which is attached to the $2,000,000 of bonds payable in 1866, they are not unwilling to admit the possibility of meeting the debt without the proposed call on the stockholders. If the income of the road should be augmented to the extent of $100,000 per annum, and the surplus applicable to the debt be thus raised to $200,000 per annum, it would require but thirteen years, as already shown, to extinguish the entire debt from the surplus income alone. And should the future business of the company encourage such an expectation, it will doubtless be in the power of the Directors, from time to time, so to re-arrange and distribute the debts as to extend the payments through the necessary period of thirteen years. As no objections could exist in any quarter to the adoption of this course, if it were found practicable, it is recommended by the committee that the instalments on the new stock be distributed for payment over a period of *ten years, at the rate of five dollars per share per annum;* and that the Directors reserve to themselves the power to remit the calls, and pay the debt from surplus income, if the same should be found practicable.

In furtherance of these measures, the committee finally recommend that the stockholders should be requested, at the next Annual Convention, to confer the necessary power upon the Directors to carry them into effect, by passing the following resolutions:

Resolved, That the Directors be and they are hereby authorized to issue 38,790 new shares of $100 each, and distribute the same rateably among the present shareholders, in proportion to the number of shares severally held by each, on the day 1860. That they be required to give credit on the new scrip thus to be issued for ($50) fifty dollars on each share, to represent in part the sums hitherto reserved out of the annual income, and contributed to the capital of the company. That the fifty dollars thus credited, be entitled to draw dividends at the same rate per centum as the old shares; and that the remaining fifty dollars per share be liable to be called in at the discretion of the Directors, and be subject to the same condition of forfeiture for non-payment of instalments as in the original subscription: *Provided*, That no more than five dollars per share shall be called in any one year, and not less than sixty days notice shall be given of such instalments as may, from time to time, be called; and *Provided*, That no forfeiture of shares shall be enforced against any stockholder who shall, within sixty days from the date fixed for the payment of the instalment upon which he shall have made default, pay up the same with interest thereon.

Resolved, That in addition to the foregoing provision for the payment of the debts of the company, that at least One Hundred Thousand Dollars of the surplus revenue be annually applied in liquidation of the same; and that nothing contained in these resolutions shall be construed to prevent or prohibit the Directors from re-arranging the funded debt of the company, and so distributing the payments as to pay the entire sum thereof out of the surplus income of the company, if the same shall be found practicable.

OFFICERS FOR 1860.—John Caldwell, *President*, Columbia, S. C., and H. T. Peake, *Superintendent*, Carleston, S. C.

Early American Locomotives.

The following is the statement relating to the early American locomotives, made by Wm. H. Brown, Esq., Agent of the Pennsylvania Railroad at Saxton:

"The first American locomotive was built at the West Point Works. It was called the Phœnix, or 'Best Friend of Charleston.' I had charge of the hands fitting up this engine. It was contracted for by Mr. E. L. Miller, of Charleston, S. C., and placed on the road by him in 1830. This engine had four wheels, all of them drivers; two inclined cylinders at an angle, working down on a double crank inside of the frame, with the wheels outside of the frame, each wheel connected together outside with outside rods. The wheels were iron hub, wood spokes and felloes, with iron tiers and iron web and pins in the wheels to connect the outside rods to. The boiler was a vertical one, in form of an old fashioned porter-bottle, the furnace at the bottom surrounded with water, and all filled inside with what we termed teats, running out from the sides and top, with alternately pipe-stays to support the crown of the furnace—the smoke and gas passing out through the sides at several points into an outer side jacket which had the chimney on it. This boiler sat in the centre of the four wheels, with the connecting rods running by it to come into the crank shaft. The cylinders were about six inches in the bore and sixteen inch stroke, wheels four and a half feet diameter. The whole engine weighed about four and a half tons. This engine was shipped to Charleston, S. C., for the Charleston and Hamburg Railroad, and put upon the road in December of that year, 1830."

Ohio and Mississippi Railroad.

This company have now upon their road 76 first class passenger and freight locomotives; 600 house and 300 platform and coal cars; 55 gravel cars; 53 saloon cars, and 20 baggage and express cars.

1857 ..	352,343,033	168,216,149	529,559,482
1858 ..	368,346,291	162,847,994	531,194,290
1859 ..	379,110,530	172,971,192	552,081,722

According to the First Annual Report of the State Assessors, just published, the aggregate valuation of real and personal property of the whole State, as assessed for taxes for several years, is as follows:—

1845	$606,646,095	1857	$1,433,309,713
1850	727,494,583	1859	1,416,296,887
1854	1,364,154,625		

The following is a statement of the amount of taxes uncollected Dec. 31, 1858, the amount of the General Tax Levy for 1859, and the portion of said taxes belonging to the city and county respectively:

	Amount belonging to the city.	Amount belonging to the county.
Taxes uncollected Dec. 31, 1858	$3,849,137 22	$25,000 00
General Tax Levy, for 1859	6,546,034 11	3,314,891 98
Total	$10,395,171 33	$3,339,891 98

The collection made during the year 1859 by the Receiver of Taxes, and interest thereon, and the respective proportions of such collections belonging to the city and county were as follows:—

	Amount belonging to the city.	Amount belonging to the county.
Taxes of the year 1858 and previous years	$416,539 49	$25,000 00
Taxes of the year 1859	5,554,012 91	2,812,535 42
Interest on taxes	48,071 50	2,335 03
Total	$6,018,623 90	$2,839,810 45

The return from the Bank of England for the week ending the 25th of January, gives the following results when compare with the previous week:

Public deposits	£5,529,728	Inc.	£363,469
Other deposits	14,079,747	Dec.	771,007
Rest	3,295,135	Inc.	10,651

On the other side of the account:

Governm't securities	£10,411,403	Dec.	£402,419
Other securities	19,199,757	Dec.	93,007
Notes unemployed	4,715,740	Inc.	125,875

The amount of notes in circulation is £21,626,880, being a decrease of £426,260, and the stock of bullion in both departments is £15,559,096 showing a decrease of £325,402 when compared with the preceding return.

The United States Treasurer's Monthly Statement shows the amount at his credit in the Treasury, with Assistant Treasurers and designated depositaries, and in the Mint and branches, by returns received to Monday, January 23, 1860; the amount for which drafts have been issued but were then unpaid, and the amount then remaining subject to draft.

In what place.	Am't on deposits.	Drafts payable.	Subject to draft.

Selma and Gulf Railroad.

This company are advertising for proposals for the construction of about 40 miles of their road, commencing at Selma, Ala., and extending southwest to the north line of Monroe Co. In a few weeks, an additional portion of the line, embracing about five sections of heavy work, will be ready for letting.

This road will connect the roads centering at Selma with the Alabama and Florida, and the Mobile and Great Northern roads, leading to Pensacola and Mobile.

The means of the company now consist of reliable subscriptions amounting to nearly $600,000—over $500,000 of which is payable in cash. It is confidently expected that something more will be added in work; and a further cash subscription of $200,000 and upwards be made.

Mobile and Great Northern Railroad.

We learn from the Mobile *Tribune* that the construction of this road has been commenced. Almost all the graduation east of the Tensas river to the Alabama and Florida Railroad has been let to responsible contractors, to be completed within twelve months. It is the intention of those who have the enterprise in charge, to have a connection made with the Alabama and Florida Railroad within eighteen months, and to have the road in operation to the city of Mobile within two years, if no unnecessary obstacles are thrown in their way.

Pittsburg and Steubenville Railroad.

The recently appointed Receiver of the Steubenbenville and Indiana Railroad has lately laid before the Harrison County Court, a report of the earnings and expenses of the Pittsburg, Columbus and Cincinnati line of railroads, for the months of September, October, and November last, in obedience to the terms of the decree of said court, appointing him Receiver. The earnings of the road were: For September, $31,380; for October, $27,077; and for November, $26,167—total, $84,624. The expenses were: September, $28,633; October, $28,543; November, $27,032—total, $84,208. Among the expenditures, were $14,573.50 for arching tunnels; $6,064.11 for renewing bridges; $3,151.50 for new cross-ties, and about $7,500 for completion of telegraph line from Steubenville to Columbus.

Cleveland and Mahoning Railroad.

The office of this company is at Cleveland, Ohio. The following is a list of Directors and Officers:

David Tool, Frederick Kinsman, Charles Smith, H. B. Perhins, Joseph Perhins, Dudley Baldwin, Reuben Hitchcock, R. W. Cunningham, James Magee.

President—David Tool.

Vice President and *Superintendent*—Chas. L. Rhodes.

Secretary and *Treasurer*—O. M. Burke.

Master Mechanic—John Young.

Our Public Works and Our Wealth.

Previous to the construction of the Erie Canal, a Committee of the Legislature, to which was referred the urgency of this work, reported the cost of transporting a ton of merchandise between Buffalo and Albany to be one hundred dollars, and the time required therefor twenty days. Such rates, of course, were an effectual bar that turned all the products, not only of the interior, but of a large portion of our own State, from us to other markets. So late as 1820 the wheat of Western New York was sent down the Delaware and Susquehanna rivers to the cities of Philadelphia and Baltimore! The turning of this tide to New York was simply the result of improved highways. Of these works, the Erie Canal brought to us, in 1858, according to the late report of the Auditor of the Canal Department, 1,273,000 tons of merchandise from the Western States alone. At the rates which prevailed before the opening of the Canal, the cost of sending this tonnage from Buffalo to New York would have been $127,300,000!—a sum exceeding twice its value delivered in this city.

The cost of transporting this tonnage over the Canals last year, including tolls and charges of all kinds, was $3,996,220—showing a saving by using the canal instead of the old earth road, of more than $120,000,000! Of course, a cost of $100 per ton would have operated as a complete bar to the movement of all this Western produce towards us, but the illustration is not therefore the less valuable to prove that our commerce is really a creation of our own, to be increased or lost as we continue to pursue the policy which has hitherto distinguished us, or reverse it by replacing upon our public the burdens we have once removed.

By none has the value of commercial freedom been better understood than by the managers of the Canal. One object has been kept steadily in view by them—to enlarge to the utmost extent the volume of its business by reducing the cost of movement over it—even at the very time when it had a monopoly of its route. The amount of revenue to be derived from it was always a subordinate consideration. Such had become the traditional policy of the State before competition from railroads was dreamed of. To demonstrate this statement beyond cavil, we copy from the late report of the Auditor of the Canal Department the rate of tolls, and the total cost of movement of a ton of merchandise on the Canal between Buffalo and Albany for a period of twenty-nine years

Year.	Up Freight, per ton, from Albany to Buffalo. Average per year.	Tolls deducted.	Leaving freight.	Down Freight, per ton, from Buffalo to Albany. Average per year.	Tolls deducted.	Leaving freight.
1830....	$20.00	$10.22	$9.78	$9.07	$5.11	$3.96

1858....	2.80	1.46	1.34	3.14	1.46	1.68
29 y'rs.	$336.60	165.64	170.96	181.90	89.73	92.17
Av'ge..	11.61	5.71	5.90	6.27	3.09	3.18

During this period the cost of transporting a ton of merchandise from Buffalo to Albany was reduced from $9.07 to $3.14 per ton; and from Albany to Buffalo from $20 to $2.80 per ton! From 1830 to 1853, when the Canal tolls were removed from our railroads, the reduction in one direction was from $9.07 to $5.18; and in the other, from $20 to $5.60 per ton. The canal, therefore, without competition, had reduced the cost of movement nearly one-half in one direction, and in the other nearly one-fourth.

To show the relation between cause and effect, in this instance, we copy the following statement from the report of the Auditor, setting forth the number of tons—the produce of the *Western* States—delivered annually at tide water, by the Erie Canal, for a period of twenty-three years:

Year.	From Western States. Tons.	From this State. Tons.	Total tons.
1836	54,219	364,906	419,125
1837	56,255	331,251	387,506
1838	83,233	336,016	419.249
1839	121,671	264,596	386,267
1840	158,148	309,167	467,315
1841	224,176	308,344	532,520
1842	221,477	258,672	480,149
1843	256,376	378,969	635,345
1844	308,025	491,791	799,816
1845	304,551	655,039	959,590
1846	506,880	600,662	1,107,270
1847	812,840	618,412	1,431,252
1848	650,154	534,183	1,184,337
1849	768,659	498,068	1,266,724
1850	773,858	598,001	1,371,859
1851	966 993	541,084	1,508,677
1852	1,161,978	492,721	1,644,699
1853	1,213,690	637,748	1,851,438
1854	1,100,526	602,167	1,702,693
1855	1,092,876	327,839	1,420,715
1856	1,212,550	374,580	1,587,130
1857	919,998	197,201	1,117,199
1858	1,278,099	223,588	1,496,687
Totals	14,223,184	9,945,605	24,177,799

Suppose the State to have received (and this is a liberal estimate) $1 50 per ton, in tolls, on this tonnage, or $21,348,273, paid into the public treasury, the value of this tonnage, estimating it at only $60 per ton, equaled $853,930,920! From which of the two have we received the greater benefit? Can there be a doubt on this question? For a State like New York, $21,000,000 is not a large sum. But $852,000,000 tells the secret of her commercial greatness; of the vastness of her commerce, her wealth and her population; of her marvelous progress—a progress now so well and clearly marked that one generation more of practical wisdom may see her the great City of the world. And all this is due entirely to our facile communications with every portion of our country. Shall we strike a fatal blow at a policy which has done so much for us, and which, if we only leave it undisturbed, will, in a very years, realize the splendid future so often and so loudly predicted for us?

But this is not half the story. Since 1853, our railroads, by the greater value of their freights, have accomplished more for us than the canal. In that year we began to receive the full benefit of our two great lines—the Erie and Central. The former was opened in the summer of 1851; the latter was relieved of the canal tolls in 1853. To show what these works have done for us, we subjoin a statement of the number of tons transported annually by each for seven years past:

	Tons car'd on the Erie R. R.	Tons car'd on the Central R.
1853	631,039	360,000
1854	743,250	549,804
1855	842,048	670,078
1856	943,215	776,112
1857	978,791	838,791
1858	816 954	765,407
1859	806,000	834,319
Total tons	5,755,297	4,794,506

The value of this tonnage, estimated at $150 per ton, a very low estimate, is equal to $1,582,470,300! For this vast sum, almost beyond computation, we are indebted to our two great roads, which (if we except the $3,000,000 given to the Erie) never cost the State a penny, but which have paid very large sums into its treasury in the shape of taxes; and now, forsooth, we are to tie these great works hand and foot, because the State happens to own a work which competes with them.

To show the relation between the commerce of public works and our foreign commerce, and how one is the necessary sequence of, and keeps pace with the other, we annex a statement of the imports and exports of the City of New York for a period of 11 years:

	Imports.	Exports.
1849	89,425,282	41,450,127
1850	113,752,618	44,646,620
1851	117,428,870	43,889,640
1852	121,183,978	71,523,579
1853	165,370,465	70,628,724
1854	191,631 557	106,060,448
1855	167,860,238	99,970,300
1856	243,556,689	120,886,296
1857	230,618,120	117,724,329
1858	152,867,067	85,639,543
1859	219,640,000	105,601,000

If we cut ourselves off from the West, upon what portion of the country shall we rely for the means to support our commerce and manufactures? The State of New York can supply them no longer. While the tonnage received from the Western States, through the canal alone, has increased in the short space of 23 years, 2,500 per cent.; and taking that brought to us by our railroads as well as canals, more than 5,000 per cent., that of our own State has fallen off in the meantime one-half! We have ceased to be producers of cereals for export. Our lumber is gone. It has been found more economical to manufacture wheat into flour in the districts where it is grown, and send it forward in barrels, than in the grain. We must, therefore, for the future, draw the materials for our commercial and manufacturing industry from the west, if we would hope to sustain them. The least burden placed upon our public works will tend to diminish the quantity sent us. If we tax the railroads, we necessarily increase the cost by the canal—for if the railroads are forced to increase their charges, the forwarders by the canal will soon do the same.

It appears to us that the relation sustained by the Commonwealth to the canal, as its owner, has led to the very absurd notion that the Empire State is to set up in business as a *public carrier*, and that having the power, she is to crush all rivals who underbid her. Suppose the State happened to own a farm. Is no one within her borders to sell produce lower than herself? If the State owns a ship, are all to conform to her tariff, freight and loading charges?

Nothing could be more preposterous than such a notion, except, indeed, such a policy. It would strike a fatal blow at all private enterprise, upon which, as we profess to have long since learned, the wealth and greatness of the State deposits. The State cannot compete with individuals, if it would. Why not, then, abandon at once the policy of taxing our public works, which, if adopted, must be abandoned, but not perhaps till after it has brought upon us infinite mischief and loss?—*New York Times, Feb.* 13.

Journal of Railroad Law.

DAMAGES FOR INJURIES CAUSED BY STOPPING TRAINS AT CROSSINGS. RULE OF NEGLIGENCE AS APPLIED TO CHILDREN.

The case of Kelly *vs.* the Pennsylvania Railroad Company decided in the Supreme Court of Pennsylvania is an authority upon rule of concurrent negligence as applied to children. The law, as we have heretofore remarked, is well settled, that where the plaintiff, in an action for damages, founded upon the negligence of the defendant, is, himself, guilty of negligence, the action cannot be sustained. But cases may occur where the party injured is a child not arrived at years of maturity and of discretion. The question then arises, shall the child be held to the same strict rule, as to what constitutes negligence, that is ordinarily applicable to a person of mature years. The case which we are discussing decides the question in the negative, and is interesting both from the facts of the case and the opinion of the learned judge deciding the case upon appeal.

The plaintiff, Patrick Kelly, on the 5th of September, 1854, was at work on the Broad Top Railroad, near Huntingdon, and his son James, a lad of nine years of age, was sent to him with his dinner. The father sent him in to Huntingdon for some tobacco; and returning by the turnpike, the boy found the crossing obstructed by a train of the defendant's cars; he attempted to creep under them, when the train started, and injured one of his feet so as to render the amputation of it necessary.

Upon these facts the father brought suit against the company for the loss, or damages, sustained by him, by reason of the injuries sustained by his son, alleging that such injuries were caused by reason of the negligence of the company.

Upon the trial the Court charged the jury among other things as follows:

"If the plaintiff's allegation, that the injury is chargeable wholly to negligence on the part of the defendant, is true, his action is maintainable The nursing, and surgical and medical attention required at the time, had to be provided by him. He has moreover a right to his son's services during his minority; and for the loss of his boy's

services, to the extent that he is disabled, as well as for nursing and professional attention at the time of the accident, he would clearly be entitled to a fair compensation in damages; and this though the son, who is the principal sufferer, might at any time bring his own action and recover damages for the principal injury. Upon the same grounds that one can maintain an action, the other may maintain an action also; and one action is no bar to the other. If the plaintiff be entitled to recover in this action, the boy would plainly be entitled to much more."

The plaintiffs claimed, that under the act, 20th March, 1845, the stopping of cars so as to block up the turnpike, was unlawful. While the defendant denied its applicability, the judge on this point said to the jury: "This act we cannot doubt applies to the Pennsylvania Railroad Company. In determining what is an unlawful blocking of a street or crossing we must give it a reasonable construction. In one sense, a crossing is obstructed, for the time, while every train is passing; but that is not an *unlawful* obstruction; for this and every company has a right to the ordinary use of its road. So a train may be stopped by accident, or some unavoidable cause, for a time upon a highway, without any violation of the law. But if a train is voluntarily stopped upon a crossing, when there is no present necessity for it, in the ordinary use of the road, and when it might have been as conveniently stopped elsewhere, it undoubtedly is an unlawful blocking or obstruction of the road, within the meaning of the act, and would subject the engineer or agent to the penalty; and while the train would so remain, it would remain an obstruction upon the highway. It would be there, not a 'spring-gun,' or any other hidden source of intentional mischief, but simply an obstruction, a visible obstruction on the highway and a nuisance, because unlawfully there, and as in the case of any other like obstruction, the company would be accountable to any persons having occasion to travel the road, for any loss, inconvenience, or injury which results directly and entirely from its being there. Any one detained in pursuit of his lawful business, to his injury, would have a right of action. If, however, through impatience of detention, he should undertake to pass under the cars, when about to move forward, and, not being observed, should be injured, he would have no pretence of claim, for that would be the result of his own reckless folly.

"Assuming the crossing to have been obstructed unlawfully, and the defendant to be regarded to that extent a wrong-doer, and responsible to that extent stated, upon the application of the general rule of law, nothing could be clearer than that, if the injury had thus happened to an adult instead of a child he would have no right of action. If Patrick Kelly instead of his boy, had thus undertaken to pass under a train of cars, under like circumstances, and with the same result, no one surely would contend that he would have any cause of complaint which could be entertained in a court of justice. We would not hesitate a moment, nor would any court, to pronounce at once against his case as matter of law."

"It is urged, however, that the negligence or want of ordinary care on the part of the party injured, which concurring with negligence of the other party, would destroy the right of action, is to be judged of in view of the age and capacity of the party injured; and that in this case, 'ordinary care means that degree of care which might reasonably be expected of a person of the age of the plaintiff's son, and in his situation,' and that whether he did or did not exercise such degree of care, is a question for the jury, under all the circumstances to determine.

Upon this question we have no direct decision by our own Supreme Court, and the decisions of the courts abroad are in conflict. Following, however, not what we think should be the rule, but what from limited investigation we have been able to give this important question seems to be the weight of authority, we submit it to you, gentlemen of the jury, to determine from all the circumstances, in case you find the cars were obstructing the crossing and that the boy was injured in an attempt to pass the obstruction, whether the injury might have been avoided by the exercise of that care and discretion which was reasonable to be looked for in a boy of his years. If your conclusion, in that case, upon the question thus submitted, be, that the injury could not have been avoided by ordinary care on the part of the boy, the plaintiff would be entitled to recover, and it would be your duty and province to assess his damages.

The defendants excepted to the charge; and a verdict and judgment having been given for the plaintiff for $3,000, the defendants appealed to the Supreme Court.

The opinion of the Supreme Court, so far as concern the points in the case that we are now considering, fully sustained the charge of the learned judge below. We give, however only that portion of it that relates to the negligence of the child. It is as follows:

WOODWARD, J.—There is no dispute about the principle that forbids a plaintiff to recover damages for an injury which his own negligence or wrong-doing contributed to bring on. But what did the plaintiff do amiss? He sent his son on a lawful errand along a lawful highway. Was it negligence to permit a boy nine years of age to be abroad on an errand? This is not pretended, but it is said the boy betrayed a want of discretion in going under the cars; and the learned counsel seem to maintain that a boy, nine years of age, is bound to the same rule of care and diligence in avoiding the consequences of the neglect or unlawful acts of others, which is required of persons of full age and capacity. The case relied on for this startling proposition is Hartfield *vs.* Roper. That case was thus:—A child of about two years of age was permitted to wander from his father's house and to be sitting or standing in the beaten track of a public highway, when the defendant, driving a span of horses and sleigh with two other persons in it ran over him and injured him. It appeared that the horses were descending a hill at the foot of which was a bridge, that they were going at a reasonable speed, and that there were no houses along that part of the road to excite the expectation that people would be found in the road. Under these circumstances the court held, that failing to see the child in time to avert the danger was not culpable negligence, and they reversed the judgment which gave him damages. The case might have been rested on the propriety of the defendant's conduct. He was pursuing his highway in a lawful and appropriate manner, and that distinguishes the case from ours, for here the wrong-doing of the defendants in obstructing the highway is established. But the case is cited for the sake of Judge Cowen's observations on infantile responsibility, and these I dismiss in the language which Ch. J. Redfield employed in concluding his opinion in Robinson *vs.* Coe.

"The case of Hartfield *vs.* Roper," said he, "is so far as it has any application to the present case altogether at variance with that of Lynch *vs.* Nurdin, and far less sound in its principles, and infinitely less satisfactory to the instinctive sense of reason and justice." Lord Denman's opinion in Lynch *vs.* Nurdin was subsequent to that of Mr. Justice Cowen, and much worthier, it seems to me, to be followed.

If the father is to be held responsible for the discretion of his son, it is only for such discretion as would usually and naturally be expected of a child of his age and intelligence. Was it a violation of that measure of prudence to go under cars standing where they were?

We cannot say it was, as a legal conclusion; and the jury did not find it as a conclusion of fact. Nay, indeed, it may be well doubted, whether most boys, grown familiar with trains of cars by daily observation, would not, in like circumstance, have acted as this boy acted. To many active and enterprising children, risks not absolutely appalling are attractive; especially if others are at hand to witness the daring achievement. Two boys in a neighboring town, went under cars in similar circumstances, and the adjudged cases in the books show that children do frequently incur equal, or even greater, hazards. We cannot, therefore, account this boy's conduct unnatural or extravagant."

Notwithstanding nearly all the exceptions to the charge were overruled, the case finally went back for a new trial on the ground of error in the charge upon the question of the measure or standard of damages. As this is an interesting and important point we reserve it for fuller consideration in our next issue.

Notice to Contractors.

ENGINEER'S OFFICE SELMA & GULF R. R. Co.,
Selma, Ala., January 30, 1860.

SEALED PROPOSALS FOR THE CLEARING, GRADUATION, MASONRY and BRIDGING of the First Division of the Selma and Gulf Railroad, will be received at this Office until the 6TH DAY OF MARCH next.

The portion of road now offered to contract extends from Selma southward to the north line of Monroe County, a distance of about 40 miles, embracing a variety of work, and passing through a healthy country, which is always accessible from several points on the Alabama River in from six to twenty-five miles. All the work in this Division is offered to contractors, except the large Bridge in Section 1, at Selma, and the graduation of a few light sections, let to planters on the line of the road.

Profiles, Plans and Specifications of the work may be seen at the Engineer's Office, after the 10th of February.

For further information, apply to the undersigned, at his office, or on the line of the road.

By order of the Board of Directors.
GAVIN B. YUILLE,
Chief Engineer S. & G. R. R.

HANNIBAL & ST. JOSEPH R. R. BONDS.

SEALED proposals will be received until Saturday, the 25th instant, at noon, for the sale to the Trustees of the Sinking Fund, of $22,500 worth of the Mortgage Convertible Bonds of the Hannibal and St. Joseph Railroad Company, dated July 1, 1858, and payable 25 years after date. Proposals may be addressed to H. H. HUNNEWELL, Boston, and indorsed "Proposals to Trustees."

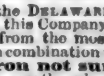
H. H. HUNNEWELL,
SIDNEY BARTLETT,
H. P. KIDDER,
} Trustees.

BOSTON, Feb. 2, 1860. 3t6

New FIRST CLASS FREIGHT ENGINE.

Cylinder 16x24. Wheels 5 feet. Fire-box 4 ft. 1½ in. long, and 5 ft. 6 in. deep. 138 flues 12 ft. by 2 inches. Boiler 48 inches. Tender 2,000 gallons. For sale low by

WILLIAMS & PAGE,
3m52 44 Water st., Boston.



LACKAWANNA
IRON AND COAL COMPANY,
SCRANTON, LUZERNE CO., PA.

BY the completion of the DELAWARE, LACKAWANNA AND WESTERN RAILROAD, this Company are enabled to obtain the MAGNETIC ORES from the most celebrated mines in New Jersey, which used in combination with their native ores, produce a **quality of iron not surpassed.**

These Works have been greatly enlarged the past year, and are, therefore, prepared to execute orders promptly for **RAILROAD IRON** of any pattern and weight, **Car Axles, Spikes,** and **Merchant Iron.** They have on hand patterns for **T Rails,** of the following weights per lineal yard, viz —**25, 30, 36, 40, 45, 50, 60, 62,** and **75** lbs.

Samples of RAILS and MERCHANT IRON may be seen at the office of the Company, **46 Exchange Place,** N. YORK.

Address **J. H. SCRANTON,** President.
Scranton, Pa.
or **DAVID S. DODGE,** Treasurer,
46 Exchange Place,
NEW YORK.

RAILROAD IRON.
90 TONS English of the  pattern for sale by

GRUND & WESTERVELT,
January, 1860. **118 Pearl st.**

RAILROAD IRON.

THE subscriber is prepared to enter into **CONTRACTS FOR RAILS** delivered at an English port or at a port in the United States.

JAMES TINKER,
54 Exchange Place,
NEW YORK.

Erie Rails, 57 to 58 lbs. per yard, on hand in NEW YORK and NEW ORLEANS.

RAILROAD IRON
AND COMMON BARS.

510 BROADWAY, N. Y.
(Opposite the St. Nicholas Hotel).
JOHNS & CROSLEY.

DELAFIELD & BAXTER'S,

Late OGDEN & DELAFIELD,

ROSENDALE CEMENT.

WE are prepared to enter into arrangements for supplying our CEMENT for public works, or other purposes. We **warrant it equal in every respect** to any manufactured in this country. It attains a great degree of hardness, sets immediately under water, and is a **superior article** for masonry coming in contact with water, or requiring great strength.

For sale in tight barrels, well paperred, on application at their office, by **DELAFIELD & BAXTER,** 104 Wall st.

The above CEMENT is used in most of the fortifications building by government. 45

Rosendale Hydraulic Cement.

THE NEWARK AND ROSENDALE CEMENT COMPANY are now receiving **fresh from the Mills** their approved ROSENDALE CEMENT, warranted **pure** and **free from quick lime,** and which has given such **general satisfaction** in the various government and other public works in which it has been used. Purchasers and shippers should be careful to get the **genuine ROSENDALE CEMENT,** branded "NEWARK AND ROSENDALE," "H. WILDE." This Cement does not swell and burst the hoops when stored in warm climates. It is packed in tight **kiln dried barrels,** and is specially adapted for safe shipping on long voyages. Terms reasonable, which may be known by addressing,

JOHN H. STEPHENS, President, Newark, N. J., or
HENRY WILDE, Secretary, 90 Wall st., N. Y.

THE LAWRENCEVILLE MANUF'G

CEMENT COMPANY,

OFFICE 96 WALL ST,

NEW YORK.

THIS Company manufacture **ROSENDALE HYDRAULIC CEMENT** of a superior and uniform quality, and are constantly receiving it **fresh** from their Works at Rosendale. Particular attention paid to grinding **fine,** and packing in superior casks. We warrant it to set under water, and attain a hardness excelled by no Cement manufactured. It has met the approval of Government, and we are at present supplying the fortification now in course of erection, together with Water Works and Public Buildings.

For sale upon favorable terms by addressing.

WM. N. BEACH, President.
CHAS. E. LAWRENCE, Sec'y.

HOFFMAN'S
ROSENDALE CEMENT,

OFFICE, 92 WALL ST., NEW YORK.

THE LAWRENCE CEMENT COMPANY are prepared to receive and execute orders for their Cement, to any extent that may be required. They would particularly call the attention of purchasers to the distinguishing brand of their manufacture, viz.: **HOFFMAN'S ROSENDALE CEMENT.** This seems to be necessary, as they have established a reputation for the superior quality of their Cement, and there are various other brands offered, as "Rosendale" Cement. It has the unqualified approbation of the most eminent Architects and Engineers, being used in almost every department of the Works under Government. It is put up in the most careful manner, each barrel being well lined with paper, and will be delivered on ship board, in this city, on the most favorable terms. Particular attention given to shipping orders, and Freight obtained on the best terms.

M. W. WOODWARD, Secretary.

IMPROVED
SPARK ARRESTER.

RADLEY & HUNTER'S CELEBRATED NEW INVENTION is now offered to the public as a **Perfect Spark Arrester**, which possesses the advantage over ALL OTHERS of being of the **most simple construction**, and much more **durable** than any ever used. The manufacturer invites an examination of this Arrester by the Railroad public, confident that it will meet with **universal approbation.**

The undersigned hereby gives public notice that he is the **sole manufacturer** of the above article under the Radley & Hunter Patent, of whom alone they can be purchased in the United States.

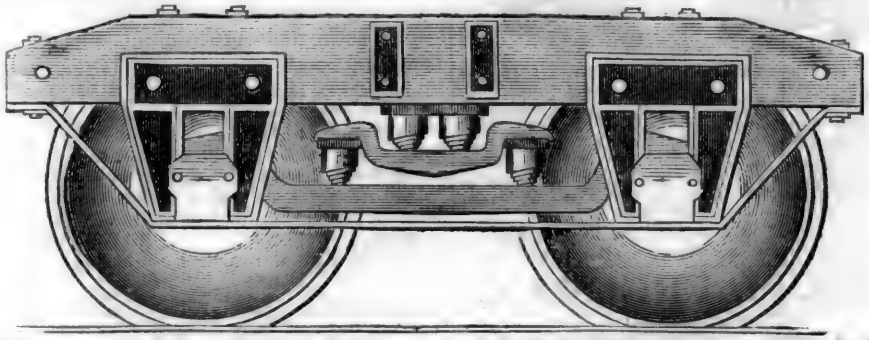
EDWIN R. BENNET,
Office 82 Duane St., New York.

VULCANIZED RUBBER GOODS,
MACHINE BELTING,
STEAM & PISTON PACKING,
HOSE OF ALL DESCRIPTIONS,
SHOE SOLEING,
LACE LEATHER,
VALVES,
FIRE BUCKETS, ETC.

THE undersigned, **Wholesale Agents** of the **BOSTON BELTING COMPANY**, beg to call the attention of DEALERS and JOBBERS to the above mentioned goods, which are conceded by all practical mechanics to be

THE BEST PRODUCED.

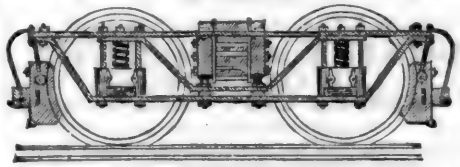
For list of prices, and a full description of goods, terms, etc., apply to



BRAMHILL & CAMPBELL,
190 William st., near Spruce, NEW YORK.

THE GUTTA PERCHA
MANUFACTURING COMPANY,
165 BROADWAY, NEW YORK,
(Factory 25th street 10th Avenue,)
MANUFACTURERS
OF EVERY DESCRIPTION OF
Gutta Percha Goods,
Army, Navy, Engineers and Emigrant Equipments,
CLOTHING,
HOSE, PACKING, BELTING,
LOCOMOTIVE BUCKETS,
ENAMELED CLOTHS, ETC.

These goods are free from offensive smell, are pliable and elastic, of fine finish, and unlike India Rubber, will not become decomposed or injured by oils or acids, or affected by the hottest climates.



GEO. N. DAVIS, Treasurer.

THE METALLIC CAR SPRING COMPANY
OF NEW YORK,
Manufacturers of PATENT CONICAL VOLUTE STEEL CAR SPRINGS.
OFFICE, 54 WILLIAM STREET, NEW YORK,

WITH increased capital and facilities, and ability to meet all orders promptly, this Company respectfully invite the attention of Railroad Managers, Car and Engine Builders, and others interested in Railroad Machinery and Economy, to these Springs, and the improvements in their application. Orders and correspondence solicited.

CHARLES D. GIBSON, Treasurer. COURTLANDT PALMER, Pres't.
Jan. 14, 1860. RICHARD VOSE, Secretary.

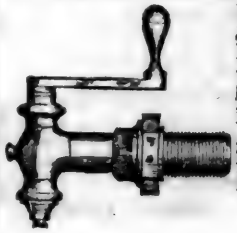
THE HUMPHREYSVILLE
MANUFACTURING COMPANY,
(SUCCESSORS TO DWIGHTS, FRENCH & CO.,)
SEYMOUR, CONN.,

ARE prepared to fill, at short notice, of the best materials and workmanship, orders for **Wrought and Cast Iron Work**, fitted ready for use, for the building or repairs of **Passenger and Freight Cars**, complete or in part.

A sample wrought iron truck can be seen at our office.
No. 5 Gold st., NEW YORK.

We also manufacture—
BEST FAGGOTTED CAR AXLES,
SALISBURY IRON CAR WHEELS,
WROUGHT IRON BOLTS, NUTS AND WASHERS,
RAILROAD JACK SCREWS, ETC.

RAYMOND FRENCH, President, Seymour, Conn.
WM. H. MARSHALL, Treasurer, No. 5 Gold st., N.Y.



STEEL
CAR SPRINGS,

MANUFACTURED
BY THE
PATENTEE,
CARLOS FRENCH,
SEYMOUR, CONN.

THESE SPRINGS are now in use on many of the leading Railroads East, South and West.
Samples can be examined and Price Lists obtained at
No. 5 Gold st., NEW YORK.

McNAB, CARR & HARLIN,

MANUFACTURERS of Steam Engine Builders' and Plumbers' BRASS WORK, such as Globe Valves, Safety Valves, Pump Valves, Whistles, Oil Cups, Steam and Water Gauges, Bibbs, Stops, Basin Cocks, Hose Pipes and Couplings, etc.

All parties interested will please send for Catalogue and Price List. Address

New York, Saturday, February 25, 1860.

Railroads of Tennessee.

We gave week before last an abstract of the statement of the railroads of this State, made by the Railroad Commissioner to the Legislature. We this week present the substance of the information communicated in a tabulated form. The results shown are most satisfactory, and creditable to the State. In no instance we believe has the State been called upon to pay a dollar either by way of principal or interest, nor is it probable that it will be. The railroad system of the State which has grown up to such a magnitude as to carry its accommodations to nearly every part, is the result of the General Internal Improvement Law passed in 1852, amended in 1854, of which the following are the leading provisions.

Sec. I. Provides that whenever a railroad company shall have procured *bona fide* subscriptions to the share capital to an amount sufficient to grade, bridge and prepare for iron the whole of the main road proposed, and when it shall have been shown to the Governor of the State (that said subscriptions are solvent, and the company shall have graded, etc. and shall have the necessary timbers on hand, and fully prepared thirty miles for the superstructure, and there shall be no lien on the same) by the written affidavits of the president or chief engineer of the company, together with that of a competent engineer by the Governor appointed at the cost of the company, *coupon bonds* of the State of Tennessee to an amount not exceeding $10,000 per mile on said section shall be issued, payable at such place in the United States as the president of the company shall designate, bearing 6 per cent. interest payable semi-annually and not having more than 40, nor less than 30 years to mature.

Sec. II. Provides that the bonds shall be used for no other purpose than the purchase of iron and equipment for the said section of road, and the president must make affidavit, and a majority of the directors pass a resolution to such effect, and the Governor shall have power to appoint a sworn commissioner, in conjunction with the president in negotiating the bonds for the purpose aforesaid and to act otherwise where the interests of the State may require it.

Sec. III. Provides that the bonds shall be a first lien on the section or sections of road and equipment for which they may have been issued, and the State upon the issuance of the bonds shall be invested with said lien without a deed from the company for the payment of both capital and interest as they may become due.

Sec. IV. Provides for the issuance of like bonds for successive sections, and that if the last section of the road shall be less than 20 miles, or if the whole road be less than 30 miles, bonds of the State shall be issued *pro rata;* and when the whole road shall be completed, the State shall be invested with a lien, without a deed, from the company *upon the entire road, including the stock, right of way, grading, bridges, masonry, iron and the whole superstructure and equipments, and all the property owned by the company necessary for its business,* for the payment of said bonds; and after the bonds are issued for the first section, it shall not be lawful to create any lien which shall have priority over or come in conflict with the State's lien.

Sec. V. Provides that the company shall deposit in the Bank of Tennessee, at Nashville, at least 15 days before the interest becomes due, an amount sufficient to pay the same, or satisfactory evidence that the same has been paid or provided for, and on failure so to do, the Comptroller shall report the fact, and the Governor appoint a suitable person to take possession of and control the property and assets of the defaulting company, and pay over the earnings, etc., under the direction of the Governor, towards the liquidation of the unpaid interest, and hold the same until all is paid off, and then surrender the property to the company. In the meantime the controller is to pay the interest, etc., and from time to time report to the General Assembly.

Sec. VI. Provides that if the company fail or refuse to pay the bonds when due, the governor shall notify the Attorney-General of the district in which the principal office of the company is situated of the fact, and thereupon the Attorney-General shall forthwith file a bill against the company, in the name of the State, in the Chancery or Circuit Court of the County, setting forth the facts, and the court shall make all such orders and decrees as may be deemed necessary to protect the State against any loss by ordering the property of the defaulting company to be placed in the hands of a Receiver, ordering the sale of the road, etc., or otherwise, as may be deemed best for the interests of the State.

Sec. VII. Provides that at the end of five years from the completion of a road, the company shall set apart one per cent. upon the amount of bonds issued to the company, and shall use the same in the purchase of the bonds of the State, which bonds the company shall pay into the State Treasury after assigning them to the Governor, and the bonds so paid shall be a credit on the bonds issued to the company; and shall be held by the State as a sinking fund. Should any company fail to comply with this section it shall be proceeded against as provided in the 5th section of this Act.

Sec. VIII. Provides that the President of each company shall report semi-annually under oath to the Governor, setting forth the financial condition of the company; and said reports shall be consolidated every two years and laid before the Governor by the 1st September, and the Legislature at its next meeting.

Sec. IX. Provides that it shall not be lawful for any officer of a company to engage in any speculation, or dealing in any real estate, on or along the line, or at either terminus of the road until after the road is completed; and every officer of a company, before entering upon duty as such, shall take an oath in writing that he will not knowingly violate the provisions of this act, and that he will faithfully perform the duties of his office, etc., under the penalty declared against perjury.

Sec. XII. Provides that the State may reserve the right to enact by the Legislature thereof all such laws as may be deemed necessary to protect its interest and secure it against loss in consequence of the issuance of bonds, but to exercise this right in such manner as not to impair the vested rights of stockholders.

Sec. XVII. Provides that in all cases where bonds may be issued to a company the State shall be entitled to two directors therein to be appointed by the Governor.

Sec. XX. Provides that no road shall be entitled to State aid unless it shall, within four years, complete at least one section of 30 miles, or the whole length of the road if less than 30 miles long.

Pacific Railroad.

Below we give a copy of a bill recently introduced into the Senate of the United States by Mr. Wigfall, of Texas, for the construction of two railroads to the Pacific, and to establish a communication by railroad and telegraph between the Atlantic States and California, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States in Congress assembled, That, to aid in the construction of a railroad and telegraph line from the Mississippi river to the western boundary of Texas, and from thence to the Pacific ocean, there is hereby granted, on the terms and conditions hereinafter mentioned, to the Southern Pacific Railroad Company, chartered by the State of Texas, of which J. Edgar Thomson, of Pennsylvania, Vernon K. Stevenson, Samuel Tate and Jeptha Fowlkes, of Tennessee, James Guthrie, of Kentucky, William H. Clement, of Ohio, John P. King, of Georgia, Charles T. Pollard, of Alabama, William C. Smedes, of Mississippi, John R. McDaniel, of Virginia, J. T. Soutter and S. L. M. Barlow, of New York, R. W. Loughery, Jason C. Wilson, W. T. Scott, J. Robinson and others, of Texas, are directors, their associates, successors and assigns, every alternate section of land, to the amount of three alternate sections per mile on either side of said railroad and telegraph line, from the Mississippi river, south of the parallel of north latitude, to the eastern boundary of the State of Texas, and every alternate section of land, to the amount of twenty-five alternate sections per mile on each side of said railroad and telegraph line, from the western boundary of Texas, on the most eligible route to the eastern boundary of California, in the direction to San Francisco; and from thence, to the amount of six alternate sections per mile on each side of said railroad and telegraph line, on the most eligible route to the Pacific ocean, at or near San Francisco. And this road shall pass over the Rocky mountains south of the thirty-fourth parallel of north latitude.

Sec. 2. *And be it further enacted*, That, to aid in the construction of a railroad and telegraph line from the Missouri river, commencing north of the thirty-eight parallel of north latitude, and thence on the most eligible route to the Pacific ocean, crossing the Rocky mountains north of the thirty-fourth parallel of north latitude, a grant of lands is hereby made upon the terms aforesaid to William H. Swift, of Massachusetts, Erastus Corning, of New York, George W. Cass, of Pennsylvania, S. S. L'Hommedieu, of Ohio, Thomas A. Morris, of Indiana, Benjamin H. Latrobe, of Maryland, William B. Ogden, of Illinois, Charles Mason, of Iowa, J. W. Brooks, of Michigan, John O'Fallon, John How, Robert Campbell, and A. S. Mitchell, of Missouri, and their associates, successors and assigns, every alternate section of land, to the amount of six sections per mile on each side of said railroad and telegraph line, for the distance of five hundred miles from the western boundary of the State of Iowa or Missouri on the most eligible route towards the pass selected therefor over the Rocky Mountains; and from the end of said five hundred miles, to the amount of twenty-five alternate sections per mile on each side thereof, on the most direct eligible route to the eastern boundary of the State of California, in the direction of San Francisco; and from said eastern boundary, to the amount of six alternate sections per mile on each side of said railroad and telegraph line, on the most direct eligible route to the Pacific ocean, at or near San Francisco, with a branch and telegraph from the nearest practicable point on said main railroad to the navigable waters of the Columbia river, at or near its mouth or to Puget's sound; to aid in constructing which, a like grant of lands to said company to the amount of ten alternate sections per mile on each side of said branch railroad and telegraph line is hereby made.

Sec. 3. *And be it further enacted*, That said railroad companies herein provided for are authorized to adopt, as part of their respective lines of road, any line of railroad now *being* constructed, or that *may* be constructed, *east* of the points from which said companies receive herein an appropriation of lands, and west of the Mississippi river, and to form a union or junction therewith, and to construct, use, and operate the same when constructed, under such articles of organization, not inconsistent with the Constitution and laws of the United States, as the parties thereto may mutually adopt; and said Southern Pacific Railroad Company may make such arrangements and junction with any road or roads in the State of Texas.

Sec. 4. *And be it further enacted*, That so far as lands are granted by this act to aid in the construction of said railroads within the State of California, the same shall be of no effect unless the said State of California shall, by some legislative enactment duly passed, declare her assent to the construction of such railroad within said State according to the provisions of this act; and this provision shall apply to every State in which any part of the railroads mentioned in this act are situated. And in all cases where the United States have disposed of any of the alternate sections granted by this act, or for any other reason cannot convey title thereto, or where the same shall be condemned by the United States surveyor as worthless, (and his decision shall be approved by the Secretary of the Interior,) or where the same shall be mineral lands in California, (which are hereinafter excepted from the operations of this act,) the deficiency shall be made up by other sections from the nearest unappropriated public lands belonging to the United States to which none of the aforesaid objections apply. And the alternate sections granted by this act shall in all cases, when surveyed, be those designated by odd numbers: *Provided*, That so soon as this act is passed and accepted by the companies undertaking to build the roads, it shall be the duty of the President of the United States to cause the public lands for forty miles on each side of so much of said roads as the companies shall indicate to be withheld from settlement and occupation until the lands shall have been surveyed, and the alternate sections selected, as provided for in this act: *And provided*, That the Southern Pacific Railroad shall, under no circumstances, receive more than six sections of land per mile for that portion of their road lying between the Mississippi river and the eastern boundary of Texas.

Sec. 5. *And be it further enacted*, That each of the grants aforesaid to the companies aforesaid, respectively, is made on the terms and conditions specified in this act, and on condition that said several companies shall severally construct a railroad and telegraph line as required by this act upon the routes respectively designated, as near as may be practicable, in a good, substantial and workmanlike manner. Such railroads to be made with all necessary drains, culverts, viaducts, crossings, sidings, bridges, turnouts, watering places, and all other equipments, furniture, and appurtenances of a first-class railroad, with rails of a good quality and size, the rails to weigh not less than sixty-four pounds to the yard, and to be of American iron, if they can be had at no greater cost than other rails, with due reference to quality, and with a uniform gauge upon each of said roads. Said telegraph line on each of said roads to be constructed in the most approved and workmanlike manner.

Sec. 6. *And be it further enacted*, That the government of the United States shall at all times have the preference in the use of said railroads and telegraph lines for postal, military, and all other purposes, paying for postal service such sums as the Postmaster General may authorize and prescribe; and for such other service as may be rendered, such sums as the Secretary of the department in behalf of which said service may be rendered shall prescribe and authorize: *Provided*, That said compensation for postal service shall not more than paid for similar services to first-class railroads in the United States: *And provided further*, That the roads provided for in this act shall carry over each section as it is finished, and over the whole roads for twenty years after their completion, under the direction of the proper departments, all military and naval supplies, troops, seamen, government agents and freight of all kinds for government purposes, with the limitation that the price to be paid shall not exceed, in any event, in peace or in war, the sum which in time of peace has been paid for transportation by first-class railroads elsewhere in the United States.

Sec. 7. *And be it further enacted*, That whenever either or any of said companies shall have constructed fifty miles of either of said main railroad and telegraph lines, and shall have supplied the same with all the necessary rolling stock, buildings and depots, for the use thereof of suitable quality for said roads, and shall report the same to the President of the United States, it shall be the duty of the President to appoint immediately a commissioner who shall examine the same and make report to him in relation thereto; and if it shall appear by said report that fifty miles of said main railroad and telegraph lines, of either company, have been completed in a good, substantial, and workmanlike manner, and supplied with all necessary rolling stock, buildings and depots, for the use of said roads, and are in good working order, then it shall be the duty of the Secretary of the Treasury, under the direction of the President, to issue to the company or companies that may have completed said fifty miles of main railroad and telegraph line or lines the bonds or treasury notes of the United States for the sum of one million of dollars, according to the stipulations hereinafter provided, and deliver the same to the said company or companies; and the said company or companies shall thereupon execute a mortgage or mortgages upon said fifty miles of railroad and telegraph line or lines to the United States, whereby the same shall be mortgaged to the United States, free from all lien or incumbrance, with all the rolling stock, buildings and depots, and including also all the purchases made of materials or outfits, and work done and to be done on said fifty miles, to secure to the United States the payment of said one million of dollars in the manner hereinafter provided for; and for each and every fifty miles of said railroad and telegraph lines so completed and put in running order, the Secretary of the Treasury shall issue to said company or companies completing the same, the like sum of one million of dollars in the bonds of treasury notes of the United States, upon the execution by said company or companies of a mortgage, as aforesaid, upon the said fifty miles of railroad and telegraph line or lines then completed, until reach-

ing the base of the Rocky mountains; and after that, the sum of two millions of dollars for every fifty miles, until bonds or treasury notes shall have been issued to the amount of thirty-five millions of dollars to each of said two main lines of railroad and telegraph, when no more bonds or treasury notes shall be issued: *Provided*, That no loan shall be asked from the United States government by the Southern Pacific Railroad Company for any portion of their road lying within the limits of the State of Texas, and no mortgage given to the United States on the same; but the loan to said road shall be applied to the portions of said road lying east and west of the State of Texas. And each of the companies undertaking to construct the respective roads provided for in this bill shall agree to build five hundred miles of their respective roads within six years after the passage of this act and its acceptance by said companies. And to this end the construction of the same may be begun on the Pacific side as early as on the Mississippi and Missouri rivers. And when five hundred and fifty miles of either of said main lines of railroad and telegraph shall have been completed and approved in the manner hereinbefore provided, the said several companies constructing said railroad and telegraph lines shall have the lands hereby granted conveyed to them, respectively, by patent for fifty miles of said line or lines, continuously, to the amount allowed by the terms of this act for such fifty miles; and so on, fifty miles of land for each fifty miles of railroad and telegraph line completed by said companies, beyond the five hundred and fifty miles first finished, until said road and telegraph lines shall be entirely completed; and when either of said roads shall be completed, the said companies shall be entitled to patents for the whole of the lands to which they are entitled by the terms of this act, leaving the mortgages aforesaid upon the bed or beds of said road or roads, and all the rolling stock, buildings, and depots thereof, as security for the payment to the United States of the amount of the bonds or treasury notes issued as aforesaid, until the whole thereof shall be paid to the United States in mail and other services, according to the provisions of this: *Provided*, That the companies receiving lands by this grant from the government of the United States shall sell and alienate one-half of said lands within five years from the date of the patents to the same; and all lands not sold at the end of ten years from the date of the patents to the same shall revert to the government of the United States.

Sec. 8. *And be it further enacted*, That if either of the companies authorized to construct either of the two main railroad and telegraph lines mentioned in the two first sections of this act shall fail to complete the whole of its railroad and telegraph line within twelve years after the passage of this act, and its acceptance by the companies, (unless the time may be enlarged by Congress,) said failing company shall forfeit all the rights and privileges granted by this act to all its line of railroad and telegraph not then completed, and all grants of land therefor. And said lands thus forfeited may be granted by Congress to any other company, the same as if this act had not been passed, to aid in completing said railroad and telegraph line; and Congress may place the management of the whole of each or either of said two main railroads and telegraph lines, thus forfeiting their lands, so far as the same may have been constructed by the aid of the United States government herein provided, under the exclusive control of the companies undertaking to complete the same, on such terms in regard to said failing companies, respectively, as it may deem just and proper, and Congress reserves the right so to do by this act, in order to insure the completion of the said main railroads and telegraph lines.

Sec. 9. *And be it further enacted*, That each of the company engaged in constructing the two main railroads and telegraph lines aforesaid shall annually, during the construction thereof, make a full report to the Secretary of the Interior, verified by the oath of the proper officer or agent of said companies, respectively, of the condition and progress of said work, of the distance of railroad and telegraph line completed, and the cost of the same, and the distance in course of construction, and the cost so far of the same, of the estimated value of the lands unsold, of the amount of money and property on hand, and of the amount received from the road, and of all the cost and expenses of the construction thereof up to the time of making said report for the preceding year. And said reports shall be continued annually after said roads and telegraph lines are completed, showing the annual income and expenditures thereof by items after that time, together with a statement of the lands remaining unsold and the estimated value thereof, and of the lands sold and the amount received therefor; and a general statement of the condition of said railroad and telegraph lines and of the income and expenditures thereof for the year preceding.

Sec. 10. *And be it further enacted*, That said companies owning or managing said railroads and telegraph lines shall keep the same in good order and repair, and shall not permit any unreasonable delay in the transportation of mails, troops, or military stores, or of persons or property on said railroads, or in the transmission of intelligence by said telegraph lines; and in case either of said companies shall permit or allow any such unreasonable delay, or permit or allow said railroad or telegraph line to remain improperly out of repair, such company shall be subjected to such fines and penalties therefor as the department whose business has been so neglected may see fit to impose.

Sec. 11. *And be it further enacted*, That the Secretary of the Interior shall cause the lands to be surveyed (after the routes shall be fixed) on the lines of said roads, so far as necessary, as fast as may be required by the construction of said several railroads; and the lands granted by this act to the railroads shall not be liable to sale, (except by said company,) or entry, or pre-emption, before or after they are surveyed. And the reserved sections of the government (designated by even numbers) on the several railroads provided for in this act shall not be sold for less than double the minimum price of the public lands. But the same shall be subject to pre-emption the same as other lands allowed to be pre-empted in all respects, except to be paid for at such double price; and said reserved sections may also be located by land warrants issued by the United States at the same double price, to wit: one-half the number of acres named in said warrants.

Sec. 12. *And be it further enacted*, That the right of way is hereby granted for each of said railroads to the several companies constructing the same to the extent of one hundred feet in width on each side of each of said railroads in the same manner in all other respects as is provided by law in other cases, including all necessary grounds for station buildings, workshops, and depots, and so forth; and the right of way shall be exempt from taxation within the Territories of the United States. The United States shall extinguish as rapidly as may be the Indian titles to all lands falling under the operation of this act, and required in the donation to the two main roads named in this bill.

Sec. 13. *And be it further enacted*, That all minerals of gold and silver, within the State of California, shall be, and are hereby, reserved and excepted from the operation of this act; but to aid in the construction of said railroads and telegraph lines, said companies may, respectively, take and use earth, stone, timber, and other materials, from any lands adjacent to said railroads, respectively, belonging to the United States.

Sec. 14. *And be it further enacted*, That if, at any time, from any emergency of national affairs, the government of the United States shall require the sole and exclusive use of either or both of the railroad and telegraph lines herein provided for, and shall assume the same, the government shall credit said railroad and telegraph companies only with the excess of the gross earnings of said railroads and telegraph lines, over and above the operating expenses during the time in which the government shall have had exclusive possession and control of the same.

Sec. 15. *And be it further enacted*, That the bonds or treasury notes authorized to be issued by the provisions of this act, shall be made payable to bearer, and redeemable at the treasury of the United States in ——— years from the date thereof, bearing interest at the rate of five per centum per annum, payable semi-annually at the treasury of the United States; and if bonds be issued, they shall be coupon bonds.

Central Railroad of New Jersey.

Hitherto the financial year of this company has been completed on the 1st April. The present report embraces the calendar year 1859, and so conforms to the date for which the New Jersey railroad companies are required to report to the Legislature. It also shows the operations of the company for the nine months from the 1st April.

Service of the Road and Ferry.

The mileage made by the several descriptions of trains has been as follows:—

	Nine months. Apr.1 to Jan.1,	Year. Jan.1 to Jan.1.
Passenger trains	108,372	141,918
Merchandise "	87,119	110,827
Coal "	227,317	276,490
Wood "	2,126	2,176
Gravel "	22,679	23,461
Total miles run...	447,613	553,872

During the nine months, the ferry boats have made 2,816 trips of twelve miles each, between New York and Elizabethport, the commencement of the road, making a service of 33,792 miles. During the whole year 1859 they made 3,544 trips, being a service of 42,528 miles.

Passengers.

For the nine months, the number of passengers carried on the railroad and ferry has been 330,580. The number of miles traveled by passengers, or number of passengers carried one mile, has been 6,765,443, which is equivalent to 90,206 through passengers. This does not include commuters or free passengers.

A comparison of the passenger business of the whole year 1859 with the year 1858 gives the following results:

	1859.	1858.
Passengers carried	405,939	294,778
Miles traveled	8,080,798	6,500,335
Through passengers	107,744	86,671

Freight.

For the nine months, the number of tons of merchandise (2,000 lbs. each) carried, has been 145,556. The total movement of merchandise, or number of tons carried one mile, has been 6,936,035, equivalent to 92,481 tons of through freight.

A comparison of the freight business of the whole year 1859 with the year 1858 gives the following results:

	1859.	1858.
Tons carried	188,418	131,900
Carried one mile	8,966,531	6,320,041
Through tonnage	119,554	84,267

Coal.

For the nine months, the number of tons of coal (2,240 lbs. each) carried, has been 534,855. The total movement of coal, or number of tons carried one mile, has been 27,608,806, equivalent to 438,235 tons carried from Easton to Elizabethport.

A comparison of the coal business of the whole year 1859 with that of the year 1858, gives the following results:

	1859.	1858.
Tons carried	638,957	540,649
Carried one mile	32,997,944	27,469,177
Through tonnage	523,777	436,018

The coal tonnage over the road, since the transportation of the road was commenced, has been as follows:

	Lackawanna.	Lehigh.	Total.
1856..	98,670 tons.	33,325 tons.	131,995 tons.
1857..	209,950 "	84,841 "	294,791 "
1858..	417,726 "	122,923 "	540,649 "
1859..	455,681 "	183,277 "	638,958 "
Tot..	1,182,027 "	424,366 "	1,606,393 "

Equipment.

The company own 32 engines, of which 25 are woodburners, 2 are soft-coal burners and 5 are hard-coal burners. Four more hard-coal burners and a switching engine have been ordered. Of these engines, 23 are narrow gauge and 9 are broad gauge. Their condition is reported to be, 24 in good order, 3 in fair order, 3 wanting general repairs, and 2 in the shop repairing. With the present business, 26 are required for daily use.

The equipment of cars is as follows: 19 first class passenger cars, 2 second class passenger cars, 7 baggage and mail cars, 68 house freight cars, 18 covered cattle cars, 1 open cattle car, 100 platform freight cars, three eight-wheel coal cars, 6 caboose cars, 42 four-wheel gravel cars, and 10 dirt cars. All the cars are in good working order, or are being made so.

Transportation Account.

The following is a statement of the ordinary receipts and expenses for the nine months, and also for the whole year:

Receipts.

	Nine months.	Year 1859.
Passengers	$152,718 87	$187,227 32
Merchandise	247,307 64	336,684 46
Coal	858,227 63	432,422 31
Mail	5,700 00	7,600 00
Express	5,171 78	6,072 78
Rents	934 44	1,542 00
Miscellaneous	173 31	203 31
Total receipts	$770,228 67	$971,702 14

Expenses.

Running expenses	$69,610 55	$89,722 79
Repairs of road	51,117 33	59,157 32
" of engines	18,625 12	25,245 85
" of cars	13,437 57	17,505 66
" of build'gs, bridges, etc.	11,063 41	13,075 75
Expense account	16,208 67	21,131 00
Miscellaneous	8,781 78	11,941 68
Wood consumed	58,917 72	77,121 54
Coal consumed	15,100 00	19,211 16
Ferry running	25,322 77	33,512 12
Ferry boat repairs	7,836 05	9,360 96
Ferry miscellaneous	6,296 29	8,730 25
Total expenses	$302,317 26	$385,716 08
Balance net earnings	$467,911 41	$585,986 06

A comparison of the receipts and expenses of the years 1859 and 1858 give the following results:

	1859.	1858.
Receipts	$971,702 14	$836,933 63
Expenses	385,716 08	345,618 39
Net earnings	$585,986 06	$491,320 24

The receipts from all sources show an advance—passenger receipts having increased during the year 9 per cent., freight receipts 16 per cent., and coal receipts 20 per cent.

Of the increase in expenses—$40,102 69—nearly one-half is in the accounts for repairs of road, equipment, etc., $17,504 78; in running expenses, $8,186 94; in consumption of fuel, $6,787 01; in general expenses, $4,486 43, and in the expenses of the ferry, $3,137 53.

An apportionment of the expenses for the year 1859, between the road and ferry, gives—

For the road, $314,901 59, or 59½ cents per mile run by transportation trains.

For the ferry, $70,814 49, or $1 66 per mile run by boats.

The expenses of the dock and handling in New York are charged to the ferry; those at Elizabethport to the road.

For the year 1858 the apportionment of expenses between the road and ferry gives—

For the road, $280,210 72, or 61 cents per mile run by transportation trains.

For the ferry, $65,402 67, or $1 82 per mile run by boats.

The above figures and results show that economy and efficiency have continued to be preserved. As the best test of the slow increase of expenses, compared with the increase of business, the following table has been compiled from the annual reports to the Legislature.

	Receipts.	Expenses.	Net earnings.
1853..	$349,018	$197,629	$151,389, or 43 p. c.
1854..	378,145	197,349	180,796, or 48 "
1855..	383,729	208,856	184,873, or 47 "
1856..	513,479	258,308	295,171, or 53 "
1857..	682,314	340,502	341,812, or 51 "
1858..	836,934	345,614	491,320, or 58 "
1859..	971,703	385,716	585,986, or 61 "
Tot..	$4,165,321	$1,933,974	$2,231,374, or 53 p. c.

In seven years the receipts have trebled, the expenses doubled and the earnings quadrupled.

Financial Condition.

The following is a statement of the financial operations during the nine month from 1st April:

Receipts.

Gross earnings	$770,228 67
New stock, cash received	212,000 00
Loan at 6 per cent.	100,000 00
Wharf loans brought on the books	57,000 00
Sundry accounts	28,676 71
Materials, etc., on hand, reduced	13,791 02
Cash from old account	8,119 35
Dividend unpaid	60,300 00
Total	$1,250,115 79

Expenditures.

Ordinary expenses		$302,317 26
Five coal wharves, land, etc., at Elizabethport		157,681 10
Two engines		18,000 00
Railway superstructure, 3 miles	$17,822 74	
Station houses built	7,827 71	
Tools and machinery	1,176 00	
Miscellaneous property	1,000 00	
(These amounts charged off again below)		27,826 45
Income bonds, $152,000, purchased		151,875 00
Bills payable, all paid off		175,000 00
Interest on $3,000,000 bonds		157,500 00
" balance of general account		20,359 06
Taxes to State, ½ p. ct. on $4,748,114		23,740 57
Div. 5 p. ct. 6 mo. to Oct. 1		110,000 00
" 2½ " 3 " " Jan. 1		60,300 00
Sundry accounts		6,971 92
Cash and cash items		38,544 43
Total		$1,250,115 79

The profit and loss account has been credited with the gross earnings, 9 months, $770,228 67, and debited as follows:

Ordinary expenses		$302,317 26
Interest on bonds, etc.		177,859 06
Taxes to State		23,740 57
Div. for 9 mos. at 10 p. ct. per ann.		170,300 00
Losses on income bonds		54,249 77
Balance of profits transferred to renewal fund, and distributed among property accounts to cover depreciation, (including $27,826 45 above)		41,762 01
		$770,228 67

It will be observed that the same disposition has been made of the surplus of the profits as was made the two previous years, thus providing against depreciation, and keeping the different accounts at amounts fully represented by the property on hand.

For the twelve months of the year 1859 we find the following to be the general results:

Gross earnings		$971,702 14
Less expenses		385,716 08
Balance net earnings, 10 per cent. on $5,755,000, the total of the balance sheet		$585,986 06
Deduct int. on $3,000,000 bonds	$210,000 00	
Deduct int. bal'ce of acc't	40,285 00	
" taxes to State for 1859	23,740 57	
		274,025 57
Balance, 14 per cent. on $2,200,000, average amount of stock		$311,960 49
Deduct dividend—		
10 p. c., April 1, 12 mos.	$200,000	
5 " Oct. 1, 6 mos.	110,000	
2½ " Jan. 1, 3 mos.	60,300	
	$370,300	
Less 9 months of 1858, incl. in April dividend	150,000	
		220,300 00
Surplus, after paying interest, taxes and dividends of 10 per cent., equal to 3¾ per cent. on present stock, $2,412,000		$91,660 49

Favorable as these results are, they are less so than those of the nine months, as they include the winter season, when business is dull and expenses large.

In the fall, the issue of $300,000 stock, alluded to in the last report, was made, the same being distributed among the stockholders, *pro rata*, at par. Twenty per cent. was called in at the time of allotment, and much has since been paid up in full, by permission of the company. With the funds thus provided, $152,000 income bonds were extinguished, leaving $88,000 outstanding of the $500,000 issued in the fall of 1857 and winter of 1858. The amount due on the scrip stock is $88,000, and this fund, therefore, exactly provides for the payment of the remaining income bonds in 1863, when they fall due.

After this provision had been made for the income bonds, there was no obstacle, legal or equitable, to the payment of cash dividends to the stockholders; and two have accordingly been made, namely, five per cent. for six months, to the first October, and 2½ per cent. for three months, to 1st January, the close of the new fiscal year.

The bonds secured by the first mortgage are divided into three series of $500,000 each, falling

due respectively on the 1st August in 1860, 1865 and 1878. In view of the probable conversion of a portion of the second mortgage issue into stock, by the holders, under the privilege which these bonds alone give, the board finally determined to allow the holders of the first mortgage bonds, due August 1st, of the present year, to extend the same *ten years*, to August 1st, 1870; and they are now being extended, accordingly, by annexing new sheets of coupons to the bonds. Such progress has been made in the extension, and such provisions made for taking the bonds of those (if any) who may prefer to sell at par interest at or before maturity, that the board have felt justified in directing the treasurer to class these bonds with those due 1870, in preparing the balance sheet for this report.

New Arrangement.

Under a favorable arrangement with the New Jersey Railroad and Transportation Company, the passenger trains are now run over that road to and from Jersey City, instead of being confined, as heretofore, to an exclusive connection with New York by the Elizabethport ferry. The difference in the gauge of the two roads has been reduced to one inch, and the trains are run with safety, expedition and a great increase of comfort to the passengers.

Construction.

The ballast and gravel trains continue at work as heretofore—the expenses being included in repairs of road. Three miles of new sidings have been laid, new station houses built at Bound Brook and Philippsburg, several workshops at Elizabethport, and an extensive water station for the coal and freight trains prepared at Green Brook. Additions have also been made to the tools, machinery and miscellaneous property. The expense of these various additions and improvements stood in the accounts for the year at $27,826 45, being about two-thirds of the actual cost; but the whole was subsequently transferred to the renewal fund, to cover depreciation. The three ferry steamers were reduced to $140,000 by a transfer of $10,000 to renewal fund. The other transfers to cover depreciation amount to $3,935 56; in all $41,762 01—thus exhausting the amount to the credit of that fund.

Three new coal wharves have been built at Elizabethport, purchases of land made, ground filled and docks prepared for the more extensive shipping of iron. The two Audenried and Sturtevant coal wharves, though not yet the property of the company, have been included among the assets, (and thus made liable to State tax,) in order to bring the whole cost of the improvements used by the company upon the books. The whole addition to the cost of land and wharves at Elizabethport is $157,681 10 less $3 443 20, equal to $154,237 90. The cost of engines is increased $18,000 by the purchase of two new locomotives, and the value of the others have been so fully kept up by rebuilding and improving as to fully cover all depreciation. No other additions to permanent accounts have been made.

Coal Burning.

The experiments with hard coal burning locomotives on this road have had various degrees of success. There is no doubt of the saving to be made by their introduction as soon as the best construction of engine is demonstrated. Locomotives from the shops of the New Jersey Locomotive Company and of Danforth, Cooke & Co. are now on the road, as also a Taunton engine, rebuilt in the company's shops. Engines from the Rogers Locomotive Co. and New Jersey Locomotive Company have now been ordered, and from the competition of these different builders, and the general attention given to the subject by all the railroads, much light will probably be thrown upon the subject during the coming year.

Connecting Roads.

Both the Lehigh Valley Railroad and the Delaware, Lackawanna and Western Railroad Companies continue eminently prosperous. The increase of coal business from each has been shown. Their contributions to the passenger and freight business of the road have very much improved.

The East Pennsylvania Railroad is now in successful operation as a local road. Negotiations are pending with this and the other connecting lines to Harrisburg, to establish a great middle route to the West. This line is demanded by the public because it possesses advantages which no other enjoys; and as it is the policy as well as the interest of all companies to afford the public the best facilities for transportation in their power, we may confidently expect this important line of communication between the seaboard and great West will be open at an early day.

Balance Sheet, Jan. 1, 1860.

Railroad:—		
Grading		$1,235,416 56
Masonry		419,552 02
Railway superstructure & ballast		1,582,138 70

Journal of Railroad Law.

Damages Recivable by Parent for Injuries to Child. Laws of Anglo-Saxons as to.

In our last article we considered the case of Kelly *versus* The Pennsylvania Railroad Company, recently decided in the Supreme Court of Pennsylvania, in reference to the degree of care required of a child in avoiding the consequences of the negligent acts of others. That is, whether a railroad company in order to defend itself from the consequences of its own negligence, where that negligence has resulted in personal injury to *a child*, could set up the concurrent negligence of the child itself. We also considered the point as to whether the blocking of a turnpike by a train of cars, when not absolutely necessary, was unlawful.

We are now to consider the rule of damages, which the law adjudges the parent to suffer, from the personal injuries that his child may receive at the hands of others. We will briefly recapitulate the facts of the case.

On the 5th of September, 1854, Patrick Kelly was at work on the Broad Top Railroad, near Huntingdon, Penn., and his son James, a lad nine years of age, was sent to him with his dinner. The father sent him to Huntingdon for some tobacco; and returning by the turnpike, the boy found the crossing obstructed by a train of the defendants' cars; he attempted to creep under them, when the train started, and injured one of his feet so as to render the amputation of it necessary. The father then brought this suit to recover a compensation for the loss he had sustained. On the trial, the Court below charged the jury, upon the point in consideration, as follows:

If the plaintiff's allegation that the injury is chargeable wholly to negligence on the part of the defendant is true, his action is maintainable. The nursing and surgical and medical attention required at the time, had to be provided by him. He has, moreover, a right to his son's services during his minority; and, for the loss of the boy's services, to the extent that he is disabled, as well as for nursing and professional attention at the time of the accident, he would clearly be entitled to a fair compensation in damages; and this, though the son, who is the principal sufferer, might, at any time, bring his own action, and recover damages for the principal injury. Upon the same grounds that one may maintain an action, the other may also, and an action is no bar to the other. If the plaintiff be entitled to recover in this action, the boy would plainly be entitled to much more. And this, of course, the jury will not fail to bear in mind, if their verdict should be for the plaintiff; but should confine their attention, *in assessing the damages*, to the consideration and elements which constitute the ground of claim to compensation on the part of the father. The trouble and expense to which the evidence shows him to have been

subject, and the loss or diminution of the boy's services.

The counsel for the plaintiff submitted the following point among others, for the judge to charge the jury upon:

That in an action to recover damages for an injury of this kind, involving the maiming of the body, and the loss of a limb, no absolute measure of damages, no market value, can be established, and the jury, if they find the plaintiff entitled to recover, may give him such damages as they believe right, to compensate him under all the circumstances for the loss and injury sustained.

In reply to this request of counsel, the Court obeyed. We affirm this point. *There is no definite measure or standard of damages; but the jury should not lose sight of the ground of claim in the action, as stated in our general charge.*

We italicise this, because it is the point upon which the Appellate Court overruled the charge, and granted a new trial.

A verdict and a judgment having been given to the plaintiff for $3,000, the defendant, upon exceptions taken at the trial, appealed.

The opinion of the Court on Appeal upon the point of damages, was as follows:

WOODWARD, J.—The substance of the instructions was that the damages must be compensatory surely, and that compensation must have regard to the plaintiff's loss of his son's services, and to the expenses of nursing and professional treatment. These were the grounds on which the father claimed damages in his declaration, and they were the appropriate grounds on which to assess them. The father was entitled to the services of his child during minority, and by just so much as this injury impaired the value of that right, was he entitled to compensatory damages. This was the only action he could ever maintain; and all his damages were to be assessed herein. For surgical attention and nursing he was also entitled to compensation or the general principle of *quantum meruit*. It was proper for the jury to understand that the sufferings endured by the boy, and the disfiguration of his form, and whatever was surely personal to him should not enter into the estimate of the father's damages, because for these the son would have a right of action; and an approximate caution was given to the jury on this point in the body of the charge.

But a majority of our number think the court erred in answering the seventh point of the plaintiff. (The point italicised.) That point called upon the Judge to say that in this action there was no absolute measure of damages, and that the jury might give such damages as they believed to be right to compensate the plaintiff for the loss and injury sustained. The court affirmed this point. They told the jury not to lose sight of the ground of claim as stated in the general charge; but it is clear, that an unqualified affirmance of the seventh point was giving to the jury; too large a license on the subject of damages, and the verdict proves that they did not heed the reference to the observations contained in the first part of the charge. Generally speaking, the influence of the court, in this class of cases, should be exerted to restrain those excesses into which juries are apt to run. The sympathies of the fathers and brothers who comprise the jury, are always powerfully excited by the distressing circumstances of the case and the eloquent appeals of counsel. Wild verdicts are frequently rendered, and the tending in modern times, undoubtedly, is to excessive damages, especially where they are be assessed against corporations. It is curious, in looking back, to see how pecuniary mulcts have grown with advancing civilization. The Jewish law abounds with instances of specific damages; but they were generally inconsiderable as compared with modern assessments. The same principle of arbitrary and fixed valuation was applied to a considerable extent by the civil law; though, on the introduction of this code into modern Europe, the discretionary consideration of the tribunal was substituted for the specific valuation. An arbitrary rule of a very singular character was established by the *Lex Aquilia*, which provided that in case of the killing of any slave or cattle, unless by mere chance, the trespasser should pay the master as much as the property had been worth any time in the year. The laws of the Anglo-Saxons applied, with the most minute case, specific damages in each class of cases. Not only was a certain value put by law on every individual, which determined the amount at which his testimony as a compurgator was to be rated, and the damage he could claim as plaintiff, or must pay as defendant; but every limb and part of the body had its distinct "wehr," or legal worth. Thus, a leg was valued at 50 shillings, (the shilling was then more than double the value of the present English shilling, and 50 shillings were equal to about $35 of our money:) the little finger at 11 shillings; the great toe at 10 shillings; an ear was 12 shillings; each of the front teeth 6 shillings; every finger nail 1 shilling, and so on.

In the laws of Alfred, the rates are higher; and under the Conqueror, the *wehrs* became fewer; until at last specific penalties were reserved almost exclusively for public misdemeanors, and the compensation for private torts came to be measured, as at present, by the discretion of the tribunal, applied to all the circumstances of the case. But even after the common law had adopted this discretionary admeasurement of damages, and after the increase of money had depreciated its value, down to a very late period in English jurisprudence, damages for torts were comparatively low.

A verdict for $3,000 for the loss of a son's services is not to be found in the old law, and if there are any such instances in modern times, they are comparatively rare. The most recent assessments in England are very much below this rate of compensation.

The courts labor to define the measure of damages with all possible precision; but the application of it must be left to the jury, and unless they are restrained by a firm exercise of the power of new trials, damages will go on increasing; each instance of excess being used to justify the next, until the pecuniary loss of one party will be repaired at the ruin of the other.

Where there has been no oppression, fraud, wantonness, or other circumstances to call for exemplary damages, these large verdicts are a violation of the rule of compensation, and a violation that is just as unpardonable, when practised against a corporation, as against an individual. If any person should wantonly crush the foot of a little boy, I can scarcely conceive of a rate of damages that I would deem too high. But when such a disaster occurs from a purely negligent performance of customary duties, and involves no malicious motive whatever, the rule of law is, that the father it entitled to compensation merely for the pecuniary loss he has sustained; not compensation for his lacerated feelings or his disappointed hopes, for the law cannot compensate these in money, but pecuniary indemnity for pecuniary losses. What he spent to cure his boy, and what profit might have accrued to him for services, more than can be realized after the injury, are the proper elements of a verdict; and they are to be rated none the higher or lower because the defendant happens to be a corporation, instead of a natural person.

Because the court's answer to the seventh point was calculated rather to release the jury from this standard, than to hold them to it, the judgment is reversed, and a new trial awarded.

Progress in Texas.

We take the following from the weekly review in the Houston *Telegraph* of the 27th ult.:

A noticeable event within the past week has been the opening of the Galveston and Houston Telegraph line.

The influx of settlers is still very large. Every boat from New Orleans is crowded, and it is estimated that not less than twelve to eighteen hundred persons arrive in the State every week by way of the Gulf. We have noted fully five hundred slaves brought in within the past week.

Railroad progress is satisfactory. The New Orleans and Texas road has now twenty miles finished, and is working along with a large force, having all the iron on hand to complete that portion between Beaumont and Liberty. The section between Liberty and Houston is all cleared out, and contractors are getting out the ties. The Galveston and Houston road is not yet open for business. The Brazoria road is about done to Oyster Creek. The B. B. & C. road is in operation to Cane Lake. The contractors on the W. C. road are employing one hundred hands, and will complete the road to Brenham this year. The Central road is open to Navasota, and will be open to Millican's this spring. The whole amount of finished road in the State is now 290 miles.

The San Antonio *Herald* of the 25th ult. says: We learn from Mr. Williams, Superintendent of the R. B., B. & C. R. R., that his road will be completed 80 miles to opposite Columbus, 120 miles east of this place, in a few weeks. Also, that the road between Galveston and Harrisburg will be opened for travel immediately. This will bring us nearly 24 hours nearer New Orleans, and will ultimately become the favorite route for passengers to and from the States.

Southwestern Railroad.

The following gentlemen have been elected directors of this company for the ensuing year:

President—R. R. CUYLER.

Directors—John W. Anderson, Wm. A. Black, Wm. S. Holt, T. M. Furlow, R. A. Smith.

A dividend of 4 per cent. was declared for the last six months.

Charleston and Savannah Railroad.

This road is making good progress towards completion. It is expected to have it in operation to Savannah River by the 1st of April. Until the completion of the bridge, passengers will be conveyed to the city by steamboat.

New York State Debt.

The total indebtedness of the State of New York, according to the statement of the Controller, is $33,883,338, the interest on which is $1,863,498 per annum.

Railroads in Tennessee.

TABULAR STATEMENT OF THE CONDITION OF RAILROADS IN TENNESSEE, FOR 1859.

Roads Finished.	Cost of Road.	Cost of Equipment.	Capital stock. Subscribed.	Capital stock. Paid in.	Funded Debt.	Floating Debt.	Receipts.	Expenditures.	Net Earnings.

* For two years. † Memphis and Little Rock R. R. Co.

Eaton and Hamilton Railroad.

The following gentlemen have been elected directors of this company for the ensuing year:—David Barnet, Daniel Beckel, John Carlisle, Lurton Dunham, John W. Erwin, James H. M'Whinney, Hugh M'Birney, James Neel, James M. Starr, Joseph Torrence, William Whiteside, John C. Wright and Thomas H. Wessner.

David Barnet, President; Lurton Dunham, Vice President; J. B. Stephens, Secretary; E. W. McGuire, Treasurer; D. M. Morrow, Superintendent.

Western and Atlantic Railroad.

We learn that the officers of this company have paid into the State treasury, out of the earnings for January, the sum of $33,000. In addition to this they have compromised and settled old claims against the road which had been pending in the courts for several years—making in the aggregate a little over $10,000.

Augusta and Macon Railroad.

The Augusta *Constitutionalist* says that the sum of $50,000 has been subscribed to the stock of this road by private citizens, and adds: "We think it likely there will be a liberal subscription from citizens, and we feel satisfied the people will direct the City Council to subscribe $500,000."

Railroad Controversy in Virginia.

Richmond, Fredricksburg and Potomac Railroad *against* the Virginia Central Railroad.—The Court of Appeals have at length decided the controversy between the above railroad companies, and in favor of the Richmond and Fredericksburg Railroad Company. That our readers may understand the history of the litigation, which has been pending for years, we give an outline, which we find in the Richmond *Dispatch* of 7th inst.:

By the charter of the Richmond and Fredericksburg Railroad, that company was granted the exclusive right to all through travel and freight between Richmond and Washington for the period of twenty-seven years. Some years after, the Louisa Railroad (now the Central,) was chartered to the Junction in Hanover, from which point its freight and travel was brought to and from Richmond on the Fredericksburg road. After that, the Legislature granted a charter to the Louisa road to extend its line east to Richmond and west to Covington. When the Central road was completed to Gordonsville, that company formed a connection with the Orange and Alexandria road, and thus virtually established a through line to Washington, though it only gave tickets to Gordonsville.

Against this the Richmond and Fredericksburg Company applied to Judge Meredith for an injunction, to prohibit the Central road carrying "through travel," alleging as a reason that their chartered rights were violated by the Central Company, it thus taking from them the business that had been guaranteed to them by the State. The motion for the injunction was argued with great ability, after which, Judge Meredith refused to grant it; and from that decision an appeal was taken to the Court of Appeals.

In the decision given yesterday, the right of the Legislature to grant the guarantee, was recognized by the Appellate Court, who decided that that guarantee was of the through travel between the cities of Richmond and Washington, and that the arrangements between the Central and Orange and Alexandria Railroad Companies for the transportation of through passengers comes within the interdict of the guarantee. The Court therefore grant an injunction to prevent such future violation of the rights of the Richmond, Fredericksburg and Potomac Railroad Company during the period guaranteed to them by their charter.

In reference to the past the Court order all account to ascertain the amount of through travel heretofore abstracted from the Richmond, Fredericksburg and Potomac Company. They give to the Central and Orange and Alexandria Companies the benefit of the travel during the period when by obstructions produced by the ice, the Richmond, Fredericksburg and Potomac Company were unable to accommodate it; and they further decide that, (with that exception,) all the through travel abstracted by the Central and Orange and Alexandria Companies *prima facie* belonged to the Richmond, Fredericksburg and Potomac Company, and that the burden of proof rests on the two former companies to show that there are any circumstances which take such travel out of that category. They further decide that the amount of damage thus ascertained is to be paid by the two companies in their respective ratios; or if not paid by both, then to be paid by either one of them.

In reference to the above, we copy the following letter from the President of the Central road:

VIRGINIA CENTRAL RAILROAD,
PRESIDENT'S OFFICE, Richm'd, Feb. 7, 1860.

GENTLEMEN: An article in the *Dispatch* of this morning, referring to the decision of the special Court of Appeals in the case of the Richmond, Fredericksburg and Potomac Railroad Company vs. the Central and Orange and Alexandria Railroad Companies, gives an exaggerated estimate of the amount likely to be paid by this company.

I feel called on to say, that the sum mentioned is ten times as much as it probably will be, and request a suspension of any further estimate of the amount until the case is finally disposed of, *with the assurance that I am authorized to say*, that its payment will not seriously embarrass the company in its financial affairs.

Respectfully,
E. FONTAINE, *Pres't.*

—*Richmond Enquirer.*

Marietta and Cincinnati Railroad.

Wm. P. Cutler, Esq., President of this company, has recently addressed to the Speaker of the Ohio House of Representatives, the following statement in the form of answers to certain questions proposed to him by a resolution of that body.

The statement will be read with interest, as being an official exhibit of the present condition of the road, and a statement of the plan in pursuance of which the road is to be sold on the 25th of the present month.

1st. The charter of the Marietta and Cincinnati Railroad Company, granted in 1847, provided for the construction of a railroad from Cincinnati either to Belpre or Harmar, points about twelve miles apart, on the Ohio river. Subsequently, in 1850, additional power was given to extend the road to a point opposite Wheeling, Virginia.

The amount of money expended upon the line between Cincinnati and Harmar, the point selected as named in the original charter, cannot be stated with accuracy, without a careful and lengthy examination of the books of the company. It is believed, however, that not more than $250,000 has been expended under the authority granted in 1850. It follows, therefore, that the entire expenditure, excepting the above named $250,000, was made upon the line originally contemplated in the charter.

2d. The gross amount of the liabilities of the company may be stated in round numbers as follows:

Bonds issued under 1st mortgage.....	$2,500,000
" " 2d "	2,000,000
" " 3d "	1,500,000
Unsecured indebtedness, consist'g largely of domestic bonds due in 1862....	2,000,000
Accrued interest on the above	1,250,600
Making the gross amount of liabilities.	$9,250,000
It may be added that the total stock issued is about.....	3,500,000
Which, with the interest allowed on the certificates, makes the total cost of the road about.....	$13,000,000

3d. The laborers employed in the construction of the road have all received their pay. A portion of the above unsecured indebtedness is due contractors; the amount cannot be stated, without a careful analysis of the books of the company. Provision is made in the decree of the Court for the payment of arrearages to operatives employed by the company in running the road.

4th and 5th. The fact became apparent that the road could not pay even the interest on its indebtednest. The holders of the first and second mortgage bonds, residing principally in foreign countries, determined to foreclose their mortgages by suits in the U. S. Courts, and thus acquire possession of the property.

In this, they were thwarted by a suit brought in the Ross County Court of Common Pleas, on the 30th day of November, 1858, by holders of the 3d mortgage bonds, who claimed to have a first lien on all the rolling stock of the company. In this suit, however, the property was taken out of the hands of the Directors, and placed with a Receiver. The Directors subsequently called meetings of the stockholders, and submitted to them a plan for the capitalization of the entire cost of the road.

The holders of the bonds under the three mortgages were to surrender their bonds, and receive preferred shares in a new organization to an amount not exceeding $5,750,000. The unsecured creditors were to receive, in place of their obligations against the company, 40 per cent. of the same in deferred stock. The stockholders to receive 30 per cent. in deferred stock.

From the net earnings, the preferred shares first to receive dividends to the amount of 7 per cent. on their par value. The deferred stock next to receive 7 per cent., and any surplus beyond a 7 per cent. dividend on these two classes of stock, to be divided equally upon all the stock.

This plan was agreed to, almost unanimously, by the stockholders present at these meetings, representing over 40,000 of the shares, being about two-thirds of the whole amount.

The stockholders also instructed the Board of Directors "to adopt such plans and employ such means as in their judgment will be most likely, at the earliest period, to accomplish the capitalization of the stock and indebtedness as nearly on the basis of said scheme as they may find practicable and expedient, making such alterations only as they may find necessary to make the same valid in law."

In obedience to these instructions, an agent was employed, who secured the consent of nearly all the bondholders to the plan proposed by the stockholders, with some modifications. One modification was that the second mortgage bonds should go at par, instead of 87½ per cent. The other was that the amount of deferred stock allowed to the stockholders and unsecured creditors, should be fixed at $1,500,000, instead of allowing the proposed per cent. upon each of these interests.

As a consideration, however, for these concessions on the part of the minor interests, it was agreed that the rate of dividends on all the preferred shares should be fixed at 6 instead of 7 per cent., thus yielding an annual benefit of nearly $60,000 to the lower interests. The Board did not hesitate to accept and agree to these various modifications, and authorize their counsel to consent to a sale, and co-operate in procuring a decree of the Court, that would perfect the entire arrangement.

6th. All the bonds issued under the third mortgage were originally used for purposes of hypothecation, and were pledged as security to parties who loaned their notes to the company, and as security to Directors and others, for endorsements for money borrowed or advanced by them to secure the completion of the road.

The general rate of hypothecation was 40 cents on the dollar. Without the aid thus afforded, it would have been impossible to have finished the road to the Ohio river. When it became manifest that these debts could not be paid by the company, it was necessary to arrange with the parties to take bonds in payment of their claims, or allow them to go to sale as collaterals, and be struck off to the highest bidder. In a few cases it was not possible to make settlements, and the bonds were offered at public sale, and were bid off at from 10 to 12 cents on the dollar.

The bonds sold to parties for whose security they were hypothecated, were taken at from three to four times their market value, as ascertained by actual sale.

The amount thus disposed of to bona fide purchasers was about $1,300,000, and the prices ranged from 25 to 80 per cent. of their par value, except as stated above in the cases of forced sales, in none of which were the Directors or any of them purchasers.

The remaining 200 bonds are yet in hypothecation, at the rate of about 40 cents on the dollar. Not over 100 of the bonds sold or hypothecated, were taken by Directors, and they were taken for actual cash advances or endorsement, paid by them, seriously to their own embarrassment, and at prices greatly beyond their present or prospective value.

7th. It is expected that the property will be bid off by some authorized agent of the bonded interest, not now known, however, to the Directors.

There is no arrangement or understanding whatever, with reference to the future policy of the so-called new company, nor is it known who will be the Directors.

8th. No fee or compensation of any kind has been paid or is to be paid by the company, to any

person in connection with these proceedings, or for bringing about the arrangements and perfecting the scheme.

Steubenville and Indiana Railroad.

At a meeting of the stockholders held on the 14th inst., the old board of directors were re-elected. At a subsequent meeting, the following officers were chosen: Hon. Thos. L. Jewett, President and Superintendent; and J. G. Morris, Secretary and Treasurer.

Atlantic and Great Western Railroad.

The work of construction has been commenced upon this road at Columbus, Pa., near the crossing of the Sunbury and Erie road, and gangs of men are at work grading east and west from that point. The work will be prosecuted as rapidly as possible.

Opelousas Railroad.

This road is a work peculiarly Louisianian in character. It lies wholly within the State, and penetrates its very heart. By the branches that are destined to proceed from it, or connect with it, either now commenced or in contemplation, or which the public necessities will bring into existence, the most important sections of the State will be placed in immediate connection with its commercial capital.

In the report of the President and Directors of the company to the stockholders, just made, we have a succinct and intelligible view of its present condition and future prospects, which we epitomize for general information.

The earnings of the road are steadily increasing, though its business is confined to the short distance of eighty miles, between New Orleans and Berwick's Bay. The actual receipts for ten months have been about $370,000. The crevasse on Bayou Lafourche interrupted its business for about two months, but for which its revenues would have been about $445,000, or exceeding the previous estimate by some $20,000. Measures have been taken, by raising the track, to secure the road from any future catastrophes of this kind. The receipts for ten months in 1859 were about $145,000 more than for the whole of the previous year, though no addition had been made to the length of the road. The floating debt of the company is in process of rapid diminution. It amounted on the 23d ult. to $268,000, and will be still further and materially reduced during the present month, and doubtless extinguished at no distant day.

Passengers and mails have been regularly passed over the road, and but a solitary failure has occurred. That was on the first day of the crevasse at Bayou Lafourche. During the continuance of the crevasse, the mails and passengers were taken over by steamboats, the interruption spoken of had reference only to freight. The entire number of passengers carried, through and way, is 51,299.

The total capital of the company is $6,000,000, but as the State pays only in proportion to the city and individual subscriptions, its actual capital amounts to only about $3,500,000, distributed as follows:

State, 28,000 shares, amounting to	$700,000
City, 60,000 " "	1,500,000
Individ'l, 52,000 " "	1,300,000
	$3,500,000

The lands donated by Congress will, it is estimated, be worth some three millions, and with this aid a road may be completed worth six and a half millions of dollars that will have cost the State, city and individual stockholder only three and a half millions. The prospective value of the stock may be estimated from this circumstance. The company will be entitled to 86,000 acres of land on reaching Opelousas, a distance of 165 miles from this city, or 85 miles from its present terminus at Berwick's Bay. No doubt is entertained that the lands will bring much more than their estimated value. The whole quantity of land enuring to the company when the road is completed to the Texas line is no less than 608,000 acres. Of the value of these lands, when the whole State is spanned by railroads, the reader can judge. The company has official notice as to the quantity, contingent, of course, upon the construction of the road.

The company has undertaken to extend the road from Berwick's Bay to Opelousas, a distance of eighty-five miles, and for this purpose has determined to purchase negroes as the best and most economical mode of doing it. It would have done this long before now, but for the desire of extinguishing the floating debt before incurring the large outlay that such a course necessarily involves. The policy was a prudent one, and must tend to increase confidence in the management of the road. Every step taken is well matured previously.

A contract has been made with reliable parties for the swamp and marsh work west of the Bay. Operations have also been commenced at New Iberia for the construction of the road between that place and Opelousas, a distance of forty miles, and five or six miles have been graded. When we state that the whole distance from the present terminus to the Texas boundary, the building of the road to which secures to the company the whole of the 608,000 acres of land donated by Congress, is only 178 miles, it will be seen at once how small, comparatively, is the work to be done before the splendid prize will be drawn. Every mile built will of course increase the receipts of the road, and the augmented earnings with the rich grant of lands must ere long run the bonds of this company up far above par. It is not possible with the facts before us to arrive at any other conclusion. But there is another consideration. At Pine Prairie, 110 miles beyond the present terminus of the road, or 65 miles from New Iberia, or 40 beyond Opelousas, the road will go so near the valley of Red River that a branch road of twenty miles will reach the Alexandria and Bayou Bœuf Railroad, terminating on the Bœuf, and connect us with Alexandria and Red River. Thus we shall be in *daily* communication with the valley of Red River, one of the most important and rapidly growing portions of the State. It would bring New Orleans and Alexandria within *ten* hours of each other! The whole distance between New Orleans and Alexandria would be only 216 miles. The report well observes that this might be effected *with ease* in *two years*, if the people in this city could be brought to a fair consideration of the great importance of the work to our trade, and in consequence buy a few of the bonds which the company offers for sale. These bonds will be equal to ten per cent. interest, and are as well secured as any railroad or any other sort of bonds in this country. There can be no doubt about it at all. The construction of the road to Pine Prairie will give a great impetus to its business by drawing over it the business of the great Red River valley at Alexandria, and its completion to the Texas boundary, but sixty-eight miles from Pine Prairie, will bring us in the *mineral region of Texas*. The late geological survey of a part of that State has shown that rich ores abound on the Sabine, near the point which this Opelousas Railroad will reach. Does not the most superficial reader perceive what an immense business from all these sources this road must do, and the land donations being also taken into consideration, how rich the company must become? More than 16,000 passengers last year passed over the road to Texas in connection with the steamship line to Galveston. The road built to Texas, our markets will be supplied with cattle and sheep over it. Its revenue from this source alone must be heavy. In whatever light we consider this subject, we are forced by the facts to the same conclusions, viz: of the great importance of this road to New Orleans; of the immense business it is destined to do, and the great value its stock must of necessity reach. Up to the 31st of December the company had sold 340 of its bonds of one thousand dollars each. W. G. Hewes, Esq., the efficient President of the company, well observes that "it is almost incredible that such an opportunity of investing money, and at the same time of receiving the munificent grant of Congress, establishing a daily connection with the richest portion of the State, now shut out of all intercourse with us a greater portion of the year, should be suffered to pass unimproved." We cannot suppose that it will be. An examination of the subject must show the bonds which this company offers to be among the most valuable investments that can be made, and as safe as they are valuable.—*N. O. Commercial Bulletin.*

English Cotton Factories.

From a paper recently read by the Mr. David Chadwick, of Selsford, before the "London Statistical Society," we are enabled to present several interesting facts relating to the machinery of cotton mills and the wages of factory operatives. In the cotton mill, seven classes of workmen are employed in the several departments following:—1, as engineers, porters, &c.; 2, in cotton mixing and blowing; 3, in carding and preparing; 4, in self-acting mule spinning; 5, in throstle spinning; 6, in spinning upon hand mules, and 7, in power-loom weaving. In a mill of 500 hands the numbers employed respectively in these departments are as 27, 7, 72, 35, 69, 275, and in beaming, twisting and sizing 14. Of the whole number, 19 per cent. are men; 50.2 per cent. women; 6.6 per cent. boys; and 24.2 per cent. girls.

During the last twenty years, the wages of all classes of factory hands have increased from 10 to 25 per cent. owing chiefly to the improvements in machinery enabling them to perform a larger amount of work, and thereby increase the value of their labor. Chadwick remarks:

In 1856, there were 3,046 cotton factories in England and Wales; 1,480 of which were situated in Lancashire. Notwithstanding that legislative restrictions were laid upon the employment of young persons, and the reduction of the time of labor from 69 hours per week to 60, the imports of raw cotton increased from 646,000,000 lbs. in 1844, to 1,034,000,000 lbs. in 1858; whilst during the same period, the value of the exports of cotton goods, twist, and yarns, increased from $130,000,000 to $215,000,000—an extension which illustrates alike the immense demand for cotton fabrics, the commercial development produced by machinery, and the enterprise of the cotton lords of England.

The estimated number of operatives employed in the cotton trade of Lancashire is upwards of 400,000 hands. Reckoning the average rate per head at 10s 3½d per week, the aggregate wages for that number would amount to about $1,029,000 weekly, or over $53,000,000 per year; whilst, for the whole of England and Wales, the aggregate annual wages would be about $110,000,000. Mr. Chadwick estimates the number of spindles employed in Lancashire at 28,000,000, and of looms at 360,000. Taking the generally estimated cost of a spinning mill and its requisite preparing machinery at 23*s*a24s per spindle, and allowing the present valuation of spinning property to be 18s. per spindle—and supposing the cost of a weaving establishment to be £24 per loom, and the present valuation of that kind of property to be say £20 per looms—we shall have the following result, as the aggregate capital now invested in the cotton manufacture of Lancashire:

28,000,000 spindles, at 18s. each	£25,200,000
360,000 looms, at £20 each	7,200,000
	£32,400,000
Add to which, as the estimated value of materials and stock, of manufactured goods, and working capital—say	20,000,000
	$52,400,000

Applying the same ratio of valuation to the remaining 1,566 mills in other districts of the country and in Wales, we shall have as the aggregate capital employed in the cotton trade of England and Wales about £525,000,000. These figures may afford some idea of the enormous interests dependent on the cotton crop of America.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, etc., etc.

An *asterick* (*) occurring in the column headed "Rolling-Stock," signifies that the cost is included in that of "Railroad and Appurtenances." A *dash* (—) signifies "nil." Running *dots* (.....) signify "not ascertained." Land-Grant Railroads are in *"italics."*

Railroad Reports.

RAILROAD COMPANIES will oblige us by sending us copies of their Reports as soon as they are published.

American Railroad Journal.

Saturday, February 25, 1860.

Sunbury and Erie Railroad.

The annual meeting of the stockholders of this company was held in Philadelphia on the 13th inst. The old officers were re-elected. The report submitted by the directors, and which we give entire in another column, is a very favorable exhibit of the present condition and future prospects of the company. The whole length of the line from Sunbury to Erie is 288 miles. The track has been laid upon 108 miles of this distance, leaving 140 to be completed—of which 100 miles are graded and ready for the iron.

The total receipts of the company have been $10,169,869.80, and the expenditures $8,609,266.88—leaving a balance on hand of $1,560,602 92.

The company's assets, applicable to the completion of the road, amount to $5,936,602 92; while, according to the report, only $2,395,000 will be required to put the road in order for business the entire distance.

St. Andrews and Quebec Railroad.

We learn from the St. John *News*, of 15th inst., that arrangements are in progress for carrying on the work upon the extension of this road. About 60 miles, from St. Andrews up, are already in operation; thence to Woodstock, on the St. John river, a distance of 25 miles, it is in progress. The *News* learns, from a letter from a gentleman connected with the works, that contracts have been signed, and that the manager, JULES THOMPSON, Esq., had obtained from the board £20,000, and from the Canadians £40,000 for the prosecution of the work. The contemplated final terminus of the road is Trois Pistoles, about one hundred miles below Quebec, at which place a connection will be formed with the Grand Trunk Railway.

Macon and Brunswick Railroad.

At a meeting of the stockholders of this road held in Macon, Ga., on the 8th inst., the following gentlemen were re-elected directors for the ensuing year: A. E. Cochban, T. R. Bloom, B. F. Ross, L. N. Whittle, George Walker, Henry Dunn, Jas. T. Blain.

☞ The Virginia Senate has passed the House Internal Improvement Appropriation bills as follows: To the Covington and Ohio Railroad $2,000,000; Virginia Central Railroad, $600,000; and to the Alexandria, Loudoun and Hampshire Railroad $600,000. The Senate also passed a bill increasing the capital stock of the Manassas Gap Railroad.

Panama Railroad.

The office at Panama furnishes the following statement of the transportation by the Panama Railroad during the year commencing Oct. 1, 1858, and ending Sept. 30, 1859.

Nature of freight.	Aspinwall to Panama.	Panama to Aspinwall.	Total.
Passengers ..	22,206	16,567	39,973
Treasure	$3,146,983	$57,097,061	$60,244,044

The weekly statements of the Philadelphia Banks made up to the 13th and 20th inst., present the following aggregates and comparisons:

	Feb. 13.	Feb. 20.	Difference.
Capital	$11,650,455	$11,661,169	+$10,750
Loans	25,458,354	25,564,640	+106,286
Specie	4,581,356	4,698,389	+117,033
Due from b'ks	1,318,464	1,192,030	—126,434
Due to banks	2,782,306	3,019,658	+237,352
Deposits	14,804,301	14,722,119	— 82,182
Circulation	2,663,695	2,676,197	+ 12,502

The Boston bank statement for the week ending 21st February foots up as follows:

Capital	$36,581,700	Due to b'ks.	$7,430,000
Loans & disc.	60,113,800	Deposits and Circulation	17,598,000
Specie	4,577,000		
Due fr'm b'ks	6,549,000		6,305,500

The cash assets and liabilities of the New Orleans banks on the 11th inst. were as follows:

Loans	$25,197,351	Deposits	$20,634,112
Specie	12,741,881	Exchange	7,349,357
Circulation	13,343,924	Due banks,	1,395,551

As compared with the statement of the previous week the results stand thus—

Dec. in specie	$11,241	Dec. in exch.	$733,670
Dec. in deposits	572,428	Dec. in dist'nt balances	252,842
Inc. in circula'n,	128,430	Inc. in l'ng l'ns	181,189
Inc. in short l'ns.	54,076		

The return from the Bank of England for the week ending the 1st of February, gives the following results when compare with the previous week:

Public deposits	£5,309,753	Dec.	£219,969
Other deposits	14,484,676	Inc.	404,929
Rest	3,324,479	Inc.	29,344

On the other side of the account:

Governm't securities	£10,171,199	Dec.	£240,213
Other securities	20,773,651	Inc.	1,273,924
Notes unemployed	6,846,370	Inc.	869,370

The amount of notes in circulation is £21,906,340, being a decrease of £279,460, and the stock of bullion in both departments is £14,942,502 showing a decrease of £616,594 when compared with the preceding return.

Since the year 1853 the coinage of silver at the United States Mint has exceeded forty-one million of dollars, of which $3,290,468 was silver of domestic production.

The production of gold in the several States, since the commencement of the coinage, has been as follows:

California	$451,310,840 26
Georgia	6,800,879 33
North Carolina	8,944,409 39
Virginia	1,525,515 50
South Carolina	1,280,604 87
Alabama	196,758 54
Tennessee	80,810 87
Oregon	69,292 00
New Mexico	48,672 00
Kansas	4,171 70
Other States	79,224 00
Total domestic gold	$470,341,478 46

This large sum has been coined at the following points—the first column representing the coinage of American gold only: the other of both American and Foreign gold, silver, and copper:

Philadelphia	$238,305,639 48	$417,875,851 10
San Francisco	106,641,697 73	105,567,313 74
New Orleans	22,293,827 91	67,434,411 47
Charlotte, N. C.	4,868 555 67	4,844,364 00
Dahlonega, Ga.	5,988,635 60	5,991,495 00
Assay Office, N.Y.	92,243,151 98	87,479,237 64
Total	$470,341,478 46	$689,189,674 95

It is now proposed to establish at New York a Branch Mint, with powers similar to that at Philadelphia.

The Currency, Land Warrants and Specie quotations for the week have been as follows:—

Total		$514,000

Sunbury and Erie Railroad.

Report to the Stockholders of the Sunbury and Erie Railroad Company.—In their last annual report, the Board of Managers congratulated the stockholders upon such an improvement in the affairs of the company as to insure the speedy and economical completion of the work entrusted to their charge, and expressed a confident expectation that the cars might traverse the whole length of the road before the close of the year 1860.

To the accomplishment of this desirable object the whole energies of the Board have been unremittingly directed, and we are happy to be able to report that such progress has been made in the work as to place it easily in the power of the company to fulfil this expectation, if they should not be arrested in their efforts by financial considerations, growing out of the extreme difficulty of negotiating any improvement securities except at almost ruinous rates of discount.

Early in the last season the grading of the line of road from Williamsport to the mouth of the Sinnimahoning, a distance of 68 miles, was completed, ready for the superstructure, and the track-layers commenced their operations as soon as the roadway was sufficiently settled. The track was laid to Lock Haven, a distance of 26 miles from Williamsport, by the 1st of July last, and was thence shortly afterwards extended 16 miles further to Whetham Station, at the mouth of Rattlesnake Creek. At this point the track-laying at the eastern end of the line was suspended for the season.

Meanwhile the grading of the Western Division was pushed forward with all possible vigor, and in May last the track-layers commenced their work at the harbor of Erie, opening for use successive sections of the road to Waterford, Union Mills and Columbus, and early in December they reached the borough of Warren, a distance of 66 miles.

On all the finished portions of the line regular trains of passengers and freight cars have been run daily from the time of the completion of each section, to the great accommodation of the country traversed and with a fair remuneration to the company.

The surveys of the Middle Division, which had not been completed at the date of the last report, were prosecuted as rapidly as the weather would permit, and resulted in the selection of a route more favorable as to grades and cost, though at the expense of some increase of length than had previously been deemed possible by the most sanguine.

The Board advertised for proposals for grading and bridging this division, a distance of about 82 miles, to be opened at their office in Philadelphia on the 16th of May.

Proposals were received from a very considerable number of contractors, for performing the work by measurement, in short sections, and a

proposition was also presented by Milton Courtwright, a well known and responsible contractor, to perform the whole work for a given sum, and to take a large proportion of his payment in the stock of the company, at par.

The Road Committee of the Board, in conjunction with the engineers of the company, went into a detailed calculation of a number of the most favorable bids, and arrived at the conclusion that the bid of Mr. Courtwright was less in absolute cost than the average of these proposals, and possessing a great advantage over them in the terms of payment, in the absolute certainty as to the whole amount of cost, and in relieving the company from any danger of delay, or loss by the failure of any contractor to finish his sections according to agreement. The contract was, therefore, awarded to Mr. Courtwright, upon the terms of his proposition, by the unanimous vote of a full Board. The wisdom of this arrangement has been fully vindicated by the result. The work has progressed steadily and rapidly in the face of difficulties, both natural and financial, and by the latest information received, there now remains ungraded but forty miles of the whole line of the road, and on this portion a large force is now employed.

The whole length of the road on the line adopted, from Sunbury to the harbor of Erie, is 288 miles. Of this distance, 40 miles from Sunbury to Williamsport, has been completed and in use for several years, leaving 248 miles unfinished at the commencement of the year.

The result of the year's operations has therefore been the completion of the grading and bridging of 200 miles of the road, and the laying of the track on 108 miles of this distance, with the necessary sidings and station houses, leaving of track yet to put down 140 miles, of which 100 miles are now ready for the superstructure.

In pushing the work with the activity that has characterized the season's operations, the Board confidently relied upon being able to dispose of their Canal bonds, at a price not greatly below par, and after these should be exhausted, in being able also to realize from the $3,500,000 of their own bonds, secured by the same mortgage of the whole road as secures the State in a like amount for the purchase money of the Canals, such a sum as would more than complete the whole line.

In this reasonable expectation we have been, to a considerable extent, disappointed. With our utmost efforts we have not been able to dispose of all the Canal bonds, at prices that we have thought ourselves justified in taking. At the close of the fiscal year, on the 1st of January last, all of the Delaware Division Canal bonds had been sold, leaving on hand a large proportion of the others, as will be seen by the statement herein of the assets in the hands of the Treasurer. Since that time all the remaining West Branch Canal bonds have been sold, thus reducing very materially the amount of the floating debt of the company, as it appears in the Treasurer's accounts.

For the $3,500,000 of our own bonds we have been entirely unable to obtain any satisfactory bid, or even to make them the basis of a temporary loan for a sum sufficient to complete the road. Under these circumstances, it is plain that the company must, in common prudence, suspend the work now in progress, and thus disappoint all the hopes of the community for a speedy consummation of this most important enterprise, unless some plan can be devised for converting into available means those securities which are held in more than ample sufficiency for this purpose. Such a result will be greatly to be deplored, as involving the country in serious loss, and in depriving, for an indefinite period, the business interest of the city of Philadelphia, and of a very large portion of the State, of those facilities of intercourse and advantages of trade, from which they have expected so much.

The Board feel, however, that they have not been wanting in their utmost exertions to avert such an unfortunate result. That they were not mistaken in their estimates of the whole cost of the line, when invoking the aid of the State in the passage of the bill of 1858, is proved by the result of the work already accomplished, and the known cost of what remains to be done. The cost has indeed been very greatly reduced below any estimates then made, and the sole difficulty in the way of the speedy opening of the whole line lies in the failure as yet to realize, as was expected, from the securities in hand. If this difficulty can in any manner be removed within the next few weeks, the road will yet be opened for use, throughout its entire length, within the present year.

The Treasurer's accounts show the receipts and expenditures of the company up to the 1st of January, the present year, as follows, viz:

RECEIPTS.

Amount of capital stock paid in	$4,506,920 13
Seven per cent. bonds issued,	594,000 00
Temporary loan	861,271 35
Income from the road	270,984 31
Old assets of the Company	1,738 78
Proceeds of sale of Del. Riv. Canal.	1,775,000 00
Proceeds of sale of N. Branch and Wyoming Canals	1,600,000 00
Proceeds of sale of West Br. Canal.	500,000 00
Interest on bonds	199,787 57
Income from canals	60,167 66
	$10,169,869 80

EXPENDITURES.

For road construction and superstructure	$5,738,024 60
For buildings, land and right of way.	375,240 93
For engineering	280,446 97
For maintenance of way	76,016 49
For equipment	107,252 63
For discount on municipal and other bonds	523,134 11
For interest on stock bonds	656,734 69
Do. on temporary loans	241,402 86
For incidental expenses, salaries, &c.	238,359 98
For piers at the harbor of Erie.	91,403 62
Paid to State Treasurer 75 per cent. of nominal surplus received from canals	281,250 00
Balance	1,560,602 92
	$10,169,869 80

This balance consists of the following items, viz:

Cash	$14,730 78
Bills receivable and amounts due by companies	93,472 35
Bonds of the Wyoming Canal Co	574,000 00
Do. North Branch Co.	346,000 00
Do. West Branch Co.	337,000 00
Do. City of Erie.	7,000 00
Do. Quakake R. R. Co	15,000 00
Stock in Telegraph Company	2,000 00
In hands of agents and balances of the unsettled accounts.	82,686 60
Coal received for tolls	19,411 78
Interest due on bonds	69,301 41
	$1,560,602 92

The company have, therefore, applicable to the payment of their temporary loans, and to the completion and equipment of the road,

The above balance of	$1,560,602 92
The balance unissued of their 7 per cent. bonds	406,000 00
One-half the 5 per cent. mortgage bonds secured upon the whole road	3,500,000 00
Instalments on stock, about.	470,000 00
Total	$5,936,602 92

That these items, if they can be converted into available means, at anything approaching their real value, will be amply sufficient to complete the unfinished line of road, and leave a handsome surplus for its equipment, it is now in the power of the Board to show with absolute certainty. The grading is so nearly finished that there can be no difficulty in arriving at its absolute cost with almost entire correctness, and the cost of superstructure is nearly a fixed sum per mile.

The balance unpaid for the completion of the grading and bridging of the middle division, (part of which is payable in stock,) is. $775,000
The balance, for grading and bridging on the Western division, for work done and to be done, is estimated at. 370,000
Superstructure on 440 miles of road, and ten miles of sidings, at $7,000 per mile. 1,050,000
Engineering, station houses and contingencies 200,000
$2,395,000

The Board are fully satisfied that this amount will cover the expense of all the work yet to be done to complete the entire line of road ready for business.

There was expended upon the line during the last year, about two millions and a half of dollars, a sum, as will be seen, more than sufficient, if provided for the present season, to carry the whole work to a final and successful completion. It is most earnestly to be hoped that a last effort of all the friends of this important enterprise will, before the next annual report shall be presented to you, put this metropolis in railroad connection, wholly over the Pennsylvania soil, with the great lakes which have so long poured their boundless treasures over other improvements in other States, to enrich other cities by a trade that should be ours, but of which we have as yet been almost wholly deprived.

Presented by order of the Board.

WM. G. MOORHEAD, *President.*

Railroad Earnings.

The December earnings of the Central Ohio Railroad were as follows:

From passengers	$15,852 43
" freight	22,559 79
" express	3,116 18
" mails	2,378 70
Total	$43,907 10
And the expenses were	43,113 05
	$794 05

The total earnings of this road for November were $49,569 24; showing a decrease, compared with December, of $5,662 14. The expenses for December were $3,661 96 less than in November.

The January traffic return of the Baltimore and Ohio Railroad is as follows:

MAIN STEM.

From Passengers	$30,767 75	
" Tonnage	183,889 31	
" Mails	8,073 33	
" Express	8,420 14	
		$231,150 53

WASHINGTON BRANCH.

From Passengers	$25,436 31	
" Tonnage	8,093 43	
" Mails	1,000 00	
" Express	1,307 50	
		35,887 24

N. W. VIRGINIA BRANCH.

From Passengers	$1,500 15	
" Tonnage	12,716 05	
" Mails	866 67	
		15,082 87
Total earnings		$282,070 64

The following is a comparison of the revenue of the road for the months of January, 1859 and 1860:

	1859.	1860.
Main stem	$254,431 07	$231,150 53
Washington branch	36,939 48	35,887 24
N. W. Virginia branch	22,830 54	15,082 87
Totals	$314,201 09	$282,070 64
Net decrease January, 1860		$32,130 45

The earnings of the Chicago, Burlington and Quincy Railroad for January were as follows:

	Chicago & Burlington. 210 miles.	Galesburg & Quincy. 100 miles.
Freight	$60,143 96	$11,821 05
Passengers	22,255 96	7,738 58
Mails and miscellaneous,	1,993 33	848 43
Total	$84,393 74	$20,407 96
Total earnings, January, 1860	$104,801 9	
Total earnings, " 1859	83,041 01	
Increase	$21,760 69	

The earnings of the Indianapolis and Cincinnati Railroad for the months of January, 1859 and 1860, show a very handsome gain this year over the same month last year. The earnings compare as follows:

January, 1860	$40,750
Do. 1859	30,384
Increase	$10,366

The following is the January statement of the Illinois Central Railroad Company:

Land Department.

Acres sold in Jan'y 1859	2,390.59 for	$39,386 81
Acres sold prev'sly	1,237,260.55 "	15,735,837 02
Total	1,239,651.14 for	15,775,223 83
Construction Bonds canceled in Jan., 1860	$31,000	
Free Land Bonds canceled	4,000	
Bonds canceled previously,	1,500,500	
Total Bonds canceled up to Jan. 31.		$1,535,500 00
Cash receipts in Jan., 1860		$50,054 22
Total cash and bonds received to Jan. 31, 1859		$3,357,482 22

Traffic Department.

Total receipts in January, 1860		$187,416 66
Do. do. 1859		132,024 80
Increase		$55,391 86

The following are the earnings in detail of the Michigan Southern Railroad, for January this year and last:

	1859.	1860.
Passengers	$43,587 83	$39,822 07
Freight	50,791 91	78,874 55
Mails	4,583 41	4,482 80
Express & miscellaneous,	5,381 58	7,180 05
	$104,344 72	$130,359 56

—making an increase of $26,014 84.

The receipts of the New York and Harlem Company, for January, were as follows:

January, 1859	$90,858 97
Do. 1860	97,016 07
Net increase	$6,157 10

The earnings for January of the Michigan Central Railroad were:

January, 1860	$110,712 29
January, 1859	101,386 50
Increase	$9,325 79

The December earnings of the Panama road were:

December, 1859	$178,250
Do. 1858	135,250
Increase	$43,000

The earnings of the New Jersey Central Railroad Company were:

January, 1860	$75,332 02
Do. 1859	61,145 27
Increase	$14,186 75

Annexed are the earnings of the Milwaukee and Mississippi Railroad in January:

	1860.	1859.
Freight	$23,477 40	$24,296 60
Passengers	9,429 41	12,929 67
Mails, etc.	4,335 42	2,554 15
	$37,212 23	$39,780 42
Decrease		$2,568 19

The traffic of the Great Western Railway of Canada for the week ending Feb. 3, 1860, was as follows:

Passengers	$12,194 68
Freight and live stock	14,638 49
Mails and sundries	1,434 35
Total	$28,267 52
Corresponding week last year	33,304 03
Decrease	$5,036 51

The earnings of the Erie Railroad for the month of January, 1860, were | $351,453 12
Earnings January, 1859 | 309,250 09
Increase | $42,203 03

The receipts of the Grand Trunk Railway of Canada for the week ending Feb. 4, were | $53,529 08
Week ending Feb. 5, 1859 | 87,172 44
Increase | $16,356 64
Total traffic from July 1st, 1859 | $1,631,959 21
Same period last year | 1,355,886 31
Increase | $276,072 90

The following statement shows the business of the Philadelphia and Reading Railroad Company, for the month of January, 1860, compared with the corresponding month of last year:—

	1860.	1859.
Received from coal	$96,168 50	$86,033 58
Do. merchandise.	41,502 01	36,298 82

52 BEEKMAN STREET, NEW YORK,
FOR THE SALE OF
SHEET BRASS,
COPPER AND BRASS WIRE,
BRASS AND COPPER TUBING,
COPPER RIVETS AND BURS, ETC.
Manufactured at WATERBURY, Conn.

FOR RENT,
AT
Rochester, Beaver Co., Penn.

THE SPACIOUS ESTABLISHMENT heretofore occupied by Messrs. KIRK & RHODES, for the building of **RAILROAD CARS.**

This Establishment is now offered *on lease*, for MANUFACTURING PURPOSES. It is admirably adapted to the construction of RAILROAD OR CITY CARS, STEAM ENGINES, AGRICULTURAL IMPLEMENTS, carriages, omnibuses, cabinet ware, bedsteads, chairs, buckets, barrels, kegs, etc.—or for *Planing machines*, the manufacture of doors, window sash, window blinds, etc., or for the manufacture of *stoves*, and all other *foundry products*; and particularly for *malleable Iron*, in all its forms.

This location cannot be surpassed, as will be perceived by reference to the MAPS of Ohio, Pennsylvania, and the Railroads of the West—having the *facilities* of the OHIO River, with the descending navigation of the Monongahela and Yohiogany from the South, the Alleghany and the Beaver from the North—the terminus of three canals, viz. from Erie, from Cleveland, and from Portsmouth—also 24 *Regular Trains, daily, of Railroad Cars*, connecting with *all the Roads of the West*.

The buildings and appurtenances here offered, occupy a block, 238 feet by 230, or 54,740 superficial feet, facing the OHIO River on one side, and the *Railroad Stations* and *Tracks*, on two other sides. The steamboat landing, canal boat landing, railroad station, ticket offices, telegraph offices, etc., all within 100 yards of the premises.

The principal building, main wing, smith shops, engine house, kiln-dry, foundry, etc., are all *built of stone*. The principal building is three stories high, front 238 feet, main wing 203 feet, paint shop 175 feet, two foundries 50 by 80 feet, (and two cupolas), smith shops, engine house, etc., all in the hollow square.

A 60 horse Steam Engine communicates *power* to various parts of the establishment, and eight-inch cast iron pipes conduct *spare steam to warm the whole*.

The premises are now ready for occupancy.

ROCHESTER, or "BEAVER CITY," is now the *nucleus* and *centre* of extensive manufacturing, mining and commercial operations, and will soon become *a city* of note,—showing a large and dense population. It is now the natural, and acknowledged *Railroad centre*, steamboat landing, and canal boat terminus, *for ten neighboring villages*, like ten wards of a city—all in sight, within three miles of a common *centre*, and having a population of fifteen to twenty thousand—more than twenty churches, fifty stores, schools, mills, and manufacturing establishments. For particulars, address

M. T. C. GOULD,
Rochester, Beaver Co., Pa.

Notice to Contractors.

ENGINEER'S OFFICE SELMA & GULF R. R. Co.,
Selma, Ala., January 30, 1860.

SEALED PROPOSALS FOR THE CLEARING, GRADUATION, MASONRY and BRIDGING of the First Division of the Selma and Gulf Railroad, will be received at this Office until the 6TH DAY OF MARCH next.

The portion of road now offered to contract extends from Selma southward to the north line of Monroe County, a distance of about 40 miles, embracing a variety of work, and passing through a healthy country, which is always accessible from several points on the Alabama River in from six to twenty-five miles. All the work in this Division is offered to contractors, except the large Bridge in Section 1, at Selma, and the graduation of a few light sections, let to planters on the line of the road.

Profiles, Plans and Specifications of the work may be seen at the Engineer's Office, after the 10th of February.

For further information, apply to the undersigned, at his office, or on the line of the road.

By order of the Board of Directors.
GAVIN B. YUILLE,
Chief Engineer S. & G. R. R.

HANNIBAL & ST. JOSEPH R. R.
BONDS.

SEALED proposals will be received until Saturday, the 25th instant, at noon, for the sale to the Trustees of the Sinking Fund, of $22,500 worth of the Mortgage Convertible Bonds of the Hannibal and St. Joseph Railroad Company, dated July 1, 1858, and payable 25 years after date. Proposals may be addressed to H. H. HUNNEWELL, Boston, and indorsed "Proposals to Trustees."

H. H. HUNNEWELL,
SIDNEY BARTLETT,
H. P. KIDDER,
} Trustees.

BOSTON, Feb. 2, 1860. 316

WILLIAMS & PAGE,
3m52 44 Water st., Boston.

Railroad Spike Comp'y,

SUCCESSORS TO PORTER, ROLFE & SWETT,

MANUFACTURERS OF

Railroad Spikes and Chairs

AND BOAT SPIKES.

PITTSBURG, PA.

THE Spikes are made on Swett's Machines, being largestunder the head, where the greatest strength is required, will stand drawing and redriving, bending double cold, and for regularity of shape and finish are unequalled.

The **Patent Wrought Iron Solid (continuous) Lip Chairs,** weighing from 7 to 16 lbs., are rolled exactly to fit any width and thickness of Rail; this new pattern, for strength, durability, convenience of adjusting to rail, combining all the advantages of other patterns and sold at a low rate, commends it to general use.

Having enlarged our Works with a New Rolling Mill, making Iron exclusively for Spikes and Chairs of Lake Superior and Refined Charcoal Metals, our facilities for promptly supplying A GOOD ARTICLE are unsurpassed.

JOSEPH DILWORTH, President.
D. W. C. BIDWELL, Secretary.

STEAM PUMPS,

WORTHINGTON'S PATENT,

SPECIALLY adapted for supplying railroad stations, and as stationary or portable fire engines for protecting Depots, Car Houses and Machine Shops. **A Pump of entirely new principle,** recently patented, is offered to Railroad Engineers as the only independent feed pump suitable for Locomotives. Also, simple, accurate and reliable **Water Meters,** for measuring water supplied to boilers and tanks, also for measuring oil.

Percussion Water Gauges, superior to glass gauges or gauge cocks, and infallible in giving the correct level of water.

12 **Jersey City, N. J.**

THE Cheapest and most DURABLE ROOFING IN USE. Sent to any part of the country with *directions for application.*

GUTTA PERCHA CEMENT ROOFING.

SPECIMENS and *references* can be seen, and any desired information obtained on application, by *letter* or in *person,* at our OFFICE, 510 BROADWAY, N. Y. (Opposite the St. Nicholas Hotel).
JOHNS & CROSLEY.

DELAFIELD & BAXTER'S,
Late OGDEN & DELAFIELD,
ROSENDALE CEMENT.

WE are prepared to enter into arrangements for supplying our CEMENT for public works, or other purposes. We **warrant it equal in every respect** to any manufactured in this country. It attains a great degree of hardness, sets immediately under water, and is a **superior article** for masonry coming in contact with water, or requiring great strength.

For sale in tight barrels, well papered, on application at their office, by **DELAFIELD & BAXTER,** 104 Wall st.

The above CEMENT is used in most of the fortifications building by government. 45

Rosendale Hydraulic Cement.

THE NEWARK AND ROSENDALE CEMENT COMPANY are now receiving **fresh from the Mills** their approved ROSENDALE CEMENT, warranted **pure** and **free from quick lime,** and which has given such **general satisfaction** in the various government and other public works in which it has been used. Purchasers and shippers should be careful to get the **genuine ROSENDALE CEMENT,** branded "NEWARK AND ROSENDALE," "H. WILDE." This Cement does not swell and burst the hoops when stored in warm climates. It is packed in tight **kiln dried barrels,** and is specially adapted for safe shipping on long voyages. Terms reasonable, which may be known by addressing,

JOHN H. STEPHENS, President, Newark, N. J., or
HENRY WILDE, Secretary, 90 Wall st., N. Y.

THE LAWRENCEVILLE MANUF'G CEMENT COMPANY,
OFFICE 96 WALL ST,
NEW YORK.

THIS Company manufacture **ROSENDALE HYDRAULIC CEMENT** of a superior and uniform quality, and are constantly receiving it **fresh** from their Works at Rosendale. Particular attention paid to grinding **fine,** and packing in superior casks. We warrant it to set under water, and attain a hardness excelled by no Cement manufactured. It has met the approval of Government, and we are at present supplying the fortification now in course of erection, together with Water Works and Public Buildings.

For sale upon favorable terms by addressing.

WM. N. BEACH, President.
CHAS. E. LAWRENCE, Sec'y.

HOFFMAN'S
ROSENDALE CEMENT,
OFFICE, 93 WALL ST., NEW YORK.

THE LAWRENCE CEMENT COMPANY are prepared to receive and execute orders for their Cement, to any extent that may be required. They would particularly call the attention of purchasers to the distinguishing brand of their manufacture, viz.: **HOFFMAN'S ROSENDALE CEMENT.** This seems to be necessary, as they have established a reputation for the superior quality of their Cement, and there are various other brands offered, as "Rosendale" Cement. It has the unqualified approbation of the most eminent Architects and Engineers, being used in almost every department of the Works under Government. It is put up in the most careful manner, each barrel being well lined with paper, and will be delivered on ship board, in this city, on the most favorable terms. Particular attention given to shipping orders, and Freight obtained on the best terms.

M. W. WOODWARD, Secretary.

Brooks and others: also the **Law of Contracts,** by W. C. GLEN, Barrister, all in 2 vols. Price £4. ATCHLEY & Co., 106 Great Russell Street, LONDON. 3m47

LILLIE'S
Chilled and Wrought Iron
SAFES.

OVER 40 of these Safes are now in use in New York City Banks; while 235 Bank Safes have been sold within two years to the different Banks throughout the Union.
Second hand Safes for sale, that have been taken in exchange for LILLIE'S Chilled and Wrought Iron Safes.

HOWE'S
IMPROVED STANDARD
SCALES,
STRONG & ROSS PATENT,

REQUIRE no Pit. Have no Check Rods. Will weigh when out of Level. Receive all friction and wear on BALLS instead of knife edges, as in other scales. No jarring of the platform affects the working of the Scale.
Every Scale warranted to give entire satisfaction or taken back.

American Railroad Journal.

PUBLISHED BY J. H. SCHULTZ & CO. No. 9 SPRUCE ST.

New York, Saturday, March 3, 1860.

Cairo and Fulton Railroad of Missouri.

This company have recently issued a report, bearing date January 1, 1860, giving a detailed statement of its organization, history, land interests, financial policy and condition.

By act of Congress, approved Feb. 9, 1853, the right of way through the public lands was granted to the States of Arkansas and Missouri, for the construction of a railroad from a point on the Mississippi river, opposite the mouth of the Ohio, in the State of Missouri, via Little Rock, to the Texas boundary line, near Fulton, in Arkansas, with branches from Little Rock to the Mississippi river and Fort Smith; with the right to take necessary materials, earth, stone, timber, etc., for its construction. The right of way not to exceed 100 feet on each side of the road. And for the purpose of aiding in making the road and branches within the repective limits, there was granted to each State every alternate section of land, for six sections in width on each side of said road and branches, to be disposed of only as the work progressed, and to be applied to no other purpose. The usual provisions and reservations are embodied in the act. In the disposal of the land, only 120 sections, and included within a continuous ength of 20 miles of the road, could be sold until the completion of the said 20 miles. For the second 20 miles a similar amount, and so on, until the completion of the whole road; but if not completed within ten years, no further sales to be made, and the land unsold to revert to the United States.

This act provided a basis for the construction of a line of railroad from the Southern terminus of the Illinois Central, at the mouth of the Ohio, to the boundary of Texas.

On the 24th of Feb., 1853, a General Railroad Law was passed by the Legislature of Missouri, providing for the formation and management of railroad companies, by articles of association, to be filed in the office of the Secretary of State. Under this law, individual stockholders are made liable for the debts of the company, to the amount of their unpaid subscriptions; and the company to a certain extent for labor, on failure of its contractors to pay. The manner of electing directors, their powers and duties, and other provisions of law concerning the administration of the affairs of such corporations, are embodied in this law.

The Cairo and Fulton Railroad Company was organized under this law, and the articles of association were filed in the office of the Secretary of State of Missouri on the 12th of January, 1854. The same to continue 500 years. The amount of capital stock of said company, including the cost of constructing the road, the right of way, motive power and other appurtenances for the completion and running of said road, to be 60,000 shares, at $25 each share—making $1,500,000. There were to be thirteen directors to manage the affairs of said company. The road to commence at a point on the Mississippi river, in the State of Missouri, opposite the mouth of the Ohio, taking its course through the counties of Mississippi, Scott, Stoddard and Butler, as near as could be ascertained, to the most eligible point on or near the State line of Arkansas; then to connect with the line of the Cairo and Fulton Railroad Company, incorporated by the Legislature of Arkansas, on the 12th of January, 1853—the length of the contemplated road being 80 miles, or thereabouts.

In anticipation of the transfer of the donated lands to the company, and in order to make the grant available, the company thus organized proceeded to a survey of the contemplated line of their road, of which a report was made to the directors in 1855, and by them approved. The formal transfer of the lands to the company was made by act of the General Assembly, approved Feb. 20, 1855, in which it was declared that the company was fully incorporated, and entitled to all the benefits, and subject to all the liabilities imposed by the General Law. The company to be styled the "Cairo and Fulton Railroad Company of Missouri." By this act, all the lands donated by Congress to the State of Missouri for the construction of a road between the termini above mentioned, were vested in this company, subject to the conditions contained in the act of Congress, granting them to the State. The company was also authorized to issue their bonds in such sums as they deemed proper, at rates of interest not exceeding 7 per cent. per annum, payable semi-annually, the principal payable at such time and place as they might designate; said bonds to be secured by mortgage of said lands, with authority to make the bonds convertible into land or stock of the company within such periods as they might prescribe. The faith of the State is in no manner pledged for the redemption of the bonds or any part thereof. In case any of the lands shall remain unsold at the expiration of ten years after the completion of the road, the same shall be offered at public sale annually until the whole is disposed of, except such as may be required for the uses of the company in sustaining and operating the road. The road to be exempt from taxation until completed and in operation, and a dividend declared, when the road-bed, buildings, equipment, etc., at their actual cash value shall be subject to taxation, at the rate assessed on other real and personal property of like value. Provision is also made for ascertaining the value of the company's property, and a penalty imposed for the non-payment of the assessment. Should the company fail to declare a dividend for a period of two years after its completion, it is to be no longer exempt from the payment of said tax, or from the forfeiture and penalties imposed,

According to the survey made, the length of line, to which this grant is applicable, is about 77 miles. A full compliance with the terms of the grant, would have brought the company 295,680 acres. But, owing to the operations of the law of Sept. 28, 1850, granting to the States the swamp lands within them, and their transfer to the counties, nearly all the valuable lands of the State have been appropriated; so that only 63,058 acres have been certified under this grant. This deficiency was, however, supplied by aid of acts of the Legislature, authorizing stock subscriptions by counties, payable in lands, or the avails of them. The authorities of several of the counties most to be benefitted by the construction of the proposed road, passed orders, under a popular vote of instruction, making subscriptions to the capital stock of this company payable in full in lands at one dollar per acre. Under this arrangement,

Stoddard	County	subscribed	$150,000
Dunklin	"	"	100,000
Butler	"	"	100,006
Scott	"	"	50,000
Ripley	"	"	19,500
			$419,500

—bringing to the company that number of acres of valuable land, so situated as to be made readily marketable at high prices, by the construction of the road. The county of Stoddard also grants an additional 100,000 acres, in consideration of the construction of a branch to its county seat, Bloomfield, or the touching of that point by the main line. Patents for a greater portion of these lands have been issued direct to the company from the government, thus creating a perfect title in fee simple.

By an act of the General Assembly, approved Nov. 4, 1857, all the land selected under the act of Congress of Sept. 28, 1850, was declared "to vest in full title and belong to the counties in which they lie;" consequently, the titles to lands derived from the counties after Nov. 4, 1857, are in patents from them—not the State, as formerly.

In entering upon the work of constructing their road, the company sought appropriate means of making their landed resources available, as a round basis of credit, looking to their gradual sales for ultimate payment. To sell the lands first would have been to sacrifice them, and defeat the object. To use them as a basis of credit, and to sell them only as the progress of the work created a demand for them, and give them a higher value, was deemed the true policy. The company having full authority given them by the act of Feb. 20, 1855, to use them in this way, provided for an issue of bonds to the amount of $1,600,000. A form of the bond is given; also a copy of the deed of trust, for securing the bonds thus issued, which was duly executed and recorded in the proper counties. These bonds are dated Oct. 1, 1857, have 25 years to run, are for $1,000 each, bearing 7 per cent. interest, payable semi-annually, in New York, in April and October. They are secured, both principal and interest, by a mortgage upon 400,000 acres of public lands granted by original patent to the company, by the United States and the State of Missouri, also upon the road and its appurtenances, subject however, with respect to the road and its appurtenances, to a prior lien in favor of the State, to secure the payment of such bonds or obligations as it may from time to time issue to the company, to aid in the construction of the road—the amount of such bonds not to exceed the sum of $650,000, bearing interest at the rate of 6 per cent. per annum.

Subsequently, and in accordance with the provisions of the trust deed, for the better securing the interest on the bonds issued, by setting apart securities, and creating a special fund for that purpose, a Supplementary Trust Deed was executed, conveying to the same trustees named in the original deed, all the lands heretofore acquired, or hereafter to acquired, by the company, under any grant of the United States, the State of Missouri, or of any county, town or corporation in the State, not included in the deed of trust. The lands thus conveyed, are denominated "Interest lands." The trustees have power to dispose of them by such form of deed or contract, in such quantities, at such prices, on such time and terms of payment, at such rates of interest, for cash, or interest warrants of bonds of said railroad company, as they may determine; to issue scrip in payment of coupons, and to provide for the redemption thereof in cash or the sales of lands; to make sale of, or mortgage any of the lands, for the payment of the interest coupons, if deemed necessary to secure the payment of the same, and protect the credit of the company. All moneys accruing from the sale of these lands to be a reserved fund, to be applied: 1st, to the necessary expenses attending the execution of the trust; 2d, to the payment of on the 1,600 bonds previously issued; 3d, to the redemption of the principal of any such bonds, whenever a surplus shall remain applicable to that object. The declared object of this trust being to secure the punctual payment of the interest on the bonds, and to confer upon the trustees all necessary powers to that end.

The lands made subject to these trusts are as follows:

Received from the United States, under the act of 1853	63,058.66 acres.
Subscribed by Counties	419,500 "
Stoddard Co., for br'ch to Bloomfield	100,000 "
Total quantity	582,558.66 acres.

Of this quantity, the title of the company is perfect to 465,652.41 acres. The title to the remaining 116,906.65 acres is not yet complete, owing to a portion of them not having been patented by the United States to the State of Missouri, through pressure of business at the General Land Office; and to delays in adjustment of titles in the counties, from which under law the titles are now to proceed.

The company has recently received schedules from Washington, for about 6,000 acres of lands in Mississippi Co., known as "Unsurveyed Territory." It is expected that enough of these lands will come within the meaning of the grant to this company (with 15 miles of its line,) to bring the aggregate quantity of its lands up to 600,000 acres, all of which pass to the trustees, by operation of the two deeds, as security for the redemption of the 1,600 bonds, in 1882, and the interest as it accrues.

The lands granted by the government are within fifteen miles of the line, and are of that character which forbade their appropriation, even under the free license of the law of 1850—being emphatically, uniformly "fit for cultivation." The lands derived from the State by county subscriptions were selected with reference to their location, quality and value, more than for their proximity to the line of the road, and are among the best in Southeast Missouri.

The railroad of this company commences at Bird's Point, Mo., opposite Cairo, Ill.—that being the point of departure fixed by the act of Congress. It passes through the counties of Mississippi, New Madrid, Scott, Butler and Ripley, to the Arkansas line.

In Mississippi and New Madrid Counties, the company has 15,061.26 acres of land, derived from the government. In Scott County, the quantity received from government is 13,510.25 acres; from County subscriptions, 50,000 acres—being a total of 63,510.25 acres. This county lies north of Mississippi. The road runs about 15 miles through the southern portion of it, leaving it at the crossing of the Castor river.

The road is constructed and equipped to Ogden, or "Big Prairie," 26 miles from Bird's Point, at the crossing of the Great Road that leads from Cape Girardeau and Benton to New Madrid. As the road passes out of Scott County, it approaches very near the northwest corner of New Madrid Co. Castor river is the west boundary of Scott Co. To that boundary the grading is done. This brings the work to the 36th mile. On the west bank of the Castor, the road enters Stoddard Co. The quantity of lands derived from the government in this county is 25,616.45 acres; County subscription and grant, 245,000 acres—being a total of 270,216.45 acres. The road runs 25 miles through this county to the St. Francois river, the boundary between it and Butler. The grubbing and clearing is nearly complete to the 52d mile. The road passes about 8 miles south of Bloomfield. Dunklin Co. lies south of the line of road, between Pemiscott and St. Francois river. The lands lying in this county enuring to the company from the government, amount to 5,476.11 acres, and from the State upon the County subscription, 100,000—in all 105,475.11 acres. On the west side of the St. Francois river, the line passes through Butler Co. about 11 miles, to the Arkansas State line. In this county the company received from the government 3,534.57 acres; and by State patent on County subscription, 100,000—in all, 103,534.57 acres. Ripley County, lying beyond, contains 206.02 acres granted by Congress; and 19,500 subscribed by the county—being 19,706.02 acres.

The resources of the company relied upon for the construction and furnishing of the road are: 582,558.66 acres of land, worth, at the average selling price, $5 per acre, $2,912,793.30, pledged for the payment of the 1,600 bonds issued, and are set down at $1,600,000, or about $2.70 per acre. Individual stock subscriptions, 33,691 shares, of $25 each, $842,275. Six per cent. State of Missouri bonds granted to, and drawn by the company, $650,000, to be paid by the company at maturity, $250,000 in 20 years, and $400,000 in 30 years, and the accruing semi-annual interest.

These resources have been made available as follows: Bonds delivered on iron contracts, $162,000; sold otherwise, $158,000; cash, net proceeds of State bonds sold, $539,969.50; cash on stock subscriptions, $90,168.75.

The expenditures down to the close of 1859, were as follows:

Preliminary expenses, surveys, etc.	$104,704 43
Grubbing and clearing on 45 miles	12,628 61
Grading, 35 miles	299,032 24
Pile bridging and trestle work on 26 miles	6,782 30
Superstructure for 31 miles	325,333 41
Equipment for 26 miles, now operating, including shops and machinery	54,047 34
Buildings, wells, etc.	8,218 98
Lands, examining, listing, etc.	24,531 50
Right of way, fencing, etc.	11,889 45
Being a total amount of	$847,168 26

The discounts on bonds sold, with interest, commissions, etc., amounted to $128,810.36.

The equipment of the road consists of one first class locomotive, one switching engine for construction, two first class passenger cars, one baggage car, and twenty-four freight and construction cars. The locomotives are from the Rogers' Locomotive Works, of Paterson, N. J. The passenger cars were furnished by Harlan, Hollingsworth & Co., of Wilmington, Del.; and the burden cars by the Humphreysville Manufacturing Co., of Seymour, Ct.

The quantity of iron rails purchased, is 2,539 tons, all of which, with the expenses of transportation, is paid for. Twenty-six miles are laid and in use, with sufficient to reach the thirty-first mile, with chairs and spikes for the same purpose. The iron is of American manufacture, furnished by the Lackawanna Iron Co., at Scranton; the Cambria Works at Johnstown; and the Montour Works at Danville, Pa.

At the Arkansas boundary, this road connects with the Cairo and Fulton Railroad of that State; which, crossing White river near Jacksonport, Arkansas river at Little Rock, and Red river at Fulton, reaches the Texas line in a distance of 301 miles from the terminus of the Missouri road. The survey of the entire line has been completed, and some progress made in grading north of White river. This company also have a grant from Congress of 1,116,000 acres of land; and has ordered the issue of $5,000,000 of 7 per cent. bonds, secured by a mortgage of all its lands, franchises and property. This deed is executed and recorded, and the bonds ready for execution and use, and measures are in progress to secure means for re-commencing active operations. Success in negotiating these bonds, however, depend in a measure upon the success of the Missouri company in building their road, which is its northern outlet. The Arkansas company have a direct line, gentle grade, and no heavy work. At its southern terminus it connects with the Texas roads. To the Bay of Galveston is 318 miles; and about 117 miles from Galveston, northerly, are in operation. On the Memphis, El Paso and Pacific road, which proceeds from the terminus of the Arkansas road in a westerly direction, 50 miles are already graded. The distance to El Paso is 787 miles. The State of Texas grants to this road 10,204 acres of lands, and $6,000 in cash per mile of road. Thence to San Diego is but 800 miles, unsurveyed and unprovided for by government or State aid.

Florida Central Railroad.

The last cargo of 1,000 tons of iron to complete the Central road has arrived, and we are informed by the Superintendent, Mr. Buckman, that in six weeks' time the road will be complete to Lake City, from which point the Pensacola and Georgia Company will immediately commence laying down the iron towards Tallahassee.—*Jacksonville Republican.*

Milwaukee and Mississippi Railroad.

The annual meeting of the stockholders of this company was held at Milwaukee on the 14th inst., at which the report of the company for the fiscal year ending December 31, 1859, was presented. The report is made in accordance with the requirements of the General Laws of the State, giving in minute detail the results of the operations of the road for the past year, and the condition of the financial affairs of the company at its close.

The earnings of the road were:

From passengers		$210,973 05
" freight		512,318 25
" mails and rents		23,207 48
		$746,498 78

And the expenses were:

Repairs of road	$93,256 36	
" locomotives	36,903 86	
" cars	27,537 53	
" buildings	13,830 37	
" bridges	6,950 50	
Fuel	64,970 79	
Oil and waste	11,699 15	
Train services	21,626 91	
Station "	77,480 90	
Engineers and firemen	26,434 50	
Salaries and expenses of officers and directors	15,772 13	
Taxes	7,152 54	
Law expenses	5,868 08	
Damages to property	4,814 67	
" persons	475 00	
Mississippi river ferry	4,256 20	
Miscellaneous	18,921 50	
		438,950 99
Leaving as net earnings		$307,547 79

The interest on the funded and floating debt was as follows:

On 1st mortgage bonds	$229,480 00
" 2d " "	60,000 00
" 3d " "	11,860 00
" City bonds, secured	21,000 00
" " " unsecured	23,400 00
" Unsecured bonds of the company and floating debt	123,083 0
Total interest	$468,823 05
Sinking fund	53,500 00
Operating expenses, as above	438,950 99
Total expenses and interest	$961,274 04
Deduct earnings, as above	746,498 78
Leaving deficiency for current year of	$214,775 26

The receipts of the company from all sources during the year were | $876,653 21

And the expenditures were:

Operating expenses of previous year	$87,357 83	
Do. current year	317,276 43	
Interest on 1st mort. bonds	134,720 00	
" 2d "	50,150 00	
" 3d "	7,820 00	
" City, 7 pr. ct.	630 00	
" Floating debt	11,882 51	
Redemption of mort. bonds	70,000 00	
Bills payable and scrip	71,541 89	
Real estate	5,022 50	
Right of way, etc.	11,542 39	
Warrants outstanding, etc.	3,551 24	
Other companies for bal'ces	76,898 96	
For steamer	11,897 60	
		860,291 35
Leaving a balance in hands of—		
Agents and other compan's.	$4,081 48	
Pay-master to pay bills	5,837 47	
Treasurer	6,442 93	
		$16,361 86

Appended to the report are a number of tables, in which the business of the past year is compared with the year previous. These tables show a loss of revenue, as compared with 1858, of $136,687.24—the decrease in freight earnings being $45,581.95; and in passenger earnings, $94,832.88. The increase of earnings from rents, transportation of the mails, etc., being $3,727.59. There was an increase of revenue from freight traffic in 1858 over 1857 of $87,980.44. Of the revenue derived from freight traffic in 1859, $388,581.02 is way or local, and $98,262.67 through; the balance is made up of express, rents of Milwaukee and Watertown Railroad, and miscellaneous. The local freight is the only encouraging feature exhibited by the operations of the road. The decline in the passenger traffic is marked, and proves quite conclusively that there has been no revival of business in the section traversed by this road. The decrease in the lumber traffic of over three millions of feet compared with 1858, when there was a decrease as compared with 1857, of about seven millions of feet, goes to confirm the same thing. There was a decrease in the number of way passengers in 1858, as compared with 1857, of 44,064; and in 1859, as compared with 1858, of 19,320. There was also a decrease of through passengers in 1858, compared with 1857, of 11,142; and of 1859, compared with 1858, of 12,331. The decrease in revenue from through passengers in 1859, compared with 1858, is $61,073.79; and compared with 1857, is $74,986.85.

A comparison of the operating expenses of 1859 with the expenses of 1858, shows a decrease in the aggregate of only $4,291.50; yet, an examination of the items exhibits a steady decrease in the ordinary expenses, as follows: in fuel, $17,284; engineers and firemen, $4,125; train service, $6,342; oil and waste, $3,076; station service, 9,528; stationery and printing, $1,336; traveling agencies and advertising, $8,081, and of salaries and expenses of directors and officers, $1,164. Where the expenses have increased, it has been by adding to the value of the property or in unavoidable expenses, such as: repairs of road, $16,910; locomotives, $6,054; damage to property, $1,364; repairs of buildings and improvements, $9,216; miscellaneous, $3,771; repairs of bridges, $6,950; ferry, $1,700, and law expenses, $5,868. There was an increase of service performed by locomotives of 9,600 miles. The law expenses are mainly caused by the embarrassed financial condition of the company. The steam ferry, at Prairie du Chien, across the Mississippi river to McGregor, in Iowa, was purchased to give the road business, and to put the company on par with other lines whose boats touch at McGregor. The apparent debt of $1,256 against the ferry, is the balance of the account of expenses kept with it, without giving it any credit for the grain and other business it has brought to the road. 425,222 bushels of wheat, and 14,674 barrels of flour, were shipped from Prairie du Chien during the year, and the larger portion was delivered to the road by the steam ferry boats. This ferry was purchased at a cost of sixteen thousand dollars, which was indispensably necessary in order to secure the business of Northern Iowa, finding its market at McGregor.

The liability of the company to the city of Milwaukee for the $234,000 of its 10 per cent. bonds, and for which stock was issued to the city, is represented in the Capital Stock account. The

same is true of the $767,800 of farm mortgage bonds, issued in connection with the farm mortgages negotiated by the company.

The floating debt as shown by the report, on the 31st Dec., 1859, including mortgage coupons and sinking funds, is $862,378.77, and consists of the following items:

Warrants outstanding	$8,669 01
Divid'd certificates and unpaid divi'ds.	3,534 62
Scrip	542 44
Debts payable, including $61,887.94, due to men	89,630 21
Bills payable	55,720 91
Unpaid sinking funds	107,000 00
" mortgage interest	144,480 00
" insecured "	157,055 50
Construction bonds	155,500 00
Credits to mortgagors	140,246 08
Total	$862,378 77

The plan adopted of funding the floating debt has not been carried out, except to a small extent. The creditors of the company in the main refused to accept the third mortgage bonds, so called, and the directors, in justice to those who had taken them, ceased their efforts in view of the declining business of the road, making it doubtful as to their ability to carry out the scheme.

The income account exhibits a debit against the company on the business of the year, and balance of last year, of $226,912.96. The amount of road mortgage interest due on the 31st day of December, 1859, is $144,480, and the amount of the sinking funds due is $107,000; to which may be added the mortgage interest falling due January 1, 1860, amounting to $38,740. The report says:

Under so discouraging a statement, it is evident that without a vigorous effort, or an arrangement preventing competition, or a revival of business, the road cannot long be retained by the stockholders, and it is submitted to you whether it is not advisable, under the circumstances, to let the trustees of the sinking fund and second mortgage bonds enter into possession, under an arrangement, or with the understanding that he shall forbear a foreclosure while there is a reasonable prospect that the net earnings will pay up all the mortgage interest now due, within the next two years. The advantage of such an arrangement would probably be to prevent a foreclosure, lessen the law expenses and litigation of creditors, and give the company time to devise a plan for the creditors, stockholders, and third mortgage bondholders, to extricate the company from its present embarrassed condition. If operated in harmony with the direction and stockholders, its expenses might be reduced, while the earnings would not be lessened.

The directors are not without hope of yet being able to make arrangements with competing lines to prevent competition, which would give better rates, and then, with a slight revival of business, the earnings would be greatly increased, while the operating expenses would be less.

During the year, the White-Water Bridge, of 110 feet span, was completed, and timber prepared for ten others; 4¼ miles of track were relaid with new iron, and 12,500 new cross-ties put under old iron. The number of rails taken up and repaired during the year, was 6,619. The old ties between Milwaukee and Madison, and between Milton and Janesville, are very much decayed, and will require renewing as fast as the means of this company will warrant. The rails, also, in consequence of the failure of the ties, have given out much faster than they otherwise would.

The track between Milwaukee and Eagle, 36½ miles, was laid in 1850 and 1851; from Eagle to Janesville, 35 miles, in 1852; from Milton to Stoughton, 18 miles, in 1853; from Stoughton to Madison, 16 miles, in 1854. On this portion of the road only 18 miles of iron has been renewed—leaving 84 miles which has been in use an average of eight years. Large expenditures must therefore be incurred for the next few years, in order to keep the track in condition for safe and economical use.

The whole length of road in operation is 234.41 miles of single track. No double track. Side track, 28.78 miles.

The number of miles run by passenger trains was 224,980; by freight trains, 247,286; by wood and repair trains, 107,219—total miles run, 579,485. The number of through passengers was 12,598; way passengers, 123,761. The amount of freight transported over the road was 160,431 tons.

The equipment of the road consists of 32 first class and 10 second class locomotives; 30 first class and 3 second class passenger cars; 12 baggage and post office cars; 411 covered freight, 107 platform freight, and 105 construction cars.

General Statement.		Dr.
Capital stock—amount paid in, including $234,000 City bonds, and $767,000 Farm mortgages		$3,686,612 66

Wm. Taintor, *Secretary.*
Chas. H. Williams, *Treasurer.*
A. G. Miller, Jr., *Auditor.*
John J. Hill, *Register* and *Transfer Agent.*

Journal of Railroad Law.

Proof required as to Defendant's being the sole probable cause of the injury.

The case of Sheldon *vs.* Hudson River Railroad Company illustrates the requirements of the law as to the proof necessary to entitle the plaintiff to a verdict in an action to recover damages against a railroad corporation, in reference to showing that the accident happened by the means of the defendants, and *could not have happened otherwise.*

The plaintiff in this action owned a mill situated about 67 feet east of the Hudson River Railroad track, at Tarrytown. On the 7th of February, 1852, it was destroyed by fire communicated, as the plaintiff claimed, by the sparks from the defendant's locomotives, by reason of the negligence and carelessness in constructing the engine, as well as in managing and conducting the same. Two of the company's trains passed the place about the middle of the day on which the fire occurred. A down train which passed at one o'clock P. M., and an up train which passed at 15 or 20 minutes past two o'clock P. M. It was claimed that the fire was occasioned by the down train None of the witnesses examined at the trial saw the fire sooner than a period of time between 15 and 20 minutes past 2 o'clock in the afternoon. The conductor of the up train testified that when he passed it going up it was on fire.

The judge at the trial ordered judgment in favor of the defendants without allowing the cause to go to the jury. From this judgment of non-suit the plaintiffs appealed to the general term. The decision upon the appeal was as follows:—

Brown, J.—At the time the accident occurred which is the subject of this action, the defendant was in the lawful and rightful use of its road, operating its trains in the usual and customary manner by means of locomotive engines. It was doing just what it was created to do, and just what the law authorized it to do, and if it was done with due care and circumspection, and with a due regard to the rights of others, it incurred no special responsibility. For if it could not employ fire to generate steam as a motive power, it could not fulfill the end of its being. If the nature of the enterprise in which it was engaged, was in any degree hazardous to the property of others in the vicinity of the road, it was not responsible for that hazard further than as it imposed upon the company the duty of greater care and caution and skill in the conduct of its business. Travel and transportation by railway has become one of the necessities of human life, and those who own or erect buildings in the vicinity of such structures must be content to have their share of the hazards, if any, incident to the business. These observations are made to show that in seeking to render the company liable to this action for the destruction of his mill, the plaintiff must do what must be done by every other plaintiff against every other defendant in a similar action—show that the act or omission, of the defendant, and also

that such act or omission was a negligent one. It is not enough for him to show that the defendant uses fire to generate steam; that the locomotive engines running upon the road occasionally emit sparks of fire and cinders; that this mill was within 67 feet of the track of the road, with some of the west windows and those next the road left open and carpenters' shavings and other combustible matter upon the floor; that no business was carried on at the mill, and no one employed about it at the time; that the west wind was blowing stiffly when the fire was discovered, and that the company's trains passed to and fro several times each day. These circumstances are quite material and essential, but without something in addition they do not establish the principal fact alleged in the complaint, because they do not exclude the idea that the fire may have originated in some other source. Standing alone, these circumstances do no more than make out a possible case, that possibly the fire proceeded from the defendants' locomotives. It is not enough for the plaintiff to show a possibility that the fire was communicated to the mill by sparks emitted by the defendants' locomotives. He cannot recover upon a possibility. Even if the evidence went farther and brought the fact sought to be proved within a probability, still the plaintiff must fail: because, to justify a verdict, the law requires, not positive proof it is true, but such proof as will *leave no reasonable doubt* of the existence of the fact upon which it must rest. The rights of property, and all claims to its possession and enjoyment, are dependent upon the existence of certain facts. And when they are disputed, and become the subjects of judicial investigation, if juries could assume their existence, without sufficient evidence and render verdicts upon possibility, probability and conjecture, the courts would be shorn of their legitimate authority, and the wise and just rules of the common law, as they have been recognized and applied from time immemorial would lose their principal value. It is amongst the primary and most important duties of the court to order a non-suit, or to grant a new trial, whenever the evidence is not sufficient to authorize or sustain a verdict.

The power to do so is highly conservative and essential to the due administration of justice. It is a power which the courts must constantly and freely exercise, unless they will consent to see the immature and imperfect conclusions of juries substituted for the rule of right. When there is proof which, uncontradicted, makes out the fact upon which the recovery depends, on the one side, and there is testimony which tends to disprove its existence, on the other; or when the recovery depends upon the degree of credit to be given to the witnesses on either side, whatever may be the opinion of the judge at the trial, he should not interfere, because these are questions to which, according to the frame and constitution of our courts, the jury alone can respond. But when the evidence is of such a character that the court in bank would be bound to set aside the verdict (should the jury find one,) as unsupported by the evidence, it is the duty of the court to non-suit the plaintiff. * * * * * *

It is worthy of remark that no witness saw the Oneida pass down but the track master Bowers, to whose evidence I will revert presently. No one saw any sparks or cinders emitted by the locomotive in the vicinity of the mill, and no witness has been examined, but Bowers, who was near the mill during the hour and seventeen minutes that elapsed from the time the Oneida passed to the time the fire was discovered, or who is able to say whether persons were in the vicinity of the mill or not. Indeed none of the plaintiff's witnesses were at the mill, or say they saw it, for several days before the fire. I think the plaintiff was bound to furnish some proof of this kind. He proves that the defendant's locomotive was within 67 feet of his mill at one o'clock on the day of the accident, and might have communicated the fire. Had it appeared upon the trial that no persons were in or about the mill during the forepart of the day of the fire, or even during the one hour and seventeen minutes after the Oneida passed, who could either accidentally or intentionally have fired the mill, he would have supplied a very necessary link in the chain of circumstantial proof by which he sought to fix the liability of the company and without which no jury would have been authorized to give him a verdict. It would be unreasonable to charge the Oneida with the destruction of the plaintiff's property because she carried fire in the furnace, and passed within 67 feet an hour and seventeen minutes before the smoke or flames made their appearance. The proof does not disclose the state of the population in the vicinity of the mill; but it does appear that it was situated between Tarrytown and Irvington; and it is not too much to assume that it was in a populous neighborhood, and exposed to the intrusions and risks which attend unoccupied buildings in such places. If the proposition of the plaintiff's counsel, that he had a right to claim a verdict upon the evidence, could be entertained, it would fix the liability of railroad companies operating their roads with locomotive engines for all accidents by fire in the vicinity of their roads, which they were not able to prove proceeded from some other source.

There is another part of the evidence which I should notice. Robert Riker, a witness for the defendant, went to the mill five or six days before the fire, tried to get in and failed. He then went to the house and got the key, entered the building, removed some tools, which he had there, and left. He found the windows open and left them open. He was carpentering in the mill, leaving shavings, hay, straw and packing boxes in the basement. "The least spark," he says, "in the world through the windows would have set it on fire." The theory of the plaintiff upon the trial was that the sparks or cinders from the Oneida were driven by the west wind into these open windows upon the shavings, hay and straw upon the floor. We have seen that the Oneida passed at one o'clock, and the sparks and cinders, if they caused fire, were driven in amongst the combustible materials at that hour. It happened, however, that Jerome Bowers, the track master, passed over the track near the mill, making his customary examinations, at twenty-five minutes past one. He saw nothing out of the way—no indications of fire or smoke—and there was nothing between the mill and the witness to obstruct his sight. He could see the mill for the space of two hundred feet before he got to it. He first discovered the fire at Irvington, a mile and a half below, after Vermeule's train passed up, which was at two o'clock and seventeen minutes. Now I submit that this evidence is wholly irreconcilable with the only theory which the plaintiff sets up; for had the sparks and cinders been driven in among the hay and shavings at one o'clock, some indications of such an event would have exhibited themselves at the time Bowers made his examinations.

I am therefore brought to conclude that the evidence upon the principal question was not of such a character as entitled the plaintiff to claim a verdict from the jury, and that he was properly nonsuited at the trial. The question of the alleged inefficient and negligent construction of the plaintiff's engine and fire apparatus, I decline to consider.

The judgment should be affirmed.

Sault Ste. Marie Canal.

The Superintendent of the St. Mary's Falls Ship Canal has made his annual report to the Governor of Michigan. He regards the prospects of the work as remarkably good, and states that the past year's business has been highly prosperous. The last vessel passed down Nov. 28th—eight days later than the close of the canal in 1858. The receipts for the year at the canal office were $17,361 63
And the total expense 5,759 24

Leaving for net earnings $11,602 29

The gross receipts are 50 per cent., and the net proceeds 100 per cent. greater than in 1858. The average number of vessels per day, during July and August last was 7. The aggregate tonnage for the season was 352,642 tons, valued at $9,887,-404. 60. It is estimated that the tonnage of next season will be double that amount.

The following is a statement of the receipts from the opening of the canal, June 18, 1855, to the closing, Nov. 30, 1859:

Month.	1855.	1856.	1857.
April	....	....	....
May	....	$742.30	$500.00
June	$390.84	1,341.96	1,605.84
July	830.24	1,548.26	2,325.40
August	990.72	1,543.28	1,822.02

The following are a few of the principal articles passing through the canal in 1859:

Iron ore, tons	65.769	Butter, lbs	842,421
" cars "	5,503	Cheese, "	54,742
" blooms, do.	536	Candles, "	117,684
Nails, kegs	3,632	Dried fruit, do	727,169
Coal, tons	8,883	Sugar, lbs	486,020
Mdse. "	10,134	Tobacco, do	21,745
Copper, do.	7,245	Engines & boil's	17
" bbls	60	Wag. & buggies	130
Malt, lbs	285,712	Machinery, tons	927
Flour, bbls	39,459	Lime, bbls	4,855
Coarse grain, bu.	71,738	Lumber, m	7,749
Furniture, pieces	7,623	Beef & pork, bls	10,664
Vegetables, bu.	6,949	Liq. & beer, do.	7,812

RAILROAD SHARE LIST, including Mileage, Rolling Stock, etc., etc.

An *asterick* (*) occurring in the column headed "Rolling-Stock," signifies that the cost is included in that of "Railroad and Appurtenances." A *dash* (—) signifies "nil." Running *dots* (.....) signify "not ascertained." Land-Grant Railroads are in "*italics.*"

Railroad Reports.

RAILROAD COMPANIES will oblige us by sending us copies of their Reports as soon as they are published.

American Railroad Journal.

Saturday, March 3, 1860.

North Pennsylvania Railroad.

The earnings of this company for the fiscal year ending November 30, 1859, were:

From Passengers	$129,316 69
" Coal	84,065 19
" Pig iron	17,572 15
" Local freight	80,158 62
" Through freight	28,651 97
" Mails and rents	7,537 34
	$347,301 96

The expenses were:

Conducting transportation	$46,461 51	
Motive power	61,811 43	
Maintenance of way	19,958 58	
" cars	14,445 35	
General expenses	16,226 63	
		158,903 94
Net income		$188,398 02

The charges against which were as follows:

Coupons 6 per cent. bonds	$150,000 00	
" 10 " "	28,100 00	
Ground rents & mortg's	4,622 31	
Interest on floating debt	13,275 31	
		195,997 62
Showing a deficiency of		$7,599 60

Compared with the previous year, the gross earnings show an increase of $50,407 97
With an increase in expenses of 24,080 39

Making an increase in net earning of $26,327 58

Of the expenses, $70,180 35 have been charged to passenger department; and $88,723 59 to the freight department. About one-third of the net earnings were derived from the former, and two-thirds from the latter.

The total number of passengers carried during the year was 303,957, equal to 91,892 through passengers, or 5,054,103 passengers carried one mile—the average rate per mile being 2.56 cents.

The whole number of tons moved one mile was 7,428,001—producing per ton per mile 2.83 cents.

The through coal tonnage for the year was 61,172 tons; way, 16,200 tons—making a total coal tonnage of 77,372—being an increase over the previous year of 11,238 tons; and, as compared with the year 1857, an increase of 34,321 tons.

The pig iron tonnage was 16,597 tons—an increase over the previous year of 10,588 tons.

The lime and milk trade show a handsome increase. Of the former, 236,905 bushels were carried—being an increase of 53,414 bushels. Of the latter, 901,783 gallons—being 167,943 more than during 1858.

The road and equipment has been kept in good order, and the trains have been run with great regularity and freedom from accident.

The number of locomotives on the road is 16; the number of cars is not given. Twenty long platform and five stock cars have been placed on the road during the year.

The increase of the equipment account has been $13,481 11.

The increase in construction account has been only $2,277 93.

The claims for damages growing out of the collision of July, 1856, have all been settled.

CONDENSED BALANCE SHEET, NOV. 30, 1859.

	Dr.
Capital stock	$3,149,000 00

Cash on hand	25,517 50
	$9,320,638 10

The annual meeting of this company was held in Philadelphia January 9, 1860, at which the report of the company was presented, and the following gentlemen elected directors for the ensuing year:

President—FRANKLIN A. COMLY.

Directors—John Brock, John Jordon, Jr., Algernon S. Roberts, J. Gillingham Fell, S. Morris Waln, William C. Ludwig, Ellwood Shannon, Edward C. Knight, William L. Hirst, Harry Conrad.

Treasurer—WILLIAM WISTER.

Secretary—EDWARD ARMSTRONG.

Engineer and Superintendent.—SOLOMAN W. ROBERTS.

Memphis, El Paso and Pacific Railroad.

We learn that Col. THOS. C. BATES, the contractor for the first 50 miles of the Memphis, El Paso and Pacific Railway in Texas, has purchased through GEO. T. M. DAVIS, 47 Exchange Place, the rails, chairs, spikes, and all other materials necessary for constructing and completing this 50 miles of road, and which is a main link on the Southern route of the Pacific Railroad.

The rails are of American manufacture, and are now being delivered at Wheeling by the "*Mount Savage Iron Company*," from whence they go direct by steamboat to Morris' Landing, on Red River. The locomotive, chairs and spikes are now going on board ship for New Orleans, whence they are transhipped by steamer up Red River.

Col. Bates takes out a full force of track-layers from Cairo, Ill., who are under contract to complete the first 25 miles of this road, ready for the cars, by the 1st of July, 1860.

Avon, Genesee and Mt. Morris Railroad.

The Genesee Valley Railroad Company was organized under the general Railroad Law of this State, May 2, 1857, and its road opened in June, 1859, since which time it has been operated, under a lease, by the Buffalo, New York and Erie Company. It was sold under foreclosure on the 17th ult., and bought in by the bondholders, who have organized this company. The fol-

lowing gentlemen were elected directors:—Wm. Kidd, M. F. Reynolds, A. Bronsop, Rochester; David Bangs, Chili: H. P. North, E. R. Hammett, J. S. Wadsworth, Genesee; J. R. Murray, R. P. Wisner, George S. Whitney, H. P. Mills, George W. Phelps, Mount Morris; Charles H. Carroll, Cleveland. Subsequently, John R. Murray was chosen President, Chas. H. Carroll, Vice President, and E. R. Hammett, Secretary and Treasurer.

The capital stock of the new company is $175,000—being the amount of the mortgage debt of the old company.

FINANCIAL.

The closing cash prices at the New York Stock Exchange for each day of the week ending 29th Feb'y, 1859, were as follows:

The weekly statements of the Philadelphia Banks made up to the 20th and 27th inst., present the following aggregates and comparisons:

	Feb. 27.	Feb. 20.	Difference.
Capital	$11,666,530	$11,661,169	+ $5,370
Loans	25,553,918	25,564,640	— 10,722
Specie	4,706,108	4,698,389	+ 7,719
Due from b'ks	1,824,813	1,192,030	—132,789
Due to banks	3,115,010	3,019,658	+ 95,352
Deposits	14,590,092	14,722,119	—132,027
Circulation	2,653,192	2,676,197	+ 23,005

The Boston bank statement for the week ending 21st February foots up as follows:

Capital	$36,581,700	Due to b'ks.	$7,430,000
Loans & disc.	60,113,800	Deposits	17,598,000
Specie	4,577,000	and Circulation	6,305,500
Due fr'm b'ks	6,549,000		

The cash assets and liabilities of the New Orleans banks on the 18th inst. were as fo'lows:

Loans	$25,000,953	Deposits	$21,367,100
Specie	12,894,520	Exchange	7,866,999
Circulation	13,459,819	Due banks,	1,471,168

As compared with the statement of the previous week the results stand thus—

Dec. in loans. $196,398	Inc. in deposits. $782,988
Inc. in specie. 152,639	Inc. in exch. $517,642
Inc. in circul. 115,895	Inc. b'k balances 75,617

The return from the Bank of England for the week ending the 1st of February, gives the following results when compare with the previous week:

Public deposits	£5,309,753	Dec.	£219,969
Other deposits	14,484,676	Inc.	404,929
Rest	8,824,479	Inc.	29,344

On the other side of the account:

Governm't securities	£10,171,199	Dec.	£240,218
Other securities	20,778,651	Inc.	1,273,924
Notes unemployed	6,846,370	Inc.	869,370

The amount of notes in circulation is £21,906,340, being a decrease of £279,460, and the stock of bullion in both departments is £14,942,502 showing a decrease of £616,594 when compared with the preceding return.

The Quarterly Bank Statement exhibits the condition of the several incorporated institutions of the State of Ohio, on the first Monday of February, 1860, as shown by their return made under oath, to the Auditor of State, which enables us to present the annexed comparison:

	Feb., 1860.	Nov., 1859.	Feb., 1859.

The Cumberland Bridge.

To the Editor of the AM. RAILROAD JOURNAL.

DEAR SIR:—The immense draw-bridge lately constructed across the Cumberland river at Nashville, for the use of the Louisville and Nashville and Edgefield and Kentucky Railroads, has justly attracted very great attention among railroad men. A detailed description of the structure was published in the *Railroad Review* of the past two weeks. But if the writer, who signs himself J. H. D., had contented himself with this description, and not turned his article, in its concluding paragraphs, into an advertisement for two or three engineers, employed by these railroad companies at the time the bridge was built, it would all have been very well. I refer to the following statement: "This gigantic work was under the sole control and management of A. Anderson, Esq., the Chief Engineer of the E. & K. R. R., whose original designs and general supervision were ably carried out by Wilbur H. Foster, the Assist. Engineer in charge."

This is a species of self-glorification, unworthy of the profession, but too much practiced. It is a lamentable fact that not one in ten of those who have charge of our railways know anything more of the science of bridge construction, than a cow knows about the manual exercise with a musket. When, by a combination of brass and importunity, backed up by an agreement to work "cheap," they are enabled to assume the infallibility with which the title of Chief Engineer is too often invested, the main object seems to be to bring their names (until then unheard of,) before the public, in connection with the construction of some important structure, like the one under consideration, if fortunately for their object, the road they are building happens to involve such a necessity. Any of the several patented plans of truss bridging, now in general use, are represented by men of experience and skill, and all that is required is to make a contract with such a party for the required work. All he requires of the Engineer is to have the locality pointed out, and the alignment and grades given him; beyond that, the Engineer is of about as much use to him or to the structure to be built, as the fifth wheel is to a coach. The builder understands the whole detail of his bridge, while the Engineer generally knows just enough to become a source of embarrassment to the whole undertaking, by constantly making absurd and ridiculous suggestions with a very wise and important air, for fear that the builder will think him the ignoramus he often really is. But when, in spite of these embarrassments, the structure is complete and in successful operation, the papers are full of long and windy descriptions of details, none of which are new except to the Chief Engineer himself, and the whole winds up with the sounding manifesto that the work was executed under the immediate direction and superintendence of Mr. Jenkins, the distinguished Engineer, whose *original* designs and plans have been ably carried out by Mr. Jones, the principal assistant, &c., &c.

Now in the case of the bridge under consideration, the whole thing from "turret to foundation, stone," was designed by D. C. McCallum, Esq., who is the patentee of the bridge. Every drawing, even to that of the minutest bolt, was made in Mr. McCallum's office in New York, tracings of which were sent to the locality for the purposes of the constructors, and the *original* plans and designs have never to this day been in the hands of the *Engineer*. I do not even infer that Mr. Anderson lent himself to such an appropriation of others men's ideas; although, as I said before, it is a practice too common. I am sure he is too much of a man to be willing to wear borrowed plumage. He owes it, therefore, to his own position and the dignity of the profession, to ignore the statement made by the enthusiastic Mr. J. H. D., and to correct the inferences which might be drawn therefrom.

Very truly yours,

CREDIT TO WHOM CREDIT IS DUE.

Southwest Branch.

We learn from the St. Louis *Democrat* that the second division of the Southwest Branch of the Pacific Railroad of Missouri, extending from St. Clair to Kinseys, a distance of 43 miles has been completed, and that regular passenger and freight trains have commenced running over it. It was formally accepted by the directors on the 22d ult. The whole length of finished road is now 61 miles—the first division of 18 miles having been completed some two years since.

The third section of this road is now under contract, and a large force of workmen are now engaged in track-laying. All the iron is on the ground, and as there is an unexpended balance of State bonds ($1,900,000) held by the company, its progress is a fixed fact. By May it is expected to be open to Rolla, 77 miles beyond Franklin.

The steepest grade is 65 feet to the mile, but the average is considerably less. The average cost per mile is $27,000, while the main line of the Pacific cost much over that sum to build.

Marietta and Cincinnati Railroad.

This railroad, with the property and effects belonging to it, was sold at Chillicothe, on the 25th ult., by ORLANDO SMITH, in accordance with a decree of the Court. The property was purchased in the name of NOAH L. WILSON, DAVID GIBSON, and others, Trustees, under a compromise agreement for capitalization. The effect of the sale will be the re-organization of the company, free of debt, as the value of the property is to be represented entirely by the capital stock, all the mortgages being wiped out. The property was sold for the minimum fixed by the Court, $200,000. The bill legalizing the sale of the franchise of the road, has passed the Ohio House of Representatives (having previously passed the Senate,) by a vote of 54 to 41, and is now a law. This will insure the completion of the line through Southern Ohio, and the placing of the whole line in condition for traffic.

Iron Railroad Cars.

The Boston and Worcester Railroad Company have placed upon the road a new car built entirely of iron. It is said to present an elegant appearance, will seat the usual number of passengers, is fire-proof, and will not, in case of collision, break up into splinters. The cost is about equal to the style of car now in use, while its durability is much greater. This one has been used on the New York and Erie road during the last six months, and has been found to answer all expectations.

Finances of Ohio.

The semi-annual report of the Sinking Fund Commissioners of the State of Ohio shows the debt to be as follows:

6 per cent. stock, payable after Dec. 31, 1860		$6,413,325 27
Do., payable after Dec. 31, 1870		2,183,531 93
Do., payable after Dec. 31, 1875		1,600,000 00
Do., payable after Dec. 31, 1886		2,400,000 00
5 do., payable after Dec. 31, 1865		1,025,000 00
TEMPORARY LOAN.		
6 per cent. stock, payable July 1, 1860	$350,000	
Redeemed during last six months	55,000	295,000 00
6 per cent. stock, payable March 1, 1861		350,000 00
Total foreign debt payable in N. Y.		$14,266,857 20
DOMESTIC DEBT.		
6 per cent. payable at State Treasury in 1863		275,385 00
Total reimbursable debt bearing interest		$14,542,242 20
In addition to the foregoing there is still outstanding, but not bearing interest:		
Stock of the loan due after Dec. 31, 1856		5,311 33
Domestic stock issued under act of 1846		1,765 00
Total funded debt of the State		$14,549,318 53

Total irreducible debt		2,587,357 84
Total liabilities of the State of Ohio.		$17,186,676 37

Michigan Southern and Northern Indiana Railroad.

The President of this road has issued a circular to the creditors of the company, in which he says that the Directors are again "compelled to ask the indulgence of the holders of certain classes of their bonds to defer the payment of interest for the present." During the past month they have paid the interest on the Sinking Fund Bonds, due November 1, 1859, to the amount of near $100,000. By the 1st of March they design to pay the interest due November 1st on the 1st mortgage bonds of the Michigan Southern Road. The President states that the business of the road is improving, and better than was anticipated for the winter. The road and its equipments have not been in so good condition as now for many years, and there is no other five hundred and twenty-five miles of road in the United States which is operated with more economy, or greater efficiency and fidelity.

Illinois Southern Railroad.

We see it stated that Messrs. Stanton, the Contractors, are at present at Mound City for the purpose of locating at least twenty-five miles of the road, and that the work will commence immediately.

Debt of Virginia.

The debt of the State of Virginia, according to the report of the Auditor, is as follows:

Registered Stock, six per cent.	$15,928,816 63
Registered Stock, five per cent.	494,000 00
Coupon Debt, six per cent.	11,952,500 00
Sterling Bonds, five per cent.	1,865,000 00
Total	$30,190,316 63
Of this the Commissioners of the Sinking Fund hold	1,083,657 20
Total	$29,106,659 43
Floating Debt	$331,901 80
Less cash on hand	104,013 36
	$227,888 44

The assessed value of the property in Virginia is 1,043,965,978.36.

New Haven, New London and Stonington Railroad.

The annual report of this company for the financial year ending Nov. 30, 1859, gives the following statement of its affairs. The receipts have been:

From passengers	$88,159 51
" freight	11,913 62
" mail	5,000 00
" rents and express	2,764 54
Total	$107,837 67
Less operating expenses	$75,092 90
Repairs and reconstruction	17,054 25
	92,128 15
	$15,909 52

The amount paid on coupons was $41,891 50—making the total payments $134,079 65.

The gross earnings of the Extension Road were $21,974 41, from which, after deducting expenses, 6 per cent. will be paid.

In regard to the act of the last Legislature authorizing the issue of $200,000 seven per cent mortgage bonds, in order to liquidate the $100,000 ten per cent. bonds, due July 15, 1860, and the overdue interest, the Directors state that the holders of the latter have, to a very great extent, agreed to exchange the old for the new bonds. When the entire exchange has been effected, the company will be comparatively unembarrassed. There will be left only the overdue coupons on the first mortgage seven per cent. bonds, which the Directors propose to fund with six years seven per cent. sinking fund bonds. This proposition is stated to have met with such general approval that the bonds are being prepared, so that on and after the 10th of March next, all holders of such bonds can deposit with the Trustees of the New Haven Savings Bank the coupons on the same for the years 1858, 1859 and 1860, without relinquishing their first mortgage security, and take their interest on them in cash and income bonds for the principal.

The Extension Road is leased for five years from November 1, 1859, to the New York, Providence and Boston Railroad Company on favorable terms; and it is not doubted that the cost of the Extension Road will return six per cent. interest, beside giving all the incidental advantages to the original line which it was believed the extension would afford.

The old Board has been re-elected as follows:

Wyllis Blackstone, C. F. Bushnell, E. C. Scranton, A. C. Wilcox, Sumner Bull, Charles J. McCurdy, Charles C. Griswold, Charles Mallory, James I. Day.

THE SPACIOUS ESTABLISHMENT heretofore occupied by Messrs. KIRK & RHODES, for the building of **RAILROAD CARS.**

This Establishment is now offered *on lease*, for MANUFACTURING PURPOSES. It is admirably adapted to the construction of RAILROAD OR CITY CARS, STEAM ENGINES, AGRICULTURAL IMPLEMENTS, carriages, omnibuses, cabinet ware, bedsteads, chairs, buckets, barrels, kegs, etc.—or for *Planing machines*, the manufacture of doors, window sash, window blinds, etc., or for the manufacture of *stoves*, and all other *foundry products*; and particularly for *malleable Iron*, in all its forms.

This location cannot be surpassed, as will be perceived by reference to the MAPS of Ohio, Pennsylvania, and the Railroads of the West—having the *facilities* of the OHIO RIVER, with the descending navigation of the Monongahela and Yohiogany from the South, the Alleghany and the Beaver from the North—the terminus of three canals, viz. from Erie, from Cleveland, and from Portsmouth—also 24 *Regular Trains, daily, of Railroad Cars*, connecting with *all the Roads of the West.*

The buildings and appurtenances here offered, occupy a block, 238 feet by 230, or 54,740 superficial feet, facing the OHIO RIVER on one side, and the *Railroad Stations* and *Tracks*, on two other sides. The steamboat landing, canal boat landing, railroad stations, ticket offices, telegraph offices, etc., all within 100 yards of the premises.

The principal building, main wing, smith shops, engine house, kiln-dry, foundry, etc., are all *built of stone.* The principal building is three stories high, front 238 feet, main wing 203 feet, paint shop 175 feet, two foundries 50 by 80 feet, (and two cupolas), smith shops, engine house, etc., all in the hollow square.

A 60 horse Steam Engine communicates *power* to various parts of the establishment, and eight-inch cast iron pipes conduct *spare steam to warm the whole.*

The premises are now ready for occupancy.

ROCHESTER, or "BEAVER CITY," is now the *nucleus* and *centre* of extensive manufacturing, mining and commercial operations, and will soon become *a city* of note,—showing a large and dense population. It is now the natural, and acknowledged *Railroad centre*, steamboat landing, and canal boat terminus, *for ten neighboring villages*, like ten wards of a city—all in sight, within three miles of a common *centre*, and having a population of fifteen to twenty thousand—more than twenty churches, fifty stores, schools, mills, and manufacturing establishments. For particulars, address

M. T. C. GOULD,
Rochester, Beaver Co., Pa.

Percussion Water Gauges, superior to glass gauges or gauge cocks, and infallible in giving the correct level of water.

H. R. WORTHINGTON,
28 Broadway, N. Y.

CEMENTS.

Rosendale Hydraulic Cement.

THE NEWARK AND ROSENDALE CEMENT COMPANY are now receiving **fresh from the Mills** their approved ROSENDALE CEMENT, warranted **pure** and **free from quick lime,** and which has given such **general satisfaction** in the various government and other public works in which it has been used. Purchasers and shippers should be careful to get the **genuine ROSENDALE CEMENT,** branded "NEWARK AND ROSENDALE," "H. WILDE." This Cement does not swell and burst the hoops when stored in warm climates. It is packed in tight **kiln dried barrels,** and is specially adapted for safe shipping on long voyages. Terms reasonable, which may be known by addressing,

JOHN H. STEPHENS, President, Newark, N. J., or
HENRY WILDE, Secretary, 90 Wall st., N. Y.

THE LAWRENCEVILLE MANUF'G
CEMENT COMPANY,
OFFICE 96 WALL ST,
NEW YORK.

THIS Company manufacture **ROSENDALE HYDRAULIC CEMENT** of a superior and uniform quality, and are constantly receiving it **fresh** from their Works at Rosendale. Particular attention paid to grinding **fine,** and packing in superior casks. We warrant it to set under water, and attain a hardness excelled by no Cement manufactured. It has met the approval of Government, and we are at present supplying the fortification now in course of erection, together with Water Works and Public Buildings.

For sale upon favorable terms by addressing.

WM. N. BEACH, President.
CHAS. E. LAWRENCE, Sec'y.

HOFFMAN'S
ROSENDALE CEMENT,
OFFICE, 92 WALL ST., NEW YORK.

THE LAWRENCE CEMENT COMPANY are prepared to receive and execute orders for their Cement, to any extent that may be required. They would particularly call the attention of purchasers to the distinguishing brand of their manufacture, viz.: **HOFFMAN'S ROSENDALE CEMENT.** This seems to be necessary, as they have established a reputation for the superior quality of their Cement, and there are various other brands offered, as "Rosendale" Cement. It has the unqualified approbation of the most eminent Architects and Engineers, being used in almost every department of the Works under Government. It is put up in the most careful manner, each barrel being well lined with paper, and will be delivered on ship board, in this city, on the most favorable terms. Particular attention given to shipping orders, and Freight obtained on the best terms.

M. W. WOODWARD, Secretary.

CEMENT, PLASTER, ETC.
THE HUDSON RIVER CEMENT CO.

JOHNS & CROSLEY.

DELAFIELD & BAXTER'S,
Late OGDEN & DELAFIELD,
ROSENDALE CEMENT.

WE are prepared to enter into arrangements for supplying our CEMENT for public works, or other purposes. We **warrant it equal in every respect** to any manufactured in this country. It attains a great degree of hardness, sets immediately under water, and is a **superior article** for masonry coming in contact with water, or requiring great strength.

For sale in tight barrels, well papered, on application at their office, by **DELAFIELD & BAXTER,** 104 Wall st.

The above CEMENT is used in most of the fortifications building by government. 45

66 NASSAU St., N. Y., Manufacturer of Mathematical Instruments of every description. Orders promptly filled.

W. & L. E. Gurley, Troy, N. Y.,
MANUFACTURERS of Engineers' and Surveyors' Instruments. Descriptive and priced catalogue gratis.

Knox & Shain,
MANUFACTURERS of Engineering & Telegraphic Instruments, 46½ Walnut st., Phila. (*Two premiums awarded.*)

F. W. & R. King,
MANUFACTURERS of Engineers', Surveying and Drawing Instruments, No. 226 Baltimore st., BALTIMORE, Md.

Richard Patten,
MANUFACTURER of Mathematical Instruments to the U. S. Government, No. 58 Baltimore st., BALTIMORE, Md.

James W. Queen & Co., Philad.,
MANUFACTURERS of Engineers' Levels, Transits, Chains, Tapes, &c. Priced catalogues by mail gratis.

Wm. J. Young
HAS removed his Engineering and Surveying Instrument Manfactory to No 43 North Seventh Street, Philadelphia.

H. SAWYER
(of the late firm of SAWYER & HOBBY),
MANUFACTURER of Transits and Levels, has removed to Union Place, near Washington Av., Yonkers, N. Y.

Hugo Harttman,
MANUFACTURER of Engineers' and Surveyors' Instruments, 223 Dock st., PHILADELPHIA.

METALS.

S. W. HOPKINS,
METAL BROKER,
72 BEAVER ST., NEW YORK.

INGOT COPPER, PIG LEAD, BLOCK TIN, SPELTER, Sheet Zinc, Antimony, Tin Plates, Roofing Plates, Pig, Bar, Hoop, Sheet and Boiler Iron.

Waterbury Brass Agency,

ALEX. ANDERSON, Agent,
52 BEEKMAN STREET, NEW YORK,
FOR THE SALE OF
SHEET BRASS,
COPPER AND BRASS WIRE,
BRASS AND COPPER TUBING,
COPPER RIVETS AND BURS, ETC.
Manufactured at WATERBURY, Conn.

WM. W. GODDARD,

No. 253 Pearl st., NEW YORK,
MANUFACTURERS OF ALL KINDS
Braziers & Sheet Copper,
YELLOW SHEATHING METAL, BOLTS AND NAILS,
COPPER BOTTOMS,
Locomotive Strips, Tubing Bolts and Bars,
COPPER AND BRASS RIVETS AND BURRS,
Large Flats and extra-sized Sheets, rolled to order at short notice,
TINNED COPPER OF ALL DIMENSIONS,
INGOT AND PIG COPPER.

NATHANIEL LANE,

PATERSON, N. J.,
COPPERSMITH AND BRASS PLANISHER,
MANUFACTURER OF
ORNAMENTAL, SHEET BRASS AND COPPER WORK
FOR LOCOMOTIVE ENGINES,
Brass Domes, Escape Pipes, Steam-Chest Covers,
Cylinder Heads, Jackets, Raised Bands for Boilers, etc., etc,
ALSO, **Smoke Stacks and Russia Iron Jackets.**
Also, COPPER FLUES OF SUPERIOR QUALITY, and
All other Copper Work for Locomotive and Stationary Engines.
Brass and German Silver Name and Number Signs
FOR LOCOMOTIVE ENGINES,
Furnished at unusual short notice.

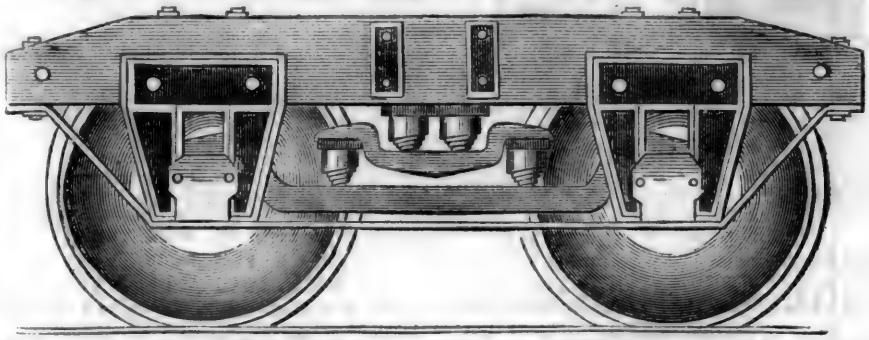
METALS for RAILROAD COMPANIES.

LUCIUS HART,

IMPORTER AND DEALER IN **METALS,**
4 and 6 Burling Slip, NEW YORK.
BLOCK TIN. | SPELTER. | BABBITT METAL.
ANTIMONY. | PIG LEAD. | INGOT COPPER.

JAMES ANDERSON & CO.,

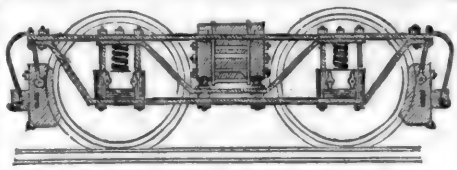
IMPORTERS OF AND DEALERS IN
HARDWARE AND CUTLERY,
Nos. 23 & 25 Dey Street, NEW YORK.
SOLE AGENTS FOR
TROY BELL FOUNDRY
AND
PHENIX BLACK LEAD CRUCIBLES.



Dealers and consumers are invited to inspect our stock consisting of every article known in the trade, viz, **Builders', Machinists'** and **Founders' Materials.** Stub's and Norton's Files, Tools, etc., etc. **METALS OF EVERY KIND.** Favorable terms to first class buyers.

GOLD PENS.

HENRY A. BROWN & CO.,
SUCCESSORS TO LEVI BROWN,
MANUFACTURERS,
181 BROADWAY,
NEW YORK.



THE METALLIC CAR SPRING COMPANY

OF NEW YORK,
Manufacturers of PATENT CONICAL VOLUTE STEEL CAR SPRINGS.
OFFICE, 54 WILLIAM STREET, NEW YORK,

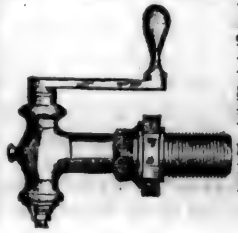
WITH increased capital and facilities, and ability to meet all orders promptly, this Company respectfully invite the attention of Railroad Managers, Car and Engine Builders, and others interested in Railroad Machinery and Economy, to these Springs, and the improvements in their application. Orders and correspondence solicited.

CHARLES D. GIBSON, Treasurer. **COURTLANDT PALMER, Pres't.**
Jan. 14, 1860. **RICHARD VOSE, Secretary.**

THE HUMPHREYSVILLE
MANUFACTURING COMPANY,
(SUCCESSORS TO DWIGHTS, FRENCH & CO.,)
SEYMOUR, CONN.,

ARE prepared to fill, at short notice, of the best materials and workmanship, orders for **Wrought** and **Cast Iron Work**, fitted ready for use, for the building or repairs of **Passenger** and **Freight Cars**, complete or in part. A sample wrought iron truck can be seen at our office.
No. 5 Gold st., NEW YORK.

We also manufacture—
BEST FAGGOTTED CAR AXLES,
SALISBURY IRON CAR WHEELS,
WROUGHT IRON BOLTS, NUTS AND WASHERS,
RAILROAD JACK SCREWS, ETC.
RAYMOND FRENCH, President, Seymour, Conn.
WM. H. MARSHALL, Treasurer, No. 5 Gold st., N. Y.



STEEL
CAR SPRINGS,

MANUFACTURED
BY THE
PATENTEE,
CARLOS FRENCH,
SEYMOUR, CONN.

THESE **SPRINGS** are now in use on many of the **leading Railroads** East, South and West.
Samples can be examined and Price Lists obtained at
No. 5 Gold st., NEW YORK.

McNAB, CARR & HARLIN,

MANUFACTURERS of Steam Engine Builders' and Plumbers' **BRASS WORK**, such as Globe Valves, Safety Valves, Pump Valves, Whistles, Oil Cups, Steam and Water Gauges, Bibbs, Stops, Basin Cocks, Hose Pipes and Couplings, etc. All parties interested will please send for Catalogue and Price List. Address
McNAB, CARR & HARLIN,
16 John st.,
NEW YORK.

Victoria Bridge.

So much has recently been written and said in laudation of that crowning achievement in engineering, the VICTORIA Bridge; so many pæans have been sung in praise of its majestic proportions—its vast strength and its indestructible character—and such a scramble has been witnessed for the monopoly of the credit of its design, that the public have become accustomed to regard it as the eighth wonder of the world, and any question as to the propriety of the structure in any one of its features has already come to be considered rank heresy.

All parties connected with it, from the principal officials in charge down to the humblest artizan who hammered the rivets, have formed themselves into a mutual admiration society, and complimentary toasts and speeches of congratulation between engineers and contractors and directors, upon its final completion, have been so bounteously and lavishly spread before the public, that engineers and constructors who have ventured to entertain a *doubt* of anything asserted or claimed for this bridge have become dumbfounded by the din, and have hardly dared to express an opinion for fear of being read out of the profession, and of being considered decidedly behind the age.

But there are engineers, not only in our own country but in England, who have, from the commencement of the undertaking, held the opinion that this great structure does not fulfil either in an engineering or financial point of view, the desired conditions; and their opinions have not been changed by all the din of praises which have been showered upon bridge or its constructors. Among these heretics, Mr. Editor, at the risk of excommunication, I, with great fear and trembling, venture to class myself.

That it is an immense structure, no on can deny. The pockets of those who furnished the money bear testimony to this fact. But its immensity has very little to do with its merits in an engineering or commercial point of view. So far as engineering skill is concerned, quite as much is involved in construction of one span as of twenty; for the bridge is but the repetition of single spans, and this repetition is merely a question of dollars and cents. Were it not for the phenomena which occurs at the "taking" and breaking up of the ice on the river, the task of bridging the St. Lawrence at this point would present only the most ordinary character of engineering work, involving no questions of doubt, or contingencies beyond those found in every ordinary railway bridge. The design of bridging the river at this point is no new idea, originating with the Grand Trunk Railway Co. The first projectors of the Atlantic and St. Lawrence and the St. Lawrence and Atlantic Railroads, forming the line from Montreal to Portland, early foresaw the probability of its construction; and there can be no doubt that its first inception originated with the Hon. John Young, of Montreal, one of the directors of the former road. In 1846, Mr. Edward F. Gay was employed to make a survey, plans, and report, but his attention was given more particularly to two sites some distance above the present one. In the same year, Mr. A. C. Morton, then Chief Engineer of the two roads, made a thorough series of soundings over the whole extent of the present site of the bridge, with a view of ascertaining the extent of the *under* water difficulties involved; and the line from Longueiul to St. Hilare was *located and constructed* under the direction of Mr. Morton, *with especial reference to a bridge from St. Lambert to Point St. Charles.* So far as the site could be generally determined upon at that early day, it was decided by these surveys, long before the Grand Trunk Railway Company had an existence. In 1851, Mr. Thomas C. Keefer, a Canadian Engineer, was employed by the Montreal and Kingston Railroad Co., to examine the site with a view to an estimate of cost upon some definite plan. Probably no person could have been selected better able to measure, safely, the difficulties to be encountered from the phenomena referred to. Mr. Keefer had for years been familiar with the locality, and his experience had been extensive upon the Canadian rivers. The *ice* phenomena had been his study, and the very able report made by him in 1853 showed that he fully understood his subject. It is quite evident from the whole tenor of his report, that Mr. Keefer did not consider the bridge as involving any extraordinary difficulties. Its general site had been fixed for years, and it was undoubtedly the best that could have been selected. Very little difficulty could be apprehended in determining the water way, or the opening of each span; for, the considerations usually controling these features had but little weight at this point, within reasonable limits, as the number of piers could be increased or diminished without sensibly affecting the stream in consequence of its width. The height of the bridge was fixed by the Canadian authorities. The *ice* phenomena were well understood, at least by American engineers, and it simply remained to design such an arrangement of piers, and such a plan of superstructure as would give the required strength at the lowest cost—or in other words, it was necessary to *understand the ice phenomena.* Mr. Keefer's design was for piers of stone, surrounded by large "shoes" of cribwork, which were to be used as coffer dams for the purpose of laying the *under* water masonry, and were to be left as *ice breakers,* and protectors to the piers. The openings were to be 300 feet each, between the piers,

or 240 feet between the "shoes," except at the centre or channel opening, where the span was to be 400 feet. The "shoes" were to form inclined planes on the upper ends, upon which the ice would impinge and rise until it broke, or crushed by its own weight. The center span was designed to be of *iron*; all the others of wood. The estimate for the whole structure, including approaches, was £320,000 sterling, or $1,600,000; and Mr. Keefer, in common with other advocates for a bridge, considered that the chief difficulty would be in obtaining even this sum. So far as the engineering difficulties were involved, they seem not to have given him any uneasiness; for he says "A wooden bridge properly constructed and protected will last at least half a century; and if it were not for the contingency of *fire*, would be all that is needed. The risk of fire should not, however, operate against the construction of the bridge, if the more expensive structure be unattainable; because it is slight, considering the vast number of wooden railway bridges in America, and would be reduced in the present instance to a very remote contingency." This was the plan and report and estimate made by an Engineer who had witnessed and studied for years the ice phenomena of the St. Lawrence, with a view to understand them, so that he might not underrate or overrate their effects upon the contemplated bridge. Mr. Keefer's plans, however, were not adopted; but in March, 1853, the contract for the *present* bridge was signed. In September of that year, Mr. Stephenson went to Canada, and left in November. He did not witness the *ice* phenomena, for the river did not close until late in December; *but if he had, it could not have influenced his choice of plan, as this had been decided and contracted for, six months before he visited the country.*

Mr. Stephenson's recommendation of the present design did not therefore depend upon his *own* acquaintance with the locality; and although in one of his reports, to which I shall hereafter refer, he says—"That Mr. Keefer's experience from long residence in the country, entitles his opinion as to the proper character of such works to confidence;" yet he adopts an entirely different design, costing £1,400,000 sterling, while Mr. Keefer's "experience" says a good and substantial bridge should be erected for £320,000.

I refer to these facts in order that the true history of the bridge may be known; and also, that I may not be liable to the charge of presumption in advancing my opinion against the authority of such a name as Mr. Stephenson's, to which charge I should be justly open, if I believed he had had opportunity to understand the requirements of this particular case. To have obtained sufficient knowledge of all the circumstances and conditions governing the entire character of such a work, with the cursory examination given to the site by him during its summer aspect, and with no greater personal knowledge of the difficulties to be encountered, than could have been obtained by a photograph, would have required an intelligence more than human; and although I class myself among his most enthusiastic admirers, I do not allow myself to consider him as anything more than a man—hence I may be pardoned for not believing what has become a dogma in the creed of certain engineers, viz: that the Victoria Bridge, as designed and completed, is exactly, in every respect, the most economical and appropriate structure that could have been erected.

The true province of an engineer is to adopt his structure to its locality and its duty, without either overrating or underrating the difficulties to be encountered; and to provide a sufficiency, but not an excess, of strength. To go beyond this, is an error in engineering as great as to go below it. Any engineer can build a pyramid like those of Egypt, if means are furnished him; but if the pyramid is only designed to carry a *mouse* upon its summit, the object may be accomplished by a more appropriate and economical structure. I am not by any means alone in the opinion, that the difficulties in this case were vastly *overrated*—and that a vague and indefinite fear of probable risks, from phenomena not understood, has been the cause of a most useless expenditure of an enormous amount of money. Beyond this, that an excessive cost not at all warranted by the necessities of the case has been incurred in parts of the structure, having nothing whatever to do with its capacity to withstand these phenomena; but which have a simple duty to perform, the nature of which is well understood; and to perform which, the required strength, is a matter not only capable of the most exact mathematical demonstration, but which has been *practically* demonstrated beyond all question of doubt, by a variety of more economical plans.

The points I make are these:

1st. That an unnecessary expenditure has been made in the dimensions and quantity of masonry, even conceding the general design of the bridge to be correct and the enormous cost of foundations to be unavoidable.

2d. That a different and efficient foundation might have been put in at an immense saving of cost.

3d. That with the present openings, and for the strength required, the tubular plan is the most inappropriate and expensive that could have been adopted, whether compared with various other descriptions of iron girders, or with wooden trusses.

4th. Conceding a tubular bridge to be the proper plan, that a very large saving might have been made at the contract valuation of the different parts, by a different arrangement of openings, and by a proper use of the advantages to be obtained by continuity of spans.

5th. Conceding the plan to be correct in every particular, both in regards to foundations, masonry and superstructure, that the price paid for the work was excessive.

Before discussing these questions, and as I shall have occasion frequently to quote from the reports to which I am about to refer, it may be as well to state that in the year 1855, some idea that a large amount of expenditure was needlessly involved in the plans then being carried out, had crept into the sanctum of the London Board of Directors. One of their number, Mr. Robert McCalmont, became so convinced of this, that in April of 1856 he addressed the following communication to the Board.

3 Crown Court Philpot Lane,
London, April 30th, 1856.

GENTLEMEN:—Having for some time past endeavored to enlist my co-Directors in an enquiry as to whether such an expenditure as £1,400,000, for a connecting link in your railway system across the St. Lawrence, be unavoidable; and failing to obtain from them that cordial and energetic co-operation which I believe the case to deserve, my feeling of responsibility compels me to make known to you the steps which I have considered it right to take in furtherance of your interests. I now, therefore, beg to lay before you a letter dated 29th March, from Charles Liddell, Esq., Civil Engineer, of No. 24 Abingdon Street, Westminster, together with the correspondence and reports to which it refers, on the subject of the Victoria Bridge across the St. Lawrence at Montreal.

These communications between Mr. Liddell and me, were preceded by the refusal of Mr. Stephenson to confer with him on the subject, when invited on behalf of the Board to do so. It seemed to me intolerable that an enquiry should be thus eluded by the exclusion of the company from professional opinions beyond those of Mr. Stephenson's selection, in which he would naturally seek support for the conclusions to which he had committed himself.

It will be in your recollection that at the public meeting, held at the City of London Tavern, in July last, when your sanction was obtained to certain concessions made to the contractors, it was announced that they had consented to a modification of the contract for the Bridge; that the works on it were to be almost suspended for some time; (partly on financial grounds, but also in conformity with an assurance from Mr. Stephenson, that until the plans of the Bridge should be re-considered, the progress of the works was to be *strictly confined to those portions, such as the approaches*, which would be common to *whatever structure might eventually be adopted*—an assurance, by the way, strangely irreconcilable with paragraph 70 in his report, and paragraph 20 in the report of his assistant, Mr. Clarke;) and you were assured of the existence of "an opportunity for considering whether some plan of construction may not be devised whereby all the advantages to be derived from completing this important link in the great chain of communication, may be obtained at a less charge upon the undertaking."

I am constrained to express my opinion that any expectation of such a result, although attainable, will prove a delusion, unless an unreserved and candid inquiry into the subject be insisted on. As regards the plans, an overwhelming preponderance of authority as well as demonstration, will be found in favor of a more economical construction than that prescribed by Mr. Stephenson; and as regards the contract, which according to the prospectus is founded upon estimates framed by Messrs. Stephenson and A. M. Ross, I affirm, that, fraud being out of the question, these estimates are based upon error.

The documents now laid before you may help to suggest a future course. They deserve your attentive perusal and consideration.

Surely amongst the shareholders there must be many gentlemen competent to form a correct judgment on the matter; and I trust that some of you will come forward and organize a committee, to grapple with the subject. What is to be insisted on is *inquiry*—uncompromising and straightforward inquiry—with a determination to arrive at a knowledge of the true merits of the case, and so to be in a position to deal with whatever circumstances may arise.

The Board is in the dark, and is consequently unqualified to negotiate intelligently with the contractors, either under existing circumstances, or probable contingencies. Pending such considera tion of the subject as I trust you will institute and insist upon, all expenditure upon the bridge ought to be arrested. In the hope that a suitable inquiry may be instituted by you, I will abstain from comment upon the reckless manner in which the company are being led on in regard to this bridge.

Before concluding I beg to acquaint you, that as the exercise of that reserve which may become a director, is incompatible with my sense of duty to you, I have, in order to qualify myself, for addressing you as I now do, judged it expedient to withdraw from the Board, and I have accordingly tendered my resignation as a director.

I am, gentlemen,

Your obedient servant,

ROBERT MCCALMONT.

The paragraphs referred to in the above communication are as follows:

1st. From Stephenson's report to the chairman and directors, November 3d, 1855.

"In all that has been said respecting the comparative merits of the different systems of roadway, you will perceive that a complete, or wooden structure has not been alluded to because, * * * And as a third reason, the construction of the tubular roadway *is already so far advanced*, that any alterations to the extent of abandoning iron, and adopting wood must involve monetary questions of so serious a nature as to render *the subject beyond discussion, or even being thought of in this report.*"

2d. From the report of Mr. Clarke to the same, dated Dec. 12, 1855:

"I have arrived at these conclusions, apart entirely from the consideration, that contracts, involving great loss, if they are broken through, *have been already entered into for these girders, and some progress made in their construction*—"

This communication of Mr. McCalmont's was accompanied by a copy of a letter from him to Mr. Liddell, dated August 9, 1855, in which he informs him that he has been requested by the Grand Trunk Board to submit a report of his opinion as to the most economical mode of constructing a permanent and substantial railway bridge across the St. Lawrence, etc., and was also accompanied by a letter from Mr. Liddell to Mr. McCalmont, dated March 29th, 1856, in which he states that he had complied with the request of the Board as contained in Mr. McCalmont's letter, but that the Board had refused to receive it, excepting from Mr. McCalmont and as a private report made to *him*,—that notwithstanding this, it was, as it appeared, given into the hands of Mr. Stephenson to answer, and this was done by a report from him as well as by reports from Mr. Brunel, Mr. Ross and Mr. Clarke.

This letter of Mr. Liddell to Mr. McCalmont was accompanied by a copy of his original report, and also by his replies to the subsequent reports of Mr. Stephenson, and the other gentlemen mentioned, which were sent to Mr. Liddell privately by Mr. McCalmont.

Mr. Liddell's report and his replies to the other reports are so complete a demonstration of the errors made in adopting the expensive plan which has been carried out, and showed so conclusively that a permanent and substantial structure might be erected across the St. Lawrence for £400,000 sterling, thereby saving £1,000,000, and they contain matters of such general interest in this connection that I shall quote from them extensively; hence I have been somewhat particular in tracing the history of their origin. Any comment upon the manner in which was conducted an inquiry of such importance, involving the question of saving so vast an amount of money, and upon the manner in which the whole subject was finally stifled in "red tape," and laid aside, is unnecessary—at all events foreign to my subject. It simply showed that certain parties understood that they had hold of a golden goose, and that they had the skill to hold it until it was fairly plucked.

(To be continued.)

Vicksburg, Shreveport and Texas Railroad.

This road commences at a point on the Mississippi river, opposite Vicksburg, and extends in an almost perfect air line, through the counties of Madison, Carroll, Ouachita, Union, Jackson, Bienville, Bossier and Caddo, to the Texas boundary, a distance of 190 miles. The route has been definitely fixed. Messrs. FANNIN, GRANT & Co. have the contract for building and equipping that portion of it lying between the Mississippi and Shreveport, 170 miles. At the date of the last annual report of the company, September 26, 1859, the cars were running to Quebec, on the Tensas river, 27 miles; and the contractors were at work laying down the rails, and daily extending the line of road towards Monroe. There were ten or twelve miles of clearing and grubbing, and about 80,000 cubic yards of earth work still to be done to complete the grading of the eastern division; but the work was so far in advance of the track laying as not to delay the progress of the road. A moderate force had also been kept at work in the parish of Caddo, upon the western division, by the contractors, Messrs. W. G. BONNER & Co.

The company had on hand rails, chairs and spikes sufficient to lay seven miles of track; and had purchased 5,250 tons of rails with chairs rolled to match the rails, sufficient to complete the road to Monroe, and lay the track across the parish of Caddo, from Red River to its junction with the Southern Pacific Railroad at the Texas State Line.

A first-class locomotive had been purchased from the Rogers Locomotive Works for this division. The locomotive, together with a portion of the first arrival of iron were to be sent to Shreveport, and the residue to De Soto. It was also intended to bring a portion of subsequent arrivals up the Ouachita river so as to enable the contractors to commence laying track from Monroe east in the spring.

The following is a statement of the amount expended during the year:

For work done and materials furnished, iron, locomotive, etc.	$156,146 83
Engineering	10,349 37
Salaries	7,100 00
Contingent expenses	4,796 71
Commissions	4,077 54
Interest (balance)	4,413 08
Depot grounds and right of way	119 14
Office expenses and printing	1,198 69
Total	$188,201 80

These amounts added to the expenditures previously reported show the entire amount of expenditures from the commencement of operations to the date of the report:

For construction and materials	$920,874 25
Surveying and engineering	80,284 54
Salaries	33,175 51
Commissions	12,866 15
Interest (balance)	21,539 57
Depot grounds and right of way	22,190 24
Law charges	10,690 86
Land grant expenses	3,176 60
Contingent expenses	5,648 38
Office expenses and printing	7,173 70
	$1,117,619 80
Cash assets	102,209 55
	$1,219,829 85

The entire amount received by the company from commencement of operations to date of the report, has been derived from the following sources:

Individual subscriptions	$422,767 07
Less reduction of tax	22,138 30
	$400,628 77
Contractors paid on their subsc'pt'ns.	260,038 67
State of Louisiana on its " .	203,000 00
Parish of Madison " " .	88,029 92
" Caddo " " .	81,781 94
City of Shreveport " " .	17,911 04
Land sold, rent, voluntary subscriptions, etc.	2,783 94
Bonds earned by Bonner & Co.	30,482 82
" " Fannin, Grant & Co.	48,439 91
Cash due to " " " .	40,332 34
Due on bills payable for money borrowed	46,400 00
	$1,219,829 85

The last two items exhibit the local indebtedness of the company, which is less, by $15,477.21, than the aggregate of cash and cash assets on hand. The purchase of iron is not included in this statement, excepting the amount paid in England for iron already shipped, which is included in the expenditures for the past year.

The means for prosecuting the work to completion are:

Individual subscriptions		$341,882 92
Less amount supposed uncollectable.		152,300 00
		$189,582 93
Parish of Madison, payable in cash		11,970 08
" Caddo, " "		18,218 06
City of Shreveport, " "		12,088 96
State subscription, " bonds.		422,000 00
City of Vicksburg, payable in cash, in five equal annual instalments		100,000 00
Subscription of Fannin, Grant & Co.		1,557,575 00
First mortgage bonds	$2,000,000 00	
Less taken by cont'tors.	79,000 00	
		1,921,000 00
About 400,000 acres of land, at $10		4,000,000 00
Cash on hand	$102,209 55	
Less present indebtedness	86,732 34	
		15,477 21
		$8,247,912 24
Add to this the value of 27 miles of furnished road		800,000 00
Work done on unfinished road, materials on hand, including iron paid for		450,000 00
Right of way, depot grounds, etc.		300,000 00
		$9,807,912 24
Against which there will be only—		
Stock subscriptions		$3,300,000 00
Bonds		2,000,000 00
		$5,300,000 00

When the road is finished, the revenue from it

will no doubt be sufficient to pay the bonds, and also fair dividends to the stockholders; and if so, the stock must eventually become very valuable. The report says:

One thing is certain, under the present system of management, there is not the least danger in the world that the road will ever be sold for debt and the stock be lost to the present subscribers. Some of our subscribers have been apprehensive that under conditions of penalties and forfeitures in the contract with Fannin, Grant & Co., that company having possession of the portion of road being built by them, would eventually become the owners of the entire road. If there were ever any just grounds for such apprehensions, they have been entirely removed by a supplemental contract made with them during the past year, to the mutual advantages of all parties; whereby they agree to deliver the road to the stockholders of this company unconditionally on the first day of January, 1864. The time was extended to them to that day, in consideration of the failure upon our part to make the payments and furnish the iron as we had contracted to do, whereby they would have lost the use and revenues of the road for a corresponding time, and which they were entitled to receive as a part of the price for the work done and capital advanced to build the road.

It is in contemplation to have the entire contract printed for distribution among the Stock holders, as the best means to remove the vague and unfounded impressions which prevail here and there in regard to it. We may embrace this opportunity, however, to repeat our entire confidence in the ability, the good faith and integrity of that company. It was a great achievement to secure the services of an association of gentlemen possessed of so much means, and embodying so much practical experience in railroad building.

The office of this company is at Monroe, La. The officers are:

President, C. G. Young.
Treasurer, Jos. F. M'Guire.
Secretary, O. D. Stillman.

Eastern Shore (Md.) Railroad Bill.

The passage, by the Legislature of Maryland, of the Eastern Shore Railroad Bill, which has been before that body for the past 10 years, is a subject of great rejoicing among those who are to be immediately benefitted by the appropriations. The claim of the Eastern Shore Railroad Company was for her portion of the eight millions of dollars appropriated at the December session of 1835. One million of dollars of the whole sum appropriated at that time for the prosecution of works of internal improvement, was allotted to this company, upon condition that the subscriptions to the capital stock of the company, including the subscriptions authorized on the part of the State be adequate to the construction of th road. Only $52,764 of the million dollars appropriated has been spent exclusively upon the Eastern Shore Railroad, or on any other work of internal improvement in that part of the State. When the appropriation was made and the million dollars allotted to the Eastern Shore, the faith of the State was pledged that it should be held sacred, to be applied only to internal improvements for that section.

The bill passed gives vitality to the act of 1835, and provides that the sums thereby appropriated, (making in the aggregate $847,235,) shall be paid in instalments, so that over eight years will be consumed in liquidating it. It further provides for the levying of a tax to meet the appropriation, and that the fund be divided upon the basis of the levy made on assessed property of the different counties of the Eastern Shore for the year 1859. The amount of the appropriation is divided as follows:

To the Maryland and Delaware R. R. Co. (The road runs through the counties of Queen Anne, Caroline and Talbot.)	$140,357
To the Kent County Railroad Company the sum of	$101,531
To the Queen Anne's and Kent Railroad the sum of	110,455
To the Eastern Shore Railroad the further sum of	112,738
To the Worchester R. R. Co. the sum of	99,100
To the Choptank and Mispillion Railroad Company the sum of	13,000
To the Elkton and Sassafras River Railroad Company	58,000
To the Philadelphia and Baltimore Central Railroad Company	25,000
To the Bohemia Bridge Co. the sum of	15,877
To the Columbia and Port Deposite Railroad Company	70,000

Delaware, Lackawanna and Western R. R.

The fiscal year of this company closed December 31, 1859. We have received a copy of the report of the Board of Managers, showing the operations of the road during the year and the condition of the company's affairs at its close. The revenue from the various sources of income was as follows:

From transportation of coal		$1,280,657 52
" " merchandise	305,189 47	
" " passengers	123,844 17	
" " expr'ss fr'ght	5,667 86	
" " mails	9,805 00	
" rents	1,831 08	
" use of locomotives	9,011 35	
" use of cars	12,600 71	
" telegraph, storage, etc.	941 30	
		$1,749,547 96
The expenses during the year were a little less than 40 per cent. of the gross earnings, and amounted to		637,111 66
Net revenue from transp. depart.		$1,062,436 30

The receipts from transportation of coal is chiefly for freight charged on that sent to market by the company. The rate thus charged on their own road is, from Scranton south, 2 cents per gross ton per mile, and from Scranton north, 2 cents per net ton per mile, and on connecting roads, what is actually paid, adding ¼ cent. per ton per mile for the use of cars—this being exclusive of the charge for hauling, when such service is performed on other roads by this company. The expenses include all repairs and other expenditures of every kind, not properly chargeable to the construction of the road—*nothing having been charged to the latter account, except entirely new work.* Neither has there been any charge made against the "Renewal funds." The business of the coal department was as follows:

The value of coal on hand 31st December, 1858, was		$214,686 43
The amount paid for coal mined and purchased, and for other expenses, during the year 1859, was		2,526,451 46
Total		$2,741,137 89
The amount received for coal in 1859 was	$2,422,066 11	
The amount received for rents	3,530 32	
The value of coal on hand 31st December, 1859, was	154,410 90	
		2,580,007 33
Less in coal department		$161,130 50

The quantity sent to market in 1859 was 829,434 14-20 net tons, of which 376,412 10-20 tons were mined by the company, and 453,022 4-20 tons were purchased from other producers. The quantity sold and delivered was 854,655 19-20 tons. The movement of coal in 1859 was 147,770 7-20 tons greater than in 1858.

Income Account.

The balance to the credit of this account on 31st December, 1858, was		$371,863 71
Add net revenue from Transportation Department in 1859	$1,062,436 30	
Add interest on Warren Railroad stock held by the company	17,703 94	
Add interest on L. and Bloomsb. R. R. b'ds, held by the company	3,500 00	
Add income from other sources	3,565 00	
Total		$1,087,205 24
Deduct—		
Loss on coal,	$161,130.46	
Insurance & bad debts,	3,522.43	
Bal. of general int'st account	9,257.94	
		173,910 93
Net earnings for 1859		$913 294 31
Dr.—Interest and rent		586,128 77
Earnings over and above all expenses and interest on debt		$327,165 54
Less amount credited to renewal fund	100,000 00	
		227,165 54
Balance to the credit of income account December 31, 1859		$598,529 35

The amount expended during the year for unsettled right of way, and for new work and equipment necessary to accommodate the increased business of the road was $122,586 01
The amount previously expended was 8,831,707 84

$8,954,293 85

The equipment of the road consists of 71 locomotives; 17 passenger cars, 5 baggage and express cars, 369 freight cars, 3,310 coal cars, and 24 other cars—being an increase since 1857, of 2 locomotives and 544 coal cars. The amount expended the past year for equipment has been $64,360 31.

There has also been completed five miles of double track, and several miles of switches and turn-outs.

The cost of the Warren Railroad to December 31st, 1858, was	$1,541,763 65
Expended in 1859	54,821 84
	$1,596,585 49

For the payments thus made. this company receives an equal amount of the capital stock of the Warren Railroad Company.

The renewal fund now amounts to $410,114 29. The sinking fund established in 1857, now amounts to $125,583 89,—with which $166,128 29 of bonds have been retired. In April next a similar fund is to be commenced, to provide for the payment of the Eastern Extension first mortgage bonds of 1875.

The whole amount of capital stock paid in was $3,360,250.

The road-bed and superstructure is represented to be in very good condition; and the rolling

stock requires the expenditure of only a few thousand dollars to put it in as good order as it was at the commencement of the year.

FINANCIAL STATEMENT, DEC. 31, 1859.

Mortgage bonds issued as follows:

Of 1871		$900,000 00
Of 1875		1,500,000 00
Of 1881		2,600,000 00
		$5,000,000 00
Less amount in Sinking Fund, (face of b'ds cancelled, Coupons collectible on acc't of fund)	$42,000 00	
Less amount retired (b'ds and coupons entirely cancelled	1,000 00	
		43,000 00
		$4,957,000 00
Income bonds, issued as follows (including certificates and stamped coupons):		
Of 1862	$525,687 50	
Of 1865	29,000 00	
Of 1867	764,841 02	
	$1,319,528 52	
Less amount in Sink'g fund (face of bonds cancelled)	124,128 52	
		1,195,400 00
Total amount of funded debt		$6,152,400 00
Bills payable, outstanding		175,882 89
Accounts payable		340,269 15
Total indebtedness		$6,668,552 04

AVAILABLE ASSETS.

Cash on hand, Dec. 31, 1859	$41,225 91	
Bills receivable	283,584 94	
Accounts receivable	205,501 08	
M'tgage and Income b'ds on hand	130,930 00	
Coal on hand	154,410 90	
		815,652 84
Total indebtedness, less available assets		$5,852,899 21
There was also on hand:		
Stock of Lackawanna and Bloomsburg R. R. Co.		$132,450 00
Stock of Washington Mills (taken for debt)		9,500 00
Also materials for operating the road and mines		200,649 12
The amount of outstanding debt on Dec. 1, 1857, (the date of the settlement under the plan of resuscitation,) was, after deducting the available assets then on hand		$6,351,911 91
The balance of indebtedness on Dec. 31, 1859, (as above,) was		5,852,899 21
Decrease of debt		$499,012 41

There were expended for construction in 1858 and 1859, $226,440.23—making expended in two years for reduction of debt and construction, $807,526.65. The report concludes as follows:

In view of the circumstances under which the Income bonds of the company were issued, (about half a million of which were due in less than three years,) the Board did not deem it just to the holders of them to make a division of the profits accrued since the resuscitation of the company. These profits have chiefly been used in reducing the debt, as above shown—a portion, also, having been appropriated toward providing such additional facilities as were imperatively required to do the increased business. The experience of the company for the past two years, when coal has ranged at such low prices, has demonstrated that the only safe policy is to move large quantities. Therefore, in continuation of this policy, it has been decided to move the present year one million of tons; to do which, it was necessary to procure six new engines and 600 coal cars—the road and rolling stock of the Southern Division having been worked to its utmost during the year just closed. Provision has been made for all of these, and they will be ready for use at an early day. A number of the switches and turn-outs will be further lengthened at the opening of spring. These additional facilities for enlarging the business of the company, it is estimated, will require an outlay of about 200,000, which can be met without difficulty from the available assets on hand, which have been allowed to accumulate with this expenditure in view.

The officers for 1860 are:

President, C. R. ROBERTS.

Vice President, R. R. GRAVES.

Secretary and *Treasurer*, A. J. ODELL.

Alleghany Valley Railroad.

The earnings of this road for the fiscal year ending February 1, 1860, were:

From passengers		$52,654 32
" freight		31,310 60
" mails		3,150 00
Total		$87,114 92
The expenses were:		
Operating road, maintaining roadway and equipments	$33,582 02	
Repairing bridges	6,555 90	
Inclined plane	459 45	
Rebuilding passenger car	213 61	
Extension of road to canal,	7,067 68	
		47,878 66
		$39,236 26
Interest on sinking fund	$15,231 00	
Other disbursements	22,669 09	
		37,900 09
Balance		$1,336 17

A comparison of the earnings with those of the previous year shows an increase of $12,197 97, or nearly 16 per cent.; while the expenses, exclusive of extraordinary repairs and work on extension of the road to the canal, have been somewhat less.

The floating debt Febr'y 1, 1859 was	$47,857 21
Same debt now due	36,089 61
A decrease of	$11,767 60
The amount due on the line of the road Feb'y 1, 1859, was	$10,957 20
Amount of same due now	10,237 60
A decrease of	$719 60
Coupons due Feb. 1, 1859	$2,275 00
" " Feb. 1, 1860	12,880 00
An increase of	$10,605 00

There were carried during the year 58,056 passenger; 13,025 tons merchandise, and 33,176 tons coal—aggregate 46,204 tons—being an increase over 1858 of 14,836 tons.

The bonded debt of this company is $400,000, being 400 bonds of $1,000 each, secured by mortgage on 54 miles of road, rolling stock, depots, etc. These bonds are dated July, 1855, payable in 20 years, interest 7 per cent. coupons made payable in New York 1st Jan. and 1st July.

The present terminus of the road is at Kittanning, 44 miles northeast from Pittsburg. Its extension to the mouth of the Mahoning, a distance of 10 miles, would add very largely to its business, without materially increasing the operating expenses. Its further extension to a junction with the Sunbury and Erie road would furnish a very direct route to New York.

The amount of capital stock authorized by the charter is $2,000,000—which was subsequently increased to $3,000,000. The amount subscribed is as follows:

By corporations	$1,693,000
" individuals	380,000
	$2,073,000

The amount of stock actually paid is:

By corporations	$1,300,000
" individuals	360,000
	1,660,000
Leaving due on subscriptions	$413,000

The total cost of road was $1,700,000; of equipment $65,300.

The equipment consists of 4 locomotives; 6 passenger, 22 freight and baggage, and 75 coal cars.

The office of the company is at Pittsburg, Pa. The officers for 1860, are:

President—FELIX R. BRUNOT.

Secretary and Treasurer—JAMES GIBSON.

Superintendent—R. L. MORLEY.

Southern Pacific Railroad of Texas.

The following abstract of a letter received by Calvin Bradley, Esq., of Cincinnati, from R. V. Richardson, Esq., of New Orleans, dated Feb. 22, 1860, gives an authentic and concise statement of the condition of this great work, so far as its charter, land grant and municipal privileges are concerned:

An act was passed, and approved by Gov. Houston on the 8th of February, by the first section of which our company are empowered and authorized to construct and operate an extension of the main stem of our road in the direction of Shreveport, a distance of not exceeding seven miles, so as to connect with any road extending from the Mississippi river.

The loan of six thousand dollars per mile, and the grant of sixteen sections of the land per mile, are given to this extension, by the second section.

The extension is procured with a view of connecting with the Vicksburg and Shreveport Railroad.

By these two sections of the act, the company will receive forty-two thousand dollars, and seventy-one thousand six hundred and eighty acres of land, in addition to former provisions.

Section third provides for a union with the Memphis, El Paso and Pacific Railroad Company upon terms mutually to be agreed upon; the construction of but one road, from the point of union to El Paso, under the name of either company; the union of the stock; and one reservation of land under the charters of the two companies, at the rate of sixteen sections of land per mile.

A bill was passed to repeal the seventeenth section of an act, passed the 7th day of February, 1854. It will be remembered that this seventeenth section gave the power to the Legislature to make provisions by law for repayment to any railroad company of the amount expended in the construction of their road, fixtures, cars, engines, and for chattels and real property then in use; and for all repairs, and interest at the rate of twelve per cent. per annum, after deducting therefrom all tolls, freight, passage money, and all moneys received from the sales of lands donated by the State, with twelve per cent. upon all such sums; then the road with all its fixtures and appurtenances, and all lands donated by the State remaining unsold, to vest in and revert to the State.

The third section of the act, passed 30th Jan'y, 1854, was amended so as to authorize railroad companies to survey their lands in block, and of two sections in size, instead of blocks of thirty-six sections, as formerly provided.

A general amendatory railroad law was passed, providing for the right of way through private property, town and cities, and containing other provisions not essential to be mentioned, except

one section, which possessed a peculiar interest. It saves to all the roads their chartered rights and property, to the extent of road completed, after they may have done anything that works a forfeiture of charter.

After a full and thorough investigation by Governor Houston, he was satisfied that our company had fully complied with the charter and the general laws of the State; and accordingly, on the 7th February, 1860, he issued the Executive mandate to the Commissioner of the General Land Office, instructing him to issue to the company, patents for sixteen sections of land per mile, for twenty-five miles of completed road, amounting to 256,000 acres.

I have a copy of this mandate, with the written opinion endorsed thereon, that the Commissioner will take up the surveys of the Company, for the purpose of issuing patents thereon, as soon as they are reached in order.

I may sum up this report in a few words.

Texas has done all we urged, and will do in the future, as we shall merit. Every department of her government has passed in review the acts of of our company, and all have sustained us. We have only to do our duty, to merit favors at her hands.

Finances of Louisiana.

The following is a statement of the condition of the Treasury and its operations during the year ending December 31, 1859:

Balance in the Treasury 1st January, 1860	$1,275,155 07
Received from all sources, from the 1st of January to the 31st of December, 1859	2,538,901 10
	$3,814,056 17
Paid out during the same period	2,613,730 56
Balance in the Treasury	$1,200,325 71

*Bal. charged to State Treas., Nov. 30, 1856.	163,573 36	.....
Total	$900,396 99	$900,396 00

* To this amount add $3 86 for outstanding warrants, which will make $161,577.22, the amount in the hands of the State Treasurer, Nov. 30, 1859.

Hog Trade of the West.

The Cincinnati *Price Current* presents its usual full and reliable statement of pork packing in the Western States. We take from it the following

RECAPITULATION.

	1858-59.	1859-60.
Ohio	638,397	680,858
Indiana	412,289	404,046
Illinois	591,380	504,935
Kentucky	396 117	822,487
Missouri	163,774	190,260
Iowa	163,974	166,935
Wisconsin	33,932	54,500
Tennessee	65,172	26,800
Grand totals	2,465,035	2,350,822
Decrease	114,213	

The decrease is equal to 4⅝ per cent.

Now, then, having given the details, we find the following result:

	Hogs.
Decrease in No., 4⅝ per cent. equal to	114,213
Decrease in weight, 11-16th of 1 per cent. equal to	16,946
Total decrease	131,159

This is equal to 5⅜ per cent. less than the crop last year, 1⅞ per cent. less than the crop of 1857-8, but 16⅝ per cent. greater than the crop of 1856-7. We expected to have been able to give the entire shipments to the East by the different channels, but have failed to obtain the receipts at Buffalo, and the shipments from Wheeling and Moundville over the Baltimore and Ohio Railroad. Otherwise we have the whole number of hogs shipped this season and last, from October 1 to February 1, as follows:

	1858-9.	1859-60.
From Dunkirk via New York and Erie Railroad	88,725	67,043
From Pittsburg via C. Pa. R. R.	92,250	61,608
From Detroit, via Great Western Railway	81,755	66,820
From Parkersburg via Baltimore and Ohio Railroad	14,390	18 668
Total	277,120	214,037
Decrease	63,083	

Journal of Railroad Law.

DELIVERY OF BAGGAGE, LIABILITY OF COMPANY FOR, WHEN DESTROYED BY FIRE IN THE DEPOT.

The case of Cary *versus* Cleveland and Toledo Railroad, recently decided in the Supreme Court of New York, reviews the law of the liability of companies for baggage not immediately taken by its owner on its arrival to its place of destination, but left by him a *reasonable* length of time in charge of the company. It appears that on the 12th of February, 1856, the plaintiff's assignor bought of the defendant at Toledo a passage ticket for Buffalo over their roads, and delivered her baggage to the baggage agents of the defendant, who gave her a check entitling her to receive it at Buffalo. The cars did not arrive at Buffalo until late at night on the 13th of February, having been detained by storms and obstructions, and then, the train in which she was a passenger, arrived at the same time with two other trains that had been detained by the same obstructions. Consequent upon this there was an unusual crowd of passengers and accumulation of baggage at the station. The car in which the plaintiff's assignor was, remained outside of the car-house when the baggage was delivered. The plaintiff's assignor, being a female and traveling alone, did not claim her baggage that night, but went immediately to her hotel. On calling for it the next morning, it could not be found. The car-house and a large quantity of baggage was destroyed by fire during the night, and the evidence justified the conclusion that the trunk, the value of which, with its contents, was claimed in this action, was among the baggage destroyed.

At the trial the case was decided in favor of the plaintiff, from which the defendant appealed upon exceptions to the charge of the judge. We transfer to our columns the opinion of the General Term of the Court deciding the appeal, so far as it relates to the point under consideration.

W. F. ALLEN, J.—The relative rights of passengers and railroad companies in regard to the delivery of the luggage at the end of the passage, and the liabilities of the companies in respect to it and the time when their responsibility as carriers cease, has not been much discussed, so far as adjudged cases have come under my notice. The duties which the proprietors of railroads owe to their passengers, in respect to their baggage, are not in all respects analogous to the duties resulting from the ordinary contract for the carriage of merchandise, or from the liabilities of a common carrier of merchandise. Still the rules which govern that class of bailments furnish, in most cases, the rules by which rights and liabilities of passengers and railroad proprietors may be determined.

If the rule is, that the liability of the carrier of persons and their baggage, as a carrier of the baggage, ceases at the instant of its arrival at the terminus at which it is to be delivered, or as soon as

it can be claimed by, and delivered to, the owner, then the charge of the judge was erroneous in the case before us.

The fair import of the charge was that the passenger was not bound at once to demand his baggage, but that he had a reasonable time within which to make the demand, and that the liability of the road, as carriers, continued until such reasonable time had elapsed; and that such reasonable time was to be determined from all the circumstances of each case. That if the baggage was left beyond an unreasonable time, the character of the bailment changed, and the proprietors of the road were liable as warehousemen simply, to be charged only for want of ordinary care. In Thomas *vs.* The Boston and Providence Railroad Company, it was held that the proprietors of a railroad who transport goods over their road for hire, and deposit them in their warehouse, without additional charge, until the owner or consignee has a reasonable time to take them away, are not liable, as common carriers, for the loss of the goods by fire, without any negligence or default on their part after the goods are unladen from the cars, and placed in the warehouse, but are liable as warehousemen only; although the owner or consignee has no opportunity to take the goods away before the fire.

Chief Justice Shaw says that the contract is, "that they will carry the goods safely to the place of destination, and there discharge them on the platform, and then and there deliver them to the consignee or party entitled to receive them, if he is there ready to take them forthwith; or if the consignee is not there, ready to take them, then to place them securely and keep them safely a reasonable time, ready to be delivered when called for." This we consider to be one entire contract for hire, although there is no separate charge for storage; yet the freight to be paid, fixed by the company as a compensation for the whole service, is paid as well for the temporary storage as for the carriage. From this view of the duty and implied contract of the carriers by railroad, we think there result two distinct liabilities: first, that of common carriers, and afterwards that of keepers for hire, or warehouse keepers; the obligations of each of which is regulated by law. Upon the assumption that the defendant was liable as a contractor to carry Miss Bedell and her trunk to Buffalo, and there to deliver to her the trunk, the argument of Chief Justice Shaw sustains the charge of the Court upon the trial of this action, to the effect that on proving neglect of the Buffalo and State Line road as warehouse keepers, the defendants would be liable.

There was but one contract, one hiring and one consideration paid for the carriage and storage of the baggage; the contract for storing, resulting from and being an incident to the main contract for carriage. It follows that the party liable upon the main and express contract is liable upon the incidents and implied contract, and the Buffalo and State Line road, in the storage as in the carriage of the trunks, must be deemed the agent of the defendants, performing its contract.

It would be unbecoming in me to review the decision of the very able court, and the argument of the very learned judge by whom the opinion in the case cited was delivered But it is open to the remark that it is highly favorable to carriers of merchandise by railroad, and much more favorable than the rule which, in analogous cases, has been applied to carriers by water or in any other way. It would hold the consignees to a constant watch at the railroad freight depots lest their goods might arrive and be stored in the warehouse of the company before they had knowledge of their arrival, and that without insurance or the responsibility of the carriers, except in the limited capacity of warehouse keepers. In the same case it is intimated that railroad companies are not required to give notice to consignees of the arrival of their goods.
